## Miners' Journal.

POTTSVILLE, PA. SATURDAY, AUGUST 10, 1867. UNION STATE TICKET FOR SUPREME JUDGE. Hon HENRY W. WILLIAMS of Pittsburgh.

PENNSYLVANIANS! When you vote in October, remember that Judge SHARSWOOD, the Democratic candidate for Supreme Ladge in Pennsylvania, in 1864 when the Republic was battling for its existence against armed Treason when your sons and brothers were exposing their lives that the Union might be preserved; when it was of the utmost importance that confidence in the financial credit of the country should be preserved-for we never could have fought the rebellion to a successful these without the sinews of money-delivered an opinion in the case of Borie va. Trott, in the District Court of Philadelphia, declaring the Government legal-tender notes-or greenbacks-to be unconstitutional and consequently illegut. Citizens, would it be safe to place a man who Rebels, on the Supreme Bench of Pennsylvania?

## FOR A CONVENTION

TO AMEND THE STATE CONSTITUTION We raise the above Banner, and intend fighting it out on this line.
We propose in the Constitution, increasing the number of Representatives to 400, and Senators 100, limiting the session to 40 days with pay at 35 a day. The Representatives to be elected from single districts representative as the content from angue marries hroughout the State.

Pass a general law fer all corporations beyond the reach of individual enterprise, and no special laws.

All corporations with an income not exceeding \$25. All corporations with a minome not exceeding \$20,000, to be granted by the courts.

For the halance of the business of the State, 40, and in fact, 50 days, would be sufficient for all the legislation the people require. This is the only plan to break up the present corrupt system, because large bodies in short sessions are not so liable to be corrupted.

Union County Convention. The members of the Union Party of Schuyikiil County, and all others opposed to southern rebels and their northern sympathizers ruling the land which they at tempted to destroy during the recent Rebellion, and who are in favor of establishing the Union and free institutions on a permanent and enduring basis, in accordance with the Reconstruction measures of our particle Congress, are respectfully requested to assemble in their respective election districts throughout the County, on

Conty, on Mounts, August 24, 1867.

hetween the hours of 3 and 7 o'clock in the afternoon, and elect 2 delegates from each district, to represent them in the County Convention to be held in the Court House, in the Borough of Pottsville, on Monday, August 26, 1867, at 10 o'clock in the forenoon, for the purpose of nomat 10 o'clock in the forenoon, for the purpose of nom-mating a Ticket to be presented to the voters of Schuylkill County at the ensuing election. The following officers are to be nominated: ONE JUDGE OF THE COURTS, to be elected in conjunction with the Counties of Lebanon and Dau-hin. phin.
ONE PERSON FOR SENATOR
THREE MEMBERS OF THE GENERAL ASSEM

BIX.

ONE PERSON FOR ASSOCIATE JUDGE.
ONE PERSON FOR ASSOCIATE JUDGE.
ONE PERSON FOR SHERIFF.
ONE PERSON FOR COUNTY TREASURER.
ONE PERSON FOR COUNTY TREASURER.
ONE PERSON FOR DIRECTOR OF THE POOR.
ONE PERSON FOR AUDITOR.
The election of these delections.

ONE PERSON FOR ADDITOR.

The election of these delegates will be held at the places and by the persons following, respectively:

T. Garrendow, Chairman.

F. B. Wallack, Secretary.

Since the 1st of May the public debt has been reduced nine millions of dollars. This is doing pretty well for a radical and reckless

THE HAMPTON FURNACE property, located in Lehigh County, is offered for sale. This is a rare chance for those who wish to engage in the iron business. For particulars see advertisement. An immense mass meeting to protest against the threatened removal of Sheridan,

