HOW TO MAKE A WATERFALL. Take two pounds of rage and a bunch of shavings An old tin pan and a bunch of straw; Then steal an old hat of somebody's leavings, And swear it's your own to get clear of the law Next get an old stocking and stuff it with paper, And if it's possible, put in a mole; Then get some old chins and a nutmeg grater, And make them all up in nice little roll. Put all these things in a net of red, And glistening beads must cover them all.
Then fasten it on the back of your head, And you have a "love of a waterfall."

PO-T OFFICE, CONFEDERT X ROADS

(Wich is in the Stait uv Kentacky).

March 28, 1867. I have made many sudden and rather 'stordi

nary changes in politiz-some so very sudden that the movement perdocat conjection uv the conshence. I rekollect wunst uv advokatin free trade and high protective tariff, all within twelve hours, (I made a speech in a agricultooral deestrick uv Noo York in the forenoon at 10 A. M., and in a manufacturin town in Pennsylvany is the evenin, our platform being so constructed that both sides cood find a endorsement in it,) and hev performed many other feats uv moral gymnas tiks; but this last change I hev been called upon to make is probably the suddenest. Last week Toocdy, Deckin Pogram, Captain McPeltor, and I wuz engaged in riddin the Corners uv niggers. We hed endcored em cz long ez we that possible and determined on standin it no longer. Solecting three with we wuz satisfied hed too much spellin-bock into em to be enslaved agin, we wuz preparin notises to be served onto em, orderin em to leave in twenty-four hours, when I reseeved in the Northern mail a letter marked "Free-Alex. W. Randall, P. M. G." I knowd it wuz offishel to winst-that blessed signatoor is on my commisshun, and I've contemplated it too often to be mistaken in it. Its contents wuz brief, and run

"To all Postmasters in the Southern States: The niggers hev votes-consillashen is our best Repairing & Regulding done at the shortest Notice Sept 22, 66 holt. See to it." This brief the not hard to be understood order wnz sealed with the offishel seal uv the Post Offis Department, stampt into putty instid uv wax, to wit : a loaf nv bread, under a roll nv butter, with CO-PARTNERSHIP.-We have this day entered into a Partnership under the firm of H. FARKER & SON, formerly H. Parker, (Boys' Clocking,) for the manufacture of MEN'S AND BOYS' CLOTHING. A large stock of Ready-made Clothing constantly on hand. Also a fine assortment of Clotha, cassimeres and Vestings, to suit the season. Furnishing Goods of all kinds always on hand. All prices fixed to suit the times. ten hands a grabbin at it. I comprehended the situation at site, and set about doin my dooty with both Roman and Spartan firmness. "Deckin," sez I, tearin up the notices, "These niggers we hey misunderstood. They are not a inferior race; they are not descendants uv Ham and Ha-Ing Goous or an armos.

We solicit the patronage of our old customers and friends in general.

Centre Street. ger; it wuzu't Paul's idea in sending back Onesimus to condemn him to servitood. We hev misunderstood the situation, and must make amends. The nigger is devoid uv smell, and is trooly a man and a brother." "Wat?" sed the Deckin, tippin back in amaze-

"Jest wat I say," sez I; "read that," and I flung him the letter.

The upshot of the conference which follered wuz the calling uv a meetin the next nite, at wich all the Ethiopians uv the Corners wuz invited and urged to be present.

The trouble waz to git the niggers to attend the meetin. The fast one I spoke to lafft in my face, and askt me how long it wuz sence I hed helpt hang a couple uv niggers, by way uv finishin off a celebrashen. Pollock, the Illinois storekeeper, got hold uv it, and told Joe Bigler and Joe swore that of the niggers hedn't any more sonse than we give them credit for, in spoosin we cood bamboczle em so cheep, he shood go back to the old bellef, to wit: that they wuz only a sooperior race uv monkeys after all, and by nite every nigger in the visinity wuz posted thoroughly, and out uv all uv em I cood only git four who would promise to attend, and them the Deekin had to nav \$2 aniece. To give colaw I promised em \$5 (to be paid at the close uv the meetin) to sit on the stand with me, wich, bein a very poor man, and having a sick wife in a shanty near by, who waz sufferin for medicine (wich he coodent

git without money) ne accepted. At this pint the idea struck me. I remembered Philadelfy, and determined to hev a scone rivalin the Couch and Orr biznis. "Another thing, Cuff, understand that its a part uv the bargain that when in my speech I turn to you and stomp, you must rise and embrace me."

