#### OK PRINTED & PUBLISHED By Matthew Carey, No. 118, Market Street,

1. Charlotte, a tale of truth, By Mrs Rowfon, of the New-Theatre
Philadelphia.
Second American edition—Price 75 cents.
[The rapid fale of the First Edition of

this interesting novel, in a few months, is the best proof of its merit.]

Extract from the Critical Review, April

It may be a tale of truth, for it is not unnatural, and it is a tale of real diffres.

Charlotte by the artifice of a teacher, retominended to a feabol from humanity rae ther than a conviction of her integrity of the regularity of her former conduct, is enticed from her governess, and accompanies a young officer to America.—The marriage cerempy, if not forgotten, is notherway. a young officer to America—The marriage ceremny, if not forgotten, is postponed, and Charlotte dies a marryr to the inconstancy of her lover, and treachery of his field.—The situations are arriefs and affecting—the descriptions natural and pathetic; we should seel for Charlotte if such a person ever existed, who for one error, scarcely, persons deterved so severe a punchment. It it is a siction, poetic justice is not, we think, properly distribut d."

Notes on the state of Virginia—by Thomas Jessen. Price, neatly bound, one dollar and a half.

History of the French Revolution, from its commencement to the death of the Queen and the execution of Briffot.

Queen and the execution of Briffot. Two dolars.

Extract from the Prefact.

"The authors have prefunded to affix to their title the epithet Impartial; and the reason is, because they cannot charge themselves with seeing the smallest bias to any party, but that of truth and liberty; and they flatter the inselves, that their readers will find not only every circumstance fairly represented, but every centurable action, whoever were the authors or actors, marked in its proper colors. It is was necessary to make a declaration of their own principles, they would say, they are neither tory nor republicas—They love liberty as English whigs, and executate every criminal act by which so noble a cause is endangered and disgraced.

In the present ferment of the public In the present serment of the public mind, they cannot flatter themselves with the hopes of seeing this claim oniversally acknowledged. On the contrary, they are well assured that these pages will not be acceptable to the zealous of eith r party. But when time shall dissipate the clouds of political deception, they with some confidence expect that verdict from public opinion, which candon and moderation seldom fail to receive.

JANUARY, 1794—page 12.

64 We have certainly derived much plea-

14 We have certainly derived much pleafure, and acquired much information from the perufal of these volumes; and we think them, both for matter and thyle, worthy the attention of all who interest the arielyes in events which have so justly excited the cariofity and attentihanent of mankind."

0,000 Tickets at 8 dol'ars

This Lottery will afford an elegant specimen of the private buildings to be erecked in the City of Washington—Two beautiful designs are already selected for the entire from on two of the public squares; from these drawings, it is proposed to ereck two centre and four corner buildings, as soon as possible after this Lottery is sold, and to convey them when complete, to the fortunate adventurers, in the manner described in the scheme for the Hotel Lottery. A nett deduction of sive per cent, will be made to destray the necessary expenses of printing, &c. and the surplus will be made a part of the sund intended for the National University, to be erecked within the City of Washington.

(F) The drawing will commence as soon as the Tickets are fold off.—The money prizes will be payable in thirty days after it is finished, and any prizes for which fortunate numbers are not produced within twelve months after the drawing is closed are to be considered as given towards the sund for the University, it being determined to settle the whole business in a year from the ending of the drawing and to take up the bonds given as security.

The real securities given for the payment of the Prizes, are held by the President and two Directors of the Bank of Columbia, and are valued at more than half the amount of the Lottery. This Lottery will afford an elegant speci-

are valued at more than half the amount of the Lottery.

The twenty four gentlemen who by appointment of the late Commillioners affitted in the management of the Hotel Lottery are requefted to undertake this arduous talk a fecond time on behalf of the public; a fufficient number of these having kindly accepted, it is hoped that the friends to a National University and the other federal objects may continue to favor the design. The synopsis of one of the Colleges, to form a branch of the National Institution, is already in the press, and will be speadily published, together with its constitution.

A compleat Plan of the whole of this important Institution, compiled from a selection of the best materials, ancient and modern, will be submitted to the public whenever the same may have gone through such revisions as may be necessary to establish the perfect considence and general approbation, so essential to its present rise and future existence for the general good of America.

By accounts received from the different parts of the Continent as well as from Europe, where the tickets have been sent for sale, the public are assured that the drawing will speedily commence, and that the care and caution unavoidably necessary to insure a

Treasury Department
Revenue Office, April 14, 1795 PROPOSALS

Will be received at the Office of the Commissioner of the Revenue, LIGHT HOUSE,

For Building a

LIGHT HOUSE,

On Seguin Island, near the mouth of Kennebeck river, on the coast of the District of Maine; of the following Materials, Dimensions and Description.

THE form is to be an Octagon. The soundation is to be of stone, to be sunk, if practicable, thirteen seet below the bottom of the wooden work, or twelve seet and an half below the furface of the earth, and to be commenced of the diameter of twenty seven seet. It is to be laid solidly to the height of two seet. From thence to the bottom of the wooden work, the foundation wall is to be eleven seet high, and six seet thick.

