REDUCTION IN NAVAL EXPENSE CONTEMPLAran. It is proposed by the Naval Departnent to retire about one-half of our vessels, and use 25,000 of our seamen-one half of the total number in service for service upon land. There is no use now in having so many vessels in service, and by this measure Mr. Welles will reduce the expenses of his department very much.

EUROPEAN SYMPATHY WITH REBELLION DIS so our. - Letters recently received in Washington from prominent Americans in London and Paris, state that all sympathy with re bellion is rapidly dying out and that the cause of the South is now considered by trading Europeans as perfectly hopeless. Diplomats also remark that despatches from England and France are becoming exceedingly

friendly towards the United States. Mar. McCirinopar has been confirmed as Secretary of the Treasury, and has entered upon the duties of the office. Senator Har-LAN of Iowa, has been nominated and confirmed as Secretary of the Interior, but will not enter upon his duries before the 1st of May, at which time Judge Usifer's resignation will take effect. Hos. Freeman Clarke, of New-York, has also been nominated and confirmed as Camptroller of the Treasury. . . ----

A new plan for delivering coal to retail customers, has been adopted in Philadelphia. The coal, care ully screened, is placed in Equare iron boxes, each holding about seventyfive pounds. Those, to the required number, are placed in appropriately 'ousire cted wagons, and the boxes being delivered over the open sides of the vehicle are conveyed directly to the bin without dust or dirt either in the street or within doors. It would seem an excellent plan.

City Point, March 11, 1865.—William T. Griffin, a deserter within our lines and a bounty-jumper, was executed by shooting, articity Point, yesterday. He had formerly belonged to a New-York battery, and subsequently to the 8th Delawar-rer ment, from which he deserted a short time ago. Beturning to City Point soon after, as an unassigned substitute, having pocketed a large bounty, he was recognized by an officer of the 3th Delaware, and arrested.

After the reading of his sentence on the occathe 3th Delaware, and arrested.

After the reading of his sentence on the occasion of his execution he made a few remarks, stating that he was "in for it, and that it could not now be helped." He said that he was not yet twenty-one years of age; that \$80,000 was coming to him from his grand-father on his arrival at that age, and that he had offered the government this sum for his release, but had not been successful. He closed by mockingly saving that he died for his country.

He died "game," as the saving is, declining to have his eyes bandaged, and sitting cooly on his coffin facing the fire of the squad detailed to care ry into effect the execution. He was shot through and through, and died instantly, falling back into his coffiin, which was open behind him.

WE call the attention of our readers to an advertisement of ARRANDALE & Co., European Jewelers' Agents, of New York. The British Whig, of Kingston, C. W., says of them, Nov. 24, 1864: them, Nov. 24, 1864:
A short time since an advertisement of Arrandale & Co., 167 Broadway, New York, appeared in the columns of this paper, headed . Great Gift Distribution. by which the public were informed that a large quantity of Gold and Silver Watches and Ornaments were to be disposed of by Lot.—the total cost being only \$1, and a prize in return valued from \$3. to \$50; also holding out great advantages to agents. A lady subscriber to the British Whig became an agent, and by request brought some twenty articles sent as prizes for her agency, to this office for inspection, and without hesitation we can state that each and all of the articles were worth treble the mount of cost to the rectorians, and some eix times, The New York Albion wrote as follows:

The New York Albion wrote as follows:

We have just inspected, at the office of Arrandale & Co.; a Agency for European Manufacturing Jewelers, a Jarge assortment of fashionable and valuable jewelry, consisting of gold and silver watches, chains, bracelets, nidice's ests, riligs, &c., all of the new and most fashionable patterns. We also notice a large quantity of silver plate, consisting of goblets and drinking cups, ernet stands, fruit baskets, spoons, forks, &c. We understand that the whole of these newly imported articles are to be disposed of on a novel principle, giving great, advantages to buyers, and affording extensive employment to agents. Our readers will find all particulars in our advertising columns; and we know the firm in question to be very respectable, and thoroughly worthy of public confidence. How BEN BUTLER GOT RICH.—After Boutwell

How Ben Butles out Rior.—After Boutwell had convicted Brooks on the floor of the House of a deliberate shader and libel upon Gen. Butler in the matter of the Smith gold-seizure, and after he had appealed to him in vain to retract his charges the calmuniator, from the shelter of, his parliamentary privileges, flung at the soldier a dirty, insinuation—that when the war broke out he was an ordinary attorney, in a little town in little Massachusetts, with a small practice, who never came to New Yock, and never argued causes in the Srpreme Court of the United States in Washington, and vet who had got rich since the war began, and, therefore, must have stolen!

For present refutation of this and similar calumnies. I will say from my positive knowledge that for five years preceding the war Gen. Butler's income from his law practice in Boston and Lowell amounted to \$20,000 a year—that he has been one of the foremost, and most successful lawyers in Massachusetts for twenty-three years—that when he started with his command for Baltimore he left the trial of a cause half finished, and was on that day worth \$120,000 of invested property, the accumulations of a life of Jabor—that he planned the purchase of the bankrupt Lawrence mill property, organized a company to stock and run the mills, put \$20,000 into the enterprise, and directed its operations with such success that the 100 par value of the subscribed stock has risen to \$50, and the dividends to the shareholders for three years have been 50 per cent. a year—that he is to-day, liberal and handsome liver as he has ever been, worth \$20,000—and that every dollar of the property has been honorably and justly carned—and that his account books, models of business exactitude and method, will give the history of every dollar of the property has been honorably and justly carned—and that his account books models of business exactitude and method, will give the history of every dollar of the foremost.

Its Symptoms, Cause and Cure. Its Symptoms, Cause and Cure.

