

The Ocean Pilot.

A pilot is a man who has made him- self thoroughly acquainted with the channels through which navigation is dangerous and who directs vessels in safety through those had places.

They are men of unusual courage and skill, and their services are of great value to the shipping industry.

NEWS OF THE WEEK.

Eastern and Middle States.

Colonel John C. Hamilton, son of Alexander Hamilton, the noted American statesman and financier, died a few days since at Long Branch in the ninetieth year of his age.

The Delaware Republicans at their State convention in Dover nominated Albert Curry for governor.

George Allen, an old and well-known miner, with a comrade, John Lewis, were instantly killed by the falling of the roof at the Pleasant mines in the Scranton (Pa.) region.

On the day that the thermometer jumped up to ninety-nine in the shade in New York city, 194 deaths occurred in the metropolis from the excessive heat.

Charles J. N. Craft, of the Franklin (Pa.) Exchange bank, looked upon as a most exemplary young man, was discovered to be a defaulter in the sum of about \$70,000. He had used the money in speculation.

Three young men while asleep on the railroad track near Jamestown, N. Y., were struck by a train, and two of them—John A. Wender and G. Lechner—were killed and the third was badly injured.

South and West.

Seven colored men were found dead on a railroad track near Meriden, Miss., the supposition being that they had fallen asleep on the track while under the influence of liquor and been run over by a train.

Two colored men, however, were arrested on strong suspicion that the men were murdered, robbed and their bodies placed on the track.

A fire in Fresno, Cal., burned about fifty buildings, mostly business houses, including five hotels, the Farmers' bank, Metropolitan hall, stores, barber shops and saloons. The loss will probably reach \$200,000.

Dr. P. P. Collins, of Minneapolis, Minn., brother of Jerome J. Collins, the journalist, who lost his life with Lieutenant De Long, commander of the Jeannette, wishes Congress to make an investigation.

Dr. Collins charges that after the Melville-Danenhower party reached a place of safety, Danenhower asked permission to search for De Long and his party, but that Melville refused, and ordered Danenhower to say he would make the search himself.

Dr. Collins also alleges that the jealousy which existed among the officers of the expedition made it impossible to make a certain search from the start.

Dr. Collins concludes: "Danenhower is anxious for an investigation and will have strong evidence to present. He expressed to me a willingness to tell the whole story to an investigating committee which would make a report to Congress."

Two freight trains collided four miles from McGregor, Iowa, on the Milwaukee and St. Paul railroad. Fireman Myron Hibbard and two tramps were killed and several persons were injured.

The Missouri Democratic State convention at Jefferson City nominated a full ticket and adopted a platform in conformity with the principles of the party.

A severe collision has been formed in Arizona and New Mexico to wipe out the marauding Apaches, who are killing the whites and carrying off their property whenever they get a chance.

A heavy thunder-storm at Smyrna, Tenn., five negroes were struck by lightning, one of them receiving fatal injuries.

A fire at New Orleans destroyed four business houses, causing a total estimated loss of \$130,000.

The governor of Iowa has issued a proclamation declaring the result of the election on the adoption of the prohibition amendment to be 157,436 votes for adoption and 125,077 against, giving a majority for adoption of 29,759.

Portions of Japan have been visited by very disastrous fires and floods.

By a railroad collision in Canada thirteen cars and two locomotives were totally wrecked. The engine driver, Ed Burns, aged sixty-seven, of Brockville, was killed and a number of passengers were injured.

In the French chamber of deputies M. de Freycinet proposed the vote of credit for Egyptian expenses, declaring that it was a question of confidence in the cabinet.

The Trouble in Egypt.

From Alexandria comes the following account of a skirmish between the British troops and Arabi Bey's forces. It appears that Arabi Bey's forces, under the command of his brother, were defeated by the British troops.

The British troops, under the command of General Buller, were defeated by Arabi Bey's forces in a battle near Alexandria.

HEALTH HINTS.

A physician reports much to be the only efficacious remedy for whooping cough has ever been tried.

It is well known that cholera infantum and its cognate ailments cause the death of the great majority of children.

This disease, if it may be so called, may, in nearly every case, be traced to food and drink and the manner of giving them.

The majority of infants who die during the summer months have been fed by the bottle, the milk in which is frequently in part or wholly curdled.

Pure and good milk is a necessity in almost every family. It may come into the house in a wholesome condition, yet there is ever the danger that it will become tainted with the sewer gas from closets, or even with the dust carried by drafts through sleeping or living rooms.

There can be no doubt that the milk which is the best and most palatable of foods in the summer, must be carefully guarded from the farm to the table or it will prove a potent vehicle of disease.

Not a day should be allowed to pass without exercise by which—at least three times each day—every air-cell of the lungs has been filled to its utmost capacity.

Once, at least each day, this should be done by active exertion, such as a sharp, but not distressing, run, increasing gradually until two or three hundred yards are covered at full speed, or from half a mile to a mile at a steady swing.

But any run long enough to set the lungs actively at work will suffice for this purpose.

Simple Fractions. An Austin teacher was explaining fractions to a rather dull boy.

"Now, suppose you and your little sister were divided by you, and you found a peach, and you wanted to have as much as you, how would you go about it?"

"Shake her down another peach out of the tree, and give her the smallest one."—Stiffings.

Language Cannot Describe It. Mr. Robert Gould, bookkeeper for Walker & Maxey, who are lumber dealers, recently said to our representative: "About one year ago I was taken with the genuine sciatica. I employed the best physicians, but they could not relieve me for the moment. Finally used St. Jacobs Oil and it effected a complete cure."—Kennebec Reporter, Gardiner, Me.

The greatest length of Lake Erie is 250 miles; its greatest breadth is 80 miles; its depth is 84 mean feet; elevation, 261 feet; area, 6,000 square miles.

Mr. Gail B. Johnson, business manager of the Houston (Texas) Post, has used St. Jacobs Oil with the greatest benefit for rheumatism, says the Galveston (Texas) News.

The United States has exported to England since 1878, each year, nearly 45,000,000 cwt., or considerably more than half of all her wheat imports.

Advice to Consumptives. On the appearance of the first symptoms—a general debility, loss of appetite, p. ill, chilly sensations, followed by night-sweats and cough and other signs of consumption, the patient should at once resort to St. Jacobs Oil.

Consumption is a scrofulous disease of the lungs—therefore use the great anti-scrofulic or blood-purifier, St. Jacobs Oil.

Merchant's GAROLING OIL LINIMENT.

For human, fowl and animal flesh, was first prepared and introduced by Dr. Geo. W. Merchant, in Lockport, N. Y., in 1833, since which time it has been steadily grown in public favor, and is now acknowledged and admitted by the trade to be the standard liniment of the country.

Thousands of bottles of Carboline, a deodorized extract of petroleum, have been sold from all over the country, and are sold by all druggists.

The new circular of the Cayuga Lake Military Academy, Aurora, N. Y., is a handsome book of 40 pages, full of information. Price, 50 cents.

What a Three-Cent Stamp will Do. It will do more than any other piece of paper of its size and value in the world.
