His photograph adorns the soldiers are for him, the people are for him, and the received an purality of a specific part of the manufacture of the cooper shop volunteer.

THE CIVIL RIGHTS BILL A LAW. To fully appreciate the magnitude of the victory which the people of this country have achieved over the factions determination of President Johnson to prevent the passage of nceded bills, -in the enactment of the Civil Rights bill into a law, we refer the reader to the speech of Senator Trumbull which will be found on the First Page of to day's Jour nal. It exhibits the sophistry of the President's arguments against the constitutionality of the bill, and his vacillating course wit those Senators in Congress who have endeavored to preserve amicable relations with him: On Friday of last week, in the Senate the

follows: ayes 33, nays 15. The vote in de tail is as follows: vras-Messrs. Anthony, Brown, Chandler, Clark. Connes, Cragin, Greswell. Edmunds, Fessenden, Foster, Grimes, Harris, Henderson, Howard, Howe, Kjrkwood, Lase (Ind.), Morgan, Morrill, Nye, Polind, Pomeroy, Ramsey, Sherman, Sprague, Stewart, Sumner, Trambull, Wade, Willey, Williams, Wilson, and Valce.

ler, Trumbuli, Wade, Walley, Whilams, Whison, and fales—33.

NAYS—Messrs. Buckalew, Cowan, Davis, Doolittle, Guthrie, Hendricks, Johnson, Lane Kansaw, McDouyall, Nesmith, Norton, Riddle, Saulsbury, Van Winkle and Wright—15. Absent, Mr. Dixon. Being two-thirds, the bill passed the Senate over the President's veto. On Monday last the bill also passed the House over the veto by a vote that lacked on-

ly two of being three to one. A Washing.

ton correspondent describes the scene in the House as follows:

About 12½ o'clock, Colonel Forney, the Secretary of the Senate, appeared at the bar of the House with the records, consisting of the original carolled bill, with the list of yeas and nays, and the manuscript yeto message all of which he duly presented to the House, stating his message in a loud clear voice. The galleries were crowded, and it was evident that there was a considerable mustering of the members. Monday morning, as it was, the notice of Mr. Wilson, chairman of the Committee of the Judiciary, on Saturday, that he intended to demand the previous question, had brought most of the lagrards and absentees into their seats. After some preliminary business, Mr. Wilson rose, and made his motion. Immediately Mr. Rogers, of New Jersey, rose to debate the question (1), but he was at once called to order. He was followed by several others, and for a little while it looked as iff the Democracy intended to "filibuster," viz.: to delay action by factious motions. But after one or two callings for ayes and noes the powerful feeling in Tayor of the bill became so apparent, that the Democrate gave up all efforts, and the roll was called with the following result; yeas, 122; nays, 41. The cheering was as spontaneous as it was tempestous and continuous. House as follows:

all enoris, and the foll was caned with the blooks, result; yeas, 122; nays, 41. The cheering was a spontaneous as it was tempestuous and continuous, and in the midst of the whirlwind of snoats and we ving of hankerchiefs the House adjourned. The Speak er then announced that the bill having received the requisite vote of two-thirds in each House, over the veter of the state of the property of the state of The yeas and mays in the H use on th

STATE BASE NOTES NATIONAL CORRECT. On and after the first of July, all State Bank Notes in circulation will be subject to a tax of ten per cent. This of course will throw all State Notes out of circulation and all the currency of the country will then be National Many are already beginning to refuse State Notes, particularly those from a

distance, and the soop r they are called in ding week last year. the better. Win an exclusive National Currency, the holders of notes will always be this region, showing an increase on the corres secure against the "bursting up" of Banks, because they are based on National securiies, and are redeemed at the Currency Department, if a bank closes up. In December, 1857, we recommended the