was held in New Orleans on Tuesday night If Andy should remove him, Congress immediately on reassembling should impeach A. Y. The Democrats are staggering on the negro suffrage question. The Boston Post says: "We have urged the North, again and again, to make its citizens equal before the law and before the ballot box. We should be glad to see the Massachusetts Suffrage law adopted by every State in the Union. No matter what a man's color or size may be-if he can read and write, is 21 years old (we have no objection to 18), and so forth-let him vote." ed have carried, the Kentucky election. Why valuable citizens. Long a resident of this not? Kentucky to day, is more disloyal than | County, and filling various public offices of South Carolina. During the Rebellion it did | high trust and responsibility, he sustained in more than any other single State to obstruct all his relations both public and private, the the war for the Union, and it is now doing highest character for integrity and truthfulall in its power to defeat satisfactory and safe | ness. No one could have been more reliable Reconstruction. When universal suffrage and trustworthy, and have enjoyed a larger becomes the national policy-a time which share of the unlimited confidence of a large

placed right, we presume not before. A Succession.—Before making up their list of books for the Fall Schools, teachers are advised to examine Quackenboss' new Arithmetics, which seem to possess features of decided and superior merit. They are being extensively introduced, and are commend ed in the strongest terms by some of our best teachers who have used them. The Publishers, D. Appleton & Co., of New York want a local agent in every county to work for these Arithmetics, and offer liberal terms.

WHEN Flanigan and his bread-and-butter coadjutors went to Washington lately to con. sult with Andy about the feasibility of running a third candidate in Pennsylvania, by the Johnson party, he told them that he had been born in obscurity, that he had filled every position in the country from Alderman to President, that he left the flag and its thirty-seven stars and the Constitution with his friends, and that he did not feel warranted in profering any advice. The County jail would hold all the friends Andy has in Pennsylvania.

THE READING RAILROAD COMPANY. -That of the meeting. Mr. Hughes delivered an address, rather historical in character, showing how the Reading Railroad Company has

rise and reduce the value of investments. He did not hesitate to state the belief that: the Company was seeking the power to mine, buy and sell Coal, which if acquired would be the last and most fatal blow at the prosf landed and colliery property in this County is estimated at one hundred millions of dollars, an investment of one per cent., or gave such an opinion in the interest of Rebellion and one million of dollars, would secure the construction of two competing outlets from this Region. Capitalists abroad have promised liberal assistance if Schuylkill County will take hold of this matter in the right spirit. It is imperatively necessary that somethin should be done to protect this great Coal Region with its millions of property, from

the rapacity of a huge and crushing monopo. ly. It is now in a terrible condition. Collieries are stopping; miners and laborers with It is worth a trial, as it gives great satisfaction. their families are threatened with want; business and capital are being driven to other and more favored localities, as regards transportstion facilities, and the question is, shall everything be suffered to go to ruin because a rail road company with thirty millions of capital, must make heavy dividends to please its for. eign stockholders and Third street stock jobers? All classes of citizens, even the poorest, are interested in this matter, and the people should not let this matter rest until the money asked for is secured to build a competing road to the Eastern markets. To remain apathetic now with the state of affairs that is before us, would be worse than folly, it would be madness. They who could be free themselves must strike the blow. United and organized evils of which they so justly complain in connection with the policy of the Reading Rail-

road Company, if they evince the will, THADDEUS STEVENS, Mr. J. E. Barr Lancaster, has just published a likeness of the Hon. Thaddeus Stevens. It is the best portrait we have seen of the "Great Common er." Taken from a photograph made at nome, engraved in Philadelphia, published at Laneaster, and the subject the first and foremost figure in Pennsylvania's history today, it is from first to last a gratifying monu ment to the artistic enterprise and nationalposition of our Commonwealth. In speaking of this fine portrait and work of art, the Philadelphia Press says:

as if weighing in the balance what it rests on, are all faithfully and powerfully reproduced.

Mr. Stevens is the embodied success of a great idea. No matter what many may think of him or his measures, he is the object on which it eye of the nation is riveted, and to find which it turns to Fennsylvania. His honest hatred of the trembling system of wrong, his uncompromising firmness, his infectible will and tenacity of purpose, are part of the record of our State, and we hardly think that there is any Pennsylvanian, whatever his political proclivities, but will be glad to secure this speaking likeness of the rugged old Spartan who so soon will sleep in Shreiner's Cemetery.

