JENKINS' The undersigned having purchased of the New York Wire Railing Co... "THE JENKINS' PATENT," for improvement in the process of manufacturing Coal Screens, &c., hereby gives notice that the value of said invention and the validity of the patent has already been fully established after a long trial in the United States Circuit Court; that injunctions have been granted and will continue to issue against any and all violations of said patent right. Also that the injunction against J. & L. Laubenstein of Minersville, Pa., as infringers of said patent was by order of the U. S. Circuit Court, Oct. 15, 1864, fully and completely restored. The subscribers also desire to give hotice that the following are the only persons who are at present authorized to use the said patent improvement as manufacturers of Coal Screens, in and throughout the Coal Region:

J. W. RROCK, Scranton, Pa., J. G. FRICK, Pottsville, Pa., BROCK & SHOEMAKER, Tamaqua, Pa.

As the manufacturers would not make in violation of the said patent unless encouraged by owners or renters of Coallieries, we are determined to prosecute every case that we discover of purchasers and neers, as well as manufacturers of Coal Screens, made in violation of said patent, to the full extent of the law.

New York, Jan. 28, 38.4 CHASE & Co. PATENT COAL SCREENS.

TO COAL OPERATORS. GREAT IMPROVEMENT IN COAL SCREENS. The undersigned are now prepared to manufacture, at their shop, in Minersville, all kinds of SCREENS for screening Coal, of the improved manufacture, patented to Jonas Laubenstein, 4th February, 1862.

Screens manufactured by this process, are more drable, maintain their form better, and are furnished a cheap as any to be had in the County.

They are made of square iron, in such shape as to prevent the Coal sliding from one size to the other before it is thoroughly assorted, thus preparing it bette than can be done by cast iron or wire screens.

The manufacturers urgently request all Operators wanting Screens, to examine those new patent Screens their work at the Manunoth Vein Collery of George S. Repplier, near St. Clair, where they have been in use for some time.

Ly purchasing screens made under this Patent, littigation, or any trouble as to patent rights will be avoided. All work done with promotness and dienatch.

A GOOD INVESTMENT-The Schuylthin and The March Steam Flour Mill for Sale.

The undersigned Executors of the last Will and Testament of Joseph Seyfert, late of Upper Tulpehocken Township, Berks County. Ofter at Public Sale on Monday, January 1, 1866.

At 1 o'clock, P. M., on the premises, the well known and advantageously located STRAM FLOUR MILL at Schuylkill Haven, and Five Building Lots, located near the Mill, late the property of said deceased.

The Mill is a four story brick indiding, 80 by 40, with three pair of burrs, and one chopper. All other machinery is in complete running order. There is an engine house, 20 by 40, attached, with a 40 horse power engine, in good, order. There is on the property a stream of clear spring water. The buildings are covered by a five proof roofing.

The business which has been established for ten years, gives continual employment to the Mill, and it would be a good Investment. Those desiring to purchase such property, would do well to examine this Mill before purchasing elsewhere.

In regard to the value of the property, we refer to Levi J. Smith, of Reading, Millwright. Levi J. Smith, of Reading, Millwright, Terms easy. For fortiler particulars apply to any of ie undersigned.

IMPORTANT NOTICE. ence, and years of practical application of my "Metaphysical Discovery" on thousands of dis-eased men, women and children, I have justly dred and forty (340) vessels, for which the come to the conclusion that every family in the land, who wish to get rid of disease, and keep it at bay, must have my Metaphysical Discovery always on hand. It is a certain preventative against disease. . It also treats and destroys the cause of disease, consequently the effects die; beginning with Deafness, Catarrh, Rheumatism, Neuralgia, with every disease man, woman or

child is heir to. It is the only safeguard against Cholera. It cleanses every sewer of the human body, hardens the flesh and purifies the blood. In consequence of the above facts, I have this day reduced the price, so as to leave no barrier in the way of the diseased. The package consists of three bottles, one ing the very root of disease, which is in a spe-

cific locality in the head. My Metaphysical Discovery is packed in a neat wooden case, and will be despatched to any part of the world on receipt of the price, which will be from this 25th day of November, sold at \$4 | number of wooden ships with an equal per pkg., or three pkgs., \$10. Celebrated Poor Richard's Eye Water. Large size, \$1 per bottle, or six bottles for \$5. Small size, 50 cts. Scalp Renovator \$1, or six bottles for \$5. The medicines can be obtained through

your Druggists, or at the Dopot, 410 Arch street, Philadelphia. The following letter is one of the many which I receive daily at my different Offices: SNAPP'S STATION, Nov. 20th, 1865.

