Patriotism is no doubt a powerful lever in urging a soldier to take desperate chances, but the late war proved that there were other levers of equal force. A New York lieutenant and thirty-four men held possession of a block house along the Baltimore and Ohio railroad in 1862. One morning a The best remedy, therefore, is to plant scout came in and reported that a force of 150 Confederates was advancing to capture the post. The lieutenant ordered the men in line and thus addressed

"Soldiers, the enemy is advancing upon us! He will be here in half an hour. We shall be outnumbered four to one, but I appeal to your patriotismto your love of country-to your respect for that dear old flag, to defend this post to the last. Will you do it?" "Lieutenant," said the sergeant, as he

stepped forward after an ominous silence, "we are too few and the Johnnies too many. We shall all be killed or captured, and the men won't stick. They go for evacuating right away."

"Patriots and heroes," continued the officer, after drawing a long breath, "we have just received fresh rations of coffee, sugar and bacon. We haven't been to breakfast yet. If we evacuate we have got to march twelve miles on empty stomachs. If we remain and defend to the last, I'll issue double rations as soon as the last reb is driven off. If you don't want to fight for your country, let's fight for a good, square meal."

Every hat was thrown up and every man cheered, and twenty minutes later, when the enemy appeared, he was greeted with such a hot reception that he soon sounded the retreat.

When the Union forces under Nelson made their stand at Franklin, the Confederates had been tight after them for several days, and it had been a march of empty haversacks. As the Confederates Their first attack, after a patriotic adhe saw the men chewing leaves from the cherry and apple trees, and he said:

"Brave Confederates, there is the en-We've got to lick the enemy to get this we'll have to fill up on grass, for there twenty-five miles of Franklin. Follow me to glory and-ratious!"

They followed him to the earth-works and over them, but he was killed and the lines driven back. His men, however, were the only ones who mounted the earth-works during that desperate battle; and it is an open question whether an appeal to a soldier's hunger won't make him fight as well as an appeal to his sentiment.-Free Press.

Educating Horses.

Horses can be educated to the extent of their understanding as well as children, and can be easily damaged or rained by bad management. It is believed that the great difference found in horses as to habits of reliability comes more from the different management of men than from variance of natural disposition in the animals. Horses with mettle are more ea ity educated than those of less or dull spirits, and are more susceptible to ill-training, and consequently may be good or bad, ac-Horses with dull spirits are not by any means proof against bad management, for in them may be found the most provoking obstinacy, vicious habits of different character that render them almost entirely worthless. Could the coming generation of horses in this country be kept from their days of colthood to the age of five years in the hands of good, careful managers, there would be seen a vast difference in the general character of the noble animals.

If a colt is never allowed to get an advantage, it will never know that it possesses power that man cannot control, and if made familiar with strange objects it will not be skittish and nervous. If a horse is made accustomed from his early days to have objects hit on his heels, back and hips, he will pay no attention to the giving out of harat an unexpected moment. A gun can be fired from the back of a horse, an umbrella held over his head, a buffalo robe thrown over his neck, a railroad engine pass close by, his heels bumped with sticks, and the animal take it all as a natural condition of things, if only taught by careful management that he will not be injured thereby. There is a great need of improvement in the management of this noble animal-less beating and more of education.

WISE WORDS.

Prosperity is a blessing to the good, but a curse to the evil.

He who seems not to himself more than he is, is more than he seems.

When anger rushes unrestrained to action, like a hot steed, it stumbles in its way.

Bodily labor alleviates the pain of the mind; whence arises the happiness of the poor.

The vanity of human life is like a river constantly passing away, and yet constantly coming on.

It is possible that a man can be so hanged by love that one could not recognize him to be the same person.

When you talk to women you must When you talk to women you must choose between lying and displeasing them. There is no middle course unless south and be protected from east winds. you say nothing.

To pronounce a man happy merely because he is rich, is just as absurd to call a man healthy merely because he has enough to eat.

No man ought to complain if the To measure one with his own yard-stick may be hard, but is fair.

And when we are in prosperity we are ready to think our mountain will never be brought low, so when we are in adversity we are ready to think that our

valley will never be fitled up. Fight hard against a hasty temper. Anger will come, but resist it stoutly. A spark may set a house on fire. A fit of passion may give you cause to mourn all your life. Never revenge an injury.

Happiness is evident to us in this life by deliverance from evil. "Happy is he who sees the day!" said a blind man; but a man who sees clearly does not say so. "Happy is he who is healthy!" said an invalid. When he is well he does not feel the happiness of

The Effects of Drougth.

