Extract from His Opinion in the Case of Borie vs. Trott. "On the whole, then, I am of opinion that the provision of the act of Congress of February 25th, 1802, declaring the notes issued in pursuance of that act to be lawful money, and a legal tender, is CNCONSTITUTIONAL.

"This renders it unecessary that I should consider the other question which has been made, as

sider the other question which has been made, as to the effect of the special agreement to pay in lawful silver money of the United States. I am in favor of entering judgment for the plaintiff, but as the majority of the court are of a different opinion, judgment for the defendant,"—Copted from the Philadelphia Age of 23d of February, 1864, where the opinion is published in full. It may also be found in the Legal Intelligencer of March 18, 1864, page 92.

In the same copy of the Age is a carefully prepared eulogy of the judge and this opinion, in which is the following: "Judge Shanswood reasons upon and decides the case as if he were some lofty spirit sitting far above and out of the contentions and strifes of the world."
Will not the holders of greenbacks and Government bonds consider the judge as quite too ele-vated and etherial for such earthly honors as a seat

THE STATE LIBRARY.—Pennsylvania has without doubt the finest library room in this country. The design and execution are exceedingly creditable to the gentlemen who were engaged in the work. We have never seen a room the tout ensemble of which is so cheerful and pleasent. The room is one hundred and two feet long, fifty four wide, and nearly fifty five feet high. A gallery sustained by Corinthian pillars runs around the entire room. The present capacity of the casing is thirty-five thousand volumes, which can be increased to admit the shelving of one hundred thousand volumes. There are over

twenty-eight thousand volumes on the shelves, many of which if destroyed could not be replaced, they are so rare. This libra ry contains the laws of all the States in the Union. It is extremely doubtful whether any other library in the country can make a similar exhibition. We will not give a minute description of this fine addition to the Capi tol, for it would fail to give an adequate idea of the great beauty of the room. We will simply content ourselves with advising those of our citizens who may happen at any time to be in Harrisburg, to visit the room, where they will be courteously received by Wm. Forney, Esq., State Librarian, or by his po life and accommodating Assistant, Mr. Geo. H. Morgan.

The new building was formally inaugurated on the evening of the 3d of July last, on which occasion Gov. Geary delivered an address to an assembled audience of seven hundred ladies and gentlemen. In speaking of the financial history of the extension of the Capitol, the Governor stated the interesting fact that the cost of the entire work is liquidated from sources which impose no burdens upon the people. Said the Governor: upon the people. Said the Governor:

Neither direct or in an indirect way have the people of the State been relicd upon to pay the erginse of this enterorise. By section thirty-one of the general appropriation law of 1864, it is enacted for the purpose of ral-ing revenue to meet the appropriation made to do this work, an additional enrolment tax of ten dollers shall be charged upon every private bill passed by the Legislature, except upon those granting pensions and gratuities. The remount of revenue from this source, lest year, was nearly five flourand dollars. From this it will be seen that the entire cost of the capitol extension will be liquidated in a very few years, without resor ng to taxation in a general way to meet the appropriation.

We convertible to the State way a to the second of the capitol extension will be liquidated in a very few years, without resor ng to taxation in a general way to meet the appropriation.

We congratulate the State upon the possession of a Library building, so beautiful in architectural design, so excellent in the perfection of its mechanical workmanship, and which is capable of accommodating a larger number of volumes than any other single library room in the United States

VOTERS, BEAR THIS IN MIND.—The election in Pensylvania in October, is to decide more than the success of candidates for the State and county officers. Contests at the ballotbox are decided upon principles, whether political parties so will it or not. The people of the South who armed for the destruction of the Government were whipped on the the Philadelphia market is worthy the attenbattle field. They resorted to the sword as an arbiter of the difference which could have first hand. been adjusted without its aid and they were defeated. .. But they are not satisfied with the overthrow in battle, they are not content with the logic of war. The ballot-box is now to decide still further the injustice of treason; the power and ability of those who believe in strong government. It is necessary that every voter know that there is as much force in a ballot as in a bullet when the contest is between loval men and traitors. The people of Pennsylvania must decide with the ballot as they did with the bullet, whether or not traitors shall control the Gov ernment. We must decide whether Northern and observance of the law shall prevail, or whether Southern ideas of resistance to the law, encouragement of disorder, defiance of the authorities, murder, arson and revolution shall be established. This is the issue of the contest now waging in Pennsylvania.

