The Porcupine.

I TAKE this method of informing the People of the United States, that on the first day of November next, I propose to resume the publication of Porcupine's Gazette, under the title of THE PORCUPINE; and to notify (in case any gentleman in America should want it) that the price of each Number will be five cents sterling, and that the cash must be received by me before the paper can be supplied.—As to the mode of conveyance, so frequent are the opportunities from London to New-York, that files may be forwarded to the latter place once a fortnight upon an average—from New-York they can be speedily conveyed to every part of the Union. When files can be, without delay, sent to other places direct, it may be done; when they cannot, they will all be sent to New-York, unless otherwise ordered. COPYING MACHINES,

These machines are made on a simple and improved plan for copying, writing, &c. of any size, in an expeditious manner, and are charged at a much less price than any other now in use. They are found to possess a superiority over any others, both by being more durable and not liable to get out of repair, and by copying any number of writings at one time, without making any alteration in the machine, and their occupying little room. The very general use into which these machines are now brought in use in London and other large trading cities, and the satisfaction testified by all who possess them, render it unnecessary to enlarge any further on their advantage, both in point of accuracy and secrecy and in the saving of time, labour and expence.