The Country Gentleman recommends early planting in a rich soil as likely to preserve vegetables from the effects of drought. It is well known to farmers first stages of growth by severe droughts early in the season. Irrigation at such times is rarely practicable. early and give a well-enriched soil. Early plenting will often push the plants so far in growth that their roots will sustain them in dry times. still more helpful is a rich soil-in two ways-one by pushing the young plants on, and the other by holding more moisture than a thin soil can do. Very early planting can be practiced only on hardy plants. Tender ones are less injured by drought. Take the onion crop for instance, which will bear very early sowing. Nothing hurts it more than a drought when the plants are the size of goosequills. Hence the most certain and heavy crops come from early planting and rich soils. Weeds are of course more or less fatal, but no good cultivator need be advised to keep a perfectly clean surface.

How to Increase Vegetable Matter in the

The amount of vegetable matter in the soil may be increased by various methods; one is by large applications of barnyard manure, say fifty cords to the acre. But this would be very expensive, and is out of the question in common farming. It may be done by putting on peat or muck, when these are near to the fields. But this involves a considerable outlay for labor in digging the peat, and a still larger expense in carting it, whether it first pass through the yards and stables or be carted to the fields for composting or in. On some farms this may be the formed for battle many of the regiments | cheaper method of supplying vegetable

had been without food for twenty hours. matter to the soil. But on others the most economical method is the raising dress, was speedily repulsed. Cleburne of clover, to be fed off upon the land, led a part of the force making the second advance. As he rode along the lines may be worth \$9, as a fertilizer, the growing of a plant is a cheap method of improving the land. Two tons for the first crop and a ton for the second is not an unemy. Behind those earth-works are common yield for land in good heart. cannon and muskets, and men who know. The roots of clover also add lagely to how to use them. Behind those is a the vegetable matter in the soil. The big wagon-train with heaps of rations. first crop may be pastured, waiting until the crop is in blossom, and then train, and if we don't get his rations turning in cattle enough to feed it off in three or four weeks. They should be isn't a Confederate hard-tack within kept constantly upon the field, that the whole crop may be returned to the soil. This will of course help the second crop, which may be turned in with the plow soon after it is in blossom. If the equivalent of three tons of dried clover hay, and one ton of roots have grown to the acre, about \$36 worth of manure have been added to the soil, and it has been distributed more evenly than would have been possible by any mechanical process. There has been no expense for carting or spreading peat, or for composting. On the contrary there has than pay the cost of seed, of plowing twice, and other labor. This is generally

tertility of soils in common farming.

little capital.

Farm and Garden Notes. It is recommended to soak seeds in added to the water will hasten germin-

ation. Eel grass is almost indestructible in the hog-pen or barnyard, and yet can be valuable fertilizer, as it contains onethird per cent. nitrogen, one per cent. potash and a quarter of one per cent. hosphoric acid.

Labels placed in linseed oil and soaked will hold paint marks plain for

Mixing salt with manures and composts will kill white grubs as well as seeds of weeds. Afterward spread broadeast and plow, harrow or cultivate into the soil.

Trim crees in open weather. Scatter no attention to the giving out of har-ness or of a wagon running against him the peach trees and cut back the new growth one-half. Sow refuse salt and brine broadcast under all fruit trees.

> you don't you'll be sorry. It is said that a strong tea made from boiling sassafras roots used as a wash

will kill lice on cattle and horses. Instead of fooling away your time in whitewashing hen-houses (on the out-side) or chicken coops to kill lice, paint

lice every time. All feeders who have studied the habits of the animals they feed have discerned that they take special note of time and are disappointed if the time i,

delayed only a few minutes. Stringhalt is an affection of the nerves and incurable. It is caused by a loss of the power of the nerve which controls the muscle by which the leg is lifted, the action then being spasmodic, irregular and excessive, causing the

high lifting usual in this order. However good the roosting-house may be, and however extensive the grass runs, a place should be provided where the poultry can congregate during wind

A cow should have from fifteen to trifling. twenty pounds of hay daily, with five to ten pounds of corn-meal, in proportion to her size and capacity for eating A cow of 600 pounds will do well on fifteen pounds of hay and six pounds of articles, with the exception of those of world measures him as he measures meal. If the hay is cut and wetted and the four years previous to 1846. the meal added to it, the food will be better digested and more economically used. One-third of the hay may be given at noon, uncut. These rations are his labor. In fact, it is another eviproper for milking cows. Dry cows dence that almost any legitimate occumay do well on fifteen pounds of hay pation in this country "pays" when and two quarts of meal, and the cutting properly attended to.—New York Commay be dispensed with if the labor is thought to cost more than the fodder.

