The MINERS' JOURNAL is now one fourth larger than any other paper published in the State, and contains more reading matter than any other paper except one published in the United States. To give our readers some idea of the amount of matter contained in a single number of the JOURNAL, reached for six cents, we have made an estimate, and found that it contains more than is contained in a $3 bound novel from the city publishing houses. And yet 52 such numbers will be furnished during a year for $2 75 in advance, or 53¢ cents per week.
The property of the JOURNAL has been great and gratifying to us. It pos sesses now outside of Philadelphia and Pittsburgh, the largest circulation of any pa per published in Pennsylvania, and is steadily on the increase. As an advertising medium this paper stands at the head of the list, and is not equalled.
