I would particularly recommend my Triple Mining Chain, the most durable and safe for mining purposes. It is the only kind used in Europe for mining. This Chain II properly used, will last five years, and is then only half worn out; by taking out the short links and sending them to the manufacturer, he will put in long links, and you then have a new chain for about half price. For further particulars I refer you to the Dancan Colliery, Pottsville, Pa.

I will warrant my heavy Triple Chain to draw from 8000 to 4000 lize, our of a elope 400 yards deep, or a perpendicular shaft of 250 yards deep.

All of whom have analyzed the Catawba Brand and commend it in the highest terms, for medical us and commend it in the highest terms, for medical use.

Analysis of the Massachusetts State Assayer, January 28th, 1858.

When evaporated through clean linen, it left no oil or offensive matter. In every respect it is a pure, spirituous liquor. The oil which gives to this Brandy its flavor and aroma, is wholly unlike fuell or grain oil,—Its odor partakes of both the fruit, and oil of grapes. With acids it produces ethers of a high fragrance.—The substitution of this Brandy for Corpnac Brandy, will do away with the manufacture of fictitions spirits, sold under this name, both at home and abroad.

Respectfully,

Assayer to State of Mass., 16 Boylston St.

Ru the Same in 1864. I have analyzed "L. Lyons" Pork CATAWRA BRAN-

I have analyzed 'L. Lvons' Pure Catawra Brann," with reference to its composition and character, being the same as that produced in past years. A sample taken from ten casks afforded the same results in regard to purity: a slightly increased amount of the principle on which its flavor depends, was determined by comparison with former samples.

The indications of analysis show that this Brandy is produced by the same process as most of the imported brandy.

DR. SCHENCE'S MANDRAKE PILLS.

DR. SCHENCE'Dear Sir:—I take pleasure in sending you a certificate in addition to many you have already received from suffering humanity. I can searcely flud language sufficient to express my heartfelt, gratification of the wooderful cures your MANDRAKE PILLS and SEAWEED TONIC have effected in the entire cure of one of the most stubborn cases of the liver.—For three years Lenfured beyond description: all my friends, as well as myself, came to the conclusion that my time in this life was short. Such was the terrible condition to which I was reduced that life to me had become a burthen; my whole system was in a state of inflammation: I could not eat, I could not sleep: my whole body was filled with pain; swelling would arise in my wrists and ankles, rendering them totally use-less. On several occasions I was attacked with a rish of blood to the head, which would fell me to the ground, and I would be carried away for dead. I applied to several eminent, physicians of our city, who administered all the medicines that they thought would reach my case, but of no avail. to be done. By these means the maximum useful effect of the power is secured with the least expense for attendance, cost of incl, and repairs to Road and Engine. With these objects in view, and as the result of twenty three years practical experence in the basiness by our senior partner, we manufacture five different kinds of Engines, and several classes of sizes of each kind—Particular attention paid to the strength of the machine in the plan and workmanship of all the details. Our long experience and opportunities of obtaining information, enables us to offer these engines with the assurance that in efficiency, economy and durability, they will compare favorably with those of any other kind in use. We also farmish to order, wheels, axles, bowling or low moor tire (to if centres without boring,) composition castings for bearings of every description of Copper, Sheet Iron and Bolier Works; and every acticle appertaining to the repair or renewal of Locomo-

plied to several enument, physicians of our city, who administered all the medicines that they thought would reach my case, but of no avail.

One of them said he could do no more for me, and advised me, as a last resort, to drink cod liver oil.—

Not relishing the horrid trash I declined to take it.—

Accident put your advertisement in my hands. I criled on you; you examined me and told me the nature of my disease. You then ordered me the Pills and Tonic with an observance of diet, pledging your word that in one week I would find myself another man. I followed your advice, and as you predicted an astonishing cure was effected. I continued your Pills and Tonic for some time; and now thank God for His goodness, and your valuable medicine. I am once more restored to perfect health. I most earnestly recommend those who are suffering from affection of the liver to give your Pills and Tonic a fair, trial, and a cure will be effected. I have sent many persons to you and they have all been cured. We find this question propounded in the "Question Corner" of the Educational col-umn, and taking it for granted that an an-swer is requested, I venture a few remarks, that may at least cause some one to discuss t more ably.

The subject matter of this question has long exercised our mind, and the plan has self liable to it, then the phrase "high crimes and misdemeanars" have no more and misdemeanars, heaving a more arms. been pretty thoroughly tried in the different and misdemeanors" becomes a mockery, and make no hesitation in saying that the pupil to any extent with impunity. IMPEACHMENT OF PRESI-DENT JOHNSON. The cry comes up from all parts of the ountry, North, South, East and West, "Imneach the President!" There can be no onfidence in business or security for the ountry so long as such a political Judas and raitor occupies the Presidential chair. We append an extract from an article in he Independent written by Wm. Lloyd Gar-My last lecture was delivered in the Acad

emy of Music at Brooklyn, in February, im-mediately after the delivery of President White House to give him their approving yells, on the 22d of that month. I then de he not essayed in order to leave the millions of emancipated bondmen at the South withof emancipated bondmen at the South with-out legal protection for any of their rights— as sheep given over to the custody of wolves; to render all the laws of Congress passed for their defense a nullity; to bring Congress itself into popular contempt, and make it the target of his poisoned arrows, even denying it to this hour a lawful existence so far as all legislation effecting the South is concerned:

egislation affecting the South is concerned;

nals! What can be more atrocious in avowal and design than their daily diatribes against Congress and the loyal people of the North? Their voice is "still for war," provided the President will try his hand at a cour person. They boldly declare that, though the South has been vanquished in the battle field, she is even more disaffected them to abide in. It is a penalty for all manhood suffrage is the only basis of enfranchisement that will save the South.—

