Elk Lodge A. Y. M.

Stated meetings of Elk Lodge will be held at their hall on the second and fourth Tuesdays of each month.

Temple of Honor and Temperance.

Elton Temple No. 81, meets on each alternate Thursday at their Lodge Room, on Main street, over J. V. Honk's store.

RAIN fell here on Tuesday last,

but not enough to hurt the rain or any one else.

THE Sale of unseated lands for taxes will commence next Monday morning at 9 o'clock.

It must be nearly time to say something about street lamps; for if the papers don't notice them no one else will be likely to.

POWELL & KIME have for sale the finest piece of dark blue broadcloth ever brought into this place.

NEW SIDE WALK.—A new walk has been built on South street from Mill to Broad. This was a needed improvement, and now we suggest that a walk be put down from the post office, on Main street, to connect with the walk at Hyde's store.

W. H. SCHRAM is doing a good job of grading on Main street with the dirt taken from Wheeler & Service's cellar under their new building.

FRANK COWAN'S PAPER.—We have received the first number of a new paper with the above name, published by Frank Cowan at Greensburg, Pa.

Oil.—The oil well near Wilcox has been flowing water and oil since last week, with good indications for a paying quantity of oil as soon as the water is exhausted, which will not be a great while.

FOUND DEAD.—Supposed Suicide.—Last Saturday, June 1st, a party of men found a man named — Emier, a German, hanging in the woods at Centreville, this county, about fifty rods from Koob's hotel and but a short distance from the turnpike.

CHANGE OF SCHEDULE.—Last Monday morning the new time table, Summer Arrangement, went into effect on the P. & E. R. R.

GOING WEST. Mail, 2:05 p. m. Express, 2:25 p. m. Accommodation, 6:14 p. m.

GOING EAST. Mail, 4:50 p. m. Express, 12:38 a. m. Accommodation, 8:40 a. m.

HARNESS.—We mentioned a few weeks in our local column the fact that good harness could be bought in this place for \$25 and upwards, and now we wish to add that J. M. Heard, is not only manufacturing the very best styles of harness in the market but is also selling at very low rates.

HORTON & MILLER have moved into the Masonic Hall building.

WE know of places where the following bit of rhyme would fit in admirably: "If your neighbors' hens are troublesome, And steal across the way, Don't let your angry passions rise But fix a place for them to lay."

AN original poem thus immortalizes the original settlers in Derryfield, N. H. "It was often said that their only care, And their only wish and their only prayer For the present world and the world to come Was a string of eels and a jug of rum."

THE EPITOMIST.—A new paper, but recently started at Williamsport by E. W. Capron, and bearing the above title, we have received. It is a large nine column paper and sound Republican to the core. We welcome it among our exchanges.

MARRIED.

DILL.—McINTOSH.—At Brookville on Wednesday, May 29th, 1872, by the Rev. Mr. Leshaw, Mr. B. A. Dill to Miss Lucie M. McIntosh, both of this place.

At last Ben has yielded up himself a willing sacrifice on the altars of Hymen; he has stepped off manfully; he has gone the way of all flesh, and is happy. We congratulate him on his happiness and tender him our best wishes for the future.

DIED.

FULLER.—At his residence in this place on Wednesday, May 29th, 1872, at half past ten o'clock, p. m., Dr. C. H. Fuller in the sixty-sixth year of his age.

THE SCIENCE OF HEALTH.—The first number of this new Health Journal is published. It is devoted to an exposition of all those agencies so vitally related to Health and the Treatment of Disease, such as Air, Light, Temperance, Diet, Clothing, Bathing, Exercise, Sleep, Electricity, and all normal agents and hygienic materials. It is an independent journal, published in the interests of the people, which is certainly a strong commendation. The first number contains many articles of general interest. The senses of sight, hearing, taste, smell, etc., are illustrated and explained. The cause and cure of Backache; the proper position on Horseback; Water treatment of Fevers; Sprains and Bruises; Pneumonia; Clergyman's Sore Throat; Chronic Catarrh; How to Sleep, etc. The department of Talks with Correspondents contains valuable information. The new magazine is issued from the office of the Phrenological Journal and published at the low price of \$2 a year, or twenty cents a number. "Try it," and save many times its cost in doctor's bills. Address the publisher, S. R. Wells, 389 Broadway, N. Y.

