BOOKS. PRINTED & PUBLISHED By Matthew Carey, No. 118, Market Street,

1. Charlotte, a tale of truth, By Mrs Rowfon, of the New-Theatre Philadelphia.

Second American edition—Prite 75 cents. [The rapid fale of the First Edition of this interesting novel, in a few months, is the best proof of its merit.]

Extract from the Critical Review, April

1791, 2. 468. It may be a taic of truth, for it is not un-natural, and it is a tale of real diffrefs— Charlotte by the artifice of a teacher, re-rommended to a febool from humanity ra-her than a conviction of her integrity of he regularity of her former conduct, is en siced from her governells, and accompanies a young officer to America—The marriage ceremny, if not forgotten, is polyponed, and Charlotte dies a martyrte the inconfancy of her lover, and treachery of his friend,—The fituations are artiefs and af-fecting—the deferiptions ustural and pa-theric; we hould teel for Charlotte if fuch thetic; we fhould feel for Charlotte if fuch a perion ever excited, who, for one error, fcarcely, perhaps delerved fo fevere a pu-minment. If it is a fiction, poetic juffice is not, we think, properly diffribut d."
a. The Inquilitor-by Mrs. Rowion, Sz-cond Philadelphia edition. 37-2 cents

History of the French Revolution, from its commencement to the death of the Queen and the execution of Brillot. Two dollars.

EXTRACT FROM THE PREPACE. 4 The authors have prefumed to affix to their title the epithet Imparial; and the reason is, because they cannot charge them-felves with feeling the Smalleft bias to any party, but that of truth and liberty; and they flatter themfelves, that their readers will find not only every circumflance fairly percented, but every centurable action. whoever were the authors or actors, mark-ed in its proper colors. If it was neceffary to make a declaration of their own princi-ples, they would lay, they are neither tory nor republican--They love liberty as Eng-lifh whigs, and execute every criminal act by which fo noble a caufe is endangered and difgraced.

difgraced. In the preferit ferment of the public mind, they cannot flatter themfolves with the hopes of feeing this claim univerfally acknowledged. On the contrary, they are well affured that thefe pages will not be acceptable to the zealous of either party. But when time thall diffipate the clouds of political decep-tion, they with fome confidence expect that verdict from public opinion, which candor and moderation feldom fail to receive. LIGHT HOUSE. On Seguin Ifland, near the mouth of Kenne-beck river, on the coaft of the Diftrict of Maine; of the following Materials, Di-menfions and Defeription.

Maine; of the following Materials, Di-menfions and Defeription. THE form is to be an Octagon. The foun-lation is to be of flone, to be funk, if prac-ticable, thit teen feet below the bottom of the wooden work, or twelve feet and an half be-low the furface of the earth, and to be com-menced of the diameter of twenty feven feet. It is to be laid folidly to the height of two feet. From thence to the bottom of the wood-en work, the foundation wall is to be eleven feet high, and fix feet thick. As it is intended that the above deferibed from foundation fhall only be carried fix in-ches higher than the crown level of the knoll or rock on which the Light-houfe is to be e-rected, and it may be found impoflible, on account of the rock, to fink the fame to the depth of twelve feet and one half below the work, it is neceffary that the propofitions for the faidflone foundation be made by the perch to include all coits, charges and expences of materials, workmanfhip and labor. The octagonal pyramid is to be well fram-of where it will reft on the top of the flone foundation, to which it is to be well feared by fixteen float in the top of the flone foundation, to which it is to be well feared by fixteen float in the top of the float from the furface of the earth, is to be forty feetto the top of the wooden work, under the hoor of the lantern ; where the diameter is to be fifteen feet. The foundation is to be capt with flawed floan at leaft eight inches wide, and floped at top to turn off the wa-ter.

