FREE TRADE HYPOCRISY. The Free Trade League of New York have been flooding the country and the members of Congress with Free Trade documents ever since the failure of the late bill. Finding a weak point they are exerting every energy to assail it and widen the breach. These documents contain no arguments. They merely set forth weak assentions without one word of proof. The arbitrary dogmas of selfish hypocrites made plausible by the artful sophistry of well paid philosophers. We quote from the "Free Trade"-a paper circulated gratis by Robert Pell, as Record ING SECRETARY OF THE FREE TRADE LEAGUE, an Englishman who is a member of the 'Lon. don and Liverpool Globe Insurance Com-

pany!"

"If our people would only open their eyes and look
at the several kinds of government, they would learn a
most important truth, viz.: That whatever progress
America may have made in the science of government,
consists in the amazint of government which we have America may have made in the science of government, consists in the amenints of government which we have dispensed with, and not in the republican forms which we have given it. Much ruling is an immistakable proof of lack of freedom, as the fall of the mercurial roolnum in a thermometer, is evidence of surrounding coldness. Virtue, another word for self government, is the foundation of republice, and a large exercise of public authority indicates either a want of virtue in the people, or an unjustifiable assumption of authority by the se who govern, for I take it to be a self-evident proposition that no governmenthus a right to interpose its rule so long as self rule regulates things properly. All governments are but attempts to supply the lack of individual self-government, and in regulatic particularly, all public authority is inaccasable, which cannot abow that the matter which it proposes to regulate is not already regulated by individuals is a simple proposition that

The above is a simple proposition that every man shall do that which he has a mind to do, and that governments should be "regulated" about as it is in Schuvlkill Coun ty, or to suit Robert Pell and his English friends. Shall interested demagogues pander to crime that they may THRIVE by its fruits, or shall the agents of English capitalists rob us of the blessings of Providence by such shal low assertions? If Robert Pell and his associates could "regulate" our trade to suit their selfish views, it would be very profitable to them; but THEIR PROFITS must be our Loss. The

English manufacturers and capitalists would like to convince us that it is a "virtue" to govern ourselves according to their dictation, and the New York importers and merchants who live by TRADE are naturally free traders. Are we to believe their specious reasoning when we know they are actuated by selfish views? Some of these men no doubt, THINK ted in their selfish theories. We give below the "declaration of principles" sent forth by this same Robert Pell, the English agent for the New York Free Trade League:

FREE TRADE PRINCIPLES VS. PROTECTION TO LABOR. 1 Heads That. Every man has a natural right to sell the produce of his labor to those who will give the most for it, and to expend the proceeds in the way which he himself may judge most serviceable; and that just as the total denial of this right, constitutes Slavery, so a partial denial thereof is a partial Enslayement.

2 Acquiraces in taxation and duties levied to meet the needs of Government, but denounces as pure robbery and tyranny, all taxation for the benefit of special classes. 3 Holds That, One of the truest and most con 3 Holds That, One of the truest and most comprehensive means of preventing panperism, is to remove all obstruction in the way of the free exchange of the produce of labor; and to allow men to nursue their own welfare in their own way, so long as they do not infringe on the rights of others.

4 That, The "Protective System" is a form of informat national selfshness which defeats its own ends that it is contrary to the wise and benevotent laws of Providence; that it partakes of the odious and iniquitions peculiarities which distinguished class legislation; and that it is a fertile source of social, sectional and international discord.

ands in producing comments which we receive.

7 That, A People is most enriched by engaging in those occupations for which it possesses advantages over other Countries, and exchanging its productions for those for which those Countries possess advantages over the Countries. rer itself.
8 That. Free Trade with all the world will conduce 1. We contend for the same principle, and have always fought against slavery at home or abroad, while the friends of FREE TRADE, the BITTEREST enemies of TREE LABOR! 2. We cordially endorse this principle, but deny the right, propriety or justice of ragging down Free American Labor to the

level of the oppressed and starving poor of Europe, or of the Southern States now suffer ing from the fruits of free trade doctrines, which included free trade in negroes as well as in rum, ruin and repudiation. 3. We can also say amen to this proposition. t does not differ from "our principles," but we apply it ourselves and do not include the whole "human family." We do not beieve in fighting our bone and muscle against the steam machinery of England or the miserable poor of Europe. Our charity is not so large that we would reduce ourselves to overty, to pamper the monopolists of Europe, and increase the burdens of our breth. ren there held in bondage by the few lords and nobles who possess the old world. 4. This assertion might hold good if all na. tions were about starting into existence under the same laws and institutions. But as many governments have had a long start of others, and have built up and perfected their systems of Industry which gives them great advantaimperative, and the government that would

