Is Toy Money Counterfeit?

The solicitor of the treasury has given an official opinion on a subject that may be of interest in certain sections of the country. It seems that the manufacture of "educational toy money," of paper or pasteboard covered with tin foil, in the likeness and with the device of silver coin, is being made in large quantities, to teach children the nature and character of lawful coin. The secretary of the treasury having referred to Solicitor Rayner the question whether the making and using of the "toy money" came within the inhibition of the law, the latter has written a letter to Messrs. M'Millan Bros., Booneville, Mo., in which he says: "Any person making use, selling or having in his possession such 'toy money' must do so at the risk of indictment by the grand jury, and convicted by a petit jury, of making using or having in his possession the same 'with the intention to defraud' some other person. A question might arise whether paper covered with leaden foil would come within the category of the provisions of the law. I am clearly of opinion that it would just as much so as a leaden (counterfeit) quarter dollar.

—At the Catholic Fair last night in the contest for the gentlemen's gold watch Captain Schoening presented \$311 while Mr. Murphy presented but \$88, consequently the watch was awarded to Captain Schoening.

—On Thursday of last week Jas. McAfee received a telegram announcing his mother's death, and on the same day started for Weatherly, Carbon Co., where she had lived. She was aged 54 years, and at her death, was living with her second husband Jeremiah Stout.
The following is an account of Mrs. Stout's death from a Weatherly paper: Mrs. Maria Stout aged about fifty four, wife of Jeremiah Stout Esq., departed this life at eleven o'clock this morning. Her death was sudden retiring at ten P. M. yesterday in usual health. Mr. Stout awoke about six o'clock and found her sitting up in bed, but in a state of semi-consciousness. She lingered in this condition for five hours, when she quietly breathed her last. She has been a sufferer from asthma for many years, but her unexpected death resulted from apoplexy. Mr. Stout and family have our deepest sympathy in their affliction. Funeral services next Monday afternoon.
—Splint east rocking chairs from the smallest to the largest size at the cheap furniture store cor. of Main and Mill streets.

More Political Virtue and Honor Wanted.
There is much talk in and out of Congress about the necessity of changes in our mode of electing a president, one also of announcing the result, much more, we think, than is necessary. Any method is a good one that is faithfully and honestly carried out, but no method can prevail against a dishonest intent, or prevent fraud being practiced if those charged with the work, or who have control of it, are bent upon acting the knave and cheating the people. What we need is not more laws and rules, but more political virtue and honor with men in high places of trust, as well as in low places, that can be depended upon to act fairly, enforce the rules impartially and perform their functions with strict integrity and an intelligently-directed purpose to deal justly by the people and faithfully carry out their will as they have found it to have been expressed, and not men who enter upon that duty with a fixed and settled intention in advance of thwarting the wishes of the people by their acts of partisanship. The rule regulating the manner of announcing the vote, fixed in the Constitution, and the usage in vogue for casting it, which has now been so long the custom as to have become our common law, are as fair methods as could perhaps be adopted and as easy of enforcement. By them the will of the people may be fully and fairly ascertained and carried out to the very letter, and what more do we need or seek for?—Richmond (Va.) State Dem.

CONSTABLES, ATTENTION—It is a part of your duty, under the law, to advertise the approaching February election, which comes off the third Tuesday of next month. The law requires you to put up not less than ten notices at least ten days before the election. Where there is a Justice of the Peace to elect, a notice of that fact must be posted up not less than twenty days before the day of election. In boroughs or townships where there is no Constable, it becomes the duty of the Supervisors or the Assessor to put up the notices, though they need give but five instead of ten days' notice.

—Winnipeg, Man., Jan. 22.—Capt. Young, of the custom department, who has been visiting officially distant posts on the boundary arrived here yesterday, having left Wood mountain on December 12. He experienced considerable hardship on the way on account of the recent unusually low temperature. Four of his horses were frozen to death, their legs having been cut by the crust of the snow. He arrived at Quappelle on Dec. 3.