establishment of a National Currency in lieu of State Binks, similar to that now in existence. This we believe, was the first recom mendation made, and in the short period of less than eight years it has been accomplished. Nothing, however, but the necessities growing out of the rebellion accom slished it. When first broached, the whole banking influence of the State was opposed to a National Currency, and with that influence arrayed against the measure, its success would have been impossible in ordinary times. With two additions it will make the currency perfect. That is, compel all the banks to take the notes of each other at par. throughout the country, and limit the issue of paper currency of all kinds to \$1 for \$30 the assessed value of the real and personal property of the country, and distribute it Penn. 40 to \$1 for \$30 the assessed value of the real and personal property of the country, and distribute it Penn. 40 to \$1 for \$30 the assessed value of the real and personal property of the country, and distribute it Penn. 40 to \$1 for \$30 the assessed value of the country, and distribute it Penn. 40 to \$1 for \$30 the assessed value of the country, and distribute it Penn. 40 to \$1 for \$30 the assessed value of the country, and distribute it Penn. 40 to \$1 for \$30 the assessed value of the country, and distribute it Penn. 40 to \$1 for \$30 the assessed value of the country, and distribute it Penn. 40 to \$1 for \$30 the assessed value of the real and personal property of the country, and distribute it Penn. 40 to \$1 for \$30 the assessed value of the real and personal property of the country, and distribute it Penn. 40 to \$1 for \$30 the assessed value of the real and personal property of the country, and distribute it Penn. 40 to \$1 for \$30 the assessed value of the real and personal property of the country, and distribute it Penn. 40 to \$1 for \$30 the assessed value of the real and personal property of the country and distribute it \$1 for \$30 the assessed value of the real and personal property of the country and distribute it \$1 for \$30 the assessed value of the real and personal property of the country and distribute it \$1 for \$30 the assessed value of the real and personal property of the country and distribute it \$1 for \$30 the assessed value of the real and personal property of the country and the personal personal property of the country and the personal perso among the States and Territories according By to their value. This is simple-will give great confidence to industry and stability to pusiness—and will gradually increase as the business and wealth of the country increases without any further legislation on the sub-

THE WISCONSIN LEGISLATURE has censure Mr Doolittle's opposition to the Civil Rights bill, and requested him to resign.

[WRITTEN FOR THE MINERS' JOURNAL.] MANUFACTURE OF IRON AND STEEL

Iron Ores of the Coni Mensures and their Avnilability.

In my last, I presented the evidence of the existence of an inexhaustible and available supply of the true magnetic iron ores of the Azoic formations of Pennsylvanla, and their accessibility to the iron manufacturers of the Anthracite region. Those who are interested in this matter; may be assured of the facts stated, on application to the writer.

All the best or superior steel of commerce have been produced from magnetic or specular ores, previous to the introduction of Josiah Heath's invention of the use manganese in the production of steel; and no good steel can be produced, unless the ores contain a small per centage of this mineral, or a certain amount is added to the metal in the course of its elaboration. It is possible, however, that lead, titanium, zinc and a few other metals may have the same properties, in preventing the oxydization of the melted iron in the process of conversion to steel, and disinfecting it of impurities.

NANGANEE.

In this convertion an innovation that may be noticed NUMBER 3.

importities.

In this connection an important fact may be noticed in relation to most of our great deposits of iron ores—that is, the existence of manganese in nearly all of them. Our magnetic ores contain almost invariably, a small per centage of manganese: while the Hematires of the Southern States, along the western slope of the Elne Ridge, in particular, are invariably accompanied, by manganese, sometimes as a mixture, but frequently as independent veins or nests. The writer has seen veins of the purest manganese, glittering in their steely blue-black lustre, from one to four feet thick, in many parts of Virginia. The abundance of this valuable mineral, so necessary to the manufacture of steel, in available localities, is an important item to the future success of this great and growing industry in this country. this country. We may also mention the fact that most of the car We may also mention the fact that most of the carbonates—iron ores of the Anthracite coal measures—contain from-one to two per cent. of manganese, and even this small amount, not only insures their value for the production of iron and steel, particularly as a mixture with the richer magnetics, but adds greatly to the facility of their reduction in the blast furnace.