"I'se a mity low nigger, and wants to buy de old woman some quinine, and wood do most anything foah dat, but, golly, dat's too much !" "Not a cent," sed I, sternly assomin my most piercinest gaze, "unless this is included!" "Well," returned he, sulkily, "of I must I

speck I must, but, goliy-" The nite arrived and the meetin-house wuz full. We that fust uv holding it in the charel uv the College, but give up the idea as impracticable, ez owin to the dillytorinis uv our Northern friends in forwardin sich suscripshens ez they her raised, we haven't got no further with the buildin than layin the corner-stun. In the front wur the four niggers, all in clean shirts, and on the stand wuz the nigger I had engaged. Over the platform waz the follerin mottoes: "In Yoonin ther is strength-For President in

1868, Fernande Wood. For Vice President, Fred-"In the nigger, etrength; in the Caucashen beauty; in the mulatter-who is trooly the noblest uv the human epocies—both." In addishen to these, we dag up all the old mottoes wich Jeff-reen writ, about vooniversal liberty and sich, wick hedn't bin quoted in Kentucky for twenty years, and posted um up; in brief, hed Wendell Phillips' blessed sperit bin

hoverin over that meetin house, it would hev smiled approvingly. I spoke to em elokently on the youniversa brother bood of markind, holdin that whatever else cood be sed, Adam wuz the father uv all mankind, and that the only difference between a white man and a nigger wuz the nigger wuz sunburnt. The nigger, I remarkt, wuz, ondoubtedly, criginally white, but hevin bin, since his arri- INDIA RUBBER GOODS. val in this courtry, addicted to agricultural per soots, he hed become tanned to a degree wich

the it marred his physical beauty, did not inter fere with his sterlin goodness uv heart? There hed bin differences between the races-at time there hed bin empleasantness with no one regre ted more than I. The whites uv the Corners hed not alluz been so considrit ez I cood hev wished They hed flogged several uv em, and hung many more, and in times past hed held em in slavery and sich, but that shood not be that uv at this happy time. It was constooshnel to 20 these things then, and Kentucky wuz eminently a law abiding State. "Here," scz I "on this platform with the flag of our common country over me, I declare eternal friendship to the colored man, and to seal the declara-hen I thus embrace-" The obstinit nigger didn't stir a step. Come up and fling your arms around me, you

black cuss," sed I, in a strange whisper. "Come "No yoo don't, boss!" sed the nigger in a loud voice, wich wuz andible all over the church, and holding out his hand. "I can't trust you a PHILADELPHIA, plessid minit. Gib me de \$5 fust. You owe dis child foah dollars now fo' sawin wood fo' yoak Wniches, Jewelry, post offis, an' ef we's a gwine to hab our rites, de fust use I shel put mine to will be de gettin dat money. Pay up fust, an' de brace afterward. I can't do sich a disagreeable ting without de tash in advance."

This ruther destroyed the effect. The unities PIANOS, MELODEONS, ORGANS, &c., having been wagn't preserved. The niggers in front bust out cash in advance." wuzn't preserved. evident to the dullest comprehenshin that nothin nore coodent be done that nite. Ez yoosual I failed for want uv capital. Hed I bin possessed uv the pairry sum uv five dellars, how different wood her bin the result! Perchance we may, thro that defichency, lose Kentucky. It must never occur agin-my salery must be raised. I can't make brix without straw. Joe Bigler met me next mornin and remarked

spring Melodeons and Harmonium Urgans, for the Counties of Schnylkill, Northumberland and Lehanon, which instruments are universally liked.—
They possess a sweetness and fullness of tone, which has received the united commendation of the musical profession, and induced an almost unprocedented sale. Is offered in the assurance that it is the best and most economical fertilizer in the market. The manufacturers introduce their SUPER-PHOS-PHATE with the guarantee that it is perfectly free om adulteration. The great superiority claimed over other Fertilizers is:
1st. That it is manufactured from Pure Bone.
2d. That a sufficient quantity of acid has been used to convert the Insoluble Bone Phosphate into Superphosphate of Lime.
2d. That the Bone being unburned retains the amonia and makes the a TRUE RAW BONE SUPER-PHOSPHATE.

The Karmer. WORK FOR THE MONTH.

We take it for granted that all our readers have completed their plans for the spring and summer campaign on the farm, and are now ready to commence the busy work of spring. It should be our aim to make "two blades of grass grow where only one grew before," and get our land into the very best condition to produce the crops which we intend to sow or plant. The active labors of the farm commence with April, and in order to bring up our farms to a thorough state of fertility we . should this month get a fair start, and all our work well under way.

BARLEY-is one of the first crops to be sown, which should be done as early as the ground can be got into good condition -Light, warm, mellow soil is the best for barley. Seed should be sown at the rate of two bushels to the acre. Land that has been manured for corn, will, if in good condition, produce a fair crop of barley.