The following is a summary of Capt. Young's news: The Blackfeet have been killing cattle belonging to settlers and traders since last fall. They commenced this west of Fort M'Leod, and gradually worked their way east to Fort Walsh, where they killed several cattle while Captain Young was there. Though the lakes and ponds are teeming with fish and game the Blackfeet are actually starving, because they are too proud to kill anything which they cannot hunt on horseback. At Fort M'Leod about 7,000 Indians are living at the expense of the government. There are plenty of buffalo at Fort Walsh. The Sioux are at Wood mountain and are behaving well, no deceptions being reported. The Cree and Assiniboines in the vicinity of Fort Walsh have not received much government provision, and feel bitter because the supplies supposed to be for their benefit have been distributed to the Blackfeet, who formerly dared not come so far east.

The Blackfeet are well armed with Winchester rifles and revolvers, and have an abundant supply of ammunition. Most of the Canadian Indians are now hunting south of the boundary line and are doing well.

The tramps then broke up the windless and threw the pieces, together with the bucket and rope, down upon Schultz, who was thus imprisoned. He set up a vigorous yelling for help, but there was no response. After some time Ziegler recovered consciousness, and though badly beaten, made his way a quarter of a mile to the farmhouse, where he found assistance and sent men to rescue Schultz, who was found to be suffering from a severe scalp wound, caused by the falling timber. The neighbors organized a hunt for the tramps, but they could not be found.

The Maine Problem.

Augusta, Me., Jan. 29.—The only disorderly feature of the state house this morning is that caused by the presence of the military. The basement has been converted into a kitchen, and the aroma arising there from is anything but savory. The library is deserted and all the committee rooms furnished a lounging place for the soldiery. Under the present arrangements each company is required to furnish guards for twenty-four successive hours.

Augusta, Jan. 25.—The fusion senate met this morning and took a recess until four o'clock this afternoon. At that hour both branches assembled and adjourned until to-morrow at ten o'clock. The fusionists are in better spirits, the judges having gone to Bangor to assemble. Most of their men returned to-day and will remain until after the decision.

Both branches of the Republican legislature to-day passed resolutions providing for a constitutional amendment for electing the Governor by a plurality instead of a majority vote. The Senate appointed committees on investigation of enlistments and enlistments and enrollments of men, and on loss of State sales.

Damariscotta, Me., January 25.—The assessors of Damariscotta, two Democrats and one Republican, have decided not to send a valuation to either legislature until the trouble is settled. One of the assessors is a member of the fusion house.

Augusta, January 27.—The fusionists assembled in Union hall this morning. In the house the committee on investigation of the bribery case presented a report, which was accepted. That they had notified Wallace R. Smith against whom charges of bribery were made, to appear before them, but he has not done so. There being no further business the house adjourned until to-morrow.

In the fusion senate there was also adjournment until to-morrow. President Treasurer Will refused this morning to follow the finance committee to examine his books. He says he does not recognize either government as legal. Mr. White expects to have a writ of mandamus served upon him, and thus bring the whole question of legality of the fusion government again before the courts.

The more ultra of the fusionists say that should the opinion of the court be adverse to their position they will inform in a body, subject to the call of Governor Smith; that Mr. Sawyer will continue to discharge the duties of secretary of state and all returns and other documents from fusion towns will be sent into him. Terrible Collision!

TWO MEN KILLED, AND THREE INJURED.—FULL ACCOUNT!

[From the Cameron County Press.]
Last Wednesday afternoon, at 1:30 o'clock two freight trains collided on the Philadelphia and Erie Road, near the coal shutes about a mile west of Cameron.

An extra freight train was made up at Emporium and started east immediately after the arrival of the Mail train at the Junction, with orders to run to Cameron and take the siding at that place. The operator at Cameron received orders to hold express west at Cameron.

THE SIGNAL.
The signal is out at all times. Trains at that point, before reaching the station, blow for orders. If there are orders the signal remains out and the train stops; if there are no orders the operator pulls in the signal and the train proceeds.

CAUSE OF THE ACCIDENT.
On this occasion, as the western bound freight train approached and whistled for orders, the operator involuntarily (probably from force of habit, as there are comparatively few orders at that station) pulled in the signal and the train proceeded on its way. Mr. Herron (the operator's) wife had been seriously ill and at the time he pulled in the signal was talking with a lady about his wife's illness, which probably took his attention from his duties and caused the mistake.

THE CRASH!
As the trains reached the curve near the coal shutes they collided with a terrible crash, destroying both engines and about a dozen cars. The engine and fireman on the western bound train did not see the extra and were caught in the wreck. The men on the extra going east fortunately saw the other train and saved themselves by jumping.

