There were 14,432,068 acres of land planted in cotton in the United States last year, and from these the crop was 5,732,969 bales. The acreage this year is estimated at 15,523,116, an increase of 91,108 acres; but the opinion prevails, says the New York Graphic, that the crop will not be so large as that of last year, owing to unfavorable weather.

The latest addition to agricultural implements in England is the "steamdigger," which is a combination of the plow and spade. In the short space of an hour, and at a working cost of five shillings, it will turn over an acre of for the purpose of being married; and, ground, and that too in such a way as to after the marriage, they returned to produce superior cultivation. The inventor claims that it will do as much work as 170 men in a day. It appears of the Territory forbid intermarriages lost in like manner less than two pounds to have withstood very exacting tests.

As soon as the death of the late Empress Dowager was announced in China the mandarins and all high officials of mony performed. Returning to the the empire put on garments of pure Territory, they were indicted on a crim-white, and these were worn for twenty-inal charge. The judge before whom four consecutive days. The regulations the case was brought for trial sustained which prescribe official mourning also the marriage, as being legally valid in require that the red buttons upon their caps shall be replaced by blue buttons. On the twenty-eighth day they put on black clothing, which must be worn for posing of the case is that a marriage posing of the case is that a marriage 100 days. The same restrictions as to valid in the State where it is celebrated

A few years ago a young man named Gardner, living at Toledo, Ohio, inherited some money from his father. He had been tinkering around from boyhood with a firearm that he was anxious to patent. When he obtained his patrimony he went to France to improve his implement. His was the experience of nearly all inventors. His as settled and will not be settled until he was reduced to the greatest extremity. But he never lost faith in his rifle. Finally he interested some capitalist and the implement was carried to perfection. In due time the French government was induced to adopt the repeater for the army. The British government has just done the same thing, and the Toledo inventor is preparing to roll in wealth. His arm is said to be the most magnificent repeating rifle in

Sitting Bull announces that he is anxious to secure a reservation in Canada so that he and his people may live in peace with the whites. His spirit is said to be broken, although a recently successful device to obtain a supply of provisions from the officer in command of Fort Walsh indicates that he has not lost his curning. It seems that even an Indian chief is not free from the machinations of would-be sonsin-laws, for at this moment Sitting Bull is grieving over the loss of a young daughter who has run away with brave of his own camp, negotiations for her purchase at a large price in horses having failed. He has left a still younger daughter, a pretty little child about twelve years old, whom he watches very closely for fear that he shall lose her too.

A San Francisco correspondent of a New York paper writes a rather alarming account of the spread of opium-smoking among the American population in that city. He says that the bane of opium-smoking in California is seen in the younger generation. California children are very precocious; they seem to have an exaggerated desire to indulge in everything which is forbidden. Every Chinese wash-house throughout the State is the center of evil. Young boys learn there to smoke opium and contract the habit which ruins them body and soul. The vice is most prevalent among the hoodlums of the city and the women of the town, but police officers and detectives, whose word may be rethe law will soon have to be invoked to check it by heavy fines or other penalties. The correspondent says the most noted Chinese opium den in that city is the Moslem. owned by a retired American missionary

454 young men liable to military service quitted the fatherland for America. As the exodus during the past year was this season the numbers are assuming alarming proportions, it seems likely a twofold loss to the countey—the sinew and backbone of the land are leaving it, and the aged, infirm and children are left behind. The chief Portugal, Dom Manuel the fortunate half it is applied where it will do as in Prussia itself.

the conclusion that its telegraph lines might better be under its own management than in the hands of enterprising foreigners; and the preliminary steps to that end have been taken in the establishment of a school of telegraphy in Hartford. The Chinese embassy at Washington recently received instructions to form a class of forty from among the Chinese students in Hartford, and Mr. Yung Wing has just chosen its members and placed them under the charge of Mr. Hubbell, late manager of the Hartford office of the Western Union company. A class-room has been furnished with every requisite appliance, and Mr. Hubbell expects that within two months the students under his instructions will be competent to teach others. As soon as they have attained the requisite proficiency they will be ordered home, and probably accom-panied by a few skilled Americans to superintend the construction and operation of new telegraph lines.

The Cincinnati Commercial publishes an interesting diagram showing the changes in the center of population from 1790 to 1880. In 1790 it was twenty-three miles east of Baltimore; in 1800 it was eighteen miles west of Baltimore; in 1810 it was forty miles north-west by west of Washington; in 1820 it was sixteen miles north of Woodstock; in 1830 it was nineteen miles west by southwest of Moorefield; in 1840 it was sixteen miles south of Clarksburg; in

cinnati, and in 1880 eight miles west by south of Cincinnati. It is a curious fact that in these changes the center of population has varied only a few miles from the line of the Baltimore and Ohio railroad, and has now traveled its whole length from Baltimore to Cincinnati. The center is now located in the State of Kentucky, and it is probable that its line of progress for many years to come will follow close to the Ohio river.