Sow CLOVER-Here, there, everywhere -On wheat lands let it be scattered freely, and a good coat of plaster applied afterwards. It will do more towards fertilizing our lands than anything else we can do. It is the grand renovating plant of American agriculture. We can also apply it with great alvantage on barley, corn and oat land, in fucanywhere and everywhere on the farm. MANURE.—Apply manure freely to meadow land. If we raise good crops of grass and clover, and feed it to our stock, or turn it under: we can soon make a worn out farm rich STONES, STICKS AND BRUSH-should be

mown. Let the land be free from any obstacles that may come in the way of the mow. er, and thus save time and money. VEGETABLE GARDEN. - Do not overlook the importance of a good garden. It should receive early attention, and each day, morning and evening, an hour or more devoted to it. Nothing adds more to the comforts of a farmer's family than a good garden full of fresh

picked off meadow lands intended to be

vegetables for the table. Prows-should be kept going when the ground is in proper condition. There is nothing gained by plowing wet land; it is better. to wait a few days, or a week, and let the ground get dry, so that it will break up and pulverize freely. Attend to the Fences-and repair them. Replace decayed fence rails with good ones. Mond stone walls where the stones are loose or fallen down. Attention should also be given to gates and fence posts, which straighten up

and reset if necessary. THE POULTRY HOUSE-should receive a thorough cleansing on the first wet day. Mix the manure with fine soil, when it can be applied to corn in the hill, or applied broadcast on the land.

ay away, and the broods brought to the house as soon as hatched. Now is the time to raise pullets for laying next fall. Early chickens make the best birds. BEES .- In April remove all absorbing material from the tops of the hives, closing up the holes and all apertures, leaving a small entrance for the bees. Clean out and repair old hives. This will retain the heat, and greatly advance early breeding. Remove all filthy and drone combs. If short of food, don't hesitate to feed. Place the food on the top of the hive, secured from other becs, if you do not wish to attract robbers. A few dimes worth of food will save many valu-

able stocks. Dissolved sugar is a good substitute for honey. Don't neglect the above HOUSEHOLD HINTS. Wood ashes and common sait wet with water, will soon stop the cracks of a stove, and prevent the smoke from escaping. Stir Polland starch with a common candle, and it will not stick to the Iron, and it will

be much nicer. Alum or vinegar is good to set colors of ed, green, or yellow. Sal soda will bleach very white; one spoonful is enough for a kettle of clothes. Save your suds for garden plants, or for parden vards, when sandy Wash your tea trays with cold suds, polish with a little flour, and rub with a dry cloth. Frozen potatoes make more starch than fresh ones; they also make nice cake. A hot shovel held over varnished furniture,

will take out the white spots. A bit of glue dissolved in skim milk and water will restore old crape. Ribbons of any kind should be washed in cold soap suds, and not rinsed. If your flat-irons are rough, rub them with fine salt, and it will make them smooth. Oat straw is the best for filling beds; it hould be changed once a year. If you are buying a carpet for durability, hoose small figures.

A bit of soap rubbed on the hinges of doors will prevent their creaking. Scotch snuff put in holes where crickets come out will destroy them. A gallon of strong lye put in a barrel of hard water will make it as soft as rain water. Half a cranberry on a corn will soon de-Always mend clothing before washing. It

friends and neighbors to publish in your excellent journal a list of the special manures which I use in the cultivation of potatoes, I cheerfully comply with their wishes. I use as a top-dressing for potatoes, a mixture of fifty-six pounds of sulphate of sods, fifty-six pounds of sulphate of magnesia and fifty-six pounds of salt per acre, sown broadcast as soon as the sets are planted. My potatoes so grown have been abundant in quantity and excellent in quality, and have almost I have also found muriate of potash an exsellent manure for potatoes, sown in the drill at the rate of two hundred pounds per acre. I speak of these as a top dressing; the best

manure to plough in before planting, is well rotted stable dung. The following manure will be found to produce good crops of potatoes: Salt, two hundred pounds, muriate of potash, muriate of ammonia and phosphate of lime, one hundred pounds each; spread evenly over the surface, and ploughed in .-This manure has the property of producing a stout good haulm, and the plants retain their oliage longer than when stable manure is employed. With this mixture alone, potatoes have been grown at the rate of three hundred bushels per acre. -- Cor. FARM AND FIRESIDE.

Recipes.

SHREWSBURY CAKE .- Stir together three quarters of a pound of sugar, and half a pound of softened butter. When white, add five beaten eggs, a teaspoonful of rose water, and a pound of flour. Drop it with a large spoon upon fist tins that have been buttered.

CURRIED BEEF. - Take two ounces of butter and place it in a saucenan with two small onions cut up into slices, and let them fry till they are of a light brown; then add a tablespoonfull and a half of curry powder, and mix it up well. Now cut up the beef into pieces about an inch square; pour in from a quarter to a third of a pint of milk, and let it simmer for thirty minutes; then take it off and place it in a dish with a little lemonjulce. While cooking, stir it constantly, to prevent burning. Send it to the table with a wall of mashed potatoes or rice round it .-

BARED PORE AND BEARS. - Have nice, clean, white beans put in, soak in cold water over night. Take a piece of fat side pork, parboll fifteen minutes, then place it in the pot with the beans, which ought to have been cooking an hour already. Boll the pork and beans together until the beans are perfectly soft, then remove them with a skimmer to a dripping, and make an island of the pork, in the centre, having first cut the STUAN HER HERE Jaconna of 700 Straw ind with a sharp knife a quarter of an inch deep in delicate, parallel lines.