As it is intended that the above described stone foundation shall only be carried six inches higher than the crown level of the knoll or rock on which the Light-house is to be exceeded, and it may be found impossible, on account of the rock, to sink the same to the depth of twelve seet and one half below the earth, or thirteen seet below the wooden work, it is necessary that the propositions for the faid stone soundation be made by the perch to include all costs, charges and expences of materials, workmanship and labor.

The octagonal pyramid is to be well framed, and of stout heart fine timber. It is to be twenty six feet in diameter at the base thereof where it will rest on the top of the stone soundation, to which it is to be well fecured by sixteen shoutiron straps built therein and otherwise. The height of the wooden building from the sottom of the water table and from the surface of the earth, is to be forty seet to the top of the wooden work, under the floor of the lantern; where the diameter is to be fifteen seet. The foundation is to be capt with sawed stone at least eight inches wide, and sloped at top to turn off the water.

The frame of the pyramid is to be coverable boards of any inch and one half in

ter.

The frame of the pyramid is to be 'covered with boards of one inch and one half in thicknefs, over which is to be laid a good & complete covering of fh. ngles, and well painted with three coats. The light honfe is to have two windows in the Eaft, and two windows in the West. The fashes are to be hung with hinges, and each fash is to have eight panes of glass, eight by ten inches.

On the top of the wooden work of the pyramid is to be a strong framed tier of joists, beded therein, planked over with oak plank extending one foot beyond the sides of the pyramid, thereby forming aneave, which is to be finished by a cornice, the whole having a descent from the center, sufficient to throw off the water, and to be covered with copper.

throw off the water, and to be covered with copper.

A complete and sufficient iron Lantern in the octagonal form is to rest thereon; the eight corner pieces or stanchions of which are to be well secured to the upright timbers of the pyramid, or to the tier of joists, or both. These stanchions are to be very strong and stout in the lower ten feet, and three and one-half inches by two and one-half inches above. The Lantern is to be ten feet high, from the floor to the bottom of the done or roof, and to have a dome or roof of sive seet in height. The whole space between the posts to be occupied by the sashes, which are to be moulded on the instide and struck solid. Each sash is to have twenty-eight large panes of glass; a part of the sash on the south-west side is to be hung with hinges for a door to go out on the platform. The iron rafters of the lantern are to be framed into an iron hoop, over which is to be a copper funnel;—thro' which the smoake may pass into a large copper ventilator in the form of a man'shead; capable of containing one hundred gallons. This head is to be turned by a large vane, so that the hole for venting the smoak may be always to leeward. Eight dormant ventilators are to be fixed in the roof, a large curved air pipe is to be passed thro' the sloor and a close stove is to be provided and fixed in the ved air pipe is to be paffed thro' the floor and a clofe flove is to be provided and fixed in the lantern. There are to be 4 pair of flairs to afcend lantern. There are to be 4 pair of frairstoalcend to the lantern, theentrance to which is to be by a trap door covered with copper. The building is to be furnished with two complete electrical conductors or rods with points. The floors are to be laid with plaak. The entrance into the light house is to be well secured by a floor base translation.

cured by a firong door hung upon hinges with a firong lock and latch complete.

Also a frame Dwelling House of one flory Allo a frame Dwelling Houle of one tlory and the roof, to be twenty fix feet or thereabout in front, and twenty fix feet deep, with a cellar, under it, if it shall be found practicable to dig it. The cellar walls to be eighteen inches thick, and feven feet high. The teen inches thick, and feven feet high. The flory of the House to be seven seet and one half intheclear. The floors to be laid in whole lengths nailed through. The House is to contain a Kitchen of thirteen by sixteen seet, a sitting room adjoining lengthwise of twelve by sixteen seet, two small chambers of eight by nine seet joini gto the ends of the Kitchen and sitting room, with a passage to those two rooms between the bed rooms. The stack of chimneys to be between the Kitchen and sitting room and is to have two plain fire places, one of them large for a kitchen; to which is to be joined an Oven. There is to be an outer door to the passage and an outer door also to the Kitchen. There are to be two windows in each half area. dows in each of the large rooms, and one in each bed room.

Each fash is to have twelve panes of glass eight by ten inches. Each window is to have a strong plain shutter, with fastenings and hinges. The doors are to be hung and surnish ed completely. The ceiling and inner sides of the House are to be plaistered with two coats. All the wood work inside and out is to be well pairted, and the whole is to be fanished in a plain and decent manner.

An oil vault is to be built twenty by twelve An oil vault is to be built twenty by twelve feet in the clear, arched over, and covered with earth or fand, over which a fhed is to be built. It is to be furnished with nine ftrong cedar Cisterns with covers, each capable of containing two hundred Gallons. The entrance to the vault is to be fecured by a strong door. A well is to be funk at a convenient distance, and furnished with a curb, bucket and rope completely. The builder is to procure and

pay, for all materials, labor, workman hip, provisions and other objects of coil charp; or expense for a fum to be proposed and agreed upon, and to execute the pefore detaribed work, and every part thereof ima good and workman like manner.

