DADDOW'S NEW MAP CF THE ANTHRACITE COAL BEGIONS

This Map is the latest published of the Anthracite Coal Regions of Pennsylvania. It differs in many respects from other Mans published, because it rives the formation and also a representation of the Coal Basius, together with the location of all the colliertes in the Arbracite Coal Regions, &c., &c.

COAL, IRON, AND OIL, BY DADDOW & BANNAN.

THIS NEW WORK ____ ON OUR MINERAL RESOURCES HAS PROVED A SUCCESS BEYOND OUR MOST

Its public reception, both at home and abroad has been extremely encouraging. The first Thorsand has already been disposed of, and the second is going very fact. According to present-indications we shall soon exhaust the first edition. We will say to our friends at home, that they will have to supply themselves early if they wish a copy of the present edition. We shall not publish a second edition for some two years, since the cost and labor of collecting statistics to the date of obblication will be very great. olication will be very great.

Some few of our friends have objected to the price Some lew of a the Book as being excessive: but we can aware them that such is not the case—it is unquestionably the changest Work of the kind ever officials are certainly growing to be very liberal The vast and varied amount of new information which it contains, together with the Maps and extensive Hustrations, has called forth commendation and praise from the most influential, scientific and mining.

more comprehensive and exhaustive volume upon materials treated of could scarcely be desired than just issued by Messrs. Dannow & Bannan under Regarding the work as a whole, it is certainly the most complete manual for the practical colliery mana-ter that has yet been published.

I may safely be said that we have no single work in It may safely be said that we have no single work in this country so thoroughly calculated to afford the superior collies and iron-worker, all the information he requires in connection with his business as is the book of Messrs. Daddow & Bannan, to meet the wants of those similarly engaged in the United States. The work must have entailed a large amount of labor, and there is ample evidence that the labor has not been applied without being made to yield the largest results of which it was capable."

The leading newspapers of all our great cities and Mining and Manufacturing Districts have given the Book a warm reception, and reviewed it with unqualled praise; while practical and scientific men generally have given us the most gratifying assurance of its value and insefulness, as the only standard, work of the kind.

It is the duty of every person whose properly is large or small, to insure it. If large they can well afford it. If small they will guard them selves from becoming penniless in case of fire :--We insure and look upon it as an important duty Too many however, neglect it, and when fire de prives them of their property they look to the community to make good their loss by contributions. This is an abuse which should be remedied. Where there has been sickness, we do not object to contribute. But we do object and will not give in cases where the parties were able but did not sure their property. We think the community should assume this position, and correct this growing abuse.

SUITS COMPROMISED .- Lately suits were brought in England on behalf of the United States Gov ernment against Trebolm & Co., the bankers who hold rebel property valued at from ten to twelve millions of dollars, to recover it. Everything was progressing favorably with the probability of a termination in favor of the United States, when its Consul at Liverpool was instructed through an agent of the Secretary of the Treasury, to compromise the matter for about one-tenth of the amount named. This was done without consult. ing with our Minister at London. It is said that and margiful. NOMINATION OF CAMEBON. The Republican Senatorial caucus met Harrisburg on Thursday evening last, and on the first-billot Cameron, was nominated for United States Senator. The vote stood, Cameron, 46; Curtin, 23; Stevens, 7; Grow, 5. The two Union Senators from Lancaster county, General Fisher and Hon, E. Billingfelt, refused to participate in the caucus. The Press stamps this nomination as an insult to the great body of the Republicans of the State, and says:

the State, and says:

There has never been so studied a violation of public sentiment and public divercy as this nomination. Although a large body of the trusted champions of on r. party appeared on the ground, protesting against the selection of Cameron and warning the Union members of the dangers of such a step, their appeals and their admonitions were alike disregarded. It is notorious that this nomination has been effected by open and unblushing pur chase. This is the first instance in which Republican representatives have been purchased for political purposes, and they will earn the loathing and contempt of their constituencies. It will be found we do not doubt, upon in vestigation, that many of these men have wormed themselves into the Republian ranks, to betray it. Before the nomination a member of the Legislature we are credibly informed, said that Cameron's nomination was sure and that it would require one hundred and fifty thousand dollars to defeat it. " We suppose then, that was about the figure it took to effect it. One thing is certain, ninetenths of the Republicans in Pennsylvania are opposed to Cameron's election, and we hope that the unfaithful representatives will be sifted from the faithful, and be sent into political obscurity by the Republicans of

their districts. We hoped to see a statesman, able and respected, elected to the position; but the feeling in the Republican party is that the State will be dishonored by the selection on Tuesday next of Simon Cameron. Well, let him be elected. Let him enter the Senate of the United States. Will he be respected there? Will not the finger of scorn be pointed at the man who could descend to unworthy means to effect his election in opposition to the wishes of the people? Thank God, that whatever Cameron may be there, there are honest and worthy men enough to meet and defeat any possible mach inations of tricksters.