ter. The frame of the pyramid is to be cover-ed with boards of one inch and one half in thicknefs, over which is to be laid a good & complete covering of fh ngles, and well pain-ted with three coats. The light houfe is to have two windows in the Eaft, and two win-dows in the Weft. The faftes are to be hung with hinges, and each fafth is to have eight panes of glafs, eight by ten inches. On the top of the wooden work of the pyramid is to be a ftrong framed tier of joifts, beded therein, planked over with oak plank extending one foot beyond the fides of the pyramid, thereby forming an eave, which is to be finifhed by a cornice, the whole hav-ing a defeent from the center, fullicient to throw off the water, and to be covered with copper.

opper. A complete and fufficient iron Lantern in

copper. A complete and fufficient iron Lantern in the oftagonal form is to reft thereon; the eight corner pieces or flanchions of which are to be well fecured to the upright timbers of the pyramid, or to the tier of joifts, or both. Thefe flanchions are to be very flrong and flout in the lower ten feet, and three and one-half inches by two and one-half inches a-bove. The Lantern is to be ten feet high, from the floor to the bottom of the dome or roof, and to have a dome or roof of five feet in height. The whole space between the pofts to be occupied by the faftes, which are to be moulded on the infide and flruck folid. Each fafth is to have twenty-eight large panes of glafs; a part of the fafte on the fourth-weft fide is to be hung with hinges for a door to go out on the platform. The iron rafters of the lantern are to be framed into an iron hoop, over which is to be a copper funnel ;----thro' which the finoake may pafs into a large copper ventilator in the form of aman'shead; capable of containing one hundred gallons. This head is to be turned by a large vare, fo that the hole for venting the finoak may be always to leeward. Eight dormant ventila-tors are to be fixed in the roof, a 'large cur-ved air pipe is to be pailed thro' the floor and a clofe flove is to be provided and fixed in the lantern. There are to be approved and fixed in the lantern. There are to be approved and fixed in the lantern. There are to be approved to the floor and a clofe flove is to be provided and fixed in the lantern. There are to be approved to the floor show to be by a trap door covered with copper. The

to the lantern, the entrance to which is to be by a trap door covered with copper. The building is to be furnified with two complete electrical conductors or rods with points. The floors are to be laid with plank. The entrance into the light honfe is to be well fe-cured by a firong door hung upon hinges with a firong lock and latch complete. Alfo a frame Dwelling Houfe of one flory Allo a frame Dwelling Houle of one, hory and the roof, to be twenty fix feet or there-about in front, and twenty five feet deep, with a cellar, under it, if it fhall be found practi-cable to dig it. The cellar walls to be eigh-teen inches thick, and feven feet high. The teen inches thick, and feven feet high. The flory of the Houfe to be feven feet and one half in theclear. The rooi to have a rectangu-lar pitch. The floors to be laid in whole lengths nailed through. The Houfeis to con-tain a Kitchen of thirteen by fixteen feet, a fitting room adjoming lengthwife of twelve by fixteen feet, two fmall chambers of eight by nine feet joini gto the ends of the Kitchen and fitting room, with a paffage to thofe two rooms between the bad rooms. The flack of chimneys to be between the Kitchen and fit-cing room and is to have two plain fireplaces, one of them large for a kitchen; to which is to be joined an Oven. There is to be an out er door to the paffage and an outer door alfo to the Kitchen. There are to be two win-dows in each of the large rooms, and one in reach hed room. lows in each of the large rooms, and one in each bed room.

Convenient payments or advances, on fecu-rity, will be made. t&ftf. April 17.

Treasury Department REVENUE OFFICE, April 10, 1795. PROPOSALS

Will be received at the Office of the Commissioner of the Revenue,

FOR BUILDING A LIGHT HOUSE,

On Long Island, at MONTAAR POINT in the County of Suffolk, and State of New York, of the following Materials, Dimensions and Description. The form is to be Octagonal. The foun-dation is to be of Stone, to be funk thirteen feet below the bottom of the Water table, or the furface of the Earth, and to be commenced of the Diameter of twenty nine fect. From fuch commencement to the bottom of the Water Table, the foundation wall is to

