VALUABLE FARM POR SALE. In consequence of poor health the subscriber has concluded to offer his Farm for sale. Said farm is located in Kingston Township, Luterns County, within four miles of the Wyoming Depot, with good roads and down grade to market. The Farm contains about 170 series, one hundred and fifteen under good improvement. The soil is good and well adapted to either grass or grais, and being well watered, would make one of the finest grazing farms in the county. The buildings are Two Dwelling Houses, one large Hay and Grain Barn, one Cow Barn for Stabling Cattle, Carriage House and Stable, and large House. ONE ORCHARD. It is also well fenced, having, several hundred rods of stone well upon it; is centrally located—two roads crossing at right angles near the buildings. There is also a Church and School House on the premises, and until recently a Post Office was kept at the place for sixteen years. It is say at the Bart Market in the State.

It is altogether a desirable property, and persons having money to invest in real eatate would do well to call on the subscriber and view the premises. Any one desiring further information can call on or address the Rditor of the Pittson Gazette, or RUFUS CARVER,

To the farmers of Pennsylvania, New Jersey, Delaware, and Maryland, Baugh's Baw Bone Phosphate is not a new name. Its great efficiency as a Fertilizer, for all crops, has been for years past practically denoted by them in its continued use. We want no better assurance of the high appreciation in which it is held by Agricultarists than the fact of so constant an increase in the demand, from year to year, as our article has enjoyed, and it has been our main object to render it, in every respect, worthy of such a favorable estimation. 274 S. ces of the periodic discharge, whether arising from relaxation or suppression. They act like a charm in removing the pains that accompany difficult or immediaate menstruation, and are the only asfe and reliable remedy for Flushes, Sick. Headache, Pains in the Loins.
Back and Sides, Palpitation of the Heart, Nervous Tremors, Hysterics, Spasms, Broken Sleep, and other unpleasant and dangerous effects of an unnatural condition of the sexual functions. In the worst case of Finor Albus or Whites, they effect a speedy cure.

Dr. Cheeseman's Fermale Pills
have been used OVER A QUARTER OF A CENTURY.
They are offered as the only safe means of renewing interrupted menstruation, but ladies must bear in mind
that there is one condition of the female system in
which the Pills cannot be taken without producing a
PECULIAR RESULT. The condition releared to is
PREGNANCY—the result, MISCARRIAGE. Such is
the irresistible tendency of the medicine to restore the
sexual functions to a normal condition, that even the
reproductive power of nature cannot resist it. THEY
CANNOT DO HARM in any other way.

Schenck's Palmonic Syrup is one of the best preparations of iron in use, it is a powerful tonic in itself, and when the Senweed Tonic dissolves the mucus in the stomach, and it is carried off by the aid of the Mandrake Pills, the Pulmonic Syrup is made into blood. This is the only way to cure consumption. If I cannot get a good appetite, and food does not digest. I cannot cure the patient. Never mind the cough; remove the cause and it will stop of itself. This is the most trouble I have with my patients at my rooms. F. S. HAESELER, WHOLESALE AND RETAIL DEALER IN TOBACCO, SNUFF, CIGARS, PIPES, &c., CENTRE STREET, POTTSVILLE, Nearly Opposite the Mortimer House,

THE peculiar taint or infection which we call Scrofely lurks in the constitutions of multitudes of men. It either produces or is produced by an en-feebled, vitiated state of the blood, wherein that fluid becomes incompetent to sustain the vital forces in their vigorous action, and leaves the system to fall into disorder and decay. The scrofulous contamination is vacaused by mercurial disease, low

living, disordered digestion from unhealthy food, impure air, filth and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending. "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children." The diseases it originates take various names, according to the organs it attacks. In the lungs, Scrofula produces tubercles, and finally Consumption; in the glands, swellings which suppurate and become ulcerous sores; in the stomach and boyels, derangements which produce indigestion, dyspepsia, and liver complaints; on the skin, eruptive and cutaneous affections.
These, all having the same origin, require the same remedy, viz., purification and invigora-tion of the blood. Purify the blood, and these dangerous distempers leave you. With feeble, foul, or corrupted blood, you canno have health; with that "life of the flesh" healthy, you cannot have scrofulous disease.