Subsectivitions to this printing and the formitted. Subscriptions to this picture, price \$5, will

be received at this office. We invite an ex-

amination of it. DEATH OF A REMARKABLY AGED MAN .- Freder ick William Kaseman died in Shamokin Township. Northumberland County, on the 1st inst., aged 107 years, 1 month and 22 days. Although having reached this remarkable age, only a few years

ago h cradled, bound and shocked 12 or 14 dozen of rye in a day, without hat or shoes, and only during the last summer he was able to hee and No trouble nor expense seems to have been take out his own potatoes. THE TENNESSEE ELECTION .- The result of this election has been a most signal victory for the Union Republican party. After a fair contest Brownlow has been elected Gove nor by the largest majority ever given to a candidate in that State, while the whole loyal delegation to Congress has been elected to Congress by signal majorities. This election is the more important as it proves that in future elections throughout the South the freedmen will as a mass, vote with the party that secured them liberty and then enfranchised them. The rebels and copperheads at the late Tennessee election endeavored to create disturbances, for the purpose of bringing odium upon the colored people, but they signally failed. Everything passed off quietly. All hail, the noble State, that has repudiated

Andrew Johnson in his own home. THE QUESTION OF IMPEACHMENT.—The impres sion prevails extensively that the Judiciary Com mittee of the House have in reality relinquished all intention of proceeding in the matter of the impeachment of the President, because of the inconsequential nature of the testimony so far taken, and because of irreconcilable difference of opinion among the republican members of the Committee as to the proper course to be recommended. All persons who carefully scanned the debate in the House on this matter, during the last day of the recent session, have probably formed a different conclusion. The inference would seem to be well grounded that a majority of the Committee are substantially agreed in opinion, that there is ample ground for impeachment, and that articles ought to be presented.

CIRCULAR.

DEAR Siz:—It is designed to hold a convention of the teachers and the friends of Sabbath Schools in Schuylkill County, on the 27th of August, at 11 o'clock, A. M. to continue for reveral days, in Pottaville.

The powerful agency and influence of Sabbath Schools for good, entitle them to the highest consideration, and it seems proper; that here as in other counties, their friends should meet in large popular assemblage, from year to year, for conference and encouragement, to report progress and to lead to higher and nobler advances and more marked and signal usefulness—eminently so in this County, where a large and needy population require all thus, Christian kindness and love can do for their progress and prosperity: to rescue them from vice and all the dangers that beaet them, and to lead them kindly and gently into the paths of peace and neefulness.

Allow us, therefore, garnestly to beer you to give to entiness. Allow us, therefore, earnestly to beg you to give to is subject your special attention, and invite all Sab-th School teachers and friends of that noble cause to

this snyect your special attention, and invite all sanbath School teachers and friends of that noble cause to
meet in the coming convention, that it may at once be
imposing in numbers, wise in its counsels, cheered in
its action, vigorous in its measures, and in its inflence
crowned with the happiest encores.

Time and effort and zeal expended in this good cause
can never be thrown away.

Very respectfully, yours,

In the death of Samuel Huntzinger, Esq., OF COURSE -The Rebs and Cops combin- | we have lost one of our most esteemed and cannot be long deferred-Kentucky will be circle of friends and acquaintances. His memory will ever be held in respect and honor. But few men bequeath to their families a richer inheritance, in a good name and unsullied character.

His habits were simple, quiet and regular. He might well have hoped for a long and green old age; but God, and not man, is the disposer of human life, and as we cannot scan-His purposes, it is our duty to strive to be always ready for the great change.

From a communication in The Muncy Luminary on the Anthracite Coal Region, we make the following extract:

A full, clear and interesting account of Coal mining can be found in a work called "Coal, Iron and Oil," Published by Barnan and Dandow, of Fottaville. It is a new book and merits a wide circulation, contains over eight hundred pages, and gives more than two hundred figures and maps representing the coal territories, formations, practical operations in mining, machinery used, do.; &c. Mr. Barnan is Editor of the Minney Journal, has been in the Schuylkill region for more than thirty-five years, has traveled considerably and is much interested in mineral formations. Mr. Daddow as a practical miner and engineer has gone to great expense and care, to llowing extract: engineer has gone to great expense and care, to produce a work worthy the interests he treats. It ought to be in the hands of every reading man, for it amply repays the most careful persual.