Mr. Lee Chin, a Chinaman residing in the Territory of Wyoming, and a white woman, also residing in the same Territory, recently went into Colorado thing like this, for in such case are, however, no such laws in the State of Colorado, and, hence, the parties the case was brought for trial sustained marrying and indulging in social pleasures that apply to the higher classes apply to them as well.

is to be deemed valid in every other part of the United States. This marriage was lawful in Colorado, though if it had occured in Wyoming Territory it would have been unlawful; and being lawful in the place of its celebration, it must be held so everywhere else. The supreme court of Massachusetts some years since affirmed this doctrine in a memorable case. The courts in some of the other States have denied it. money was soon exhausted, and at times some case shall bring the point before the supreme court of the United States.

> A New York reporter's attention was attracted by an odd advertisement, which stated that "ladies desirous of purchasing articles from the wardrobe f Queen Victoria can do so by calling on Mrs —, West Fortieth street." The reporter, desirous rather for information about Victoria's cast-off clothes than to purchase, called upon the lady, who showed him a great variety of articles of ladies' wear, of apparently extra fine quality, and with the initials "V. R." surmounted by a crown woven upon them. This regal stamp, the reporter was informed, is permitted only articles for the royal wardrobe, and its presence, like that of a duly authenticated trademark, attested the genuineness of the articles. In explanation as to how the clothes came into her possession the woman, Mrs. Martin, informed the reporter that every three months there is a complete renewal of Queen Victoria's wardrobe; and notwithstanding much of it is almost unworn, it must give place to the new supply. The cast-off garments fall the perquisite of the maids of honor, who, according to Mrs. Martin, receive no other reward. These mercenary ladies of high station sell it in a lump, and divide the money it brings among them. While the reporter was present a carriage with a fiveried coachman drove up. and a lady richly and fashionably dressed came in, with an evident eye to pur-chasing some of the articles. The story is probably either a reportorial invention, the newspaper man has been imposed upon, or the pretended royal wardrobe was a fraud.

Portugal.

The Portugal of the geography and soon push out. the library had long before charmed our imagination, and we find her, on more intimate acquaintance, showing fascinating hints of her romantic history. Heiress alike of the Roman and the Saracen, she has old heirlooms from both sides of the house to interest the antiquary, lied upon, declare that the practice is spreading with great rapidity, and that the bull-ring is all that is left of the Coliseum, but Moorish fountains and The bull-ring is all that is left of the antique glazed tiles that match those of the Alhambra are only single jewels in the unbroken parure handed down from

A tiny country, occupying, like the island of England, a mere spot upon the atlas, we remembered that in the The emigration statistics of Germany are engaging the serious attention of the imperial chancellor, who has submitted the world. While Columbus was purton the Banders of the Columbus was purton the Banders of the Columbus was purton the serious attention of the columbus was purton the Banders of the Columbus was purton the columbus was purt to the Bundesrath tables showing that suing his studies, Prince Henry the during the year 1880 no fewer than 11,on the lonely shores of Algarve, and gathered the young nobles to his school of navigation. Through the century nothing beyond the common, whereas that followed, the bread cast upon the waters poured back to Portugal. The Azores, Madeira, and the golden sands that the military service will be deprived of Guinea were made her own; Bartolo- rial ointment kills as much by the lard of at least 20,000 young men. The meu Diaz doubled the Cape of Good in it as by the mercury—that is, so far worst feature of the case, of course, is Hope, Vasco da Gama discovered India, as the vermin are concerned, but not that the emigration of this class means | Magellan made the first voyage around | as to the animals that lick it off from exodus seems to be from Prussia. built his pyramids in Belem, Alcobaco the most good. In all soils of this kind they preached the crusade that led Dom | go down gradually, and enrich as you Sebastian, the Regretted, to his disastrous expedition into Africa, and left the country an easy prey to the Spaniard, while the Dutch seized their colonies.

Honorable Employment. There is nothing derogatory in any employment, which ministers to the wel!being of the race. The plowhman that turns the clod may be a Cincinnatus or a Washington, or he may be brother to injury. the clod in turns. It is every way creditable to handle the yard, and to measure white goods. tape; the only discredit consists in having a soul whose range of thought is as short as the stick, and as narrow as the between nations ratified; the glory consists in the rectitude of the purpose that approves the one, and the grandeur of the philanthropy that sanctified the other. The time is soon coming, when, by the common consent of mankind, it will be esteemed more honorable to have been John Pounds, putting new and beautiful souls into the ragged children of the neighborhood while he mended their father's shoes, than to have been set on a throne.