The indignation of the people at this fraud upon them is intense, and they feel like sweeping the faithless representatives from the seats they disgrace.

GALVANIZED IRON. -There is nothing so durable and able to resist the action of the elements as galvanized iron. Messrs. We can recommend the firm as willing and able to give satisfaction to those who favor it with orders in its line.

A GREAT SPEECH OF THE OLD COMMONER. -On the First Page of to-day's Journal will be found the speech of Thaddeus Stevens in support of his bill offered in December; for establishing loval governments in the South. We hope none of our readers will fail to peruse it carefully, for it is a thrilling appeal for justice to the true men of the South who have combined against them the Administration and a pro-slavery Supreme Court. Mr. Loan offered resolutions declaing that for the purpose of securing the fruits of the victories gained during the late war against the rebels, it is necessary to impeach the President; to provide for the faithful administration of the Executive Department; to provide effective means lecting the tax rigidly on whisky and other luxuries, in place of insisting that the people shall still be ground down under an oppressive tax, which practically neutralizes all protection, in order that his administration may be glorified in the speedy extinguishment of the debt. If he cannot collect the whisky tax and keep inspectors faithful to the interests of the Government, let him suggest the plan adopted in France and England—possession of the distilleries by the government. This would be more profitable occupation at least for the country than concocting schemes for reducing the debt by impoverishing the great industrial interests of the country.

Those desiring extra copies of the Journal containing our annual statistics, will please send in their orders during the coming week. COMMISSIONER WELLS'S REPORT The Report of Commissioner Wells has

With these exceptions, all his remarks favor the interests of the friends of low duties, who have their establishments already built up and who fear home competition, and the European manufacturers, who are backing un Mr. Wella's bill at Washington. We hope Congress will repudiate his bill instanter, and pass no tariff supported by free traders at home or foreign interests in Europe where labor is at the starvation point. On the subject of Goal Mr. Wells shows that he is either interested in the Nova Sco.

tia product or panders to their interests. In all his calculations converting gold into currency he fixes the data at forty per cent, ex cept when treating on coal he fixes it at FIRIT per cent. This is a small matter, but it shows the drift of Mr. Wells's comments.-He fixes a duty of \$1 50 per ton on Cannel coal, \$1 50 on Anthracite, and 50 cents per ton on Bituminous. Now, Mr. Wells ought WASHINGTON, January 7, 1866. Senate.—The Senate received petitions for an increase of pay of army officers; for the passage of the Tariff bill; against the curtailment of the currency, and for an increased duty on foreign wines. A resolution instructing the Commissioners of Agriculture to collect and prepare specimens of the Paris Exhibition was passed. Also, a resolution instructing the Committee on Commerce to inquire into the expediency of prohibiting passerger vessels from being sent to sea after they have been in use a certain number of years. A mesult was a war was to break out against to know that there is no foreign Anthracite Suppose a war was to break out against Great Britain, and the exportation of Nova Scotia Coal should be prohibited, what would be the condition of the New England States with scarcely any development of our Bitumi

nous Coal fields and the foreign supply entirely cut off? We are aware that a large number of persons in the East are interested in the Nova Scotis mines, and we also learn that a large amount of stock has been distributed even among members of Congress to favor legislation in the interests of Nova Scotia Coal: but we will PLEDGE OUR REPUTATION AS JOURNALISTS that if the duty on Coal is fixed at \$1 25 per ton, as it exists at present, it will tend to develop the vast Bituminous Coal fields of our country to such an extent that New England manufacturers will obtain fuel of all kinds at a cheaper rate, and a permanent supply, too, than if Coal was admitted duty free. There is a large profit on Nova Scotia Coal, and large fortunes were accumulated while it was admitted duty free under the Reciprocity Treaty; and it is a notorious fact that after the abolition of that Treaty, and Nova Scotia Coal became subject to a duty of \$1.25 per ton, THE PRICE OF NOVA SCOTIA COAL DID NOT RISE IN THE NEW ENGLAND MARKETS; the whole duty was paid by the Nova Scotia Coal producers into our freasury, which their extra profits enabled them to pay. During this period the supply of our Bituminous Coal largely increased in the New England markets. With a mere nominal duty Nova Scotia Coal will be kept up to the highest point to keep out ompetition. With the competition in the New England markets of our domestic Bituminous Coal, the price will be reduced to a greater extent than the amount of duty imposed. And besides, the competition of our domestic Bituminous Coal will also tend to keep down the price of Anthracite (which is