es over the others, protective laws became refuse to protect its people from such disadvantages would prove to be unworthy of the support of said prople, as the whole object of government is protection. Under such circumstances the shallow pated ignoramus who would teach such a doctrine, can only be looked upon as a silly fool, or a paid agent of British and French Free Traders in their efforts to break down our Domestic Industry, and impoverish our laboring classes. 5. This assertion is contrary to reason and experience, and we contend that the "Protective System" not only increases our markets but brings the consumer to the PRO-DUCER; that it increases the demand for labor and the profits of labor by diversifying occupations and the exchange of labor in the same community. It was the protective policy of England maintained for a period of 150

up entirely of agriculturists—it must be a "commonwealth" if all would enjoy the fruits of their labor or intelligence. The value of each day's labor of the nation is over \$16,000,000. Under protection every one is engaged at profitable employments; none are idle. But if our wants are supplied by the manufacturers of Europe, our people become agriculturalists, and MUST PRODUCE food at prices low enough to enable the ill paid. up entirely of agriculturists—it must be a

That our charity must extend to our rivals and our enemies, and that we must allow the monopolists of and that we must allow the monopolists of the old world to see the labor of their ill-paid poor in competition with ours. We have tried the experiment on several occasions, but each time it has resulted in ignominious failure while on the contrary the "Protective System" has always resulted in prosperity, and an increase of trade and commerce. Free trade brings poverty, while "self-protection" saves from the low labor of Europe, and enables us to enjoy the blessings of a

free country. THE SUNDAY CAR QUESTION. The Philadelphia Press of Monday contains a long editorial on the defeat of the Sunday car question in the State Legislature, the concluding paragraph of which is as fol-

lows:

There are several clergymen in both bodies and we are glad to see them there; but they should recoiled that they are only members with no more rights than others, whether farmers, mechanics, manufacturers, iron masters, merchants, doctors, or lawyers. Because it would injure a clergyman's standing to be seen at a ball, an opers, a theatre, or a German of Indian concert, he has no right to blame his fellow-members for the has no right to borne in speculiar tenets into practical legislation demanded by the want of the community. This clerical influence deficated this wise, ralutary, and Caristian mensure, but the remedy lies with the twenty-one city memiers. Let no bill pass until the Sandsy car, bill becomes a law. The people of Philadelphia expect this. The Press errs in supposing that this is solely a question between the religious community and those who advocate the proposed innovation. Although the question has its religious aspect, it has another equally as important. The mass of the laboring people of this State are opposed to any infringement upon the Saubath and its laws on the just ground that it would be oppressive upon them. As a day of rest the Sabbath, importaut to all, is absolutely indispensable to the working-man. Every intelligent operative knows that if the rapacious money-making spirit of the age could have its way, it would compel him to work every day in the week. We oppose it on this ground mainly, while

we recognize the fact that the proposition is repugnant to the moral sensibilities of the great mass of the best citizens throughout the State, and that it is in contravention of all previous legislation, and directly in conflict with the law of God himself, who has commanded us to remember the Sabba'h day to keep it holy. We regret to see the Press which is usually so fair and liberal, and willing to submit gracefully to the will of the majority, forget itself so far as to use so foolish a threat as that noted in the above extract. Our cotemporary should remember that Philadelphia is. but a component part of the State, and not the entire State; and that the State has the right to regulate all legislation tending to sap the foundation of morality throughout its York Tribune says:

the foundation of morality throughout its borders.

If the Press is so earnest in defence of the rights of the poor of Philadelphia as it professes to be, we will direct the attention of the able chief of that paper to a matter in which the weight of his vigorous pen would tell more signally than in the advocacy of a measure tending to an increase of vice and an addition to the burdens of the working man. It is this: Philadelphia as a manufacturing city is interested in getting fuel as turing city is interested in getting fuel as they are right because like the old slave cheaply as any of her competitors. Her citmasters of the South, they have been educa- izens, the majority in humble circumstances, want their coal cheap. This coal region is only ninety-three miles from Philadelphia, outlets from this region, makes a discrimination of from twenty-five to fifty cents a ton in favor of coal shipped to New York. By this unjust discrimination the manufacturers of Philadelphia and the poor of that city pay about one Million of Dollars More for their coal than is paid by the manufacturers and other consumers of New York for the same quantity. Here is Philadelphia outrageously taxed by a foreign, unsympathizing corporation; its manufactures discriminated against; its favorable situation affected, and its poor compelled to pay more for coal than is just, yet the Philadelphia papers take no note of this outrage on the rights of the poor man, while they grow eloquent over a measure that if adopted would compel him to work on Sunday and deprive him of his only day of rest. We submit these facts to the consideration of the press of Philadelphia,