THE COAL TRADE. 

). A. Smith's, Centre street.

Pottsville, August 10, 1867. The quantity sent by railroad this week i 61,552 14—by canal 24,684 00—for the week 86,236 14 tons against 193,048 tons for the corresponding week last year, a falling off for the present week of 46,812 tons. The trade is in a bad condition. A number of collieries have been compelled to stop. throwing many miners out of employment our people have the power to remedy the For months the trade has yielded the and bringing distress upon their families mass of coal operators no profit, and at the present reduced prices, they are worse off

than ever. To the rapacity of the Reading Railroad Company, which has robbed the producers of this County of their hard earnings, by extortionate charges for transportation, much of this state of affairs is due. The only hope for the landed and colliery interests of this Region, is to become independent of this monster corporation and grinding monopoly, by constructing competing roads to the Eastern markets. The sooner that decisive steps are taken to consummate this, the better it will be for all classes here from the capitalist to the miner and laboring man. The trade sums up this week as follows,

It will be observed by the above table that while the entire product for 1867 up to this time, falls short only 156,944 tons, as compared with 1866, THE LOSS FROM THE SCHUYLKILL REGION AMOUNTS TO 565,096 TONS. This Region which should from its capacity and importance, produce from its capacity and importance, produce over one-half the Anthracite coal mined, will this year produce less than one-third. And deep as those for common pawder; that was deep as those for common pawder. ly exercise it.

THE HILL & HARRIS COLLIERY.—The Coal furnished from this Colliery which is located near Mahanoy City, has such a deservedly high reputation in Philadelphia, New York and other Eastern markets, that we are disposed to refer to the operation at some length, and state the manner in which their Coal is prepared for market. The breaker at this Colliery is one of the largest in the County. spared to prepare the Coal mined in the best possible manner, while at the same time the arrangements are such that very few men are required to handle the Coal. As the Coal comes out of the gangways in long trains, it is dropped into the foot of the plane, one car at a time, by gravity. It is then hoisted by Martz's patent dumper, which seizes the car, lifts and dumps it, and returns it to its place without being touched by band. Inside the breaker the facilities for dividing and cleaning the Coal, are very complete. There is plenty of room and light everywhere in the building. After passing through the rollers and screens the Coal runs out on large wide tables, slightly inclined, over the pockets or bins, around which can be seen on any busy day, large numbers of boys, known as "slate. pickers." One sits in the centre of each table to spread the Coal before the others, who finger every piece, separate the slate, and pass the Coal down into the proper bins. The presiding genius of the juvenile assembly stands by much like an old-fashioned schoolmaster with rod in hand, to keep the boys at work, and to watch carefully, that they do not put down any slate. This novel but efficient plan was perfected by the firm, the members of which know exactly what is wanted in the market and they have succeed-

ed admirably in affording satisfaction to their customers. While they have been doing this their facilities are such that very little extra expense is incurred, and they are enabled ship a large amount of the best Cost. On a recent visit to this Colliery we foun them "patting through" about five hundre tons per day, and all working so smoothl and quietly, that one would hardly suppos they were "half trying." Messrs. Hill & Harris certainly merit th

great success they have met in endeavoring to give their Coal a firm hold on a strongly mpetitive market. BLASTING POWDER-A NEW INVENTION .-Anything which will have the effect in its use of lessening the expense of mining coal, is matter of interest not only to the miners bu to the entire population of this Region, wh are dependant upon that industrial pursu either directly or indirectly, for their mainten ance. Especially at this time when genera trade is prostrated, and the mining interest of the Region are at the mercy of an extor tionate railroad monopoly, the rapacious pol cy of which is rapidly closing every collier n the County, is it important that everythin which will cheapen the cost of producin

coal should be used. These thoughts were suggested on Saturday last while we witnessed some experi ments at St. Clair and Wadesville, with a blasting powder, recently invented by Dr. L. New York. 2 1042 25 H. Ehrhardt, a German chemist and physi cian, of Boston. At St. Clair the spot selected for the trial was nearly opposite to Johns's colliery, on the side of a hill covered with huge masses of conglomerate rock. The explosive force of the powder was tested in numerous blasts; common sand tamping was used, and the charges were fired by electricity and common fuse. The charge and depth of the drill-hole in each case, as we noted at the time, were as follows: First hole, 2 feet, 7 inches deep, 14 inches charge of powder.

