THE object of the proposed work, is, to present to public view a connected series of the chief events of a per od of American history, that does not yield, incompertance, to any period of equal length, in the peaceful annals of any country in the world. However, in the peaceful endeavour to fa isfy, the writer is thus early in announcing, that the body and consistence of a regular history, is not to be looked for in this work; neither his tale, is nor his avocations allow him to hope for this. To give a proper idea of the Plan of this Work, the fol-lowing is extracted from the Advertisement of the Author:

Author:

1. Imagine a Scythian, named Anagharsis, to arrive in Greece, some years before the birth of Alexander; and that from Athens, the usual place of his residence, he makes several excursions into the neighbouring provinces; every where observing the maners and cultions of the inhabitants, being present at their sessions, and studying the nature of their governments; sometimes dedicating his leisure to enquiries relative to the progress of the human mind, and sometimes conversing with the great men who flourished at that time; with Epiminondus, Phocion, Xesophon, Plato, Aristale, Dem Shenes, &c. As soon as he has seen Greece ensured by Philip, the father of Alexander, he returns into Scythia, where he puts in order an account of his travels; and to prevent any interruption in his narrative, relates in an introduction the memorable events which had passed in Greece before he left Scythia. "

"I have chosen to write a narrative of Travels rather than a history, because in such a narrative all is seenery and action; and because circumstantial details may be entered into which are not permitted to the historian."