THON OUTE OF THE COAL MEASURESS. to the facility of their reduction in the blast intrace.

The ores of the Authracite coal measures are generally of the variety known as carbonates. They are the most valuable kinds for the production of iron, and almost invariably produce a superior metal.

The deading that would region in the vicinity of the Namokin Valley and Pottsville Rail Road now controlled by the Pennsylvania Central Rail and almost invariably produce a superior metal.

It is used extensively in the Cambria trout Co.'s furnaces, at Johnstow?

The carbonate of the name of the former, and receive many interest and receive many interest of lean but productive of good iron which are generally lean, but productive of good iron with a mixture of the carbonates of the carbonates of the carbonates of the former, and are seldom used except in small quantities with the recalculation of the Bitumious coal measures. The calculation of the former, and are seldom used except in small quantities with a mixture of the carbonates of the carbonate of the former, and releft on the furnace, and releft or the furnace, and releft or the furnace, and when pure, this kind of ore is valuable. It

Authracite coal measures; and their use in our blast furnaces would be of inestimable value to our iron manufacturers.

This subject has attracted but little attention as yet, and few comprehend the value and importance of theores which accompany our coal beds, but as a inixiare for the refractory magnetics, those ores are far more available in every respect, than the hematites which are now used. It is manifest that our available sipples of hematite, within accessible distances of the Anthracite regions, must soon become exhausted, and we have nothing to replace them with but the ores of our coal measures; but fortunately they are inexhaustible and more valuable for the purpose required, than the ores which they would thus happily substitute. It may not be generally known that nine or ten workable beds of iron ore accompany our coal veins, and that several of them can be worked with much economy in connection with the coal, but such is the fact. The largest ore beds are in the white-ash measures, but we think the richest are with the regash veins. A very valuable bed of ore exists above the Buck Mountain coal bed, or between it and the mamoth—another is found in the vicinity of the primrose, and several smaller beds intervene. All the redash seams carry more or less ore, and some of them are immediately overlaid by valuable and workable beds.

bed.

The mode of mining practiced in England and Wales is the only one that can be operated with economy, either here or there. To attempt to mine our carbonates, independant of the coal is to fail in the attempt. They can only be successfully obtained in connection. either hear and a successfully obtained in connection they can only be successfully obtained in connection with the coal. By working the coal first, the ore may be obtained with comparatively small expense.

The cost of MINING

Total.

Total.

Total.

The Welsh ores exist in sixteen thin beds, ranging from 3 to 18 inches in thickness, and yielding from 20 to 30 per cent. of metallic iron, or an average of 30 per cent. The yield of the ores in the Anthracite measures, ranges from 20 to 60 per cent., and averages 25 per cent. of metallic iron.

An analysis of a specimen of the gate vein ore by Rogers, yielded

nen from the St. Clair furnace, on

Metallic iron.

About 16,000 tons, mostly of the list class of oreswere mined—originally for the St. Clair furnace—by Burd Patterson, Esq., but were subsequently smelted at the Pioneer furnace, Pottsville. The ore worked well in the furnace and produced a superior metal, which brought nearly double the price of ordinary Anthracite pig in the markets of that time. It was used for the production of hollow-ware, which requires superior metal. The writer was informed, not long since, by the Messrs. Atkins, Bros., that such ores as they were familiar with from the Anthracite coal measures, would produce a superior iron, and that pig metal formed in whole, or in part of the carbonates of the coal strata, would command a much higher price in market than the common pig as now produced from a mixture of magnetic and hematic ores.

*Average cost from both large and small beds ore. Ores from the larger seams are mined for less.

ind the following letter published in the Philalelphia Press of Thursday: delphia Press of Thursday.

Hardshere, April 11.—It is understood that a corps of engineers will commence surveys for the route of the Anthracite railroad within a few days, the southern terminal point being on the Delaware river below the city. The stock-books will be opened within a mouth in the cities of New York, Boston and Philadelphia; and the managers of the enterprise claim to have secured the aid of such financial parties as will insure the building of the main line of road from the Schuylill coal-fields to the Delaware, as well as a branch road for the direct trade between Schuylkill County and New York. This branch road will also form part of a new through route connecting the Philadelphia and Eric railroad with New York City.

