Domestic Recipes.

BAKED INDIAN PUDDING .- The following is a recipe for baked Indian pudding which has been handed down from mother and daughter for many years back in a New England family: Boil a quart of milk; stir into it gradually three gills of yellow Indian meal and half a pint of molasses; scald thoroughly and add two tablespoonfuls of powdered ginger and a teaspoonful of salt; butter pint of molasses; scald thoroughly and add two tablespoonfuls of powdered ginger and a teaspoonful of salt; butter a brown earthen pan; put into it half a pound of beef suet chopped fine; turn in a quart of cold milk; then add the pudding and stir up well; bake five hours. Serve either plain or with hard sauce; the rule for the sauce being a cup of granulated sugar to half a cup of butwell beaten together, and flavored with either vanilla, lemon or grated

CURRY.—Take pieces of beef or mut-ton, or better, both, and stew them to shreds; to one quart of stew add one tablespoonful of fresh ground coriander seed, one teaspoonful of tumeric, one teaspoonful of salt, one bird pepper, or a little cayenne pepper; fry one medium sized onion and add; if the gravy is thin, thicken with a little flour. An economical housekeever will use remnants of beefsteak and mutton chop to

Lemon Meringue Pie.—Boil three lemons until they are soft enough for a straw to penetrate the rind; mash them straw to penetrate the rind; mash them its lightning-like rapidity as it plowed lits lightning-like rapidity as it plowed lits way through the doomed town, that up fine with a tablespoonful of butter, its way through the doomed town, that one cup and a half of powdered sugar, they had little or no time to prepare for and the yolks of six eggs; make a thin crust; put in the mixture and bake it; when cool, beat up the whites of the falling buildings and either killed outeggs with one and one-half cups of right or crushed and maimed, so that powdered sugar and spread it over the pie; brown it a nice color. their lives are despaired of. There were eight of the citizens killed, their bodies

POTATO YEAST,-Two good sized potatoes, grated raw; pour on one-half pint boiling water, one-half cup of white sugar, teaspoonful salt; when cool, put in one-half cup good yeast; let it rise; img caught up in the storm and thrown when light, put in a bottle and cork tight. Half cup makes two loaves of bread; reserve one-half cup every time ported to have been terrible to an alarm-

CHICKEN PIE CRUST .- Six cups of flour, one and one-quarter cups of water, one and one-half pounds of lard, one teaspoonful of salt, one-half teaspoonful of soda, sprinkled over the dough. This is crust enough for a pie of two

Sponge Cake.—Three eggs, beaten shared the fate of many other building one minute; one and one half cups of In addition to the rain there was also white sugar beaten five minutes; one heavy hail storm, the weather having oup of flour, beaten one minute; one suddenly turned cold. The dead, so for half cup of cold water and another cup as could be ascertained, are Josh of flour, with two teaspoonfuls of baking Richards, Mrs. John Looney, Mr powder, beaten one minute; bake in a Thomas Richards, Mrs. Thomas Ed

JELLY ROLL.-Three eggs, one cup of sugar, one teaspoonful cream tartar, onehalf teaspoonful of soda, one cup of flour; pour it thin into a baking pan; slowly; spread jelly over it, and up. Wrap it in a cloth.

Farm Notes.

One feature of fruit growing by the doctors available at once went to the farmers, who are mainly the fruit growers, is the neglect to thin out the crop when the fruit is about half grown. The refuse taken from the tree at that time, being one or two of the smallest ly east of Dubuque, and ten miles nor from a cluster, and all the small and of Galena, in the extreme southeaster knotty ones on the weak twigs, etc., are portion of Grant county, Wis., and no profitable food for all classes of stock.

Of all churns that have come under village, and is situated in very nearly

your sheep without worrying and fatigue; the less exercise the better. Hang it up at once; now change ends; hang him by the head, and skin down to the tail; the job is done in half the time, and neatly.

The following is a method for healing up wounds, caused by the splitting of fruit trees by frost or other means Heat some grafting wax; dip a strip of muslin in it, and place it perpendicularly Methodist church. The storm was over the wound; then put three or pretty general over the northwestern more narrow bands around the tree. That is sufficient, and the healing process will go on rapidly.

