BARTRAM & FANTON
PATENT
BUTTON-HOLE & SEWING
MACHINES.
Bartram & Fanton Manufacturing
Co., Danbury, Conn.
We are at last ready to offer to the public our IMPROVED
MACHINE which we warrant to be more perfect than any
other sewing machine made.
They are stronger and more elastic, seam, and do a
better and lighter class of work than any other.
It has the honor of being the only single thread ma-
chine that has been awarded a first prize over double
thread machines.
All are fitted complete at the Danbury Shirt Factory
and are then running by power, side by side with doz-
en machines others.
Hear what those that have used them say:
"Your machines give entire satisfaction.
H. D. COOLEY, Jr., Att'y, Washington, D. C.
"The most perfect little slave to woman's hand I
have ever seen.
Mrs. G. H. S. HALL, Brooklyn, N. Y."
"Second all not as well part with our farm.
Mrs. M
"I have used nearly every kind and never saw its
Mrs. O. Br Agents, San Francisco, Cal.
"A quantity of neatly dressed garments folded and
in the last sewing, a neat proof that the B. & F. Machine
is right only better than any other, but really perfect
Mrs. O. H. Parsons, N. Y."
"Even a farmer, Mrs. Chatterton, Paris, France,
Province of the best exhibition; we therefore re-
connected them to honors of the first class.

they have fitted up rooms for the Accommodation of the sick
The Doctors are those all other efforts and systems
have failed, and when cases have been pronounced
hopeless by the most eminent in the profession. No operations. No pain caused. All who receive
treatment are instantly benefitted. The Doctors are
not resigned a case member of the body, but will always
be found with all natural laws, and in explaining their
scientific principles. Many eminent physicians of all
other systems not only acknowledge the success of
their treatment in themselves and families, but
so recommend it to their patients. By this new and
strikingly mysterious treatment it takes but a few
minutes to produce a change in the most obstinate
chronic cases, and so sure is the effect that many cases
require no more than a single operation.

Oct 31, '68 44-6m
CHARLES BURNHAM & CO., 119 South
TENTH street, Philadelphia, sole manufacturers
of the PATENT "EXCELSIOR" Wood & Rubber Weather Strip
A cheap, simple and effectual means to
EXCLUDE COLD, RAIN, DUST and SNOW.
There is not a house in the city or country that could
not be kept warm during the winter season, while enables tenant farmers to pay heavy rents, keep
up the stamina of the soil, and make much
better livings than Americans do who own
their farms.
As the population becomes thicker, and
farmers cannot run down their land farther
or run away from it and get more in the
West to serve the same, the exhausted land
will have to be farmed in the English style;
or there will be nothing but little plot farm-
ing—few acres kept up in tolerable heart,
at the expense of the rest of the farm, and to
any good agriculturist there can be nothing
so disgraceful as one portion of any man's
land sacrificed to support the rest.
To bring exhausted land into a good state
of fertility is one of the easiest proceedings
in the world, for if there is no heavy or large
manure to be had within a reasonable dis-
tance, it is ofily to obtain a light concentra-
ted kind and grow turnips to be eaten, and
the dung and urine will, cause any crop to
grow after, among which clover can be sown,
and that can be disposed of in the same way
as the turnips, or in any way circumstances
may demand. Highly once rejectablished
fertility, the rotation must be brought to
come round often enough to keep up the rich-
ness, and endeavor to increase the depth of
good soil as well. Where there's good na-
tural grass land, like the Kentucky blue grass
region, or any other good natural grasses, it
is wise to continue the best portions in per-
manent pasture and mowing; for be it
known, the mixed natural grasses, when
managed properly, make hay equal to any
on the face of the globe. There are three-
fourths of the farmers in America who have
no idea of what a meadow is in England;
and this is particularly the case on light land.
In the Northern States the winter is so much more severe as to prevent
the eating of the crop on the land after the
middle of Dec., but up to about that time, and
from the middle of Sept., the consumption of
turnips can be quite as well done, which is giv-
ing ample time to carry out the system. Any
one having sheep and an English shepherd
would have no trouble in the matter, except-
ing in obtaining hurdles or a substitute for
them, so that the sheep can be daily moved
on fresh ground, so as to have their drop-
pings left regularly all over the surface. It
would be a great benefit to the country if
travellers visiting England would give par-
ticular attention to this system, which enables tenant farmers to pay heavy rents, keep
up the stamina of the soil, and make much
better livings than Americans do who own
their farms.