Falstaff asks, "What's honor?" as 1850 it was twenty-three miles southeast of Parkersburg; in 1860 it was twenty miles south of Chillicothe; in 1870 woman sit behind another in chusch, and she'll tell what's on her in less than two minutes.

The Loss of Ammonia. The loss of ammonia in manures is a question frequently discussed. The experiment of Dr. Voelcker with fresh horse manure, gathered from the stables before being mixed with the heaps, will, no doubt, interest and surprise many. In one experiment the amount of ammonia, which was drawn out by long-continued boiling, amounted to 6.6 pounds per ton, which, at twenty cents per pound, would amount to \$1.32 per ton. The loss, however, on the land would not amount to a quantity anything like this form. ammonia was extracted with boiling water. A second experiment, with a between whites and Chinese. There per ton, or 39 2-10 cents in value. As are, however, no such laws in the State the excrement, even as hot as this is, soon cooled when spread upon the ground, and as the fresh earth absorbs the ammonia very rapidly, these experi-ments would indicate a loss in practice of too small a value to be taken into account, when the convenience of time is taken into consideration. A large majority of our farmers are frequently deterred from drawing out manure at times when the hauling would cost very little, on account of the teams standing idle in the barns, for fear of loss by exposure, but so small a loss should never be considered when a question of convenience arises.

> Grafters. Grafting is an operation that had better be done too late than too early. The best time is when the buds on the stock are swelling, and if necessary shall be continued until the trees are in full bloom. At this season the bark slips readily, and much care will be required when sawing off a limb not to make a bad wound by peeling down. This can be prevented in great part by cutting through the bark with a strong knife all round the limb where the saw is to go. Buds should be left upon the stock until the union of the graft is insured, which will be known by the buds of the graft starting into growth. After this rub off the buds upon the stock. The growth of the graft will need some attention; should but a single bud start, slender shoot will be produced, easily blown about by the wind and thereby loosened from the stock. All such will require checking by pinching off the top so that lateral branches may be formed. There seems to be a strong desire to give the trees the second place on the land, and put some other crop first. Those who do not care enough for an orchard to devote the land to it, should not plant one. Young trees, not yet in bearing, are not injured by having some hoed crop between them. But when the trees begin to bear a fair crop they deserve and should have all the soil A clover crop to be fed off by pigs is the best thing for the orchard and for the pigs. This will enrich the soil, as the only thing is in the shape of flesh, while a large amount of vegetable matter in clover roots and manure has accumu-

SCIENTIFIC NOTES.

naked eye in 1849 was 77,000 miles in The diameter.

Zine, if beaten out into thin leaves, will take fire readily from a common paper. The internal nucleus of the earth can

lose little heat outwardly, by reason of the bad conductivity of the rocks. All living beings are made of cells, each of which is too small to be seen by the naked eye. The living cell is a little closed sac filled with liquid. At the rate at which coral reefs are

known to increase, the total age of those surrounding Florida is calculated their former residence and lived sample of hot, fermenting horse manure, at 135,000, and that of some human remains found in them at 10,000 years. Attentive examination has proved

hat when the waves of the sea strike a hingle (pebble) beach at the rate of ess than seven per minute the shingle s disappearing, but when the beat is nine or over an accumulative action goes on. In the roasting of coffee Dr. O.

Bornheimer finds three principal prod-

ucts-solid fatty acids, caffeine, and caffeol, a heavy oil which turns yellow after having been exposed to the air, and which is the vehicle of the peculiar aroma of coffee. Japanese cement is made by mixing powdered rice with a little cold water, and then gradually adding boiling water until the desired consistency is acquired, care being taken to keep it stirred. Lastly, boil for one minute in

strong and nearly colorless. The principal vegetable substances used in the adulteration of coffee are chicory, beet-root, carrot, figs, corn, malt, etc. A simple method of testing coffee for a mixture of chicory is to shake it with water. If pure it remains floating for an hour together, whereas chicory sinks.

a clean saucepan. This cement is very

[New York Union.] Did Rim Good.

Mr. Charles H. Baner, editor of the above paper, and Notary Public, in a late issue mentions the following: Patrick Kenny, Esq , some time ago, suffered much from rheumatism and tried almost every means to rid himself and push upward very rapidly, a long of this painful evil, but in vain. He was advised to use St. Jacobs Oil, which he did so successfully that all pain has left him, and he is as healthy and strong as ever before. Mr. Kenny is an enthusiastic advocate of St. Jacob Oil, and it has done him good.

