Household Recipes.

BROWN BREAD. - Mix together one quart of Indian meal, and one quart of rye, and a cup of bread risings. If yeast is used it will not require a cup-ful. Add a tenspoonful of soda dissolved in hot water, and three tablespoonfuls of molasses. Mix them well with warm water in a pan, then pour into a baking tin, and place it where it will be warm to rise, and bake when light.

COTTAGE PUDDING. - Rub into one pint of flour two tenspoonfuls of cream- new, and not troubling themselves as to of-tartar; rnb together one table-spoonful of butter, and one teacupful of sugar, and add to the flour ; dissolve one teaspoonful of soda in a teacup of sweet milk ; beat one egg to a froth and add to the milk ; then stir the latter briskly into the flour, etc., turn into a buttered pudding dish and bake half an hour in a quick oven.

As a sauce for the above, beat together the yolk of one egg, a teacupful of up his residence in Greenwich, Ct., sugar, and half a teacup of melted but-ter. To this add half a teacupful of ter. To this add half a teacupful of and has, for the time being, abandoned wine and the same of boiling water. New York. Not long ago Mr. Tweed While this is cooling beat to a froth the white of one egg, and then stir into the some.

SOFT GINGERBREAD, - One cup of sweet milk, one cap of molasses, and a may now be found, enjoying his gains, tablespoonful of shortening must be and entertaining his old companions melted in half a cup of hot water in and friends. which a teaspoonful of soda has been dissolved. Add three cups of flour, a Tweed does not seem vouchsafed to little ginger, and salt. Mix all these in comptroller Richard B. Connolly. He is now traveling in Ireland, and enshallow pan.

PLIM DOUGHNUTS .- Take one cap of sugar and one cup of sweet milk, two teaspoonfuls of cream-of-tartar and one of soda, the latter dissolved in half a cup of hot water, a little salt and spice with nutmeg. Mix with flour until hard enough to roll, and fry in hot fat.

Cheap Poultry Yard.

Set posts firmly in the ground, six feet high, eight feet apart. Take No. 9 wire, and stretch from post to post outside, fastening with staples made of wire driven into posts. Place three wires one inch apart, one foot from the ground; another three at three feet ten nches from the ground ; another three at top of posts. Take common laths and weave in, leaving three inches space between sides of each. This makes the fence four feet high. Then take other laths, picket one end, and chamfer the other like a chisel blade, and interweave among the top wires ; then shove the chamfered edge down beside the top of the bottom lath, lapping under wires two inches. This makes a cheap, durable, pretty fence, that is seven feet and should be left somewhat slack, as interweaving the laths will take it up,-J. W. Lang, in the Poultry World,

Charcoal for Fowls.

The kenefit which fowls derive from eating charcoal is, I believe, acknowl-The method of putting it before them is, however, not well understood. Pounded charcoal is not in the shape in which fowls usually find their food, and consequently is not very enticing to them

I have found that corn burnt on the cob, and the refuse-which consists almost entirely of the grains reduced to charcoal, and still retaining their perfect shape-placed before them, greedily caten by them, with a marked improvement in their health, as is shown by the brighter color of their combs, and their sooner producing a greater average of eggs to the flock than efore,-S. Rufus Mason in the Poultry World.

Gently warm the greased or spotted part of the book or paper, and then press upon it pieces of blotting paper, one after another, so as to absorb as much of the grease as possible. Have ready some fine, clear essential oil of turpentine, heated almost to a boiling state; warm the greased leaf a little, and then with a soft, clean brush wet with the heated turpentine both sides of the spotted part. By repeating this application the grease will be extracted. Lastly, with another brush dipped in rectified spirits of wine, go over the

place, and the grease will no longer appear, neither will the paper be discolored

Blind Staggers in Horses.

A writer in the Southern Cultivator says he has seen horses cured by the ceeding 140 degrees Fahrenheit. The following remedy; As soon as it is operation should be completed in three known that the animal has staggers, which can readily be told by its dull, sleepy appearance, disposition to move round in a circle, and running against objects that come in its path, bleed copiously from the neck, and immediately pour into each ear about a gill of expand to their natural condition. The meat powder prepared in this way has a spirits of turpentine. Also, get as much turpentine up each nostril as possible, light by using a stiff feather or small brush. Give light diet, or grass only for a day or two, and a cure is effected.

To Make Green Pickles.

A correspondent replies to the question "how to make green pickles, ns follows : - If hard, green cucumber pickles are wanted, salt down in dry after any amount of boiling. salt, putting a layer of salt in a jar, then a layer of pickles, and so on until full. This will produce pickles as green as they can be made, but it is more costly than making brine. If you have stock to feed the salt to, it will be better than the old process. Souring may be done process is not calculated for manufacturers for market.

Wheat Sacks.

Wheat Sacks are a very important item to the wheat growers of California, We notice that a statement was recently made by the President of the San Joaquin Farmers' Club that a San Francisco firm, representing a capital of \$15,000,000, had offered to furnish 80, 000 good, second-hand sacks for 91 cents each.

facilitated.

The Largest Railroad Shops in the World.

Located in Cheshire, one of the midland counties of England, and situated on the London and Northwestern Railway, some five sixths of the distance between the metropolis and Liverpool, by itself, but a city of no mean importance when considered in connection with the vast works which it contains. The establishment which supports, and, in fact, forms the town, the population and extent of which is about half that of Worcester, Mass., was originally laid down by George and Robert Stephenson, and is known as the Crewe Works, or, as it would be termed in this country, the shops of the London and North Western Railway. Here no less than six thousand hands are employed, building or rebuilding the two thousand two hundred and twenty engines which, for repairs.
