DIEHM & SNELL'S NEW COMBINATION COAL SCREENS
The undersigned take pleasure in announcing to Coal
Operators and others, that they are manufacturing a
new COAL SCREEN of their invention, which they
will guarantee to wear twice as long, and do its work
better than any crimped wire Screen in ose. The segments turned out by us can be bent to any circle required. We also guarantee that the mesh will always
retain its original size until entirely worn out. In the
crimped wire Screens the meshes frequently slip, and
lose the proper mesh, before the Screen is half worn
out. We manufacture any sized mesh of our New
Combination Screen, used in the trade.

I. John A. Newcomb, of Quincy, do certify that I have been entirely deaf in my left ear for twenty years, and for the past six years my right ear has been so deaf that I could not hear conversation or public speaking of any kind. I could not hear the church bells ring while any state. The church. I have also been troubled for a number of years with a very sore throat so that I was obliged to give up singing in church, for I had lost my voice. I had great trouble in my head, terrible noises, almost to craziness. My head felt numb and stupid, and was a source of constant trouble to me.

I tried every remedy that could be thought of. I went to ancists, but as they wanted to use instruments. I would have nothing to do with them. About one month since, I obtained Mrs. M. G. Brown's Metaphysical Discovery, and used it according to the directions on the bottles. And the result is that the hearing of both ears is perfectly restored, so that I can hear as well as any man. The great, trouble in my head is entirely gone. My head feels perfectly easy and at rest, My throat, which was so diseased, is entirely cured, and I have recovered my voice again. For two years I suffered with catarrh and great dizziness in my head. It seemed as if I was falling. I suffered greatly with asthma, it being hereditary in the family. I was diseased all over. I could not go where there was any dust. I had great pain in my head and neck. I have suffered much with cold feer. The bunes in my neck were grayment of place with head and neck. I have suffered much with cold feet. The bones in my neck were drawn out of place with the asthma: and my throat looked like raw beef. After applying to several physicians and obtaining no relief. I finally applied: to. Mrs M. G. Brown, by whose medicines I have been so much benefited that I now sweep wells although I could not formerly go where there was any dust. I could not formerly go where there was any dust. I could not go to the door with my head uncovered without taking an attack of asth... My insthma is now entirely gone. My catarrh has wholly disappeared. I felt weak and languid for many years, so that I was a burthen to myself. The coldness of my feet has disappeared, and I feel a general circulation through my entire system, so that I, benin to fee as formerly, full of strength and vivacity, and can attend to household duries as well as ever I did in my life.

CATARRH OF THIRTY YEARS STANDING CURED. CURED.

I. S. C. Chase, of Cambridgeport, do certify that I have been troubled with a bad catarrh for upwards of thirty years. I obtained Mrs. M. G. Brown's Metaphysical Discovery, and in ten minutes after using it found relief that I never found before. I have used the medicine faithfully, and I believe that it went to the root of my disease, and I feel as if catarrh was eradicated from my system, the foul effects of said disease having ceased. My wife also has been suffering from a complication of diseases. On using the Discovery, clotted blood and matter rushed from her head, and she found immediate relief, and has been gaining her general health ever since. Under these circumstances I heartfly recommend the Metaphysical Discovery to all who suffer.

Canistoga, C. W., July 23, 1864.—Mrs. M. G. Brown:
—Dear Madame:—I have been quite blind in my right
eye for seven years. I have been to several doctors,
whem I heard could restore my eyesight, but they never done me any good. I spent large sums of money
in travelling to where I heard there were doctors who
could benefit me, but none of them could do me any
good. I thought my case hopeless, until told by a
friend you could relieve me. I sent by a friend and
procured your. "Metaphysical Discovery," and in twenty-four hours after the first treatment, I could see quite
distinctly. I am very thankful for my deliverance.

I remain yours, truly.

From injuries received in my. right eye, when a boy, a chronic inflammation had heen produced, in consequence of which I suffered constant martrydom. Every moment of my waxing life was embittered, and I was frequently mable to eleep at night.