Loyalty, not color, not capacity to read and their colors and which along these than ever, and will avail herself of every in-strumentality to "rule or ruin." Nothing is ruined states can be safely rebuilt. The law left undone by them to "fire the Southern heart" to the utter violation of all those obligations and duties the patriotic performance of which alone can make us "one and inseparable" as a nation. What broader ground for his impeachment need be desired than that the President is in close affiliation with rebels of the deepest dye, wielding power in sought for our dead alone, with a half dozen their behalf which was never committed to negro soldiers they could march in safety

his trust, and determined to checkmate Con anywhere. These troops would protect their gress in every effort to reconstruct the South own ballot-box as thoroughly as they would on the basis of absolute loyalty?

Let this perjured and perfidious occupant of the presidential chair be summarily removed, and one chosen to fill it who will be our patriot dead. true to his country, working harmoniously with congress in its endeavors to give the same security to liberty and loyalty at the South as is enjoyed at the North, and the South as is enjoyed at the North, and the safety of the nation will be placed upon an indestructible foundation. Not to do this will be the sowing of dragon's teeth, ending in a harvest of blood.

The right of impeachment is not only a constitutional right, but the Constitution itself assumes that it may be an imperative dustrict of the safety beautiful assumes that it may be an imperative dustrict.

PEN. PASTE AND SCISSORS, the humbiest official in the land, and should be as readily brought to the tribunal of jus-THE REV. GILBERT HAVEN Who has been

traveling extensively in the South within the last year, writes as follows: It shows how perilous is our state when is equally true when the President takes the tical eye discerned his presence. He must be seen none the less in these crises of restoration.

His demand, as every conscience confesses is that this nation, through its appointed channels, insure absolute peace, rightcous ter length, but I will simply submit them to mes and fraternity in all that justly desolated region. Congress, by the call of the hour, more able may further enlighten us in this important question. Teachers, let us hear to less than by the preamble of the Constitution, must "establish justice, insure domestic transmitting and control to the constitution of the co

tranquillity, and secure the blessings of liberty" to all the people.

This duty requires, first of all, the removal of the President. For none of these benefits can be secured while the present governments are allowed to continue in their unrep-resented states. Those governments are carrled on solely by men steeped in rebellion to the very lips. Through the favor of the President they have so far arisen from off the burning marl and assumed the rights and reins of sovereignty. While this continues there can be no peace or safety. The wild, impoverished, conquered masses will take courage from the high position of their leaders to wreak their brutal vengeance on their Union neighbors, white and black. The prime, the perfect necessity, therefore, laid upon the nation is to make all this region as quiet and safe as her loyal territory: And this she cannot do while she allows her still rebellious citizens to control that land. But how can she strip these officials of the robes wherewith the President has clothed them? Only by depriving him of his power. Whatever path of investigation we follow, this end is inevitable—the President must be Incurately after the delivery of President impeached. Of what use is it for Congress Johnson's infamous speech to the mob of each and Copperheads assembled before the White House to give him their their control of the president must be impeached. Of what use is it for Congress to adopt Mr. Sumner's resolve and degrade these states into territories?

appoints the governors of territories. He can and doubless will, reinstate the very men in that office whom the rebels have sewhite House to give min.

Yells, on the 22d of that month. I then de clared, with all sincerity and thoughtfulness, that if I were a member of the U.S. House of Representatives, I would instantly propose the impeachment of Andrew Johnson for sundry "high crimes and misdemeanors," as a patriotic duty. Since then of what further acts of official usurpation and indecency has he not been guilty? Was there ever so dispersional design as was made by him as he "swung round the circle," last summer, from Washoff and design as was made by him as he "swung ington to Chicago? It has no parallel in our political history—none on the other side of the Atlantic. I need not recapitulate what was said and done by him on that humiliating tour. All know it by heart. What has he not essayed in order to leave the million. The work of the national legislature is directive, not executive. Until, therefore, it has an Executive in harmony with it, all its of forts will be less effective than that of the travailing mountains. Not even a mouse will reward their toil and travail. There fore, again and ever, must we come to the conclusion that, as the first step in Southern econstruction, the President must be impeached. It is said as a last resort, let this disorder

We first called on J. Wharton Bradley, the obliging and energetic Superintendent and Principal of the High School. We found his school in good condition. Seldom has it been our lot to visit a school where there was such good order and strict attention to business, with apparently so little effort on the cacher's part. Superintendent Bradley is assisted by John Peckman.