Nest boxes should be movable. that after hatching, and occasionally when used for laying, they may be conveniently cleaned. One way is to whitewash them; but another, preferred by some, is to kindle a fire inside and char them. This process will effectually destroy vermin and their larvæ, and will thoroughly purify the nest by leaving a coating of charcoal inside. This substance is one of the best antiseptics, and a perfect deodorizer. Boxes made of seven-eight stuff-pine, hemlock, or spruce-will outlast a number of these purifications by fire, as the process tends to preserve the wood.

### Natural Age of Fruit Trees.

It seems to be the common belief other papers. Their amount would dethat there is no limit to the natural age pend, he said, upon the prices his propof apple trees. But this is certainly mistake. We all know that the peach tree usually fails to be profitable at twelve to fifteen years of age, and the cherry and plum averages only twenty to thirty years; the pear, in favorable circumstances, forty to fifty years-in rare cases a much longer time; so, also, the apple tree has its natural limit, and although, like man's life, the duration of the period of health and vigor varies greatly according to constitution, nurture, climate, etc., its approaching termination is clearly indicated by signs of debility and disease. On very deep and favorable soils, and where the trees are not damaged by severity of climate, apple orchards are occasionally found bearing fair crops of fruit at eighty to one hundred years of age, but these are ditional, but this is secured by mortnearly as rare as for their owners to live gages. Very few soils are of the best kind for an orchard, and everywhere our climate is either too warm or at times too cold for the best health of the trees. Injury by severe cold blackening all the no business whatever. He dates the bewood, I am convinced, is a very common cause of the premature failure of orchards; but starvation, in consequence of exhaustion of the soil, is still more common, and this is a more difficult matter to remedy than most people suppose, especially when trees have attained full bearing size.

### Policy.

A portly Detroit citizen fell in the mud, and another citizen who had a grudge against him called to a newsboy twelve or thirteen years old and said: "If you'll go up to that fat man and mining company also caused him a ask him what he picked up I'll give you heavy loss. Mr. Drew expresses his a quarter."

Not for a dollar-not for ten!" exclaimed the lad. " Why ?"

"I could get away from him, I know, but I guess he'd be mad, and I won't do it. I'm just growing up now, and I had no money to buy shoes; but I met don't know but I'll want to be that very a man without feet, and became conman's son-in-law some day!"

sling, and your port wine sangeree and your tod," said Dade, going over a cata-logue of compounds, "and I kin drink 'em, and you know it." So they laughed together, on the

strength of reminiscences.

"Well, Jack," said the governor,
"what kind of an office do you want?" "Governor Jack," was the response, "I wants a office with bang-up big pay and nothing to do !"

## The Centennial Legion.

The Centennial legion, which is to carade at Philadelphia on next Indesendence day, as escort of the President of the United States, is composed of one military company from each of the original thirteen States:

New Hampshire—Amoskeag Veterans. Massachusetts Boston Ligat Infantry. Rhode Island -First Light Infantry. Connecticut—New Haven Grays. New York—Old Guard. New Jersey-Phil. Kearney Guard. Pennsylvania-State Fencibles. Delaware—American Rifles.

Maryland-Fifth Maryland Infantry. Virginia-Norfolk Light Artillery

North Carolina—Fayetteville Rifles. South Carolina—Washington Light Infantry.

Georgia-Clinch Rifles. Each command will wear its own uni form, and carry the flag of its State, and a medal commemorative of the occasion will be presented to each member of the

# Waiting for Better Times.

"You are not having many nice dresses this year," said one Chicago belle to another, the other evening. "No, I know I don't," was the reply. "But why don't you?" continued the

inquisitive friend. "Well, I will tell you, Madge," was the answer. "You see pa says that we've got to scrimp along a little for a while until he can make an 'assignment' or something, after which he says we

can 'splurge' ad we want."

The friend looked surprised for a moment, and then turning to her associate, exclaimed, in a burst of confidence: "Why, that's just what my father keeps saying—what can they mean ?"