THE ANTIETAM DEDICATION.—The dedica tion of the Antietam Cemetery took place on Tuesday last. The traitor Johnson made an effort to turn the solemn ceremony into a political concern, which was an insult to the loyal citizens present and to the patriotic dead who sleep beneath the sod at Autietam. Johnson had his rebel programme arranged, and was carrying it out when Governor Geary was called for loudly. Johnson and his rebel friends attempted to choke down the Governor, but the lovalists present would not sub

Whereas, in a National Convention of the Grand Army of the Republic, the cardinal principles of this great Order were declared to be:

First. That the Grand Army of the Republic is organized to maintain, in civil life, those great principles for which it stood in arms under the national flag; that it stands pledged to crush out active treason, to advance and superfective loyalty, to secure sound constitutional flocity to all men, and to vindicate, everywhere and at all times, the full and complete rights of every loyal American citizen sgainst all combinations of force or fraud that may attempt to deny or deprive them of such rights.

Second. That we pledge all the power and influence which as an association we can legitimately wield in the most especial manner to those gallant men who stood fast by the country in the hour of its agony, in the rebellious States, and who, through all manner of loces and injuries—persecutions by lorce and persecutions and reference and injuries—persecutions by lorce and persecutions.

fast by the country in the hour of its agony, in the rebellious States, and who, through all manner of locaes and injuries—persecutions by locae and persecutions under color of law—maintained their integrity and vindered their loyalty. And we solemnly declare that no power that we can use shall be neglected until they are throughly and completely protected in the active exercise of every right of American freemen, through the entire country over which our flag floats.

And whereas, At the present critical juncture in the political Pictory of the sation, any lack of sympathy with the party which esponses the principles to the success of which we declare our devotion, any suplineness on the part of individuals, any aid rendered to the party by whom those principles have been bitterly opposed, whether on the ground of personal feeling or from other cause, or any failure ') do all that may be in our power to aid in 1 accting the triumph of the political party which represents us, would be alike infinical to the solemn declaration of our Order in conventions essembled, and subversive of the great ends to effect which we were called into existence; therefore, Be it declared, as the serse of this Convention, That it is the colemn duty of every convention of every of every true—east edsolder, and of every other lowal voter, to devote every energy to securing such a trumph for each and every candidate of the Union Republican party as will prove to the nation that her sone who defended her in any as ever freed at the expense.

It was moved by Comrade S. B. Wylle Mitchell that the Department Coromander be requested to take measures to provide for a proper compliment to General Shoridan in case he prives through Philadelphia. It is proposed that the Grand Army shall unite in a grand serenade to that hero. Adopted.

On motion, a committee was then appointed to aid in giving more public expression to the sentiment of the loyal soldlery, by holding a grand mass meeting at some time yet to be fixed.

His eye is on the traitor now in the Presideutial chair, and we doubt not that he will people in time of contemplated acts of usurpation. Col. What may happen between now and the 21st of November, when Congress meets, no good man can tell—though, as I nave said (and as you have been told by others that deserve, because they have never dishonored, your full confidence), the worst may be anticipated. The Presidency has become a despotism of which one malignant man is the head, surrounded by reckless satellites like J. S. Black. "Occasiona" looks to Grant. In this thick and