MORO PHILLIPS' GENUINE IMPROVED go amongst the Farmers, offering the same at a price much below my establised Philadelphia and Baltimore Retail-Price, I hereby give notice that I have no Agents to hawk my articles about. It is sold at my Office and No. 27 North Front St., Philadelphia,

AND AT MY BRANCH HOUSE No. 14 Bowley's Wh f. Baltimore.

It is also sold by responsible dealers in all parts of the country. I make no consignments but sell at my wholesale price to licensed dealers, and at my retail price to consumers. My price is uniform to all. Sixty dollars per ton in Philadelphia, and sixty Dollars per ton in Baltimore; Three Dollars per ton for freight. &c., added to the Baltimore price. Dealers are not permitted to overcharge the Farmer, but to be salisited with a reasonable profit, and to sell for no less than my retail price at Philadelphia, and no more than my retail price is Philadelphia, and no more than my retail price in Baltimore.

I do this for the protection of the Farmer, that my article should not fall in the hands of irresponsible parties to undersell and adulterate.

Farmers will find it to their interest to deal only with responsible parties, and allow them to make a fair profit, as no man, honest or otherwise, will work for nothing:

Respectfully yours.

45. E. B. PEALE, WHOLESALE DEALER IN BALED HAY AND STRAW.

Abstracts of the Department Reports. Secretary of the Navy.

When hostilities against the Governmen were commenced in the spring of 1861, and e ports on our southern coast were ordered to be closed under the form of international blockade, instead of the municipal form of an embargo, the labor, embarrassments, and responsibilities, suddenly and unexpectedly imposed upon this department were immensely increased. Three hundred and twenty-two (322) offi-

cers traitorously abandoned the service to which they had dedicated their lives, proved false to the flag which they had sworn to support, and to the government which had confided in their honor and relied on their fidelity to sustain it in conflict and peril.

From seven thousand six hundred (7,600) men in the service at the commencement the rebellion, the number was increased to fifty-one thousand five hundred (51,500) at its close. In addition to these the aggregate of artisans and laborers employed in the navy yards was sixteen thousand eight hundred and eight (10,200) install for dred and eighty (16,880) instead of three thousand eight hundred and forty four (3,844) previously in the pay of the Government.— This is exclusive of those employed in the private ship yards and establishments, under contracts, constituting an almost equal aggregate number. Two hundred and eight (208) vessels have been commenced and most of them fitted for service during this period. A few of the larger ones will require still further time for completion. Only steamers, the propellers also having sailing power, have been built by the government during my administration of the department.

Since the 4th of March, 1861, four hundred and eighteen (418) vessels have been our and eighteen (418) vessels have been purchased, of which three hundred and thirteen

were steamers, at a cost of \$18,366,681 83. government has received \$5,621,800 27. The Secretary speaks at length of the depredations committed on our commerce by piratical crafts fitted out in English ports. He recommends enlarging our principal navy The iron-clad vesse's, so formidable in war, but unsuited for active service in peace

have been laid up, ready to be brought for-ward at any time for active duty should circumstances require. He recommends League Island for this purpose.

The true policy of the Government with regard to our naval force in time of peace will be to keep our iron-clads laid up in fresh water, in perfect fighting order. Our largest steamships should remain in ordinary, distributed among the principal commercial-cities, while there should be a force afloat navigable port on the globe where our trade It is gratifying to know that an examina tion of the sick reports, covering a period of over thirty months, shows that so far from being unhealthy, there was less sickness on

board the monitor vessels than on the same ber of men, and in similarly exposed positions. The exemption from sickness upon the iron-clads in some instances, is remarka-The number of midshipmen at the Naval Academy is 451. The number of vessels captured and sent to the courts for adjudication from May 1, 1861, to the close of the rebellion, is one thousand one hundred and fifty-one, of which there were steamers, 210; schooners, 550, sloops, 139; ships, 13; brigs and brigan stoops, 103; smps. 10; origs and origan tines, 29; barks, 25; yachts, 2; small boats, rebel rams and iron clads. 6; rebel gunboats, torpedo boats, and armed schooners and sloops, 10; class unknown, 9—making a total of 1,149. The number of vessels burned. wrecked, sunk and otherwise destroyed during the same time were: steamers, 85;

