Charlotte a tale of truth—by Mrs. Rowson, of the new Theatre, Philadelphia. Second American edition—Price 75 cents. [The rapid sale of the first edition of this interesting novel, in a few months is the best criterion of its merit.]

EXTRACT FROM THE CRITICAL REVIEW, APRIL 1791, p. 468.
"It may be a tale of truth, for it is not unnatural, and it is a tale of real distress—Charlotte, by the artifice of a teacher, recommended to a school, from humanity rather than a conviction of her integrity, or the regularity of her former conduct, is enticed from her governors, and accompanies a young officer to America—the marriage ceremony, if not forgotten, is postponed, and Charlotte dies a martyr to the inconstancy of her lover and treachery of his friend."
The situations are artless and affecting—the description natural and pathetic; we should feel for Charlotte if such a person ever existed, who for one error, scarcely, perhaps deserved to sever a punishment. If it is a fiction, poetic justice is not, we think, properly distributed."

COLLEGE of NEW-JERSEY.

MAY 26, 1795.

ADVERTISEMENT.

THE Grammar School formerly attached to this College, having gradually declined through the increasing infirmities of the late President for some time before his death, it is proposed by the subscriber immediately to revive it, and to put it under the most careful instruction and government. The Latin, Greek, and French Languages shall be taught in it, together with the principles of English Grammar, of Geography, and practical Geometry. Parents, likewise, who do not chuse that their children should go through the entire course of studies in the College, may now have them instructed in any particular branches in the same manner, on the same terms, and to the same extent as in the College—particularly in the antiquities and mythology of Rome, in Geography, in the Mathematics, in Natural Philosophy and Astronomy, in Moral Philosophy and the Principles of Civil Government, in Eloquence, and in the Elements of History. They may address their children to any of the Masters in the College, or to

SAMUEL S. SMITH.
N. B. The young gentlemen shall be under the same rules of moral discipline as the other Students—shall be subjected to public examinations, and, at leaving the College, shall be entitled to public testimonials of the branches they have studied, and of their proficiency in them.

P. S. The School is already opened, and under the direction of Mr. SCOTT.

THE following Certificates of the Funded Debt of the United States, issued from the Office of the Register of the Treasury of the said United States, in the name of Patrick Hearty of London, to wit.

Scheme of a Lottery,

To raise 39,900 Dollars, on 266,000 Dollars—Deducting 15 per Cent. from the Prizes—This Lottery consists of 38,000 Tickets, in which there are 14,539 Prizes, and 23,461 Blanks, being about one and an half blanks to a prize.

THE Directors of the Society for establishing Useful Manufactures, having resolved to erect LOTTERIES for raising ONE HUNDRED THOUSAND DOLLARS, agreeably to an Act of the Legislature of the State of New-Jersey, have appointed the following persons to superintend and direct the drawing of the same, viz. Nicholas Low, Rufus King, Herman Le Roy, James Watson, Richard Harrison, Abijah Hammond, and Cornelius Ray, of the city of New-York—Thomas Willing, Joseph Ball, Matthew McConnell and Andrew Bayard, of the city of Philadelphia—His Excellency Richard Howell, Esq. Elias Boudinot, General Elias Dayton, James Parker, John Bayard, Doctor Lewis Donham, Samuel W. Stockton, Joshua M. Wallace, Joseph Bloomfield, and Elisha Boudinot, of New Jersey, who offer the following Scheme of a Lottery, and pledge themselves to the public, that they will take every care and precaution in their power to have the Monies paid by the Managers from time to time, as received, into the Banks at New-York and Philadelphia, to remain for the purpose of paying Prizes which shall be immediately discharged by a check upon one of the Banks.

The Superintendants have appointed John N. Cumming of Newark, Jacob R. Hardenberg, of New-Brunswick, and Jonathan Rhea, of Trenton, as immediate Managers thereof, who have given ample security for discharging the trust reposed in them.

In order to secure the punctual payment of the Prizes, the Superintendants of the Lottery have directed that the Managers shall each enter into bonds in 40,000 dollars, with four sufficient securities, to perform their instructions, the substance of which is

- I. That whenever either of the Managers shall receive the sum of Three Hundred Dollars, immediately he shall place the same in one of the Banks of New-York or Philadelphia, to the credit of the Governor of the Society, and such of the Superintendants as are in the city where the monies are placed, to remain there until the Lottery is drawn, for the payment of the Prizes.
- II. The Managers to take sufficient security for any Tickets they may trust, or otherwise to be responsible for them.
- III. To keep regular books of Tickets sold, Monies received and paid into the Bank, abstracts of which shall be sent, monthly, to the Governor of the Society. Paterson, January 1, 1794.

TREASURY DEPARTMENT,

Revenue-Office, April 27, 1795
PROPOSALS will be received at the Office of the COMMISSIONER of the REVENUE for building

A LIGHT HOUSE

on the head land of Cape Hatteras on the coast of North Carolina, of the following materials, dimensions, and description.

THE form is to be octagonal.—the foundation is to be of stone, to be sunk thirteen feet below the bottom of the water table or the surface of the earth, and to be commenced the diameter of twenty nine feet.—From such commencement to the height of four feet the foundation is to be laid solidly and from thence to the bottom of the water table, the foundation wall is to be nine feet high and nine feet thick.

The diameter of the base from the bottom of the water table to the top thereof (where the octagonal pyramid is to commence) is to be twenty eight feet four inches and the wall is there to be seven feet thick—the wall of the octagonal pyramid is to be six feet thick at the base thereof, on the top of the water table.