Kerosene will destroy the mealy bug, but will also destroy the plant. It cannot be diluted with water, as the two will not mix, but milk will mix with kerosene, and then the combination will mix with water, and in this way kerosene can be effectively used for destroying these parasites.

Recipes. BEET SALAD.—The new beets must fashioned remedy. Price twenty-five cents a be thoroughly boiled—nothing is worse | bottle.

FARM, GARDEN AND HOUSEHOLD, in the way of food than a half-cooked beet. When done cut them while hot in rather thin slices and marinade them -that is, let them lie for an hour or two in a mixture of two tablespoonfuls oil, one spoon vinegar and a small pinch Of course more than this must of salt. that a serious cheek is often given to be used if there is to be a large dish vegetables which require water in their of salad. When ready for serving put them in the salad dish with some young and tender leaves of uncooked dandelion. Dress with oil, vinegar, salt, and pepper in the usual way.

LEMON CAKE. - Beat to a cream one cup of butter and three cups of pow-dered sugar. Add the yolks of five eggs, previously well-beaten, the juice and grated rind of one lemon, and a cup of milk with one teaspoon of saleratus (or baking powder) dissolved in it. Then add the whites of the eggs beaten to a stiff froth ; sift in four cups of flour and bake.

water, in order to loosen the skins. Slip off the skins and lay the tomatoes in a dish with a little butter, salt and butter, and dredge over them a little

FILLING FOR LAYER CARE, -A delicious filling for layer cake is made in this way: Take a cup of white sugar, put it into a tin basin with enough water to dissolve it, let it boil until it will harden in cold water, have a cupful of stoned and chopped raisins ready, then beat the white of one egg into a stiff froth, put with the raisins into the boiling sugar, stir briskly, and while and that he may have a chance to dewarm put it between the layers of cake, which should be all ready, having been taken out of the tins and laid on a cloth, spreading upon the surface to be plowed | so that you may easily select one which is nicely browned for the bottom of the cake, and another very smooth one for

Household Hints. Nothing is better to clean silver with than alcohol and ammonia; after rubbing with this take a little whitening or a soft cloth and polish in this way; even frosted silver, which is so difficult to clean, may be easily made clear and

Silk neckties can be washed in rain water, to one pint of which add a tea spoonful of white honey and one of hartshorn. Do not squeeze but let them drip, and when nearly dry press between

folds of cloth. When water has once been made to boil the fire may be very much lessened, as but little heat is required to keep it at a boiling point. There is no advantage whatever in making the water boil furiously; the heat will escape in steam without raising the heat of the water.

A Race Between Geese and Turkeys. In Percy Fitzgerald's "Life of George IV." this humorous anecdote is told: been the equivalent of two tons of During a convivial party at the Carlton clover-hay consumed upon the field, House Mr. Hanger designedly intro-worth, as fodder, 824. This will more duced the subject of the traveling powers of the turkey and the goose. Prince of Wales, who placed great reliadmitted to be the cheapest method of ance on his judgment in subjects of this increasing the vegetable matter and the nature, backed his opinion. A match tertility of soils in common farming, was made with Mr. Berkely of twenty And this it will be seen requires some turkeys against twenty geese, for a distance of ten miles, the race to be for a civil basis. tance of ten miles, the race to be for \$2,500; and then as Mr. Hanger and the turkey party hesitated not to lay two to one in favor of their birds, the prince which has been nine years without a constant of the prince which has been nine years without a constant of the prince which has been nine years without a constant of the prince which has been nine years without a constant of the prince which has been nine years without a constant of the prince with the prince without a constant of the one in favor of their birds, the prince which has been nine years without a did the same to a considerable amount, pastor, and which, during that time. Barley—Two-rowed State..... water that has been slightly acidified did the same to a considerable amount, cording to the education they receive. with nitric acid. A little ammonia not in the least suspecting that the whole was a deep-taid plan to abstract a sum of money from his pockets. The prince deputed Mr. Hanger to select twenty of the most wholesome and easily decomposed by composting with quicklime or wood ashes, when it makes procured, and on the day appointed he and his party of turkeys, and Mr. Berkley and his party of geese, set off to decide the match. For the first three hours everything seemed to indicate that the turkeys would be the winners, as they were then two miles in advance of the geese; but as night came on the turkeys began to stretch out their necks toward the branches of the trees which lined the sides of the road. In vain the prince attempted to urge them on with his pole, to which a bit of ed cloth was attached, in vain Mr. Hanger dislodged one from its roostingplace only to see three or four others omfortably perching among the upon the road. In the meantime the accepted in 1842 his present charge. eese came waddling on, and in a short the land, and at the same time yields a time passed the turkeys, whose party profitable return. ing to dislodge the birds; but further keys as soon as they can run nicely. If progress was found impossible, and the geese were declared the winners.