#### AGE OF THE SEXES.

The Space Allotted and Marked Of to th How to Tell the Long from the Short Lived .- The Ears and the Fingers Indicate Vi-

> Dr. Lambert, of New York, gave an interesting lecture on woman and her nature, duties, needs, and entitlements. He in a good natured manner spoke of his peculiar treatment of the subject, and said it was a new lecture, and gave a little sketch of his own history. Coming directly to the lecture itself, he discussed the question of the comparative length of life of American men and warmen and between records of this women, and between people of this country and those of Europe. Fe showed statistics to prove that, contrary to the popular opinion, the people of New York were longer lived than those

of the old world. The English girls, so often spoken of for blooming cheeks and robust forms, owed these qualities to their out-door life, the damp coldness of their native island and their fondness for the national beverage, beer. The fact was, the women of this country were longer lived than the English women. There proba-bly was no place in Europe where so many old people could be found in proportion to the population as in New Hampshire, and three out of every four of the people who had eached the age of ninety years in New Hampshire were

The constitution of woman was substantially the same as the constitution of man, and the duration of their earthly existence, as a general rule, on the American continent, was the same. 4,300 Gliding into the peculiar marks and formations of the body as indications of long or short life, the lecturer said that if a lady wore a heavy earring, and the ear was pulled down in consequence, presenting a distorted appearance, this indicated a short life to the owner of the weak member. On the contrary, should the ear retain its natural position over a heavy ring, tue strength of the gristle pointed to a long life to the owner.

And so with fingers. If a hand had very short fingers, that had an indication of longevity, whereas long fingers were indicative of a short span of life. It was not found that the proportionate number of men and women dying at the different ages varied materially. After reaching the age of twenty a girl was liable to live to a good ripe old age as man at the same period. As a rule, i male beauty and longevity were no companions; those azure eyes and ver fair faces that carry off short live

young men are not long lived.

Another wonderful fact was the co stant change going on in the body. The air of the hall was at that moment for of particles of the brains and organiz tions of those present. Every da every hour, aye, every moment, worked a change in every living form. The speaker said that he would like to se women withdrawn from the post-office counting rooms, and other positions labor where they were half paid, a young men put in and paid double t amount paid women. Then the m could support the women.

Every man had a woman beside his and should work for her instead of ha ing her earn her living outside of t household. The young men, he thought, ought not to be crowded out of the places and sent West. Men of long life usually had some great and strong principle in their characters, some stamina which symbolized a vigorous

### Poor Organs.

The following, from the New York since, is yet more true to-day than when it was written; as the popularity of the instrument has extended, the number of imcompetent makers has increased. There are now few articles in reference to which the public is more deceived and imposed upon than in parlor or cottage organs. This is attested by the thousands of such instruments now standing utterly useless, all over the country, which are but a few months or vears old:

CABINET OR PARLOR ORGANS. usual in such cases, the new and large demand for these instruments has induced a great number of persons to engage in their manufacture, some of whom are quite unequal to the business hey have undertaken. It requires something more than the mechanical skill of the artificer in wood and iron to make and prepare for use a musical instrument; and yot some have evidently brought nothing else to their aid in the business. The result is that the country is becoming filled with inferior and defective instruments. Large sums of money are expended for valueless articles, and the people are defrauded of their needed musical education. The evil is intensified by the fact that these inferior instruments are, on account of their inferiority, most industriously urged upon the public. Because they cannot compete with better ones in the open market, they are pressed upon the public by direct solicitations; and because they offer larger commissions, they are those most commonly offered agents and hawked by peddlers. And as most purchasers are unable to judge of the relative merits of these things, the inferior articles are often bought when better ones are desired, and would be cheerfully paid for.

Induced by these considerations, we have been at some pains to ascertain what instrument of the many now soliciting the public favor combines the greatest amount of real excellencies We have prosecuted this inquiry entirely independently of aid or direction from interested parties. The opinions of some of the best musical critics, composers, and performers have been obtained; reports of experiments made in the ordinary use of various instruments in churches, schools and families have been compared, all of which with singu lar unanimity concur in assigning the first place to the Cabinet Organ of Mason & Hamlin-a decision that corresponds with our own previously formed convictions. \* \* \* We have written these things without solicitation from AGENTS MEMBERS IN THE STATE AGENTS IN WEINT IN THE STATE AGENTS IN THE STATE AGENT A any one, and without the knowledge of those whose pecuniary intrests we may seem to favor The interest of our readers is the object we have sought especially to promote, and in that interest

Chapped hands, face, pimples, ring worm, saltrheum, and other cutaneous affections cured, and rough skin made soft and smooth, by using JUNIPER TAR SOAP. York Christian Advocate.

