The following Character of this work is extracted from the Monthly Review, p. 311, 312, for March, 1793.

"We have no small degree of pleasure in announcing the present work to our readers; as one which from the freedom of its enquiry, the grandeur of its views, and the fortitude of its principls, is eminently deserving of attention. By this eulogium, we would by no means be understood to subscribe to all the principls which these volumes contain. Knowledge is not yet arrived at that degree of certainty which is requisite, for any two men to think alike on all subjects; neither has language attained that confistent accuracy, which can enable them to convey their thoughts, even when they do think alike, in a manner perfectly correct and intelligible to both. These difficulties are only to be overcome by a patient, incessant; and benevolent investigation.

"Many of the opinions which this work contains, are bold; some of them are novel; and some doubtless are erroneous:—but that which ought to endear it even to those whose principles it may offend, is the strength of argument adduced in it to prove, that peace and order most effectually promote the happiness after which political reformers are panting;—that as the progress of knowledge is gradual, political resorm ought not to be precipitate;—and that convulsive violence is dangerous not only to individuals (for that result comparatively would be of small account) but to the general cause of truth. It is the opposite of this principle that inspires the enemies of political enquiry with so much terror; it is the supposition that change must inevitably be attended by the urbulence and injustice of commotion; and that innovation cannot be made without th

felicity depend."

Philadelphia,

FRIDAY EVENING, JUNE 24, 1796.

In a late Virginia paper, a candidate for a fer in the Federal House of Representatives has published an address to HIS Fellow Citizens, in which he inveighs against the treaty, the funding system, foreign influence, &c. &c. Under the address' the following article, written, no doubt, by for malicious aristocrat.

" HUZZA FOR CITIZEN GERARD!!! " ALL true patriots will doubtless lend their aid to bring that enlightened Statesman into our public councils.—He is a real Democrat, and fulfils all his Wheat Contracts.

A FEBERAL REPUBLICAN.

COMMUNICATIONS.

The opposers of the British treaty said that the debts due by the merchants of the United States, which that instrument would compel them to pay, amounted to five (some of them said fifteen) millions of dollars. It was rough gueffing. The Aurora of this morning has found out that a law passed during the late session appropriating "about eighty thousand dollars to carry the British treaty into effect" and that the sum of eighty thousand dollars will not pay a " few millions !!!"

" Let the people judge who are diforganizers, antifederalifts, and abettors of a foreign faction in the United States; let the flicklers for administration be judged of from their own mouths. A member of the house of representatives lately declared in a large circle, that the union could not hang together if such men as Jefferson, Madison, and Gallatin once got into the executive administraand Gallatin ouce got into the executive administra-tion; as if the people had not the capacity of chusing with discretion their public officers." The foregoing is extracted from the Aurora, and con-tains most precious confessions indeed! Here it is confessed what our antifederal faction mean by THE PEOPLE. They do not mean any perfon in office or those who have elected them, for here, a member of the house of representatives is proscribed merely for giving an opinion as one of the people.

But supposing that a convention held fince the adjournment of Congress had voted in conclave, that Mr. Jefferson should be President of the United States, Mr. Madison or rather Mr. Burr, vice President, and Mr. Gallatin, Secretary of the Treafury; would any man cease to be one of the people, would he be a diforganizer, an antifederalift, au abettor of a foreign faction, if he should declare it as his opinion "that the union could not hang together if such men once got into the executive admininistration?" This is a precious confession .-

" You shall be vice-roys, it is true. " But we'll be vice-roys over you."

The governor of this Commonwealth in confequence of an infectious difease in the West Indics has by proclamation ordered that all veffels arriving in the Delaware from any of the West India Islands shall perform a quarantine of FIVE DAYS, by being detained opposite the Health Office on State

In the pretent leginature of Mallachuletts there is a majority of about 5 to 1 of Federal characters. Mr. Robbins, the Speaker of the House of Repre-sentatives was elected to that office almost unani-

The senate elected Mr. Goodhue, Senator of the United States, for fix years from the 4th March 1797. Mr. Goodhue and Mr. Robbins had an equal number of votes in the House, viz. 70 each for the same appointment on the sirk trial, on the second, Mr. Goodhue preponderated, and the house concurred with the Senate.

From the above circumstance certain persons have abfurdly supposed that Mr. Robbins is of the anti-federal faction; not reflecting that it is impossi-ble that any such characters should gain a majority in fuch a legislative body, for any office whatever. In addition to which, it may be afferted that Mr. Robbins is as firm a Federalift as any in the United States.

Fram the Charleston City Gazette.

Messers. Freneau and Paine, In your paper of the 30th of May I see some observations on the treaty with Great Britain, introduced by a correspondent. The mischievous effects of Mr. Jay's treaty, says this observer, will shortly be very sensibly selt by the citizens of the southern states, as chief instice Ellsworth has decreed that it prohibits the selling of French prizes in American ports. And further, he fays, that during the present war, the prices of West India produce have been low, in consequence of the great quantities captured and fent into Carolina and Georgia by the French cruifers. Had this been the case, the people of the southern states might have enjoyed some advantage; but your correspondent proceeds to shew that it was not the case, and that the citizens at large are not benefitted, but that the merchants are: for, fays he, the merchants finding rum, fugar, coffee, and molasses (which they bought cheap at prize sales) better articles of remittance than rice and indigo, derived great profits from shipping them, What is this, but saying that the merchants would not buy their rice and indigo, when they could purchase West India produce? and I think it requires a little more ingenuity in your correspondent, than his piece will allow us to think he possesses, to prove that the agricultural interest of a country is benefitted by the admission of articles, so much more desirable as remittances as to prevent the sale of its produce. Thus, for instance, the merchant who had ten thousand pounds would not be yet a barrel of rice or indigo, because the merchants are: for, fays he, the merchants finwould not buy a barrel of rice or indigo, because prize goods made better remittance. This, to be fure, is a substantial reason indeed against the treaty with the planters of this country: for it is faying, in to many words, that if the merchants could get prize goods enough, they would not buy a barrel of your rice and indigo, and for an excellent reason too; because it did not make as good a remittance. Again, if the merchants buy it with avidity to
