Ten "	8 00	12 00	20 00	55	175

Nonpareil Notices 25 per cent. higher.

Local Notices and lines over a square, 25 cents a line each insertion.

Larger Advertisements as per agreement.

The MINERS' JOURNAL is now one fourth larger than any other paper published in the county, and contains more reading matter than any other paper except one published in the United States. To give the reader some idea of the amount of matter contained in a single number of the JOURNAL, we have counted the ems, we have multiplied, and found that it contains more than is embraced in a $7 book printed from the city publishing houses. And yet for such matters will be furnished only a year for $2 75 in advance, or 25 cents per week.

The circulation of the JOURNAL has been great and steadily to increase. It goes to every county of Philadelphia and Pennsylvania. The largest circulation of any daily published in this county-seat, and is steadily on the increase. As an advertising medium in the interior of the State, it is not equaled.

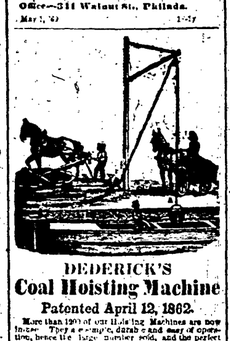
DEDERICK'S
Coal Hoisting Machine
Patented April 12, 1862.



More than 1200 of our Hoisting Machines are now in use. They are simple, and many of superior excellence, hence the large number sold, and the perfect satisfaction given to purchasers. Pamphlets containing cuts, prices and testimonials from parties using them, and containing prices of our Wood and Iron Coal and Mine Cars, Turn-outs, Dock and Bank Blocks, &c., &c., containing much information to coal operators, sent free.

PATENT IMPROVEMENT.—The undersigned would inform the public that they are now prepared to manufacture, and are manufacturing, to order, in accordance with Letters Patent granted to Thomas Dederick, of Pottsville, County of Schuylkill, on the 12th day of April, 1862, the Coal Hoisting Machine for which application was made by said Dederick, and has sold to said JAMES M. CONNER the right to supply it in the County of Schuylkill. Said Machine is now in use at the Locust Mountain Colliery, in one of the most breakneck breasts in the coal region, and has been pronounced by the said Lewis Ehrenfry and by the United States Inspector of Coal Mines, to be the best machine for the purpose now in use. Any person desiring to use the same, or any portion of the Valve can receive the same at my office in Coal street. The benefit of the Valve to all persons using the Machine is from its not requiring the use of a steam engineer built. It can be applied to all coal engines. Machinists are requested to take notice that infringement will be prosecuted. They can secure from me the use of the Machine or a portion of the Valve, or the improvement on reasonable terms. They can see the machine at work in the Locust Mountain Colliery, or by addressing me at Pottsville. Parties ordering from me will be supplied with the Machine complete, ready to put up, for the price of $1,000. All orders promptly attended to.