PHILADELPHIA MANUFACTURES.-We are somewhat astonished to notice that the Quaker city of Philadelphia puts forth a claim to being, not only the greatest manufacturing city on this continent, but, with the excep-

ries having a capital of \$73,318,885, which employed 98,000 hands, and produced an annual value of \$136,000,000. Recently, Mr. EDWIN T. FREEDLEY, a well known author. has prepared a volume of 700 pages, on the Manufactures of Philadelphie, and demonstrated that, in 1866, the factories produced OVERTWO HUNDRED MILLIONS OF DOLLARS OF STAPLE GOODS. This is an astounding exhibit; no other city on the American continent approximates this amount. In 1855, the State of Massachusetts, including Boston Lowell, and all her famous manufacturing towns, did not produce more than two hundred and forty millions. In 1860, New York had only seven small Cotton Goods Manufactories, and no Woolen mills; Philadelphia is now the commercial centre of two hundred and sixty Cotton and Woolen factories, and has besides, several thousand hand looms, of which the annual product is equal to that of Schuylkill,..... seventy additional mills of average size.-The class of Dry Goods manufactured in Schuylkill over Wyoming,.... 738,149 Narrow Textile Fabrics, are made there as follows: every year. Of Carpetings, the product Wyoming, amounts to nearly ten millions of dollars; of Schuylkill, Ready Made Clothing, to eighteen millions; of Refined Sugar, over twenty millions; of Boots and Shoes, over five millions; of Stoves nearly three millions. Philadelphia claims to have the largest Military Goods Manufectory, the largest chemical factories, the largest Cordage factory, the largest Bookselling house, and the largest Locomotive Works and Machine shops in the United States. It is quite evident, that her proximity to the Coal Mines and Iron Beds, her low. rents and facilities afforded mechanics for comfortable and economical living, have given Philadelphia a start in manufacturing, which nothing but her want of enterprise can retard. It is moreover evident that with

tion of those who wish to purchase goods at In two weeks from next Tuesday, election day will be here. Union men of Schuvlkill County in the meantime, have a great responsibility resting upon them. They must see to it that every district is canvassed, and that not a voter will be absent from the polls. There is nothing to fear if a full Union vote can be brought out. and it behooves all memtion we can carry our entire County ticket, and send forth a handsome majority for Judge Williams. friends attempted to choke down the Governor, but the loyalists present would not submit to it. At last the manager of the concern begged Governor Geary to quell the tumult, and as he stepped forward and requestions of the same of the adhered to, cheers rent the air. Subsequently after Johnson and the other rebels left, Gov. Geary spoke, and in opening said:

When you come to Pennsylvania, we will let everybody speak we want to hear. Thanks to Almighty God for his preservation and care of the country, we have no gag applanee]; we have no programmes for this purprect (renewed applanee); we have no programmes for this purprect (renewed applanee); we have no gag on our programmes.

On the field where fitty-five Pennsylvania Regiments with six batteries of artillery, fought, and left so many of their brave men dead, a traitor President saw proper to leave their patriotic Governor from the programme of the dedication ceremonies, because he is loyal. We do not wonder that the blood of the nation tingles with indignation at the

some sections. It is indeed much to be regritted

A gentleman in New Jersey, named Speer, is cultivating the Port Grape wine with signal success, from which an excellent wine is made, which is better than imported Port, and has been adopted for medicinal purposes in the hospitals of New York, Philadelphia and Washington.

Wistar's Wild Cherry Balsan.—This balsanic compound has become a home fixture. Let all who suffer and have in vain attempted to cure their coughs, colds, bronchial or pulmonary complaints, make use of this unequalled remedy. It can be relied on, as the mass of testimony that has been published since its introduction is ample proof of its efficacy.

It is worthy of note that Messrs. S. D. & H. W. Smith of Boston, manufacturers of the American Organs; have been most successful in the sale of their instruments in those localities where special exertions have been made by certain manufacturers who have had the arrogance and manufacturers who have had the arrogance and deception to claim every improvement in reed instruments as their own, which were in operation ever before they existed in the business. Never have been the AMERICAN ORGANS been so popular, and the sales so large as at the present time. We have tested these instruments for a long time, and find them in every respect the most satisfactory and perfect which we have ever used, and we have had practical experience in the new of those have had practical experience in the use of thosorgans which in the public prints claim the greatest celebrity.—Vi. The sole and only cause of this-for in extent our Anthracite coal fields are unequalled. ur improvements in most cases, first class, and capacity equal to almost any demand-is the existence of the railway monopoly to which we have alluded, which with its extor-tionate rates of transportation places us at a serious disadvantage in the Eastern markets, while it grasps the lion's share of the profits, reckless of the depressing tendency of its