We have a sourcapeed from another source that We have a surances from another source that

this road will be pushed through as rapidly as possible. Its terminus on the Delaware will be below Philadelphia. There is great rejoicing in Schnylkill County at the prospect of a new outlet and we see no good reason why the whole Coal trade of the County should not come out and publicly endorse it; because we know all are decidedly it favor of the project. There will be an abundance of trade for all by the time it is built, and a new road can be built for nearly one half the cost of the present road, which will enable it to pay the stockholders handsome dividends at greatly reduced rates of transportation. TAPPING THE LEHIOR .- We learn that the Phil

TAPPING THE LEHIOH.—We learn that no Phil-addiphia and Reading Rail Road Company have dispatched a corps of engineers to survey a route for a branch Rail R and from a point man Burnes-ville, this County, via Wetherley, to connect with Pardee's Rail R and in the Lehigh region, near Hazleton, for the purpose of diverting a portion of the trade via the Valley of the Schuylkili. We understand the route is favorable. This of course, is in opposition to the extension of the Leligh and Mahanoy road through Schuylkill County to Mt. Carmal.

The Reading Rail Road Company is also making

PANY give notice of a final assessment of \$10 on ea it aliare of capital stock, amounting to the sun of \$400,000 payable on or before the 20th of

J. J. CONNER. THE PATENT

Exhaust Fan Ventilator For Mines, Tunnels, and all Subterranean Workings. LOWDEN BEADLE, Patentee, Ashland, Pa.

Gen. J. K. SIGFRIED, Agi, Pottsville.

This system differs from all other appliances for mine ventilation in several essential properties: —First., it has the advantage over all the French and Belgran modes in its great simplicity of style. and economy of operation, saving from fluty to one hundred per cent. in motive power. It also differs from all English mechanical modes, both in economy and application, and is superior in every respect to the furnace. The efforts of the fan are exerted entirely on the mine vapors in the return air courses, thus creating a vacuum which must be filled with pure air. It is assisted by the weight of the atmospheric column, in direct opposition to the old method, in which its weight, or fourteen pounds to the square inch, acted against the yentifating column.—This is the great-secret of the invention, and both science and experience teaches as that scarcely a limit can be placed to the extent or power of this system of ventilation. The following extracts from numerous testimonials fully endorse this system;

"I am free to say that there is no system of ventilation as yet known, equal to the Eshauste Fan, and not only does it perfectly ventilate a colliery, but is also a great saving of expense as compared with furnace and Gen. J. K. SIGFRIED, Agt., Pottsville

ny does n' pericenty seminate a conneyt, ont is also cat saving of expense as compared with furnice and emit jet ventilation." WM, MILNES, Jr., Of Milnes & Co., former lessees of Hickory Colliery Since I have been connected with the managem of the above mentioned (Hickory) Colliery, the ian work d admirably, and I must say that we could no without if. It is installed that the could not the c work d admirably, and I must say that we could not do without it. It is just what every extensive colliery below water level needs, and I take great pleasure in recommending it to all coal operators.

W. H. SHRAFER,

Gen. Agt. Mammieth Vein Con. Coal Co.
Prilapelpula, February, 1866.

Gen. J. K. Sigrafer—It affords me great pleasure in being able to see that J. Lowden Beadlers Exhauste.

Very let the best if not the only true and perfect system.

How can be sell such goods so cheap?

We call attention to the advertisement of Dr. Porter in another part of the paper. The Doctor will remain at the Pénnsylvania Hall but six days longer, and all those who decire to avail themselves of his services can do so, and have their cases examined by his new Electro Magnetic Machine, which he will cheerfully do, FREE OF CHARGE as it will do no harm and may be of great benefit.

Postscript.

Saturday, April 14, 1866. THE LATEST NEWS. Terrible Marder in Philadelphia Ad-journment of the State Legislature— Interesting Miscellany

Interesting Miscellany.