THIS has received its name from a constant nansea or sickness at the stomach, which attends the pain in the head. This headache is apt to begin in the morning on waking from a deep sleep, and when some irregularity of diet has been tonmitted on the day before, or sometimes for several days previous. At first there is a distressingly oppiessive feeling in the head, which gradually merges into a severe heavy pain in the temples, frequently attended by a sense of fullness and tenderness in one eye. and extending across the forehead. There is a clammy, unpleasant taste in the mouth, an offensive breath, and the tongue covered with a yellowish white fur. The sufferer desires to be alone in a dark room. As soon as the patient feels the fulness in the head and pain in the temples, take a large dose of Schenck's Mandrake Pills, and in an hour or two they will feel as well as ever. This has been tried by thourands, and is always sure to cure, and instead of the sick headache coming on every week or ten days, they will not be troubled with it once in three months.

months,
Schenck's Mandrake Pills are composed of a number of roots besides Podophinin, or concentrated Mandrake, all of which tend to relax the secretions of the liver, and act more prompt than blue pills or mercury, without leaving any dangerous effects. In a bilious person they will show themselves by the stody. They will sapel worms, nucus, bile and all morbid matter from the system. In sick headache, if they are taken as directed above. (a full dose as soon as they feel the first symptoms of it) Dr. Schenck will and has directed his agents to return the money if they do not give perfect satisfaction. Don't forget the name—Schenck's Mandrake Pills.

HAWLEY'S SOLIDIFIED DENTAL CREAM. For Gleansing, Whitening and Preserving

THE TETH!

This article is prepared with the greatest care upon scientific principles, and warranged not to contain anything in the slightest degree deleterious to the teeth or gums. Some of our, most eminent Dental Surgeons have given their sanction to, and cheerfully recommend it as a preparation of superior qualities for cleansing, whitening and preserving the teeth. It cleans them readily, rendering them beautifully white and pearly, without the slightest injury to the enamed.—It is healing to the gmms where they are ulcerated and sore. It is also an excellent disfrictor for old decayed teeth, which are exceedingly offensive. It gives a rich and creamy taste to the month, cleansing it thoroughly, and imparting a delightful fragrance to the breath.

Prepared only by A. HAWLES & CO., N. W. Cor. 10th and Lembard sts., PHILADA, and sold by all Druggists. Price 25 cents.

TESTIMONIALS.—The following opinion of Dr. White, as to the high esteem in which he holds the Dental Cream, must be sufficient evidence of its value: to quote other testimonials in detail is needless, contenting ourselves by simply giving the names and addresses of persons who speak of its excellence for the teeth:

PRILADELIFIER, April 18th, 1863.

Having carefully examined A. Hawley's "Solidified Dental Cream," I hereby cheerfully recommond it to the public generally. It is an excellent preparation for cleansing and preserving the teeth, and can be used by all persons with the utmost confidence, as its properties are perfectly harmless. Besides preserving the teeth, it promotes a healthy action to the gums, and imparts a pleasantness to the breath.

On Thursday evening gold was quoted at 1671.

There will be no more three-cent currency issued, as a new coin of that denomination is to ake its place.

EFERCT OF THE STEADY SUCCESS OF THE NION ARMIES .- A money writer in the hiladelphia Ledger of Thursday, thus comments on the tumble in the price in gold. with its attendent consequences: with its attendent consequences:

The fall in gold is fast taking the bottom out of things. At New York there is an active demand for money and a heavy decline in almost all prices. The dry goods auctions, day before yesterday, showed a decline in domestics of from ten to afficen per cent. After gold sold below 185 there was scarcely, anything done. The markets seemed perfectly paralysed. The heavy receipts of produce since the railroads have resumed full business, are adding to the depression. Grain, pork and other provisions wern lower. Flour and whiskey were only firm. At Boston the demand for money is also active. At Chicago the stringency is very marked, with a great demand for extensions among those who are carrying produce over to the opening of navigation. In this city there is more demand for money and great anxiety to realize in almost all the markets.

Wirn the great tumble in the price of gold. he big forestallers—the men who speculate on the necessities of the people—are going "by the board," one by one. Precious little

oity will be felt for their misfortunes. Thursday's Philadelphia Ledger says:/ The beginning of the end, it is to be hoped, is at hand. Last week the failure of a large dry goods house in this city was reported, and to-day we learn from New York of the suspension of Messrs. Lawton & Hayden, grocers, in that city, with liabilities to the amount of about \$300,000. These failures, which are, perhaps, the type of many more to follow, are not the result of any decline of prices, by reason of a feduction of the volume, and consequent appreciation of the value of the currency. The currency through the free issue of the circulation to the National banks, is kent fully up. The failures moted are the results them until the scarcity shall advance prices to the cornorant desires of the party engaged in the speculation. The great abundance of moneypurpose a comparatively easy task. But the idea that pervades the public mind that the new Secr-retary of the Treasury intends to appreciate the currency by every means in his power, seconded by the many successful efforts of the Government to put downsthe rebellion, has created an impression that peace is not remote, and that when it comes there will be a very decided fall in all prices. It is this sentiment, based on no particular fact in the operation of the money and finances of the country, that is working the change that is manifesting itself in failures of the big forestallers. The money market is more stringent, and the holders of produce and merchandize evidently feel a little blue over the prospect before them. Certainly it is with satisfaction that we quote a decline in the necessaries of life which have been at prices almost above reach. Increasing caution is shown by lenders on miscellaneous collaterals, in view of the stagnation in gold and the apprehension of a further decline of the premium; and the same applies to discounts, owing to the unsettlement of values in the merchandize markets. In the latter an extremely dail state of feeling. o put down the rebellion, has created an impres