and their coad cheap. This coal region is the their coad cheap. This coal region is ly ninety-three miles from Philadelphis, and the poor of that cluty and their coad shipped to New York. By its urjust discrimination the manufacturers philadelphis and the poor of that city appoint one manufacturers of the consumers of New York for the men quantity. This is an action of ejectment. The party in interest is one of the judges who is to try the case, and the brother of the presiding judge of the court is his lawyer. I think I need say nothing further than this. I do not pretend that these gentlemen would do what is not right or fair, but I say they will be under influences that will permit them to take advantage of every circumstance in their favor. cy of England maintained for a period of 150 years, that built up her immense machinery, created her wealth, and now enables her to manufacture so cheaply as to defy the competition of other counties, while she pays a higher rate of wages than she ever did before. By the adoption of a similar policy, we also can in a few years reduce the prices of our products as low as those furnished in England and France, while labor will be better rewarded than it is under a free trade or low duty policy.

6. We deny this most emphatically. Since a community cannot be prosperous if made up entirely of agriculturists—it must be a support of the importance of the matter to the House, and make this remonstrance a part of my remarks against this bill. I sak attention to the facts set forth in it:

THE somer the country can reduce its national debt and return to specie payments, the better itwill be for the stability of business, and for the general prosperity. Of course this can only be done gradually. The best bill we have seen to

produce these desirable results, is Mr. Morrill's. This bill one purpose of which is to provide for a reserve of gold in the Treasury and the National Banks and for other purposes, makes it unlawful for the Secretary of the Treasury to sell or otherwise dispose of any gold or silver, coin now held y the Government of the United States, or that may heresfter be received by it from duties on imports, as now provided by law, until the balance f specie in the Treasury shall amount to \$203,000,-000, when it shall be the duty of the Secretary of the Tressury to give public notice that all liabilities of the Government of the United States matured and to mature will be paid in coin. It further provides that it shall be unlawful for any National Bank to sell or otherwise dispose of any gold eived in payment of interest or bonds held by the Treasury of the United States as security for

the redemption of its notes while not redeeming its notes in coin, and all National Banks failing to redeem their notes within thirty days after the resumption of specie payments by the Government shall forfeit their charters; that no further edemption or contraction of the legal tender notes now outstanding shall be made by the Secretary of the Treasury; that all surplus revenues beyond a epecie reserve of \$200,000,000 shall be applied to the redemption of the public debt; that the Secretary be authorized and required to issue notes. payable in twenty years from date, and bearing 3-10 per cent interest, payable semi-annually, in arrency, with which notes he shall redeem all indebtedness of the United States not otherwise provided for by law, and which shall mature withtwo years from the passage of the act reservingthe right in the Government to pay 6 per cent in gold in lieu of the 7 3 10 per cent. from and after the expiration of the said two years; that a case holders of any portion of the maturing lebt shall decline to receive in payment thereof the said 7 3-10 notes, the said notes, or so much thereof as shall be necessary for the purpose, shall from time to time be sold by the Secretary of the Treasury, on due public notice, and the avails thereof be applied to the payment of the

said maturing debt. THE total receipts of the Government for 1866 were \$523,977,389, nearly \$50,000 000 more than those of any other year. \$300,-000,000 were raised by internal taxation, and \$180,000,000 came from imports. The total expenditures in the year were \$323,086,215, and while part of the balance has been used in payment of the debt, much is reserved as a basis of specie payment.

Polisville Teachers at Murfreeshoro.—As our readers are aware, Miss Couch and Miss Streeper, late of this Borough, are now teaching a freedmen's school at Murfreeshoro', organized under the auspices of the citizens of Pottsyille and supported by them. To those who have taken an active interest in this work, the following letter from Miss Streeper will be read with interest:

MERFREESHORO, March 21, 1857.

TO Mr. J. A. M. PASSMORE, SCHETARY OF THE POTTS-VILLE COMMITTER OF THE PENNA BLANCHOT THE FORTS-WEN'S AID COMMISSION—Sir:—Miss Couch laving already written you of our pleasant journey and safe arrival, I will endeavor to give you some information concerning our work in the school room. On the afternoon of the 6th inst., we retred our new field of labor, and were much pleased with the appearance of things, although we could not help observing the great contrast between our new school room, and the nice, pleasant only we had so recently occupied.