On Wednesday afternoon last a terrible murder was acovered in Philadelphia. A family, comprising year persons in all, residing in the "Neck," some stance below the Nary-yard, were found dead, having been brained with an are. It is supposed that the "neck was committed on Saurday last, and that was was the object, as the house had been ransack." The vica so this tearful slaughter were—Christopher Deering, and 40 years. Julia Deering, aged 25
years: Elizabeth solan, aged 35 years. Julia Deering, aged 25
years: Hollan Deering, aged 5 years. Annie
Deering, aged 4 years. Deering, aged 6 years. Annie
Deering, aged 4 years. Deering, aged 14 mas.
The body of Cornellus and Deering, aged 14 mas.
The body of Cornellus and Deering, aged 14 mas.
The body of Cornellus and Deering, aged 14 mas.
The body of the bound of arraday morning under
a bay stack, horribly mutilated.
The control of the bound of the second in one of
the upper rooms of the house. A diamond ring are
plain gold ring and \$120 in money belonging to Mr.
Dolan, and a gun and pistol belonging to Mr. Deering,
are missing, and are supposed to have been carried or
by the assassin.

The North American says:—Humanliy cannot avoid a shudder at the contemplation of these dreadful details, and wonder what sort of an organization the wretch who did the bloody work could have possessed to induce him to take so much blood upon his soul for allittle money. The mawkish sympathy so generally wasted on murderers when laboring under sentence of death is responsible for no small share of this reckless attocity. wareat on matterers when mooring under sentence of death is responsible for no small share of this recklers atrocity.

The murderer is still at large. A hired man of Mr. Deering is supposed to be the marderer. He is a German called Authony or Antoine. He is about 23 or 30 years of age; 5 feet 11 inches in height; light complexion; light hair; slight moustache and goates of light colur; pimples in his face; round-shouldered; stoops when walking; walks slow and takes long strides; very muscular, and presents a general awkward appearance. He speaks very poor English.

The Pennsylvania Legislature has adjourned sine dis. Mr. Lonis W. Hall was elected Speaker of the Senate. The retiring Speaker, Mr. Fleming, was presented with a beautiful gold-mounted vory gavel, as an emblem of his office. In the House resolutions of thanks were passed to Governor Curlin, the Speaker and the clerks. A number of presentations were made.

The Provost Marshal General has completed a careful compliation, from the muster-rolls, of all the deaths in battle, from wounds and from disease, in every regiment and company of every loyal State from the beginning to the closs of the war. From it it appears that 280, 739 officers and men have lost their lives in the service. Of this number 5, 221 commissioned officers and 90,886 enlisted men have been killed in action, or died of wounds, while 2, 231 commissioned officers and 183, 329 enlisted men have died of disease, or, in a few cases, from seddent.

On the 6th of April the clitzens of Savannah, Ga.

329 enlisted men have died of disease, or, in a few cases, from accident.

On the 6th of April the citizens of Savannah, Ga, commemorated the battle of Sailors' creek, the last fearful struggle of the rebel troops under R. R. Lee, for the defeat of the Union army in Virginia. Large numbers proceeded to Laurel Grove Cemetery, in that city, and decorated with flowers the graves of those who had fallen fighting for the dissolution of the American Union. Around about were the last resting places of those who had fought and died for its flag, but while the graves of rebels were strewn over with flowers, theirs were left bare.

Judge Underwood, of the United States District Court for Virginia, decides that the rebellion is not at an end so long as Texas is excepted from the terms of the President's peace proclamation. Any attempt to release Jeff. Davis by a writ of habeas corpus will therefore fail. elease Jell. Lavis by a herefore fail.

The Fenian excitement on Campo Bello Island is still kept up, and the residents are removing to Eastport, Me. A raid in the neighborhood of Calais, is anticipated, and military preparations have been made to

icipated, and minary preparations have occurred fremans.