From fuch commencement to the bottom of the Water Table, the foundation wall is to be thirteen feet high, and nine feet thick. The Diameter of the bafe from the bot-tom of the Water Table to the top thereof, (where the Octagonal pyramid is to com-mence) is to be twenty eight feet, and the wall is there to be feven feet thick. The wall of the Octagonal pyramid is to be fix feet thick at the Bafe thereof, on the top of the Water Table. The Height of the building, from the bot tom of the Water Table and from the fur-face of the Earth, is to be eighty feet to the top of the ftone work, under the floor of the Lantern; where the Diameter is to be fixteen feet in inches, and the wall three feet thick. The whole to be built of Stone; the W ter Table is to be capt with fawed itone, at leaft eight inches wide, and Sloped at top to turn off the walls is to be faced with hewn or hammer dreffed flone, having four windows in the Eaft, and three in the Weft. The Safles to be hung with hinges, and cach faft to have twelve panes of glafs, eight by ten inches.

On the top of the Stone work is to be a framed tier of Joilts, beded therein, planked over with Oak plank, extending three feet beyond the wall, thereby forming an eave, which is to be finished with a Cornice, the beyond the wall, thereby forming an eave, which is to be finifhed with a Cornice, the whole having a defeent from the Centre, fufficient to throw off the water, and to be covered with Copper. A complete and fu-ficient iron lantern, in the Octagonal form is to reft thereon, the Eight corner pieces or Stanchions of which, are to be built in the wall to the depth of ten feet. Thefe Stanch-ions are to be nearly 3 inches fquare in the lower ten feet, and 31-2 by 21-2 inches above. The, lantern is to be ten feet and nine inches in diameter. Is is alfo to be ten feet high, from the foor to the bottom of the dome or roof, and to have a dome or roof of five feet and nine inches in height. The whole fpace between the pofts or up-right pieces at the angles is to be occupied by the Sahes, which are to be moulded on the infide and furck Solid. Each fafth is to have twenty eight panes of glafs, furteen by twelve inches, a part of the laft on the Sonth wetf fide is to be hung with hinges for a convenient door to go out on the platform. The rafters of the Lantern are to be fram-ed into an Iron hoop, over which is to be a copper funnel, thro' which the finoke may copper funnel, thro' which we finde and further finoke may copper funnel, thro' which the finoke may copper funok and the a lareare for the panel for the finoke ma

and an Iron hoop, over which is to be a copper funnel, thro' which the fmoke may pals into a large Copper Ventilator in the form of a man's head; capable of contain-ing too Gallons. This head is to be turned ing too Gallons. This head is to be turned by a large vane; fo that the hole, for vent ing the finoke, may be always to Leeward. Eight Jorn ant Ventilators are to be fixed in the roof, a large curved air pipe is to be paffed thro' the floor, and a close Stove is to be provided and fixed in the Lantern. There are to be feven pair of Stairs to to the Lantern, the entrance to which is to be by a trap door covered with copper. The building is to be furnished with two complete electrical Conductors, or rods with points. The floors are to be laid with plank. of at leaft one inch and one half in thicknels. The entrance to the Light-House to be well fecured by a ftrong door hung opon hinges, with a ftrong lock, and latch complete. Alfo a Frame house to be thirty four feet in front and fixteen feet deep, with a cel lar under it. The cellar walls to be eight teen inches thick, and feven feet high. The first story of the house is to be eight feet, and the fecond, feven feet fix inches high, the floors to be laid in whole lengths mailed through. The flack of Chimneys with two plain fire places on each floor, one of them large for a kitchen; two windows below, and three above in front and rear, each fash to have eighteen panes of glafe ten by eight in the second second second second and rear. of glafs ten by eight inches. The doors to be hung and furnifhed completely.— The ceilings and fides of the house to be plaistered with two coats, all the wood work infide & out to be well painted & the whole to be finished in a plain decent manner.

pay, for all materials, labor, wertmanflip provisions and other objects of coll charge or expence for a fum to be proposed and egreed upon, and to execute the before deferibed work, and every part thereof in a good and workman like manner.