Ayer's Sarsaparilla is compounded from the most effectual antidotes that medical science has discovered for this afflicting distemper, and for the cure of the disorders it entails. That it is far superior to any other remedy yet devised, is known by all who have given it a trial. That it does combine virtues truly extraordinary in their effect upon this class of complaints, is indisputably proven by the great multitude of publicly known and remarkable cures it nas made of the following diseases: King's Evil. or Glandular Swellings, Tumors, Eruptions, Pimples, Blotches and Sores. Erysipelas, Rose or St. Anthony's Fire. Salt Rheum, Scald Head, Coughs from tuberculous deposits in the lungs, White. Swellings, Debility, Dropsy, Neuralgia, Dyspepsia or Indigestion, Syphilis and Syphilitic Infections, Mercurial Diseases, Female Weaknesses, and, indeed, the whole series of complaints that arise from impurity of the blood. Minute reports of individua cases may be found in Aver's American ALMANAC, which is furnished to the druggists for gratuitous distribution, wherein may be learned the directions for its use, and some of the remarkable cures which it has made when all other remedies had failed to afford relief. Those cases are purposely taken from all sections of the country, in order that every reader may have access to some one who can speak to him of its benefits from personal experience. Scrofula depresses the vital energies, and thus leaves its victims far more subject to disease and its fatal results than are healthy constitutions. Hence it tends to shorten, and does greatly shorten, the average duration of human life. The vast importance of these considerations has led us to spend years in perfecting a remedy which is adequate to its cure. This we now

SARSAPARILLA, although it is composed of ingredients, some of which exceed the best of SarsaparMa in alterative power. By its aid you may protect yourself from the suffering and danger of these disorders. Purge out the foul corruptions that rot and fester in the blood, purge out the causes of disease, and vigorous health will follow. By its peculiar virtues this remedy stimulates the vital functions, and thus expels the distempers which lurk within the system or burst out on any part of it. We know the public have been deceived promised much and did nothing; but they will neither be deceived nor disappointed in dant trial, and there remains no question of its surpassing excellence for the cure of the afflicting diseases it is intended to reach. From the American Agriculturist. NOTES AND SUCCESTIONS FOR FEBRUARY. ADVERTISEMENTS are profitable reading. They usually indicate what progress the world is making. To farmers they are invaluable. Notes on tools, seeds, stock, trees, plants, etc., should be made, and further information gained by sending for circulars of trustworthy parties.

Ashes, fresh from the fire, should not be emptied into wooden smoke-houses. A few smouldering sparks may be sufficient to fire the structure, destroy its contents, and cause great loss; at least the lower part should be brick or stone.

Apples.-Sort over those commencing to lecay, and feed, if no better use can be made

BAGS, BARRELS, BASKETS, etc., used for narketing, or kept at home, should be plainmarked with the owner's name and resilence. A branding-iron or marking-plate and brush, will save much loss. Improve. leisure by putting all in repair.

Buildings.—Clear roofs from too heavy snow, stop leaks, keep eaves-troughs free. paint where needed, fasten loose boards, keep manure away from sills, oil rusty hinges, see that fastenings are in order, and all repairs promptly made. Get out timber for sheds sufficient to shelter all stock. Study economy aud convenience in plans.

Binds.—Prepare neat houses for martina, duebirds, and wrens, to be put up about the house, fruit yard, and farm. The occupants next seasen will pay good rent by detroying multitudes of insects, and sing grate-

Dears contracted before the war can now e paid at half price; that is, owing to high prices half the produce required then will suffice now. Lift mortgages rather than buy carriages or other non-essentials. A pinching ime will come.