The Canadian Cabinet is in session daily, but the proceedings are not made public. The report that resident Johnson will issue a proclamation in regard of Fenian movements is received, with satisfaction in Toronto.

During the last few days a number of Fenians have left their homes in Boston for 'part-unknown."

In Philadelphia the case of Hubbell vs. Fernon, which was an action of damages for injuries received in an assault, a verdict of \$3,500 was rendered for the behavior. In various places throughout the South the 26th of April will be observed as an anniversary of the rebel rend: The restaurant and oyster saloon keepers in Boston The restaurant and oyster saloon keepers in Boston have been notified to stop selling ale at their counters. The Loan bill has been signed by the President. Robert Lee's name does not appear on the list of rebel applicants for pardon. Senstor Wright continues very weak. He has not been to the Senate since he voted against the Civil Pickets in peral Alfred Pleasanton has been granted injor-central antical reasonable in the month's leave of absence.
President Davis, of the Fenian Brotherhood, was in Vashington, on Thursday, and openly approved the fortheastern raid.

THIRTY-NINTH CONGRESS.

FIRST SESSION. Washingron, April 9, 1866:—Senate.—Mr. Sherman introduced a bill to equalize the currency, which was referred. The House bill to pay Pennsylvania's war claims was reported. The Loan bill, as it came from claims was reported. The Loan bill, as it came from the House, was passed, yeas 32, nays 7. It now awaits the President's signature to be a law.

House, "Various resolutions, including one in relation to the persons charged with assassination by the Presidential proclamation of May, 1963, were offered and disposed of. The Civil Rights bill was taken up, and the previous question being carried, it was passed over the President's veto.

April, 10.—SENATE,—Mr. Sanlabury offered resolutions declaring for the maintenance of the Constitution and laws and the preservation of the Union unimpaired, and expressing confidence in the President: Mr. Sumner objecting, they were laid over. The House bill, appropriating \$500,000 to, pay Pennsylvania's war claims, was then passed.

Horse,—A resolution was adopted asking information of the President as to what steps had been taken to protect Americans in the Canadian fisheries. The bill to revive the grade of General in the army was reported back, with amendments. A motion to reconsider the Bankruptcy bill came up, and the bill was defeated—yeas 70, nays 73. The same bill, with some modifications, was subsequently introduced and referred. A bill authorizing the colnage of five cent nickel pieces was passed.

Legislative —The following act, introduced by Mr. Crosland and called up by Mr. Adaire, was passed in the House on Tuesday last:

"That if any incorporated company of this Commonwealth, chartered for the development of herecal and mineral resources, the procurement of petroleum with in her boundaries, or the working into commercial value of such products, shall, upon the payment of the enrollment tax required by law, furnish the Governor with satisfactory evidence that they are actually and actively engaged in preparations for such development, such company shall be exempt from the bonus-tax of one-half of one per cent. now imposed by law. And in all cases where any chartered company of this Commonwealth have entered upon lands under the franchises of such charter, and with machinery and workmen are actually engaged in the development of the-same, and shall satisfy the Governor in like manner that no income or revenue has been derived therefrom, the remaining payments due on such bonus-tax is hereby to mitted, and the same fully canceled."

EF Orders for SEALED ENVELOPES STUART & MAXWELL,

CURED FOR ONE DOLLAR.

READ!—For one dollar per mail, I will send free to any address a recipe and medicine that I will guarantee to cure the worst cases of Catarrh in the head or bronchial tubes in a few weeks. It has saved my life, and made me a well man, from Caarrh and a severe and dangerous bronchial trouble I had suffered with for years. I tried the best physicians, and all the advertised medicine, but found no relief till I obtained this. I would give one hundred dollars for this recipe and the medicine, if I now had the Catarrh and could not obtain it less. I believe if instructions are followed, it will cure any case whatever, that has not already reached the lungs and become a settled consumption. Cure it while you can. Address, T. P. SYMMES, March 31, 66-18-3m. No. 1874 Fulton St. N. Y. NEW BOOKS just received and for sale at B