of a Winter which must bring distress and suffering to their doors. There is but one course for the owners of land to adopt, and they should be assisted by the people of the County to the extent of their means. They must construct a competing outlet to market. A little must be invested in this enterprise to save all. We can hope for no permanent improvement in trade here until this shall be done. Without it we will ever be at the mercy of the Reading Railroad Company which cares for nothing except to extort the last penny from our impoverished operators and business men. Build a rival line, and it would increase the value of property here at least one hundred per cent., while much coal land now unproductive, would make generous returns to the owners. There should be no delay in this vitally im portant matter. The disease is bad, and the remedy should be promptly and fearlessly ap-

Messas. Beitors Journal—Gentlemen:—The people of New York and the East generally ero more deeply interested in questions which agliate your community at present, in regard to the transportation of coal, than is apparent from their seeming indifference. We are not anxious that the price of coal should advance, as you are, but on the contrary are more desirous of a reduction, and are therefore as much interested in the direct coal line from your mines to New York for the purpose of reducing the price of coal and preventing fluctuations, as you are to obtain additional outlets in order to secure a proper and fair share of the coal trade and reasonable profits.

The question is therefore as yital and important to the coal consumers as the coal producers. We see still paying a large retail price for our coal, notwithstanding the extreme low rates prevailing at the mines, in which many of our people are interested on the minual principle. We are out of pocket as far as our lavestments are concerned, and are still required to pay extravaently for our winter's coal.

"Who gets the profits of the coal trade," and "where the money goes," are matters, that concern New York rs much as schuylkill County. We are beginning to see that our mineral wealth—our magnifecent mines avail us but little, as the profits go to a few carrying companies, whose stockholders are principally in England. Monopoly and bad management ro the prevailing difficulties which lie between the coal consumers and coal producers. Our manufactures suffer and our mines are ruined in order to enrich the "middle men." The corporation that controls your partion of the coal anthracite of Pennsylvania have grown rich and powerful on the profits of your trade; while your rices of the results and your miners are simply struggling to keep their heads above water. The great weeks of the results and content and a content of the profits of your trade; while your rices of the results and condent and any or miners are simply struggling to keep their heads above water. ductive to a second rate, and your miners and most pro-ductive to a second rate, and your miners are simply struggling to keep their heads above water. The great mass of the people—either producers or consumers profit nothing—while the carrying companies—creates

profit nothing—while the carrying companies—created as means of convenience and faculty, grow rich and oppressive.

These, of course, are questions which we may consider and discuss, but it is useless to whine and complain; we know the cause and see the remedy. It is childish and silly to regret the first and neglect the second, while we repine, we are less able to nelp our selves. Why not go manfully to work and repair the evil by making our elves masters of the situation.

It requires but a small amount of enterprise and expenditure to build a coal line direct from Schuylkill County to Raintan Bay. Nine-tenths of the money can be raised here by simply saking for it. It can be made plain to any man of common practical sense that such a line would be extremely profitable and would pay large dividends.

It can be built at one-half the cost or capital of the Reading line, while coal can be brought to New York, with large profits at less than the prevent freights from your mines to Philadelphia. A direct line of less than 140 miles from your mines to New York with favorable grades and built expressly for heavy freights, can carry coal, ron, lime, &c., for one cent per ton per mile and pay dividends of 12n per cent, on the cost.

In France, we are assured by good authority the main lines of railroad carry coal and iron ores for a half cent per ton per mile and realize a profit. Sooner or latter we shall be compelled to reduce our railroad charges. We cannot possibly compete with European manufactures while our railroads charge two and three cent yer ton per mile freight. If capital will turn its attention, to the present favorable opportunity to connect New York with the Schuylkill cosl mines, and thence via the Pennsylvania kailroad—by theshortest line to the west, we shall all profit by the event.