schooners, 114; sloops, 32; ships, 2; brigs, 2; barks, 4; small boats, 96; rebel rams, 5 2; barks, 4; small boats, 56; repet rums, 5; rebel iron clads, 3; rebel gunboats, forpedo boats, and armed schooners and sloops, 11; total, 355—making the whole number of vessels captured and destroyed 1,364. During the war of 1812, the naval vessels, of which there were 301 in service at the close, made but 201 captures. There were 517 commissioned privateers, and their captures numbered 1,428. That war was with a nation having the greatest commerce on the globe. During the recent war we have had o privateers affoat, and the rebels had but a limited commerce from which the prizes of the navy could be made. Nearly all the captures of value were vessels built in so-

called neutral ports, and fitted out and freighted in the ports of a government with which we had treaties and were on friendly terms, which had publicly pledged itself to a strict neutrality, and manifested its sincerity, so far as we were concerned, by withdrawing so far as we were concerned, by withdrawing hospitality to our national vessels. The gross proceeds of property captured since the blockade was instituted, and condemned as prize prior to the first of November, amounts to \$21,829,548 96; costs and

hundred thousand dollars, and of the 355 vessels destroyed at least seven millions of dollars, making a total valuation of not less han thirty-one million five hundred thousand dollars, much of which was British property, engaged in un neutral commerce, and so justly captured and condemned. On the 1st of November, 1865, the navy pension roll was as follows:

931 invalids, with annual pensions amounting to........\$68,587 50 1,096 widows and orphans, annually receiving.. ..... 179,942 00 2,027 persons, receiving a total Being an increase during the year of 418 persons, receiving pensions amounting to The enhanced prices of the necessaries of life, which are felt by all who are dependent on salaries or a fixed income, have been painfully severe on our naval officers. Their case appeals with force to Congress, and though always averse to unnecessary and un-wise public expenditures, I have felt it my

duty to present it for favorable consideration. The available resources for the Expenditures during the same time......\$140,091,125 99 ..... 116,781,675 95

Appropriations not wanted and carried to surplus fund, Leaving a balance at the commencement of the present fiscal year..... ..... 22,408,990 65 The appropriations for the current year are..... 119,882,928 75

and location fees, for the same five quarters, ending September 30, 1865, were 1,038,-400 78. The cash sales for the year ending June 30, 1865, amounted to \$748,427 25, an excess of \$70,420 04 over the sum received from the same source the previous year.

During the fiscal year ending June 30, 1865, 4,161,778 acres of public lands were surveyed. The aggregate quantity of surveyed public lands undisposed of September 30, 1865, was 132,285,035 acres. Owing to the failure of the appropriation

for that purpose at the last session of Con-gress, no contracts have been made for sur-veys during the current fiscal year, except where there were unexpended balances from previous years, or where the expense of survey was defrayed by private parties.

The total number of army pensions on the rolls at the close of the year ending June 30, 1865, was eighty-four thousand one hundred and thirty, requiring for the payment thereof, exclusive of expenses, an annual appropriation of seven million seven hundred and ninety-two thousand seven hundred and hundred h

lowed on original applications during the fiscal year was two hundred and fifty, and there were seven navy invalids whose pensions were increased. Two hundred and sixty-six the Institute for general discussion, in which navy pensions were awarded to widows or other dependent relatives of deceased officers.

No good resulted from these discussions. other dependent relatives of acceased oncers, seamon or marines. The aggregate amount paid to naval pensioners of all classes was two hundred and five thousand four nundred and eighty dollars and sixty-two cents. To good resulted from these discussions, no new ideas were elicited. Nor were any good rewinded from these discussions, no new ideas were elicited. Nor were any good resulted from these discussions, no new ideas were elicited. Nor were any good resulted from these discussions, no new ideas were elicited. Nor were any good resulted from these discussions, no new ideas were elicited. Nor were any good resulted from these discussions, no new ideas were elicited. Nor were any good resulted from these discussions, no new ideas were elicited. Nor were any good of the control of the contr dred and eighty dollars and sixty-two cents (\$205,480.62.) At the close of the fiscal year there were on the navy pension rolls eight hundred and thirty-nine invalids, the amount of whose pensions was sixty-one thousand eight hundred and fifty-four dollars and ninetwo cents, (\$61,854 92,) and one thousand and seventeen widows and other dependent relatives, requiring the sum of one hundred and sixty-eight thousand eight hundred and eighteen dollars, (\$168,818). The total number of navy pensions at that date was eighteen hundred and sixty-six, whose annurelatives, requiring the sum of one number and sixty-eight thousand eight hundred and eighteen dollars, (\$163,818). The total number of navy pensions at that date was eighteen hundred and sixty-six, whose annual stipends amounted to two hundred and thirty thousand six hundred and seventy-two dollars and ninety-two cents, (\$230,672,92). The total amount, therefore, required for the payment of pensions of all classes adjudicated and allowed up to the close of the last fiscal year, or conferred by special acts of Congress, is, exclusive of expenses, eight million twenty-three thousand four hundred and forty-five dollars and forty-three cents, (\$8,023,455,43.)