Wealth in Wool.

The United States census of 1810, which was the first one where elements other than that of population were introduced, shows twenty-four woolen them with kerosene. That will kill factories that spun yarn, and 9,258,269 yards of woolen cloth woven in families, valued at \$4,413,000. In 1860 woolen establishments had increased to 2,020, employing 46,000 work-people of various grades, and producing goods valued at \$67,300,000 annually. The demand for blankets and clothing for soldiers during the civil war caused a general advance in prices, and a corresponding increase in factories, so that in 1870 persons employed in the manufacture numbered 97,000, who produced goods valued at \$177,000,000.

The demand for woolen fabrics natur-1833 this country has imported wool. \$170,000,000 has been brought in, while | ated hands, the export has been comparatively

Spenk a Good Word. If you say anything about a neighbor or friend, or even a stranger, say no ill. It is a Christian and brotherly charity to suppress our knowledge of evil of another, unless the evil have such relation to society that our higher public duty compels us to bear accusing witness. And if it be a true charity to keep our knowledge of such evil to ourselves, how much more should we refuse to spread evil report of one another. Dis-ereditable as the fact is, it is by far the commonest tendency to suppress the good we know of our neighbors and friends. We act in this matter as though we felt that by pushing our fellows down or back a peg we were putting ourselves up and forward. We are jealous of commendation unless we get the larger share. Social conversation Stewed Tomatoes.—Take fine ripe tomatoes and pour over them boiling made up of what is best understood by the term scandal. It would be difficult to find a talkative group, of either sex. who could spend an evening or an hour pepper scattered over them. Set them together without evil speech of someon the stove and let them cook slowly about fifteen minutes. Then take them off and turn them. Add a little more governed in our treatment of personalities. Better a thousand times stand or flour. Pour over them a scant cup of milk to make a gravy; set them back on the stove to scald about ten minutes. others. What we should do in this, as in all our human relations, is to practice the golden rule. If we do unto others as we would that others should do unto us we shall be exceedingly careful not to volunteer ill words about them. Where other than a good word is to be spoken, let it be spoken to the person concerned, that he may know your motive is not idle, cowardly or sinister,

\$66 a week in your own town. Terms and \$5 outfit free. Add's H. HALLETT & Co., Fortland, Maine \$999 a year to Agents, and expenses. \$6 Outfi

April 4, 1881. He says: "I firmly believe that ALLEX's Lexo Baysan will and has cured consumption if taken in time and proper care be taken of the patient both in suitable food and clothing. Six years ago my mother was attacked with pneumonia. The attending physician 'some time after' told me that the discase bad settled on her Lungs, and that she had the consumption. Not believing that a permanent cure could be effected, but thinking I might be able to get an expectorant not containing opinim, which would afford some relief, I inquired of a druggist at Richmond, Va., if he had any medicine not containing opinim that was a good expectorant. He them recommended Allen's Lung Balsam, which I purchased and induced my mother to try. Before she had taken the first bottle the improvement in her condition was so marked that I purchased three more bottles. The attending physician, seeing the beneficial effects, recommended its continued use, and in about twelve months her lungs were pronounced cured. Upon my recommendation many others who had the consumption have been cured. I think you can claim for your medicine the following: Expectoration without irritation, and healing of the lungs by keeping them free from foreign substances, thus arresting and curing this dread disease." Mr. Digges says he writes because he wants it known that Allen's Lang Ralsam is loing good.

Neuralgia, Sciatica, Lumbago, Backache, Soreness of the Chest, Gout, Quinsy, Sore Throat, Swellings and Sorains, Burns and Scalds, General Bodily Pains,

Tooth, Ear and Headache, Frosted Feet and Ears, and all other Pains and Aches.

No Preparation on earth equals Sr. Jacons Oil as a safe, sure, simple and cheep External Remody A trial entails but the comparatively trifling outlay of 50 Cents, and every one suffering with pain can have cheap and positive proof of its claim.