Convenient payments or advances, on fecurity, will be made. April 17.

## Treasury Department REVENUE OFFICE, April 10, 1795.

PROPOSALS Will be received at the Office of the Commissioner of the Revenue,

LIGHT HOUSE, On Long Island, at MONTAAK POINT in the County of Suffolk, and State of New York, of the following Ma-

terials, Dimensions and Description. terials, Dimensions and Description.

The form is to be Octagonal. The foundation is to be of Stone, to be funk thirteen feet below the bottom of the Water table, or the surface of the Earth, and to be commenced of the Diameter of twenty nine feer. From such commencement to the bottom of the Water Table, the foundation well is to be thirteen feet high, and nine feet thick.

The Diameter of the bate from the bottom of the Water Table to the top thereof, (where the Octagonal pyramid is to com-

tom of the water I able to the top thereof, (where the Octagonal pyramid is to commence) is to be twenty eight feet, and the wall is there to be feven feet thick. The wall of the Octagonal pyramid is to be fact feet thick at the Bafe thereof, on the top of the Water Table.

the Water Table.

The Height of the building, from the bottom of the Water Table and from the furface of the Earth, is to be eighty feet to the top of the flone work, under the floor of the Lantern; where the Diameter is to be fixteen feet fix inches, and the wall three feet thick. The whole to be built of Stone; the Water Table is to be capt with fawed flone, at least eight inches wide, and Sloped at 100 to turn off the water.

at top to turn off the water, and Stoped at top to turn off the water.

The outfide of the walls is to be faced with hewn or hammer dreffed. Rone, having four windows in the East, and three in the West. The Sashes to be hung with hinges, and each fash to have twelve panes of glass, eight, by

fash to have twelve panes of glass, eight, by ten inches.

On the top of the Stole work is to be a framed tier of Joists, be led therein, plank dover with Oak plank, extending three feet beyond the wall, thereby forming an eave, which is to be failful divith a Cornice, the whole having a defent from the Centre, fulficient to throw off the water, and to be covered with Copper. A complete and sufficient iron lautern, in the Octagonal form is to rest thereon, the Eight counce pieces or Stanchions of which, are to be built in the wall to the depth of ten feet. These stanchions are to be nearly 3 inches iquare in the lower ten feet, and 3 1-2 by 2 1-2 inches above. The lautern is to be ten feet and nine inches in diameter. It is also to be ten feet high, from the floor to the bottom of the dome or roof, and to have a dome or roof of five feet and nine inches in which the parts of the bottom of the saftes, which are to be moulded on the institute of the saftes, which are to be moulded on the institute of the saftes, which are to be moulded on the institute of the last on the South west fide is to be hung with hinges for a convenient door to go out on the platform.

The rafters of the Lautern are to be frameed into an Iron hoop, over which is to be a copper funnel, thro' which the spinks, may

The ratters of the Lantern are to be framed into an Iron hoop, over which is to be a copper funnel, thro' which the fmoke may pals into a large Copper Ventilator in the form of a man's head; capable of containing 100 Gallons. This head is to be turned by a large vane; fo that the hole, for venting the fmoke, may be always to Leeward.

Eight dormant Ventilators are to be fixed in the roof, a large curved air pipe is to be

in the roof, a large curved air pipe is to be passed thro' the stoor, and a close Stove is to be provided and fixed in the Lantern.

There are to be seven pair of Stairs to affect to the Lantern, the entrance to which is to be a root down to the contrast.

is to be by a trap door covered with copper.
The building is to be furnished with two complete electrical Conductors, or rods with points. The floors are to be laid with plank of at least one inch and one half in thickness, The entrance to the Light-House to be well counted by the floors are to be well counted by the floors are to be well counted by the floors are to be well counted by the floors and the floor and the fecured by a strong door hung upon hinges, with a strong lock and latch complete.

Also a Frame house to be thirty four feet in front and fixteen feet deep, with a relar under it. The cellar walls to be eigheen inches thick, and feven feet high .--The first story of the house is to be eight feet, and the second, seven feet six inches high, the sloors to be laid in whole lengths night, the floors to be laid in whose lengths nailed through. The flack of Chinneys with two plain fire places on each floor, one of them large for a kitchen; two windows below, and three above in front and rear, each fash to have eighteen parts of all the hard large that he had to be the form of the doors. of glass ten by eight inches. The doors to be hung and furnished completely. The ceilings and fides of the house to le pia sered with two outs, all the wood work infide & out to be well painted & the whole to be finished in a plain decent

An oil Vault to be built twenty by tweive feet in the clear; arched over and covered with earth or land over which a hed is to be built-It is to be furnished with nine firong cedar ciflerns, with co-vers, each capable of containing two hundred gallons.

The entrance to the vault is to be fecured by a strong door. A well is to be sunk at a convenient distance, and furnished with a curb, bucket and rope completely. The builder to find and pay for all the materials, labor, workmanship, provisions, and other objects of cost, charge or as pence for a fum to be agreed upon and co execute the before described work and every part thereof in a good and workman

Convenient payments or advances, fecurity will be made. tu&ff