Second hole, 8 feet, 10 inches deep, 10 inches charge. Third hole, 2 feet, 8 inches deep, 6 inches charge. Fourth hole, 2 feet, 11 inches deep, 9 inches charge. Fifth hole, 2 feet, 9 inches deep, 5 inches charge. The explosive power of these charges, was truly surprising. Huge boulders containing many cubic yards of conglomerate rock, were split and rent asunder. The relative quantity of the new compound used was only mining Superintendent at Hickory Colliery, a

gentlemen present by Mr. John C. Northall, Ches the mining Superintendent of the works of the Mammoth Vein Consolidated Coal Company to visit the shaft of the Company at Wadesville, and witness an experiment with the powder. Many of those present accepted the nvitation and proceeded to the shaft. We were among the number. We descended the shaft which is two hundred and twenty yards in depth—the deepest we believe, in the country—at the bottom of which gangways have been driven during the past six weeks, on the even foot vein, to a distance east of about wenty yards, and west shout sixty yards. Mr. Northall has also sunk to the Mammoth ein, which at that point is only thirteen feet thick. We might remark en passant, that we examined the timbering, etc., of the shaft and gangways, and found everything conructed of the best material and in the mos ubstantial manner. In Mr. Northall's hands and from the excellent plans he has adopted to work this colliery, we have no doubt it will ecome one of the best and most productive perations in this Region. The quality of

he coal now taken out is very fine. We nake these digressive remarks because we think Mr. Northall deserves credit for the admirable manuer in which he is managing this fine colliery. Dr. Ehrhard's powder was tested at the face of the west gangway. We asked the miner who was preparing the Mill Creek. Mahanoy & Broad Mt. Little Schuylkill. charge, how many inches of the common blasting powder he would put in the drillhole, if he were to charge it with that. He replied, fifteen inches. Eleven inches of Dr. Ehrhardt's powder were then put into the hole, and the charge was fired with a common fuse. The effect was such as to send a considerable quantity of the coal several yards into the gangway, proving that a nine inch charge of the powder would have been sufficient for all practical purposes. A feature of this powder, one highly appreciated by miners, is the fact that it produces but a small amount of smoke with no offensive odor. This renders it, independent of its cheapness, xcellent for mining purposes. Major Anthony informs us that the miners at his colliery after trying this powder will use no other. To give a plain idea of the explosive force of this powder, we might state that

fifty pounds of this powder will do the work of about one hundred and twenty pounds of the common blasting powder, while its cost per pound is somewhat less. We will describe the peculiar properties of the new powder. It is composed mainly of two ingredients, one of which, when separate from the other, is no more combustible than common saw-dust, and the other is nearly incombustible. Being mixed, and ignited in the open air, the compound burns very much like wet gunpowder, and a person might apply a match to a keg of it and avoid being burned. Its great peculiarity lies in its tremendous explosive force when excluded from air, as in a loaded drill-hole, or gun, when the product of its combustion is a ges which greatly exceeds in power that produced by common powder. The combustion. also, is much more thorough than that of

common powder, very little smoke, as we have already stated, being produced. An have already stated, being produced. An important recommendation, in view of the danger in using the common powder in this respect, is that the compound cannot be ignited by concussion. Other advantages which are claimed for it, and which were demonstrated on Saturday last, are, that in blasting, Beaver Meadow. Ta ter tamping does not deteriorate it; and that
as we particularly observed in the mine at the
Wadesylle shaft, the small amount of smoke.
Produced is not of an offensive odor. In this
cennection it might be stated that the comnound is used in Mt. Conic tended in Stillman.