WOMEN AS PRIZE-FIGHTERS.—Why not? Is it any worse for a woman to fight, smoke, drink, lie, cheat, steal, gamble, rob and murder, than it is for a man to do these things? Neither virtue nor vice is a matter of sex. It pertains to conduct. A clergyman in Ohio, reading in a newspaper that two women were training for a prize-fight, declared that in all history, even in the antediluvian period, when the earth was filled with violence, there is no record of any parallel to this case. Very true: no women have ever before undertaken a prize-fight. It is only the men. But if the men would stop this business who believes the women would persist in it? The reverend gentleman calls on the Christian women to band together, and at once arrest this horrible outrage. All right as far as it goes. But we respectfully suggest that, as we only have a woman prize fight once in six thousand years (and that only threatened), while we have prize-fights almost every day in the year (not counting the irregular fights outside of the ring every hour of the day), the men employ the men to stop the fighting among men. When the men will do this, we will agree to make all the women in all the earth keep the peace in this respect for another six thousand years.—(Science of Health.)

J. L. CUMMINGS is building a dwelling house on South street near East street.

THE PUBLIC DEBT.—The public debt statement shows a reduction during the month of May of about \$7,000,000. The reduction is less than last month, owing to the advanced payments on account of Pensions.

THE shipment from the Oil Region by all routes during April reached over 398,000 barrels of 45 gallons, an increase over March of about 134,000 barrels and an increase over April last year of about \$300,000 barrels. There were shipped by river about 20,000 barrels, crude, of 42 gallons.

In the whole history of American journalism the rapid progress of the American Working People, of Pittsburgh, is perhaps without a parallel. It was started in May, 1871, and the number for June, 1872, contains a certificate of the pressman that for that month the circulation had reached the number of 28,000. Each number contains twenty large quarto pages, nearly all devoted to manufacturing interests, and handsomely illustrated. Price \$1.50 per annum in advance.

HOME AND HEALTH for June is before us, and is certainly a very valuable number. No other magazine surpasses it in the quality of its literature, while it surpasses all others of its size in the number and variety of its articles, and in its adaptation to all the wants of the family. Its departments of Health Culture, and Home entertainment, Humorous Incidents and Current Events, make it the most valuable and cheapest family magazine published in the country. Order it from the newsdealers, or send direct to De Pay, Lyod & Co., No. 52 Fourth Avenue, New York. Single copies 15 cents; \$1.50 per annum.

THE newspapers of Great Britain have been declaring that quite a reduction of the public debt has been going on for the last three years, the statement reaching \$60,000,000. Sir John Lubbock, M. P., denies this, and says that \$30,000,000 were only a transfer from the chancery and bankrupt funds, so that the real reduction has been only \$30,000,000 or \$10,000,000 a year. This year the Government will borrow \$17,500,000, which, therefore, will make an actual reduction of \$12,500,000 in three years. This figure looks meagre alongside of those showing the reduction of the debts of the United States in the same time.

THE PHRENOLOGICAL JOURNAL for June is an admirable number to close the Fifty-fourth volume of that most excellent family magazine. Conspicuous among its contents are, William Orton, President Western Telegraph Co.; what is the Tariff Question? by Horace Greeley; Steel or Starvel Sir Francis Crossley, M. P.; Monticello, Famous as the Home of Thomas Jefferson; Expression; The Chinese in the Philippines; Preachers and Preaching; Boys' Library; Carbon and its different forms; Paul Du Chailu, the famous Traveler; Life Insurance; A Bad Pen, etc. With numerous fine illustrations and portraits. A new volume begins with the July number. A good time to subscribe; fine premiums offered. Terms \$3 a year. 30 cents a number. S. R. Wells, Publisher, New York.

