Paying bonds in general acceptances.

It is however, a hobby with Mr. Pendleton that the five-twenty bonds, as they are called, should be paid off in greenbacks, and he says that the Government of the United States has a right to pay them in that way. In that way he proposes to pay off the public debt. I do not see myself how it would pay the debt to take up one species of indebtedness and issue another to take its place. You would owe just as much afterward as you did before. That would not pay the debt. But he proposes, however, in insuing the recond evidence, to issue it without interes: Well, is that an honest transaction? Would you consider it homest fifty you held the note of an individual for a hundred doilars loaned money, bearing ris per cent, interest; and he were to come to you and insist upon taking un that hote and giving you ose in its place that did not bear interest, payable at his option, and taking from you all means of coercing payment? How much money could the United States have borrowed, if, when it issued those five-twenty bonds, that is to say, a bond which the Government of the United States reserved to itself the right to pay, if it thought proper, in itser-given. It had said to the public from whom it expected to obtain money. "It was will parchase the ed of the fire years, it had said to the public from whom it expected to obtain money." is money and its property, and its securities, are to be taxed at the discretion of some other. Government: Why, I think these States that favored secession would easily carry out their determination, if the notion is to prevail that they may tax United States property and United States securities in their discretion. The public lands of the United States have never been taxed in the States. It has always been provided, when new States are admitted into the Union, that they shall not tax the lands belonging to the Union, that they shall not tax the lands belonging to the Union that they shall not tax the and so the Union that they shall not tax the such that they shall not tax the shall not be taxed by State and local anti-stics, and it has never been done. But if United States, and it has never been done, But if United States, and it has never been done, But if United States, and the tax amounted to two per cent, whit, would be fifted when the money was borrowed—securities that was about the average amount distate and local taxes in each of the States of the Union. Why, then, when a man furnished the Government of the United States with a thousand colors, two per cent, of that thousand—that is, twenty dollars—would be taken to pay the taxes of the State. He would know this when he loaned the money, and the result-of it would be, that he would ask is, additional two per cent. Indeed from the Government, and the Government, instead of paying six per cent. for the money it borrowed, would be compelled to pay eight per cent. This would compel heavier taxation to pay the interest on the public debt, and how would anything be gained to the citizen? Would he gain anything by paying two per cent more to the Government of the United States, and having the bond taxed, and raising two per cent at home for State varpoess? It is so broad as it is long, except in this wise, that the citizen would be subjected to the additional expense of collecting these taxes. So that nothing would be gained by taxing United States securit and fearful gloom, around their trembling forms. of covering, fast they fled the glorious face

taxes. So that nothing would be gained by taxing United States securities in the manner proposed.

BOY TO MAINTAIN DUR CREET.

How, then, is the credit of the Government of the of the United States to be maintained? I will tell you my view of that in a very few words. It is clearly expressed in the laixth resolution of the Chicaco Platform, that the best policy to diminish our burden of debt, is so to improve our credit that capitalists will seek to loan us money at lower rates of loterest." Improve our credit—that is the way to lessen the burdens of the public debt. That is the way to have one uniform currency for the laborer, and the same currency for the bondholder. I am for the same currency for the bondholder, the laborer, the sewinggirl, and everybedy else of whom Mr. Pendleton speaks, but I am for having that a good currency.—iApplause.] We must make it all good, instead of trying to make it all bad and worthless. But how is that to be done? By resuming specie payments at the carliest practicable period, without deranging the reneral business of the country. That is the way to have an uniform currency to give to the laboring man something that has a fixed and definite vaine, and that he cannot be cheated out of by sharpers and speculators, who can infate the currency to-day and contract it formorrow. That is the way to reduce the public debt. We six paying now aix per cent, interest on \$1.000,000,000 in gold every. year, while Canada can borrow money at four per cent, or less. Braxil and in the North American Republics, subject to revolution every few years, most of them can borrow money at four per cent. or less. Of glary where God's promised Son bent o'er then That brightened coming ages with new life and light THE ADVANTAGE OF USING PRINTERS' INK .-This advantage is duly appreciated by those who have tried it judiciously in the shape of advertising in the newspapers. As an illustration of how extensively certain firms advertise, we might state that the proprietors of Plantation Bitters have contracted with Geo. P. Rowell & Co., advertising agents, No. 40 Park Row, New York, for \$45,776-26, and this is but a small part of the expenditure of Messrs. P. H. Drake & Co., in this way for the present year. The agency which is sending out this order is another example. It commenced business less than five years since, and the fact that it now controls a greater advertising pationage than any similar establishment, is without doubt to be attributed to their having expended more noney in advertising themselves and their facilities within that time than all other advertising firms put together, since the estab-

Our sitention has intely been called to an article which has an extensive sale and a very high reputation, knows as Ring's Vegetable Ambresia, and we see inclined to think that it possesses more destrable and less objectionable qualities than any other in the market. It restores gray or faded heir to its original color is a most remarkable manner, and by its luvisporating and mothing properties removes all desdruff and humors from the scalp. Give it a fair trial and you cannot fail to like its.