RON WORKS FOR SALE.—The undersigned offers at private sale the Hampton Furnace Property, strusted in Lehich county, 3 miles
from Millerstown, a station on the East Penna Railroad. Belonging to it are 90 acres of
land, 50 acres of which is of the best
farming land. Also, a fine new Mansion House, 9 Tenant houses, nearly all
as good as new, a large Barn for five
teams, Coal shed, to hold 150 loads of Coal, new
Shop.
The Water

Bridge House and Casting House and Blacksmith Shop.

The Water-power is good, always having enough water to insure a strong blast. A new Dam, sufficient in all purposes, was built two years ago—Water Wheel and Bellows as good as new. The Teams and other personal property and also the undivided half of a valuable Bed of Magnetic Iron Ore will also be gold private, and at reseasonable terms. These Works are only for making Cold Blast Charcoal Metal, which is the best kind for Car Wheels, and has also been used for Army and Navy gunz.

More Iron has been made at these works per week, than at any other works, of life size, (except two), is also been used for army and Navy gunz.

First growth timber is plenty within a radius of 10 miles, and enough can always be had to make a full blast. Good Hematite. Ore is near esough to han with teams. Limestones are within a quarter of a mile.

As much possession as is necessary to prepare for next year's blast will be given to the purchasers.

This is a rare chance for those wishing to engage in this business, and is worth the attention of parties who need Charcoal metal for Car Wheels and other proposes.

Postscript. THE LATEST NEWS. Saturday, August 10, 1867. The Johnson-Stanton Difficulty-Re-moval of Rebels by Sheridan-The In-dian War-Miscellany. The Washington special dispatch to the Boston Daily Advertiser, Angust 7th, speaks of the Johnson Stanton difficulty as follows:
"Since the fight has become an open one; the fact was here." the fact may be stated that a few weeks previous to the adjournment last Spring of Congress, lacts came to the knowledge of the War Department and General Grant's office, that convinced Mr. Stanton and General Grant that difficulties of a most serious character would surely follow an adjournment to December. The earnest importunities of these officers alone induced Senators to hold the nower of meeting in their own hands. these officers alone induced Senators to hold the power of meeting in their own hands.— From that time the President has waged a bitter war on Mr. Stanton, who had thwarted his deep schemes from the first hour of this trouble to the present. General Grant has been in full accord with Mr. Stanton, and heir consultations have been constant. They ad a long interview last night.

had a long interview last night.

"The present action of the President is openly proclaimed by his supporters to be but the inauguration of a policy which will remove all the official obstacles in his way. The attack through the press and through the counsel for the defence in the Surratt case upon Mr. Stanton and Judge Holt is part of the same attack, and by the same measures it is hoped to force Judge Holt out of his position. There is also the best authority for saving that the edministration is thority for saying that the administration is acting in accordance with the expressed wishes of the rebels at Anapolis. Delegates to the rebel convention there are contemplating tho-removal of Vice Admiral Porter, because he has rendered himself obnoxious by his adical views.
"As to General Sheridan, the President hes.

"As to General Sheridan, the President has broken down for the time being, under the influence of General Grant and appeals from his own friends, who contend that the responses from the country show plainly the great danger of his removal only serving to make Gen. Sheridan more prominent for the Presidency. These urged a transfer of the point of attack to Mr. Stanton, and no movement on General Sheridan is now looked, for until Mr. Stanton's case is disposed of."

Edward Dougherty, Judge of the Twelfth district of Texas, has been removed by Gen. Sheridan, "for denying the supremacy of the laws of Congress, stating that he would not obey them when conflicting with the laws of Texas, and openly denouncing the government of the United States in the presence and offlice of Breyet Major General J. Reynolds. office of Brevet Major General J. Reynolds, commanding the sub-district of the Rio. Grande, "Edward Bruce succeeds Dougherty.
Thomas J. Adams, Chief of Police of New Orleand her learning the sub-district of the Rio. Orleans, has been removed by General Sheri-dan at the request of Mayor Heath, and J. J. Williamson has been appointed in his place. The announcement that the Indians on the Plains have commenced throwing trains from the railway track, killing an engineer, fire-nian, and brakesman, and burning freight, indicates that a drastic and comprehensive, policy, providing for a complete removal of the savages from the regions adjacent to the lines of travel, is now becoming imperativenecessary. The country is still waiting for the verdict n the Surrait case. As yet there is no intimation of when it will be rendered. It is reported that the jury stand nine for convicon and three for acquittal, which is proba-