A variety of remedies had been resorted to without success, and I entertained the purpose, as a last resort, of having the ball taken out of the socket; in the hope of thus finding relief.

In the meanwhile, most providentially, I noticed one day in a shop window a bottle of Poor Richard's Eve. Water. I had never heard of it before, but determined to try. — and did with the most delightful results. In a few days the painful irritation was removed. I could bear the strongest light, and went forth as it were to to the enjoyment of a new life. I now keep a bottle of it always in the house, and if my eye seems at all disposed to annoy me. I give it a dose and there is an end of it. I would not be without it for, any amount of money. I take occasion to say further, that my wife used to suffer severely at times from protracted pain in and over her eye, and she has found Poor Richard's Eye. Water a sovereign specific in her case, giving her almost instant cellef.

WRITTEN FOR THE MINESS' FOURNAL! "Away to the Gallows with Traitors." BY CLAUDE MERCHANT. Ain-"Our Cause is Growing Stronger. In eighteen hundred sixty-one, At Sumter, the war first begun: The slaveholders the victory won, With seven thousand gainst seventy-on CHORUS.

Then away, away, our cause is growing stronger,
Away to the gallows with traitors:
Then away, away, we can't wait any longer,
Away to the gallows with traitors. Then treason reared its hydra head.
Filled all the land with fear and dread.
As fatal bullets on they sped
To lay the brave among the dead. CHORUS.

Then the nation rose in its might : Twas indeed a glorious sight.

As freemen marrhed, with armor bright,
To defend God and the right. - CHORUS, Slavery dead : Rebellion ended: Let unity be extended. And liberty defended. Traitors in air suspended.

DESERTED. e river flowed with the light on its breast, And the weeds went the hight on its breast.

And the weeds went eddying by,
And the round red sun sank down in the West,
When my love's loving lips to my lips were prest,
Under the evening sky.

Now weeping alone by the river I stray,
For my love he has left me this many a day,
Left me to droop and die!

CHORUS.

As the river flow d then, the river flows still, In ripple and foam and spray. On by the church and round by the hill, And under the sluice of the old burnt mill. And out to the day.

But I love it no more, for delights grow cold,.

When the song is sung, and the tale is told,

And the heart is giv'n away!

Oh. river, run far! Oh. river, run fast!
Oh. weeds float out to the sea!
For the sun has gone down on my beautiful past,
And the hopes that like bread on the waters I cast,
Have drifted away like thee!
So the dream it is fed and the day it is done.
And my lips still marmur the name of one
Who will never come back to me!

[COMMUNICATED.] Eds. Miners' Journal :- Is the war ended, and shall peace and prosperity soon pervade throughout the length and breadth of our land? These are questions daily asked by our people, who are anxious to resume their ordinary vocations in quiet tranquility, and feel inclined to leave the further consummation and reestablishment of the Union to the executive and judiciary departments of our Government. These are the sentiments one would suppose pervading the breast of every true lover of his country, and that now an earnest desire to President

Court House Democracy were to be seen; none from the highest to the lowest, not even D. E. N.; "Not our Gen. Lee boys," or any other of the same stripe were visible.

It was hoped and believed, now as the rebellion is about stretched on the hier of its fate, that those heretofore so hostile to our Sovernment would cease their hostility, and oin in with the rest of their fellow citizens n giving their sanction and aid to the powers that be, to close out with all possible speed the last dregs of this foul rebellion; and from the recent demonstration made by this very class of our citizens, who shrouded their dwellings in the habiliments of mourning over the death of the late President; I say one would suppose from such outward manone would suppose from such outward manifestations as these, at least something of the finer feelings of humanity that dictated such a display of crape, would prompt them to yield their assent to the proceed-