CENSUS returns, recently published, show an increase of \$4,000,000 in land value received in the single State of Pennsylvania since 1860. The quantity of new land improved in the State in that period exceeds 1,000,000 acres. In some staples of agriculture Pennsylvania holds the first place. In a few she falls behind some of the new regions of the West. Thus, her wheat crop is far exceeded in quantity by the wheat crop of Ohio, Indiana, Illinois, Iowa, and Wisconsin; while it is nearly equalled by the wheat crop of California, Michigan and Minnesota. Her crops of corn are also much smaller than those of Illinois, Indiana, Iowa, Kentucky, Missouri, and Tennessee. But in the estimated value of all farm products Pennsylvania is only exceeded by three States, New York, Ohio, and Illinois. In fruit the orchards of New York make a return of \$8,374,417 against a return of \$4,208,094 in Pennsylvania.

GOOD MANNERS.—Good manners are the particular distinction of a gentleman. They elevate him in society, and in the estimation of all worthy people, and create for him a respect that money cannot buy. In the education of our children nothing is more neglected, and to this, in a large degree, attributable, the growing lack of respect and reverence among young people for their superiors. Home is the first school of childhood. Here they should be early taught to be polite and well behaved, for the first mental impressions of a young child cannot be obliterated by correction nor forgetfulness. Parents cannot exercise too great a degree of care in the examples they set before their children, and in the manner in which they expose them to impure and contaminating influences. The formation of human character is commonly the result of early associations.

Hooks and Eyes.

The latest publication is what I know about ball bonds and conventions, by H. G. The "coldest March" on record—Bonaparte's retreat from Russia. The wheat crop of North Georgia is said to be immense, and promises to be one of the best ever harvested.

A French college has given a girl the degree of Bachelor of Sciences. It means that she is Made of Knowledge. An exchange gravely says: Was Rhoderick Dhu anything like a Scotch mist?

Early rising was once an indication of thrift, but now it indicates that a man is dry. There is a time for all things. The time to leave is when a young lady asks you how the walking is.

A California man was thrown out of bed by the earthquake. He doesn't consider it a fair shake. The population of Great Britain is placed at 31,000,000, while that of France is 37,000,000.

It is estimated that there are over 30,000 canary birds brought to this country every year. Lobsters will be very scarce this year—"probably because the long winters has killed the vines," suggests Mr. Greely.

The coal beds of Missouri are said to have an area of two thousand seven hundred square miles, mostly in the northwest. An eccentric Connecticut gentleman, recently deceased, left to religious institutions \$75,000; to his cook \$120,000, and to each of his five children \$400.

One of the results of the civilization of Japan is to leave ten thousand Buddhist priests penniless without employment. Which is the oldest—Miss Ann Tiquity, old Aunt Deluvian, Miss Ann Terior, Miss Ann Cestr, Miss Ann T. Mundane, or Miss Ann T. Cedent?

A fool of a dog in Indiana chases his tail until he drops down with exhaustion. This is one of the cases where the tail wags the dog. A Michigan Indian was promptly escorted to the happy hunting grounds by a can of nitro-glycerine which he endeavored to open with his little hatchet.

Glass bottles were made in England about 1555, but the art was practiced by the Romans 79 A. D. as they have been found plentifully among the ruins of Pompeii. You will always notice one thing, the devil never offers to go into partnership with bizzzy men; but you will often see him offer to jine the lazy, and furnish all the capital.

Sprinks says he knows just the kind of dwelling that his wife wants, because she has described it to him. She wants "a house large enough to accommodate eight persons, with a parlor, dining-room, five bed-rooms, nursery, bath-room, closets in every room, basement, kitchen, cemented cellar, and high attics, all on the first floor."

It will be remembered that an elephant's tooth was found in a gravel-pit in Louisville, Ky., last summer. After giving the subject due consideration, scientific men say it must have been there for over two thousand years. It is related of Lessing that he was occasionally so absent-minded that he once knocked at his own door, when the servant, not recognizing her master, looked out of the window and said, "The Professor is not at home." "Oh, very well," replied Lessing composedly, walking away. "I will call again."

The manufacture of beet sugar in Europe has been so large and so profitable that the attention of American agriculturists was attracted to it many years ago, but their experiments have so far met with little success, except in California. It is believed in Massachusetts that the culture of the sugar beet may now be undertaken under circumstances more favorable to success, and the Legislature of that State has been asked to give encouragement to the enterprise by exempting from taxation all the property used in the manufacture, excepting the land on which the beets are raised.