bly authentic.
The rumor that President Johnson had written a note to Secretary Stanton saying that he would not recognize his official acts is pronounced unfounded by a Washington The Indian Commission at St. Louis, have agreed to invite the Indian tribes north of the Platte river to a conference at Fort Larturned to New Orleans from Vera Cruz, the

the business as usual:

Executive Massion.

Washingto, Angust 5, 1867.

Sin: Public considerations of a high character consider me to say that your resignation as Secretary of a will be accepted.

Very respectfully,

e Hon. Ewix M. States To which Mr. Stanton replied as follows: WAR DEPARTMENT, August 5, 1507.
Sin: Your note of this date was received, stating that public considerations of a high character constrainty you to say that my resignation as Secretary of War will be accepted.

To reply, I have the honor to say that public considerations of a high character, which alone have induced me to continue at the head of this department, constrain me not to resign, the office of Secretary of War before the next meeting of Congress,

Very respectfully, yours,

Bown M. Stanton. TO THE PRESIDENT. A decided check mate of King Andy I. JUDGE PIERREPONT in his masterly closing peech to the Surratt jury, effectually squelched the Copperhead story that Mrs. Surratt was not commended to Executive clemency by the Court which tried and condemned her. He proved that the recommendation of mercy was among the papers presented to the President by Judge Holt on. the 5th of July, 1865, when the Executive approval of the sentences of the assassination conspirators was written out by Judge lolt and signed by the President. Johnson

denies it, but then everybody knows that Andy will deny anything that places him in an unenviable position. ----COLONEL ALEXANDER VON SCHOOLDER .-This week we were grieved to hear of the death of a personal friend, Brevet Colonel Alexander Von Shroeder, who served with distinction during the late Rebellion, in the Army of the Cumberland. He was on the stalls of Major Generals Rosecrans and Geo. II. Thomas. He had been a European officer of experience and reputation. At the Battle of Chicamauga he was taken prisoner while carrying an order, and suffered the fate of a prisoner at Belle Isle and Andersonville. The service loses a fine officer, while his late companions-in-arms, who knew and admired the man, sincerely mourn his sudden death,

road Company and to construct other outlets from this Region, is already perceptibled in the stock market as far as Reading is concerned. On Thursday last those shares declined to 521. THE BORDENTOWN FEMALE COLLOR, of which Rev. Jolfa H. Brakeley, A. M., in President, is an Institution for the careful and thorough instruction of young ladies, which we can comnend. The Winter session will commence Sen-

The Wyoming Seminary and Commercial College, desirably located in the Wyoming Valley, is a first class Institution. There are many pupils in it from this County. The coming section will commence on the 5th proxime. See advertise-

s over 40,000. Wool is evidently, at a promium lown there.

EDS. MUNES' JOURNAL—Gentlemen:—In your last issue I noticed that complaint was made against the Philadelphia and Reading Railroad, for not supplying passenger cars sufficient to accommodate the people who attended the Temperance Parade at Mahanoy City on July 20th, and that you stated that the unfortunate accident that beele one of our conductors was attributed to the fact that Ireight cars were used in transporting passengers. Allow me to correct this matter as I had the arranging of the supply of cars. I called upon G. A. Nicho's, Esq., General Superintendent, at Reading and after stating our wants, he remarked that he could only supply a limited number of passenger cars, whatever excess of the number he could furnish must be freight cars, and I accepted the-offer, as it was the best that could be done. If there are any complaints to be made, I am the responsible party, not the Philadelphia & Reading Railroad Co. I make this statement out of justice to the Company, as I know they are very liberal in cases of this kind. [CONMUNICATED.] A Lot of flat Rail Road Iron, 11/12 and 21% for sale cheap, BRIGHT & CO.
May 25, 167