西班易斯斯 The quantity sent by Railroad this week is 94,370 19 tons; by Canal 86,868 10 tons; for the week 181,289 10 tons, against 112,595 for the corresponding week last year. The trade continues without any change from last week. The demand for prepared coal is good, while for lump and broken it is slacking off a little. All the operators are making as much prepared coal as their facilities at the collieries will permit. Both the Canal and Railroad are now worked up to their full average of boat and rolling stock capacity. The trade sums up this week as follows.

BAROMETER AND VENTUATION .- A correspondent ot the Contry swarming, who has evinemy and a large experience in coal mining, has noted a few points, showing the effect of atmospheric changes upon mine-ventilation. The rules that he gives to those who have not already observed them, may be found of service. They are as follows:

lows:

1. With a high barometer the ventilation is more pure, and presses back the gas. and, of course more healthy and safe to the miner. 2. With a low barometer the ventilation is more loaded from the secure of was from its healthy. the escape of gas from its lodgments; the wind being less pure, and consequently less healthy and more dangarous to the miner. 3. With low barommore cangerous to the minor. 3. With low baron-etrical pressure we generally get high winds, rais-or saturated atmosphere, always detrimental to mining. Winds from the east, coutbeast or south, should always get the minor upon his guard. If the barometrical readings are care-fully soud, and the astion of the wind also re-corded, it will be from them winds from these points of the compass generally (although not generally (although not spooding sease of gas is the sure result. 5. Year high winds, from whatever point of the ompass they how, are always to be looked upon a dangewess to mining for they surely indicate low berometer, and as surely are they accomined by an escape of gas.

ANOTHER GUN FOR PRACE.

Clorious Republican Victory in West Virginia.

OVERWHELMING MAJORITY FOR THE GRANT TICKET.

West Virginia held her State election on Thursday last, and went Republican by about 6,000 majority.

The Democrats made extraordinary efforts, and had help from outside of the State.

The Republicans will probably elect all three Congressmen and a majority of the Legislature, which elects a United States about 6,000 majority. No. 35 SOUTH THIRD STREET, ension.

The value of this important decree, apart The value of this important decrees aparafrom the fact that it swells the resistless current in favor of Grant, is that it proves that the policy of disfranchising the rebels was the only true one, and therefore a good forerunner of what may be expected in Missouri, and Tennessee, where they are also denied the right of suffrage, if they fail to comply with certain conditions West Virginia, as they do in these two States, but the ballot was too strong for the

THE Presidential election takes place on the first Tuesday of November (the 3d day of the month,) not on the second Tuesday, as erroneoussupposed by some. Let none forget the day. PENNBYLVANIA-OFFICIAL The official vote of Pennsylvania is as follows

, 328,391 This does not include Forest county, not yet heard from officially, but is estimated to have given four majority for Hartranft. A LEADING New York Democrat recently gave \$40,000 to his party for electioneering purposes, and Mr. Childs of Philadelphia gave the printers of that city a buryingground. The New York Sun thinks that the gifts should be transferred—the dollars to the

printers, and the burying-ground to the De-GIVING IT UP.—Even the rebels are giving it up. They recently held a caucus in Lexington, Ky., and had under consideration whether they should cease hostility to Grant's election, and go in for him, and make the best terms they can. The rebels are losing confidence in the Northern Copperheads, and it looks as if they would out loose om them. It begins to look as if Seymour rould not get a single State. 👢

BELMONT GIVES IT UP, AND MAKES TRACKS FOR ENGLAND.-It is stated that Augusto Belmont, the Chairman of the so-called Democratic National Committee, refused to "swap horses' and sailed for England on Wednerday, to report to the Rothschilds, whose agent he is in the United States. The Rothschilds control Belmont, and Belmont controls the Copperheads in the United States. "BRICK" POWEROY in his Democrat, says the "villainy" of the World is unparalleled, for desiring Seymour and Blair to withdraw.

The only difference is that "Brick! denounced Seymour and Blair before the nomination as totally unworthy of the confidence of the Cops., and the World rather favored these candidates. Such somersaults however, are iothing for the Cops. They are only showing to the people more glaringly every day, how totally unworthy they are of their support.