A WASHINGTON paper stated recently that the impression prevails among scientists there that the coming comet is the cause of the late dry spell of weather which has been felt so severely till the late rains. If such a drought is one of the first fruits of the coming meteor, we might well dread the harvest of distress and blight in store for us. But the idea of cometary influence on the atmosphere can hardly be entertained by scientific men. The fact has been well attested by a long series of observations that these eccentric visitants do not radiate sufficient heat to affect the most sensitive mercurial thermometer yet constructed; and from that it would seem to follow that the popular notions of their meteorological agency have no foundation. So far, however, from occasional long dry spells, the flashing train has been popularly regarded as the augury of a bountiful harvest and vintage. The comet of 1811 was supposed to have been the cause of the prolific and abundant crops which were almost universal in the Old and New Worlds. Even now in the later it is not uncommon to hear of the great comet year, and vines have sometimes been sold at a high figure, under the fancy of some influence produced by the tail of a favorite comet. It is said by close observers that other comets of later years have apparently had some physical influence in producing fine agricultural yields, and it may be the spectroscopic, with its wonderful powers of analysis, may, ere long, enable physicists to settle the long-agitated problem of the constitution and influence of these vast nebulous streams.

Ayer's Cherry Pectoral.

For Diseases of the Throat and Lungs, such as Coughs, Colds, Whooping Cough, Bronchitis, Asthma, and Consumption. Among the great discoveries of modern science, few are of more real value to mankind than this effectual remedy for all diseases of the Throat and Lungs. A vast trial of its virtues, throughout this and other countries, has shown that it does surely and effectually control them. The testimony of our best citizens, of all classes, establishes the fact, that Ayer's Cherry Pectoral will do relief and cure the afflicting disorders of the Throat and Lungs beyond any other medicine. The most dangerous affections of the Pulmonary Organs yield to its power; and cases of Consumption, cured by this preparation, are publicly known, so remarkable as hardly to be believed, were they not proven beyond dispute. As a remedy it is adequate, on which the public may rely for full protection. By curing Coughs, the forerunners of more serious disease, it saves unnumbered lives, and an amount of suffering not to be computed. It challenges trial, and convinces the most sceptical. Every family should keep it on hand as a protection against the early and unperceived attack of Pulmonary Affections, which are easily met and cured, but which, if incurable, and too often fatal, if neglected. Tender lungs need this defence; and it is unwise to be without it. As a safeguard against the most distressing diseases which beset the Throat and Chest of childhood, Ayer's Cherry Pectoral is invaluable; for, by timely use, multitudes are rescued from premature graves, and saved to the love and affection centred on them. It acts speedily and surely against ordinary colds, securing sound and refreshing sleep. No one will suffer from troublesome Influenza and painful Bronchitis, when they know how easily they can be cured. Originally the product of long, laborious, and successful chemical investigation, no cost or toil is spared in making every bottle in the utmost possible perfection. It may be confidently relied upon as possessing all the virtues it ever exhibited, and capable of producing cures as memorable as the greatest it has ever effected.

PREPARED BY Dr. J. C. AYER & CO., Lowell, Mass., Practical and Analytical Chemists. SOLD BY ALL DRUGGISTS EVERYWHERE. For Sale by G. G. MESSENGER, Druggist, Ridgway, Pa.

Every year increases the popularity of this valuable Hair Preparation, which is due to merit alone. We can assure our old patrons that it is kept fully up to its high standard; and it is the only reliable and perfected preparation for restoring GRAY or FADED HAIR to its youthful color, making it soft, lustrous, and silken. The scalp, by its use, becomes white and clean. It removes all eruptions and dandruff, and by its tonic properties, prevents the hair from falling out, as it stimulates and nourishes the hair-glands. By its use, the hair grows thicker and stronger. In baldness, it restores the capillary glands to their normal vigor, and will create a new growth, except in extreme old age. It is the most economical HAIR-DRESSING ever used, as it requires fewer applications, and gives the hair a splendid, glossy appearance. A. A. Hayes, M.D., State Assayer of Massachusetts, says, "The constituents are pure, and carefully selected for excellent quality; and I consider it the BEST PREPARATION for its intended purposes." Sold by all Druggists and Dealers in Medicines. Price One Dollar.