Montana is what she exactly was two years ago when she elected a Democratic delegate. That she has not changed her politics is accounted for by some explorers at the headwaters of the Yellow Stone, who say: headwaters of the Yellow Stone, who say:

For eight days they trayeled through a volcanic country, emitting a blue flome and living stream of molten brimstone. The country was smooth and rolling, with lone level plains intervening. On the summits of these rolling mounds were craters from four to eight feet in diameter, and everywhere on the level plains were amaller craters from four to six inches, from which streamed a blaze and constant whistling sound. The hollow ground resounded beneath their feet as they traveled, and every moment seemed about to break through. Not a living thing was seen in that vicinity. The explorers gave it the significant appellation of "Hell."

Ir is predicted that the President will not develop any more important steps towards the execution of his new policy until after the Pennsylvania and Ohio elections have passed. If by any chance they should prove favorable to him, he will then take steps which if resisted by the people, will result in civil war. Let voters remember this in October, and vote the Union ticket. The rebels of the South anticipate and are preparing for war if Sharswood should be elected. The contest has lost its local character. The peace of the country depends upon the result. and will be secured if the traitor's plans are

thwarted at the polls by loyal Pennsylvanians. EXTRACT from a letter dated Washington September 18: Since my arrival in Washington I have found that nothing will prevent Andrew Johnson from resorting to force against the Congress of the United States but a great uprising of the people in the coming election. He takes no counsel but from the traitors, and is at war with nearly every member of his Cabinet. He seems perfectly infuriated, and is capable of any atrocity. city:
Do the people know these facts? Can they not see In the people know these facts? Can they not see that they are opposing their own best interests by hesi—tating? The question is slimply, whether the Government shall be restored to the rebels, or retained in the hands of honest men. And if the people choose the former, they choose willingly their own rain. I am no alarmist, but speak the words of truth and soberness, sad and gloomy as they are.

COPPERHEAD GAINS IN ELECTIONS.

Jadging from the Copperhead rejoicings over the late elections, our 'iends algebt think that the Republican porty was about to collapse and pass entirely out of exist oce. But that is not quite the fact. The election of a Governor in California is the only point-gained over which the Democracy have legitimate recanot or ejoice. We are not certain about Congressmen from that State, but it is probable that two of them are Republicans. Now let us see what wonderful gains the Democrats have made in the only place where gains can do them suy good—that is, in the House of Representatives (the S mate is beyond their reach for half a century). The relative strength of partice in the last and present Congresses is as follows:

The Water-power is good, always baying enough water to insures strong blass. A new Dam, sufficient for all purposes, was built two years ago—Wate: wheel and Bellows as good as new.

The Teams and other personal property and also the undivided half of a valuable Bed of Magnetic Iron Ore will also be sold private, and at reasonable terms. These Works are only for making Cold Blast Charcoal Metal, which is the best kind for Car Wheels, and has also been used for Army and Navy gong.

More Iron has been made at these works per week, than at any other works of like size, (except two), in any of the adjoining counties.

First growth timber is plenty within a radius of 10 miles, and enough can always be had to make a full blast. Good Hematite Ore is near enough to band with teams. Limestones are within a quarter of a mile. BARRY TOWESHIP, SEPTEMBER 19, 1967.

EDITORS MISSES JOURNAL:—I am happy to inform: you that Conrad Seltzer, the Independent Candidate for County Treasurer, is making a clean sweep in this Township. Having lived during many years in Minerstile, Mr. Seltzer became personally acquainted with a most every voter in Barry. They know him as a gen: eman of great moral worth, of strict integrity, and fully competent to descharge the duties of this all-important trust. The adjacent township of South Butler, Eldred. Upper Mahantongo, Healns and Hubley, will also poil a tremendous vote for Conrad Seltzer, and he will without doubt, be triumphantly elected over his opponent, Edward Bradley of Minerstille. mile.

As much possession as is n researy to prepare for next year's blast will be given to the purchasers.

This is a rare chance for those wishing to engage in this business, and is worth the attention of parties who need Charcoal metal for Car Wheels and other

purposes.