ings contemplated by the meeting. But as none of that class of politicians made their appearance, doth it not foreshadow a cirumstance from which we may draw a fair and rational conclusion, that the former venom and hostile feeling against the administration is still alive, and their first love to the south as strong as ever? Such hypocricy and deceit are monstrous. Man looks in vain to find a parallel even among heathen according of this stable. It is trialled by nations of this globe. It is trifling with religion, a bane to morality, and an utter prostitution of decency. But can we look for anything more decent from such a prostituted party who have been so bitter against the administration of Mr. Lincoln; and consequently against the Government of the na-tion,—for it was one and inseparable—until the hand of the assassin separated them? Decency and humanity have been alike outraged; nothing short of the cannibal who slays and cats his fellow man, can equal Demorracy of the present day. Instance, if you will, the disentember of the late Sen ator Hicks, to wreak their savage and bloodthirsty vengeance on his dead body. We may well fear from the past, that their dark and damnable avocation may be extended to the grave of the murdered President also. How much the southern allies in the north have contributed to the Judas fund of one

million dollars, (being the fee demanded by the editor of the Selina Despatch, for the assassination of President Lincoln, Vice President dent Johnson and Secretary Seward,) is shrouded in darkness; but as Booth and his accomplices failed in fulfilling their entire contract, the editor himself will, no doubt, pocket what is left. Such being the beauties of modern Democracy, where will you look for another race equally steeped in iniquity? I venture to say not on this wide spread earth. On their devoted heads must rest the blood of our slaughtered soldiers, for by their aid and countenance was the strife prolonged, and thousands of our men had to be sacrificed to save the Government and preserve the Union. The news of the capture of Jeff Davis, will doubtless cause another howl of these.
Copperheads, their outward exhibition to the contrary notwithstanding; and now as we hold in our possession this arch-traitor and others of his accomplices, the question suggests itself to the mind, will our Government stand firm, quail not, but deal out the punishment due to all traitors? Should they deviate from this course, the loyal people of America would deplore the event, as any

mitigation of punishment on these rebels, would in effect be paying a tribute to treason. We have more in store, but close for the A LOOKER OK. present.

ment more magnanimous than to hunt down women and children." The rebellion and slavery wree execrated the terrible murder and inhuman treatment of our prisoners, and the final crowning act of crime were regarded with horror, and Jeff Davis, the head and tront of all, intensely ha ted. This hate now has changed into sheer disgust and contempt for his distinguished and unparalleled poltroonery. What can his Copperhead friends, admirers and sympathizers have to say now? How exceedingly sheepish they must feel! What an enviable predicament they are in! Of course, the chivalrons South can never

conquered; they will die in the last citch; Mr Davis will never yield; oh! no. not he There is an intense interest manifested in the pending State trials, no sympathy what-ever being accorded to the criminals. On the contrary, they are deservedly, the objects of detestation, and hanging is considered too good for them.

It is expected that there will be a grand review of all the troops to be mustered out, previous to that event. The men generally, do not favor the idea much; now that the

war is over, they "want to go home."

THOUGHTS OF TEACHING. At the risk of being thought extremely subjective in all that I have to say, may I not ask if teachers of youth are not too remiss in not striving to keep before them some particular end or object, in the education of those entrusted to their care.

In almost every department of mechanical labor, the workman labors with some definite labor, the workman labors with some dennite end in view. The ship-builder adds timber to timber, meanwhile keeping in sight the no-ble vessel, which shall some day ride proud-ly upon the sea, and bid defiance to winds and waves. The mechanic constructs the ponderous machine which is to be the mo-tive power among many others, with an eye to the fitness of one part to another.

It is related of Tubonius, one of Luther's early teachers, that upon entering the room where his pupils were, he was wont to take off his hat and how to them. He did this, he said, because he saw in them not merely boys, but the burgomasters, the lawyers, and the doctors of the future. Would it not be well if teachers were to imitate his example in theory, especially as in our land places of the highest trust are equally attainable by

But teachers are far -too prone to indulge themselves in their love of care. For instance, a child comes to the teacher, requesting help to solve a problem in arithmetic. The principle involved had been sufficiently explained before the class, but the pubil's attention was directed elsewhere. The teacher

Fault finding should be seldom or never practised. It has the most pernicious effect ipon the minds of children; only tending to discourage them, and rendering their tempers sour, and morose. Try to find something which you can consistently and conscientiously commend, and you will find it has a far more cheering result.
