The massive gold head tentions, caused the hair of our citizens is elegantly carved and bears the legend in German Text and script "from J. W. The cane is to be brother dying it decends to the next oldest, and when the three brothers are no more in need of canes, to stay their declining years, it will then go to Elk Lodge A. Y. THE new issue of one dollar United States Treasury notes has made its appearance. The new notes of this de comination, like all the steel engraving bank note work of the government, is admirably executed. While the general style of the old and the new one dollar notes is the same on the face, the backs are entirely different. On the face of the new note is the same central medallion head of Washington, and left hand corner viguette of Columbus discovering America, as well as the same right and upper corner lathe work denominational vignette. There is no green tint on the face of the new note, as is the case with the old issue. The difference of engraving on the face of MILLSTONE has a literary society, the note are simply in the borders for numbers, and in the red treasury seal. The latter is now smaller, and placed between the Washington and Columbus vignettes. In place of the large seal on the old note, is a red border and lathe work over the block letters forming the words "one dollar." The back of the new note is green, of course, but of a new, elaborate and intricate design of geometrical lathe work, with St. An-

words "United States of America."

SENATOR MORRILL, of Vermont de ivered a speech at Rutland a few days ago, that was chiefly notable for the oundness of its views on the question of he currency. He entered a strong pleaor honest money, that was directed especially to the agriculturists, and his lews cannot fail to have great weight Hipped coin, as a legal tender, he said, would be no more dishonest than depreciated paper. States never chartered banks with the privilege of issuing dereciated paper and calling is money The necessity for such a false standard long ago passed away; and while its continuance is pernicious to all healthy business, it is exceptionally oppressive to the agriculturists, whose form at no time could have been sold for inflated prices, and the value of whose products has borne no just proportion to the inhereditary, and in case of the oldest creased cost. Mr. Morrill apposed the reciprocity treaty as discriminating unjustly against American producers He considered it a one-sided arrangement, in which Canada derived all the benefit, while the State suffered to a

proportional extent. SIMPLE CURE FOR BOILS .- Dr Simon, physician of Lorraine, gives us a new cure for boils, namely, by treating them with camphored alcohol. As soon as the culmination point of a boil makes its appearance he puts a little of the liquid in a saucer, and, dipping the ends of his little finger in it, rubs the inflamed surface, especially the central part, repeating the opperation eight or nine times for about half a minute. He then allows the surface to dry, placing over it a slight coating of camphorated olive oil. He says that four such applications will, in almost all cases, cause boils to dry up and disappear; the operaevening. The announcement of so simple a cure for such a painful malady will bear repetition.

CORRESPONDENCE.

Benezette, Sept. 22d, 1874.

MR. EDITOR OF ADVOCATE: With your permission I wish to correct statements, made in a letter printed in the ADVOCATE, dated Sept. 9th, 1874, from Penfield, over the signature of "A Guest." In the first place he says that the Hewit family is one of the oldest and largest in the county, his father and mother having settled in the county 55 years ago. Now, 55 years takes us back to 1819. In my father's account book I find an account beginning March 25th, 1818, and the account with Mr. Hart continues up to 1828, February 28, and further I have not hunted up. Another statement is to the effect that they were the first settlers of all this region up and down the Bennetts Branch, and remained so for many years, and during all this time Mrs. Hewit and daughter did not see a white woman, their nearest neighbor then being Benezette etc. Now I find by reference to my father's books, charges against John Boyd, beginning August, 1816; the first is Dr. To Erasmus, canoeing and helping about his house 84 days. At that time Boyd commenced making improvements preparatory to building a sawmill at the mouth of Kersey Run, where Weedville now stands, and got it running in the fall following. I also find by father's book an account opened between him and Chauncey Brock.

way, in 1817 previous to December 20th, By the same old book I find accounts opened with Col. Isanc Webb, old Jonathan Nichols, | Uncle Sam. Fredrick Weed, Capt, Josiah Mead, Isaac Horton, and I could name several others, were it necessary to show that Mr. Hewit's family was not the first in the neighborhood. All these accounts commence in 1817 and 1818. Mr. Ebenezer Hewit commenced, as stated previously, in 1818. Now, I think from what I have written, "A was not correctly posted, in regard to all of his statements, respecting the Hewit family. But Mr. Hewit and family saw hard fare when they first settled where they now live, as all of the first settlers did, but they had neighbors not far off, and there was a sawmill as stated, which was more convenient than it was when my father commenced in the county, 1818, without a mill nearer, well, I do not know how far off, or nails to build with. There are some oth r statements might be corrected but I will pass them for the present

George Bayard Aldrich, the son of A. T. and S. A. Aldrich departed this life September 14th 1874. To say that his death caused intense sorrow and grief is not saying enough. Soldom will you see more heartbroken people as was at the grave of our young friend and pupil, Bayard was a tender hearted well meaning upright and honest boy. He was gifted with a faculty that enab led him to learn with case and discern readily. He possessed a characteristic. jocular in its nature, that won for him the entire respect and love of his schoolmates. As a pupil he was obedient kind and willing to his teacher. As a school mate he was forbearing, lively, free and kind to his fellow mates The old praised and the young admired bim. school-mates without exception deeply lamented the one with whom they so often talked, walked, played and studied. They deplored their dear friend for in him they found a tender and kind disposition. His death made the school room a bouse of sorrow and tears. The school mournfully and slowly led the procession to place of burial. At the grave while that which was mortal of our young friend was being bid from mortal view, the school sang with pathos They are going down the valley." Wm Martin of Ridgway after his brief yet affecting and appropriate remarks read the following which was written for the occasion:

Thy voice that oft in accents broke Will ne'er again thy love proclaim, Fee God in all his wisdom spoke: "Come up hither," where love doth reign.

Oh thou art dead, my dearest boy, What can your tender parents say; Your brothers, sisters have no joy. For thou so quickly passed away. There is a rest beyond the skies,

Where angel voices sweetly sing-A rest where sorrows never rise. Where Christ to thee a crown will bring We will, like thee, soon pass away To realms of bliss, where thou wilt be:

Where no disease its hand can lay, No death-for 'tis eternity. One who possessed the energy and perserverance found in those youths who in after life became men of integ-

rity, honor and influence. One who was as it were a bud of true manhood but destined to bloom in heaven. HIS TEACHER.

The Drouth.

General drouth prevails. In Philadelphia the supply of water is alarmingly low and restrictions have been placed upon its use. In New Jersey the cort crop has been seriously injured and for est fires still rage unassuaged. Throughout this region we hear a general murmur. The corn crop which promised so well several weeks ago, cannot but be affected. The ears will not grow to maturity, nor will the grain de as full and solid. It is too dry to do seeding and pastures have become bare. Unless we have rain soon the injury to the crops will be incalculable. In these stringent times the people may well fear the consequences of a long drouth .-