limited) when our manufacturing interests are sufficiently protected to increase American productions. Mr. Wells also speaks of a Protective Tariff as a TAX upon the consumer. None but a Pr fool or a knave would make such an assertion in this decade of the nineteenth century. England protected all her interests higher than any other country, and this high protection reduced all her productions to the lowest point by the introduction of labor saving machinery; and protection will do the same in this country in a very short time. Mr. Wells says that some branches of industry have declined in this country on account of high wages; but he does not say one word about the increased importations of about ONE HUNDRED MILLIONS in value over our exportations. Of course our bu siness would decline under such circumstan ces. Last year we imported foreign fabrics amounting to about \$12 per head for every nan, woman and child in the country. Under the Protective Tariff of 1842, we think

the importations amounted to about \$4 per lead. With such a policy American proluctions must decline. Mr. Wells says that we are dencient in skilled labor. Our labor is more skilled than that of any other country, except in producing the finer fabrics. In England they introduced skilled labor in the shape of machinery under her protective policy. We can the same under adequate protection. In England, with a population of less than 28,-000,000 souls, they have erected skilled working machinery equal to EIGHT HUN-DRED MILLIONS OF LABORERS, which produces her low fabrics, while skilled manual labor is paid higher than ever before When we build up machinery under the protective policy equal to half that power. we will require but little protection to our industry, because we will then produce all our nanufactured products as cheap as they can e produced in any other part of the world. We would advise Congress by all means to ismiss Commissioner Wells and reform his morals, or if really ignorant, send him to school to study political economy. The

country can easily dispense with such advisers. OUR NEW YORK COAL LETTER. Naw York, Jaz. 10, 1867.

The time has not come to make contracts for the year, and no one car tell how business is likely to result. Everybody is talking about retrenchment, and all business men are running as close to the wind as possible. If manufacturers and steamers are not busy in 1881, the coal trade this year will be very dult.

As if to produce a greater depression, the Pennsylvania Coal Company saverties that they will sell on February 1Rth, from 150,000 to 200,000 tone of coal at Newburgh, on the Hudson. The advertisement does not state when the coal, if sold, is to be delivered.—The truth is, that the "big companies" as they are called, intend doing all the business they can, even at prices which will drive off other operators. Cressona, Jan. 12th, 67. The Report of Commissioner Wells has been published. It contains a great many valuable statistics, and so far will be of service in regulating a Tariff for the Protection of American Industry.

There are only two recommendations that will meet the approval of the friends of American Industry, the first of which is the removal of all duties as far as possible on raw materials not produced in sufficient quantities at home which enter into our manufactures. This was the distinguishing feature of the tariff of 1842, which tended to advance the internal industry of the country to such an unexampled extent. The other is the change from ad valorem to specific drites on such articles as are liable to fraudulent contries.

On Tuesday in the House at Harrisburg the following resolution was adopted, every so-called Democrat voting against it: "That it is the imperative duty of Congress to enact such laws and provide such governments in the rebel States as will seeme each loyal person therein full and complete protection to life, libertly, properly and enjoyment of equal political rights, to the end that the foundations of such governments may be fixed on principles of eternal justice, which will endure through all future time, and that the Clerk forward a copy of this resolution to Congress." So. remarks the Philadelphia Evening Bulletin, the Democracy of Pennsylvania have put themselves clearly upon the record as being of opinion that Congress should not enact such laws for the rebel States as will secure to loyal persons therein full and complete protection to life, liberry and property; they (the Democracy) also declare themselves opposed to having the foundations of the governments of such rebel States "fixed onprinciples of eternal justice, which will endure through all future time," and the said Democracy are also opposed to the forward-

ing of a copy of the resolution to Congress. There is nothing like putting one's self fair and square upon the record. PENNSYLVANIA LEGISLATURE. Harntseung, Jan. 8, 1867.—Subart.—The President announced the chairmen of the principal committees. A number of bills were introduced.