The number of Indians residing within the jurisdiction of the United States does not jurisdiction of the United States does not

jurisdiction of the United States does not probably exceed 350,000, a large majority of whom maintained during the past year peace-During the year ending September 30th, 1865, there were received at the Patent Office eleven thousand eight hundred and sixty applications for patents, and seventy appli-cations for an extension of patents. Six thousand two hundred and ninety two patents (including re-issues and designs) were issued and sixty-one extensions granted. One thousand five hundred and thirty-eight caveats were filed. Seven hundred and forty-one applications allowed but no patents is-

### sued thereon by reason of the non-payment of the final fee.

LETTER FROM "JACK SLOW." ASHLAND, December 4th, 1865.
Eds. Miners' Journal:—A spirit of emulation in a community is always praiseworthy and laudable, provided it arises from an honber, amounts to \$21,829,548 96; costs and expenses. \$1.616,223 96; net proceeds for distribution; \$20,501,927 69. There are a number of important cases still before the courts, which will largely increase these amounts.

The value of the 1.149 captured vessels and end laudable, provided it arises from an nonest wish to excel either in the attainment of good to ourselves, or in promulgating those principles of virtue which exalt the mind and purify the heart. Any community is benefited, when the citizens strive in the just and the value of the 1.149 captured vessels. The value of the 1,149 captured vessels and true way to improve the tastes and enwill not be less than twenty four million five improvements in architecture, wise legisla-tion or public displays.

But while these tend to the exalting and ennobling of our race, how often are their results rendered ineffective and of no avail, by men of position, wealth and influence, ruled by private malice, insatiate ambition, inordinate vanity and vulgar flattery, refusing to

act or take any part in public improvements, simply because they are not first consulted, or are given positions for which they are unqualified either by common sense, sterling worth, or intellectual capacity.

How we all love that noble and generous hearted man who will give freely of his time, talents and wealth to the education of the poor; to the erection of public buildings; to public and innocent meetings, parades and displays, and yield a portion of his social hours to the enjoyment and improvement of his less fortunate fellow-citizens, without desiring more than the love and esteem of his friends, and harboring no jealous dislike against any who may receive praise or commendation because he acted and performed a more conspicuous part. How we loathe and detest the man who How we loathe and detest the man who uses his wealth for ostentatious display, giving it freely to causes and objects wherein he has the ruling power, and for the fickle praise, and flattery, and worship of the noble, thereby gaining hosts of sycophant admirers and securing homage.

How loathesome indeed to be the fourth man in a country in regard to wealth, publicly to boast of that wealth, and deeds done with it, when its possessor has not the bring.

with it, when its possessor has not the brains of a flea, or the heart of an ape. It is indeed praiseworthy and convenient to be wealthy, but where is the man that abhors not the miser, or he, more than miser, who by chance accumulates wealth, and uses it only wherein it gratifies his love of public and indiscriminate praise, and personal vanity, regardless as to whether it benefits any human being or not. We have in this Countries of the ty men whose greatness of mind and soul will yet redeem us from misrule, and disgraceful Representatives and Congressmen, if their labors are not rendered useless by silly puppets, who will attack a man on the street

the cost of barrels, that it has been pro-nounced by one of the large petroleum deal-ers of New York City worth \$10,000 per day to the county of Venango alone, a county

## Educational Column.

J. A. M. PASSMORR, M. S.; Editor. The following article is from one of the best teachers in the County, and he was also a close observer at our late County Institute. We are glad to receive his criticisms, not that we agree altogether with him, but it may be the means of arousing some one to reply, and by this means we may be enabled to get

at the truth. THE LATE COUNTY INSTITUTE Mr. EDITOR:—I propose, through the Educational Department of the Journal, to offer a few criticisms on the manner in which the late County Teachers' Institute was conducted, and I trust that all teachers and other friends of popular education, who may peruse this article, will give me credit for a proper motive in doing so.

First, I would suggest that teachers, as a general thing, receive such measure salaries.