Dogs.-Unite with your neighbors in urging your representatives at the Legislature o protect sheep raising from the ravages of destructive curs, by strong laws.

FARMERS' CLUBS .- The meetings may be made interesting by committees appointed to investigate and report on various subjects; as new crops proposed, new implements, the condition of farms in the vicinity, etc.; by correspondence with other similar associations, and occasional joint meetings of the offer to the public under the name of Ayen's | clubs of a township. New facts and experience worthy of general notice, should be communicated to the public journals.

Food for cattle and hogs will be improved and economised by steaming. A good apparatus, especially for this purpose, will. pay where many animals are kept. A large kettle will do,

GRAIN.-Carefully study price lists, and improve good weather for marketing produce.

Horses.—A few carrets with their grain will aid digestion and appetite, and improve this. Its virtues have been proven by abun- their coats. Exercise daily. readily called in under any emergency, in addition to furnishing strength for crushing the rebellion and securing permanent peace and MAPLE SUGAR.—The high price of sugar should stimulate the largest possible produc-tion. The first flow of sap is the richest; make preparation to secure it during the open

weather, which often occurs in February. Roors.—Sort over, remove decayed ones to be cooked and fed immediately, and keep a supply of the soundest for breeding animals, or those failing in appetite, as spring approaches. No decayed turnings, rutabagas, or cabbages should be fed to milch cows, or bad flavor will be imparted to the milk. BUTTER brings golden prices; make the

Keep well sheltered. Wheat flour boiled in milk checks scours. TOOLS AND IMPLEMENTS.—Have all in repair and readiness for spring work. In the end, buying is cheaper than borrowing. Consult advertisements, send for catlogues and circulars for information about new implements, and always get the best.

Wood.-Save many late dinners, and much needless scolding, and annoyance in the household, by having a year's stock cut and stored under cover. Sheep.-Exercise and fresh air are essential to their health. Shelters must be well ventilated, not crowded, and the sheep turned out daily, except in severe storms. Roots, fed with grain, will be returned in wool and mutton. Pregnant ewes should have little if any grain, but roots with hay. Those yeaning early will need separate, clean, not over-littered apartments, and careful attention, that the lambs be not fatally chilled.

## Recipes.

UNBOLTED WHEAT BREAD. -Mix one quart of warm water, a teaspoonful of salt, with fine wheat flour enough to make a thin batter. Let this stand uncovered over night. The next morning stir in half a teaspoonful of mo-lasses, a tablespoonful of salt, and mix with unbolted flour into a dough stiff enough to unbouted hour into a dough stiff enough to knead without sticking to the pan. Let it rise moderately, mold it over, place it in a greased pan, and when entirely light, bake it about three quarters of an hour in a moderately hot over.

Pickling for Hams or Beer .- For each 100 lbs. of meat, take 7 lbs. coarse salt, 5 lbs. brown sugar, 2 ounces saltpetre, 1 ounce And many other articles, just as you wish to have them. There is also to be had.

Dried Fruit.

Applex Cherries Raisins, Peaches Plums, Grapes, &c., which they will sell at the lowest prices. Also, which they will sell at the lowest prices. BAKED CARROTS are mi when boiled. A Hubbard squash when baked preserves its peculiar aroma and sweetness much better than when boiled. In northern latitudes it does very well as a substitute for sweet potatoes:

To Cunt. HAIR. Rub it with the beaten yolk of an egg, then wash off with clean water, and put on a little pomatum.

GREASING DISHES, griddels, etc., for cooking is done most easily with a swab made by winding a strip of clean cotton cloth on the end of a stick, and fastening it with twine. To CLEAN BOTTLES:-Partly fill the bottle

with the soap suds, drop in one or two dozen tacks, or some small nails, and shake them up briskly. SHOE STRING TAGS are apt to come off speedily. A blow or to with a hammer to bring the sides together will keep them in