THE KILLED AND INJURED.
Christian Dean, engineer, foot burned—his leg near the ankle since been amputated.
Edward Nixon, fireman, died a few hours after the accident.
James Grace, brakeman, head injured—died Friday morning.
Eugene J. Kissel, brakeman, back and head hurt—died last night.

Mr. McAvoy, brakeman, slightly injured about the head.
THE OPERATOR.
Will L. Herron, who made the terrible mistake, is one of the oldest and best operators on the road, having been in the employ of P. & E. Company as operator eleven years, and heretofore has been perfect in his work. Mr. Herron is a gentleman of correct habits, always attentive to business, and respected by everybody. He informed us that when he pulled in the signal he was not conscious of the terrible mistake he was making; did not remember the order even when the train went thundering by his side, and the awful fact that he had neglected his orders to hold the train flashed upon his mind when the train had passed—too late to stop it.

The mistake is one of those unaccountable transactions that occasionally happen to the most efficient railroad employees. Every human being is liable to make mistakes, but a mistake of this character is fatal. Of course Mr. Herron keenly feels the responsibility of the act; the suffering he endures is pitiable, and he has the warmest sympathy of our best citizens. His good record and excellent character is worth everything in this trying hour.

INCIDENTS.
When the operator discovered his mistake he exclaimed: "My God! I have allowed that train to pass and there will be a collision!"
Mr. Tweed, section boss, was at work at Cameron putting in a switch, and noticing the steam escaping from the fitted engines, ran into the office and told Mr. Herron that he thought the engine had exploded. "No," replied the operator. "It's a collision! I allowed the train to pass when I had orders to hold it." Mr. Herron immediately telegraphed to Runovo what he had done, and the consequences of his mistake. The Runovo office telegraphed to Emporium for physicians and workmen to go immediately to the wreck, and the yard engine and a crew of men from the Emporium yard, with Dr. DeLong at once started on the scene of the disaster.

The workmen at Cameron also started on a handcar, and an engine with Supt. Westfall and other R. R. officials started from Runovo.

The engineer and fireman were so thoroughly wedged in the wreck that it took two hours to release them—during which time the two men suffered the most terrible tortures.

THE HEROISM.
The engineer with a foot upon the hot boiler, literally roasting by inches had managed to get a hammer and chisel and was trying to release his crushed and mangled companion, entirely forgetful of his own sufferings.

The so-called heroism of the battle, where men excited and indamed by the worst passions that can abide in the human breast rush madly to their death, can have nothing in common with that heroism which prompts a man when suffering the exquisite tortures of the inferno, to call for help not for himself but for others; and this is precisely what was done at the wreck on the P. & E. R. last Wednesday by Chris. Dean, the heroic engineer of No. 1050. He was crushed between the timbers of his cab with one foot pressed against the boiler, where it was being slowly cooked, while near him lay his fireman unable

to move. When found, the noble engineer was at work with a hammer and chisel trying to extricate his fireman. As the men drew near, Chris. Dean looked up and his whole frame quivering with the intensity of his suffering, with frightful sickening pain of his burning foot, those noble words of utter self abnegation burst from his trembling lips: "Never mind me, but for God's sake get Ed. out." That was all, not a word concerning his own fierce agony escaped him.

Then and there in the ruins of his engine, in the hiss and of rushing steam, Chris. Dean displayed a true, a lofty heroism; than which none more true or more noble has ever been recorded.

Newspaper Sales.—A postmaster is required to give notice by letter, (returning a paper does not answer the law) when a subscriber does not take his paper out of the office, and state the reasons for its not being taken; any neglect to do so makes the postmaster responsible to the publisher for the payment.
2. Any person who takes a paper from the postoffice, whether directed to his name or another, or whether he has subscribed or not is responsible for the paper.
3. If any person orders his paper discontinued he must pay all arrears, or the publishers may continue to send it until payment is made, and collect the whole amount, whether it be taken from the office or not. There can be no legal discontinuance until the payment is made.
4. If the subscriber orders his paper to stop at a certain time, and the publisher continues to send the subscriber is liable for the cost of the paper sent out of the postoffice. The law proceeds upon the ground that a man must pay for what he uses.

5. The courts have decided that refusing to take a newspaper and perceiving from the postoffice or removing and having their unrecalled for, is prima facie evidence of intentional fraud.