First. I would suggest that teachers, as a general thing, receive such meager silaries—barely sufficient to enable them to live comfortably—that they are not warranted in going to the expense necessarily incurred in attending a convention of this kind, unless they are certain of obtaining the full worth of the money expended, by being benefited by the exercises of the Institute, which are intended to improve his methods of teaching, and to encourage him in the prosecution of his noble work of educating the minds of the young. If the Institute fails to accomplish this object, it is a failure altogether, and the teacher is poorer than he was before—poorer in purse, and not a whit richer in intellect, and he returns to his work rather discouraged than otherwise.

With all due deference to our worthy. County Superintendent, and the able teachers who principles.

County Superintendent, and the able teachers who principally conducted the late Institute, I cannot avoid arriving at the painful conclusion, that it was a failure; that, with the exception of the exercise in orthography, the lectures upon that subject by Prof. Raub, and the lectures by Dr. Plumer and Prof. Wickersham, there was nothing done calculated to benefit the teacher in the leasts I don't think that this failure can be attributed to any want of energy or interest on the part of the County Superintendent, but it was partly the fault of the teachers themselves, and partly the result of the stepping aside from the usual methods of conducting these Institutes, and resolving the entire convention into one class instead of dividing the mem-bers into six or eight classes, and thus dis-

cussing the best methods of teaching as many branches as there were classes at the same enty-two dollars and fifty-one cents (\$7,792, - 172 51.)

The number of navy invalid pensions allowed on original applications during the fisher of the figure of the figu every one had or should have had an interest. discussions; treated the subject enurely too lightly. They seemed to think that here was an opportunity for them to display their wit, and if they succeeded in making the audience laugh, and themselves ridiculous generally, their object was accomplished. It was a matter of little important to them whether matter of little importance to them, whether or not they uttered a single word to the point. Thus the time was frittered away, and we failed to be benefited by the views of so ber able and provided by the views of so

pecomes the dignity of the teacher profess with the view of comparing methods, eliciting new ideas, and instructing the less successful teachers, rather than to make a display of wit, which, by the way, more frequently proves no wit at all; and then we

may expect to have an interesting and successful Institute. PRACTICALITY. We not unfrequently hear parents complain that their children learn very little or nothing that proves useful to them after leaving school. Judging from the number of complaints of this kind, we are constrained to believe there must be some cause for them.

A boy may perhaps, be able to work all the examples in a common school arithmetic, and vet if he is asked to compute a question in simple interest, or to find what will a certain number of pounds of beef cost at a given price per pound, he will stammer and hesitate, and finally seek to excuse himself by saying there were no questions of that kind in the book which he used; or he may, after spending four or five years in the study of grammar, offend the ear of every person of good taste by saying seen for saw, him and me for he and I, and by committing other blunders still more ridiculous.

A good plan to make children quick and ready at figures, is to give them frequently during the recitation hour, long columns of figures to add, or bills of merchandise to compute, or test examples in any of the rules o believe there must be some cause for them.

pute, or test examples in any of the rules which have been explained to them.

Letter writing, too, calls for some attention in our schools. There is no person who does not need at some time or other, to write letters of friendship or business; and comparatively speaking, but few persons are able when they leave school, to write a letter neatly and as it should be written. Errors in grammar, orthography, and composition, crowd one upon another. Some litposition, crowd one upon another. Some literally cover the page with capitals, others are too sparing in their use, while others cannot spell the simplest word correctly upon paper, although they may be able to spell it orally. Any person who has taken the pains to examine letters written by most children, will find that they commence something like this: "I take my pen in hand to let you know that I am well; and I hope this will find you in a good state of health, as this leaves me at present." leaves me at present."

An exercise in letter-writing should be given about once a week. It is only by constant practice and close attention that the mistakes above mentioned will be corrected. Teachers should instruct their pupils how far from the margin of the paper they should begin to write, how to fold the letter, and how to write the address on the envelope.—

In nothing perhaps, do children require so much encouragement as in writing letters to

out writing a word. Ask them what they would say if the person to whom they are writing were present. Ask them to tell of something they have seen, of something that occurred during the day, at home or at These few remarks may serve to suggest to the minds of teachers other methods of in-structing their pupils how to turn the knowl-edge of other branches of study to some account. However, it is to be hoped that none will be so utilitarian as to suppose that nothing is of real use only so far as it ministers to the bodily wants. Everything that elevates us above mere soulless animals is practical so

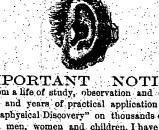

much encouragement as in writing letters.— Sometimes they will sit for half an hour with-

of Internal Revenue to report on the best sumed their quotes of this tax, for which