History of the Old Red Cent. As the old "red cent" has now passed ut of sight, like the "old oaken bucket," its history is a matter of sufficient interest for preservation. The cent was first roposed by Robert Morris, and was amed by Jefferson two years later. It ade its appearance from the mint in 1792. It bore the head of Washington on one side and thirteen links on the other. The French revolution soon created a rage for French ideas in America, which put on the cent instead of the head of Washington the head of the Goddess of Liberty—a French Liberty. The chain on the reverse side was displaced by the olive wreath of peace; but the French Liberty was short lived, and so was her portrait on our cent. The next head or figure that succeeded this-the staid, dassic dame with a fillet around her hair—came into fashion about thirty or forty years ago, and her finely chiseled Grecian features have been but slightly

affected by the lapse of time. [Sheboygan Falls, Sheboygan Co. News.] We never saw any one joyous when suffering from pain—neuralgia for in stance. In relation to this matady his George Guyett, Prop. Gnyett Bouse thus informed our representative: have used St Jacobs Oil for neuralpia and can confidently recommend it to any one similarly affected.

In 1867 a man died in Germany who was so devoted an admirer of Cervantes that he had spent his life collecting editions of Don Quixots. In his library were 400 editions in the Spanish, 168 in French, 200 in English, eighty-seven in Portuguese, and so on down to several in Greek and five in Latin.

Lamba

The word "hurrah" is pure Slavonian. The origin of the word comes from the spot on the sun seen with the idea that every man who dies heroically battle to remind the combatants of the

immediate recompense of a brave death.

Well Worth Reading.

Who is there that does not desire to be always exempted from indigestion—to have a good appetite, a painless stomach, a clear head, a regular pulse, a healthy complexion? If this meets the eye of any who are not thus blessed let them try Hostetter's Stomach Bitters. We guarantee that this delightful tonic will restore any stomach, however weak, to a healthy condition; that it will bring back the truant appetite, and give permanent vigor to the whote system. The feeble and emaciated, suffering from dyspepsia or indigestion in any form, are advised, for the sake of their own bodily and mental comfort, to try it. Ladies of the most delicate constitution testify to its harmless and its restorative properties. Physicians every where, disgusted with the adulterated liquois of commerce, prescribe it as the safest an of commerce, prescribe it as the safest an nost reliable of all stomachies.

It is happily ordained that grandparents shall always take the part of the little folks, and the little folks know it. Down in Salem the other day a bright little girl was sent to get some eggs and on her way back stumbled and fell, making sad havoc with the contents of her basket. "Won't you catch it when you get home, though!" exclaimed her companion. "No indeed, I won't." she answered, "I've got a grandmother."-Boston Budget.

Mainrial Fever.

Malarial Fevers, constipation, torpidity of the liver and kidneys, general debility, nervous ness and neuralgic ailments yield readily it this great disease conqueror, Hop Bitters. It reasirs the ravages of disease by converting the foot into rich blood, and it gives new life any vigor to the aged and infirm always. Se "Proverbs" in other column.

QUINCE SEED.—Quince seed is good for sore and inflamed eyes. Take about one-half dozen quince seeds, put about a tablespoonful of scalding water on them; let them stand till cool, and bathe the eyes just before going to bed and in the morning.

A NEW DEPARTURE

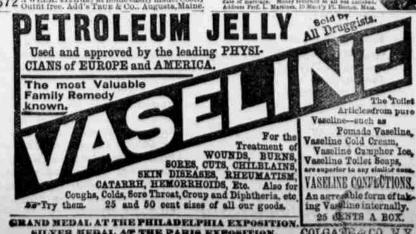

Since its foundation, nearly 60 years ago. The Springfield blevablican has always contributed generously to the bestriction and entertainment of islarge rural constituency. To make the paper still imprevate the statement of the larger rural constituency. To make the paper still imprevate their sandles, a med-class agricultural department has been lately added to the weekly cilition. It regularly fills from four to five columns of stace, and contains a variety of interesting matter, one alteoriginal articles by skilled agriculturals relating to life at the form. Among the regular contributors are: Dr. Oscanot B. Louiso. United States Commissioner of Agricultural Science of Agricultural Science and the Associaty for the Promotion of Agricultural Science and the Associaty of the Promotion of Agricultural Science and the Ambridge of Agricultural Science and the Ambridge of the Society for the Promotion of Agricultural Science and Science and the Ambridge of the Society for the Promotion of Agricultural Science and the Ambridge of the Society for the Promotion of Agricultural Science and the Society for the Promotion of Agricultural Science and the Society for the Promotion of Agricultural Science and the Society for the Promotion of Agricultural Science and the Society for the Promotion of Agricultural Science and the Society for the Promotion of Agricultural Science and the Society for the Promotion of Agricultural Science and the Society for the Promotion of Agricultural Science and the Society of the Society of the Society of the Science and Science and Science and Law Science and Science