The school had organized a few weeks before we reached here, as the morning school was so much crowded, that further delay was impossible.

Mr. Buchanan opened the exercises in the usual way by sloging, and then reading a portion of Scripture, which was repeated by all the pupils in concert. After introducing us to our new pupils, and giving them some good savice, he resigned the school into our charge, and we immediately commenced operations.—The most advanced scholars we ascertained were reading in Wilson's First Reader, while quite a number had just began the Primer, and siew were on the cards. I vary soon become much interested in my highest First Reader class. It numbered fitteen of the largest pupils, whose ages are from twenty-three to thitteen; and who are very anxious to learn.

A large proportin of our scholars live three end four miles from Murfreesboro, and yet very few comparatively are tardy. There is a constant change going on in the school owing to the parents frequent change of residence in scarch of work. This is a source of disconragement to the teac best English novel which has been published in this country for many years.

The work is published complete in a large duodecimo volume, and beautifully bound in green and wine moroco, cloth. The book in this respect, would be an ornament to any centre table. Price \$1,50 in paper; or \$2 in cloth.

Copies of this work, also "Woodburn Grange," \$1,50 and \$2, "Our Mutual Friend," \$1,25, and "David Copperfield," \$1,25, the two latter the first tread of Dlakane, American Edition published issued of Dickens' American Edition published by Messrs. here, and we are much more pleasantly attracted than we expected to be.

There are six teachers at present occupying The Teachers' Home, two of whom are from Vermont, one from Maine, and three from Pennsylvania.

The weather is very unpleasant, it having raived or snowed almost every day since the 2nd inst. As soon as it becomes settled, we intend visiting Stone River hattle ground, and many other places of interest in the vicinity of Murfreesboro.

At some future time I may possibly be able to write a more entertaining letter.

Respectfully.

Assault by Murderers and Robbers upon a Duciling in Mahanoy Tounship—Repulse of the Assailants with a Loss of One Killed and One Wounded.—On Friday night, 22d instant, about 10 o'clock, a gang of five Irishmen went to a house occupied by James Gallagher, known as the "Flour Barrel Hotel," which is situated near the junction of the road from Mahanoy City with that leading from Fractville to Shenandesh City, in Mahanoy Township about twelve miles from Pottsville. The robbers demanded admittance which was denied. They then procured a large stone and dashed it against the front door breaking it in. Immediately after forcing the door they commenced firing shots into the house, and some of them made a rush to enter. Gallagher seized a gun which was loaded with No. 5 shot, and fired at his assailants. The entire load entered the abdomen of one of the gang, making a large wound from the effects of which, the hemorrhage being great, he must have died in a few minutes. Duty of Township Auditors.—It may not be generally known that a general law of the Legislature, approved April 11, 1866, requires the bounty accounts of every district to be carefully audited by the Township Auditors, and "prepare a condensed statement of these finances, and publish the same, at the cost of the district for three successive weeks, in two papers." It not only requires this duty to be performed by the Township Auditors, but imposes a penalty of fifty dollars upon each Auditor who refuses to comply one half of which goes to the prosecutor, and the other half to the school fund of the district. It myndies also, that the Auditors shall notify the D. W. BLAND, F. B. WALLACE, FRANK R. LEIR, | Committee. E. F. Bodey,

Whether this man was
shot by Gallagher or by his own friends, is not postitively known, as the window through which the
shots of the assailants came is nearly opposite
the door where the man who was wounded stood.
The wounded man was taken prisoner by Gallagher and kept until next morning when he was delivered into the custody of a constable from Shenandoah City. On Sunday last he was brought
to Pottsville and committed to prison. He gives
the name of Owen McCloskey. When saked who,
his dead comrade was, he replied that he did not
know; that he had been met by four men on the
road and asked to go with them and take a dirik.

CLIMAX. A plain statement of facts. I inherited Scrofula, and many of my relations have died of it. In 1839 my case was frightful. Tumors and ulcers spread, until in 1642, under the advice of my physicians, I went to Avon Springs. I received no benefit-tried every medicine and did everything I could. I had to rest my arm on a cushion, and had not been able to raise it to my head for over a year. The discharge from two nicers was nearly a pint a day. Amputation was recommended; but pronounced dangerous. I could not sleep, and my sufferings were intolerable. A friend brought me an English physician, who applied a salve with which he said he had accomplished extraordinary cures in the
