By accounts received from the different parts of the Contineut as well as from Europe, where the tickets have been sent for sale, the public are assured that the drawing will speedily commence, and that the care and continuation unavoidably necessary to insure a safe disposal of the tickets, has rendered the short suspension indispensable.

TO THE PUBLIC.

THE object of the proposed work, is, to present to public view a connected series of the chief events of a period of American history, that does not yield, in impartance, to any period of equal length, in the peaceful annals of any country in the world.

Desiring to excite no expectations but such as he shall endeavour to sa issy, the writer is thus early in announcing, that the body and consistence of a regular history, is not to be looked for in this work: neither his tale..ts nor his avocations allow him to hope for this. His humbler task shall be to sketch out the most prominent features. It shall be his study to collect and arrange the most interesting materials—to smooth the rugged path—for abler hands, who, by such means, will find their labours abridged, and their progress accelerated.

His chief view will be, to give the History of the United States as a consederated Republic. Nevertheless, notice will be taken of the most remarkable circumstances in the history of the individual States, as far as they can be collected. This information shall be classed under separate appendixes.

The Author folicits the affiftance of fuch Gentlemen as may be possessed of documents calculated to promote the execution of his plan. They shall be received with due gratitude—carefully preserved—and fasely returned.

"I imagine a Scythian, named ANACHARSIS, to arive in Greece, fome years before the birth of Alexander;
ind that from Athens, the usual place of his residence, he and that from Athens, the ufual place of his residence, he makes several excursions into the neighbouring provinces; every where observing the manners and customs of the inhabitants, being present at their sessions, and studying the nature of their governments; sometimes dedicating his leisure to enquiries relative to the progress of the human mind, and sometimes conversing with the great men who flourished at that time; with Epaminondas, Phoeion, Xenophon, Plato, Arishile, Demosshemes, &c. As soon as he has seen Greece enslaved by Philip, the father of Alexander, he returns into Seythia, where he puts in order an account o his traveis; and to prevent any interruption in his narrative, relates in an introduction the memorable events which had passed in Greece before he less Scythia."
