Loss for the week, 36,003 tone The trade shows a little increase compared with last week. The demand is very limited, and prices have receded at New York by the boat load. After paying commission the present prices will not net the operator over \$2 50 a ton, which is less than the cost of production at many of the colliries even at the reduced wages. At these rates many of the collieries will find it to their interest to stand idle, and they will do so in preference to working at a loss.

Of the loss of 806,467 tone sustained this year, Schuy'l Navigation Stock, of... 470,652 tons is from Schuylkill County, and of the loss of 80,246 tons for the week, 56,003 are from Schuylkill County. These losses are much greater than our pro-Lehigh Canai....Bonds... portion, nothwithstanding the known activity of our operators in forcing Coal into the market. Caltawissa Railroad. These facts show conclusively that we cannot complete with other regions at present prices. Coal has been reduced in price in a much greater proportion than transportation has been, and unless our Transporting Companies reduce their rates still further, as those in other regions have done, many of the collieries that have started will have to suspend again, and our loss will continue to be very heavy. If the reduction could only be made to carry us over the dull months of July and August, it would greatly advance the interests of the trade, as after the 1st
