BALDWIN LOCOMOTIVE WORKS.
M. BAIRD & COMPANY, Broad and Hamilton streets, Philadelphia, Penna., Would call the attention of Railroad Managers, and others interested, to the Locomotive Engines, to their system of Locomotive Engines, in which they are adapted to the particular business for which they may be required; by the use of one, two, three or four pair of driving wheels; and the use of the wheel, or no truck, as may be desired, for the safety of the locomotion; and in accommodating them to the grades, curves, strength of superstructure, and rail and work to be done. By these means the maximum effect of the power is secured with the least expense for attendance, cost of fuel, and repairs of road and engine. With these objects in view, and as the result of twenty-three years practical experience in the business by one senior partner, we have produced fifteen different kinds of Engines, and several classes of sizes of each kind. Particular attention paid to the strength of the materials in the plan and workmanship of all the details. Our long experience and opportunities of obtaining information, enables us to offer these engines with the assurance that in addition to their great durability, they will compare favorably with those of any other kind in use. We also furnish to order, wheels, axles, boxings, and cast iron tire to fit centres without turning, composition castings for bearings of every description of Copper, Sheet Iron and Boiler Work; and every article pertaining to the repair or running of Locomotive Engines. BOOTH & GARRETT, of Philadelphia, Chemists of high standing in their report of the analysis, say to us:
"The constitution of the above indicates a decided advance in the composition of a Fertilizer by the introduction of potash, more especially in the form of sulphate and countenances the claim involved in the name "Complete Manure."
WILLIAMS & MORTON, of Philadelphia, Chemists of large experience in the analysis of Fertilizers, say:
"We find from an analysis of your "Complete Manure," that the name you have given it is certainly warranted by its Chemical composition; in addition to the cordially recommending your Fertilizer from a Chemical stand point, we should state that its mechanical condition is most excellent, being such as to admit of its use in the drill without further preparation."
The "Complete Manure" has been used largely on various crops, and the testimony thus far received proves it to be the best Fertilizer yet introduced.