The height of the building from the bottom of the water-table, and from the surface of the earth, is to be ninety feet to the top of the stone-work, under the floor of the lantern; where the diameter is to be sixteen and one half feet and the wall three feet.—the whole of the walls is to be built of stone: the water table is to be cap with fawed stone, at least eight inches wide and sloped at the top to turn off the water. The outside of the walls is to be faced with hewn or hammer dressed stone, having four windows in the north east and five windows in the south west: The flashes are to be hung with hinges, and each flash is to have twelve panes of glass, eight by ten inches

On the top of the stone work is to be a framed tier of joists, bedded therein, planked over with oak plank, extending two feet beyond the wall thereby forming an eave which is to be finished with a cornice, the whole having a descent from the centre sufficient to throw off the water, and to be covered with copper. A complete and sufficient iron lantern in the octagonal form is to rest thereon. The eight corner pieces or slanchions of which, are to be built in the wall to the depth of ten feet. These slanchions to be nearly three inches square in the lower ten feet, and 3 1/2 inches by 3 1/2 inches above. The lantern is to be ten feet and nine inches in diameter, it is also to be ten feet high from the floor to the bottom of the dome or roof and to have a dome or roof of five feet and nine inches in height. The whole space between the posts or upright pieces at the angles is to be occupied by the flashes, which are to be moulded on the inside and bruck solid. Each flash is to have twenty eight panes of glass, fourteen by twelve inches. A part of the flash on the fourth west side is to be hung with hinges for a convenient door to go out on the platform. The flashes of the lantern are to be framed into an iron hoop, over which is to be a copper funnel, thro' which the smoke may pass into a large copper ventilator in the form of a man's head, capable of containing one hundred gallons.

This head is to be turned by a large vane; so that the hole for venting the smoke, may be always to leeward. Eight dormant ventilators are to be fixed in the roof, a large curved air pipe is to be passed through the floor, and a close stove is to be provided and fixed in the lantern. There are to be eight pairs of stairs to ascend to the lantern, the entrance to which is to be by a trap door covered with copper. The building is to be furnished with two complete electrical conductors, or rods with points. The floors are to be laid with plank, of at least one inch and one half in thickness. The entrance to the light house is to be well secured by a strong door hung upon hinges with a strong Lock and latch complete.

All a frame House to be thirty four feet in front and sixteen feet deep with a cellar under it. The cellar walls to be eighteen inches thick and seven feet high.

The first story of the house is to be eight feet, and the second, seven feet and six inches high. The floors are to be laid in whole lengths, nailed through. The stack of chimney is to be finished with two plain fire places on each floor, one of them large for a kitchen. Two windows below and three above in front and rear, each flash to have eighteen panes of glass ten by twelve inches. The doors are to be hung and furnished completely.

The ceilings and sides of the House are to be plastered with two coats; and all the wood work inside and out is to be well painted and the whole to be finished in a plain decent manner.

An Oil vault is to be built twenty feet by twelve feet in the clear, arched over and covered with earth or sand over which a shed is to be built.—It is to be furnished with nine strong Cedar Cisterns with covers, each capable of containing two hundred gallons.

The entrance to the vault is to be secured by a strong door. A well is to be sunk at a convenient distance, and furnished with a curb, bucket and rope completely.

The builder to find and pay for all the materials, labor, workmanship, provisions, and other objects of cost, charge or expense, for a sum to be agreed upon, and to execute the before described work and every part thereof in a good and workman-like manner.

Convenient payments or advances, on security will be made.

15,000 ditto	10	15,000

16,739 Prizes
33,301 Blanks

50,000 Tickets at 8 dollars 400,000

This Lottery will afford an elegant specimen of the private buildings to be erected in the City of Warrington—Two beautiful designs are already selected for the entire fronts on two of the public squares; from these drawings, it is proposed to erect two, centre and four corner buildings, as soon as possible after this Lottery is sold, and to convey them when complete, to the fortunate adventurer, in the manner described in the scheme for the Hotel Lottery. A neat deduction of five per cent. will be made to defray the necessary expenses of printing, &c. and the surplus will be made a part of the fund intended for the National University, to be erected within the City of Warrington.

The drawing will commence as soon as the Tickets are sold off.—The money prizes will be payable in thirty days after it is finished, and any prizes for which fortunate numbers are not produced within twelve months after the drawing is closed are to be considered as given towards the fund for the University, it being determined to settle the whole business in a year from the ending of the drawing and to take up the bonds given as security.

The real securities given for the payment of the Prizes are held by the President and two Directors of the Bank of Columbia, and are valued at more than half the amount of the Lottery.

The twenty four gentlemen who by appointment of the late Commissioners assisted in the management of the Hotel Lottery are requested to undertake this arduous task a second time on behalf of the public; a sufficient number of these having kindly accepted, it is hoped that the friends to a National University and the other federal objects may continue to favor the design. The synopsis of one of the Colleges, to form a branch of the National Institution, is already in the press, and will be speedily published, together with its constitution.

A complete PLAN of the whole of this important Institution, compiled from a selection of the best materials, ancient and modern, will be submitted to the public whenever the same may have gone through such revisions as may be necessary to establish the perfect confidence and general approbation, so essential to its present life and future existence for the general good of America.

By accounts received from the different parts of the Continent as well as from Europe, where the tickets have been sent for sale, the public are assured that the drawing will speedily commence, and that the care and caution unavoidably necessary to insure a safe disposal of the tickets, has rendered the minor suspension indispensable.

February 24, 1795.

SAMUEL BLODGET.