Pimples, Eruptions, Rough Skin.

The system being put under the influence of Dr. Pierce's Golden Medical Discovery for a few weeks, the rkin becomes smooth, clear, soft and velvety, and being illuminated with the glow of perfect health from within, true beauty stands forth in all its glory. The effects of all medicines which operate upon the system through the medium of the blood are necessarily somewhat slow, no matter how good the remedy employed. While one to three bottlee clear the skin of pimples, blotches, eruptions, yallow spots, comedones, or "grubs," a dozen may possibly be required to cure some cases where the blood is rotten with scrofulous or virulent blood poiseons. The cure of these diseases, however, from the common pimple to the worst scrofula, is, with the use of this most potent agent, only a matter of time. Sold by dealers in medicines.

Pimples, Eruptions, Rough Skin.

#### Important to Persons Visiting New York or the Centennial.

The Grand Union Hotel., New York, opposite the Grand Central depot, has over 350 elegantly furnished rooms. Elevator, steam, and all modern improvements. European plan. Carriage hire is saved, as baggage is taken to and from the depot, free of expense. The restaurants supplied with the best, Gueste can live botter for less money at the Grand Union, than at any other first-class hotel ptages and cars pass the hotel constantly to all Sarts of the city, and to Philadelphia depot.

#### Dr. SCHENCK'S STANDARD REMEDIES

The standard remedies for all diseases of the lungs are SCHENCE'S PULMONIO STRUP, SCHENCE'S SEA WEED TONIC, and SCHENCE'S MANDRAKE PILLS, and, if taken before the lungs are destroyed, a speedy cure is affected.
To these three medicines Dr. J. H. Schenck, of Philadelphia, owes his unrivaled success in the treatment of

pulmonary diseases.

The Pulmonic Syrup ripens the morbid matter in the lungs; nature throws it off by an easy expectoration, for when the phiegm or matter is ripe a slight cough will throw it off; the patient has rest and the lungs begin

To enable the Pulmonic Syrup to do this, Schenck's Mandrake Pills and Schenck's Sea Weed Toule must be freely used to cleans the stomach and liver. Schenck's Mandrake Pills act on the liver, removing all obstruc-tions, relax the gall bladder, the bile starts freely, and the liver is soon relieved. Schenck's Sea Weed Toulc is a gentle stimulant and

Schenck's Sea Weed Tonic is a gentle stimulant and alterative; the alkali of which it is composed mixes with the food and provents souring. It assists the digestion by toning up the stomach to a healthy condition so that the food and the Palmonic Syrup will make good blood; then the lungs heal, and the patient will surely get well if care is taken to prevent fresh cold.

All who wish to consult Dr. Schonck, althor personally or by letter, can do so at his principal offce, corner of Sixto and Arch Streets, Philadelphia, every Monday. Schenck's medicines are sold by all druggists through out the country.

HALE'S HONEY OF HOREHOUND AND TAR

FOR THE CURE OF COUGHS, COLDS, INFLUENZA, HOARSE-NESS, DIFFICULT BREATHING, AND ALL AFFECTIONS OF THE THROAT, BRONCHIAL TUBES, AND LUNGS,

LEADING TO CONSUMPTION. This infallible remedy is composed of the Honey of the plant Horehound, in chemical union with Tan-Balm, extracted from the LIFE PRINCIPLE of the forest tree ABIES BALSAMEA, or Balm

The Honey of Horehound SOOTHES AND SCATTERS all irritations and inflammations, and the Tar-Balm CLEANSES AND HEALS the throat and air-passage leading to the lungs. Five additional ingredients keep the organs cool, moist, and in bealthful action. Let no prejudice keep you from trying this great medicine of a famous doctor, who has saved thousands of lives by it in his large private practice.

N. B.—The Tar Balm has no BAD

TASTE or smell. PRICES, 50 CENTS AND \$1 PER BOTTLE. Eold by all Druggists.
