Would call the attention of Railroad Managers, and those interested in Railroad Property, to their system of Locomotive Engines, in which they are adapted the commotive Engines, in which they are adapted they may be required; by the use of one, two, three or four pair of driving wheels; and the use of the whole, or so much of the weight as may be desirable for adhesion; and in accommodating them to the grades, curves, strength of superstruction, and rail and work to be done. By these means the maximum useful effect of the power is secured with the least expense for attendance, cost of fuel, and repairs to Road and Engine. With these objects in view, and as the result of twenty-three years practical experience in the business by our senior partner, we manufacture five different kinds of Engines, and several classes of sizes of each kind.—Particular attention paid to the strength of the machine in the plan and workmanship of all the details. Our long experience and opportunities of obtaining information, enables us to offer these engines with the assurance that in efficiency, economy and durability, they will compare favorably with those of any other kind in use. We also furnish to order, wheels, axles, bowling or low moor tire to fit centres without boring, composition cartings for bearings of every description of Copper, Sheet Iron and Boller Works; and every article appertaining to the repair or renewal of Locomotive Ragines.

Dear Sirs:—Having realized in my family important benefits from the use of your valuable preparation—Wistar's Balsam of Wild Cherry—It afforts me great Pleasure to recommend it to the public. Some eight years ago one of my daughters seemed to be in a decline, and little hopes of her recovery were entertained. I then procured a bottle of your excellent Balsam, and before she had taxen, the whole of the contents of the bottle there was a great improvement in her health—I have, in my individual case made frequent use of your valuable modicine, and have always been benefitted by it.
