LEWES, Del., Nov. 20, 8 A M.

Quite a number of square-rigged vessels are in the Bay, and are likely to go to sea this forenoon without stopping at the Breakwater. Steamer Engineer, schrs F H Hall, Jos Holmes, Mary P Burton, and Emma Tuttle, are in the Roadstead. A severe storm of rain, and wind from NW prevailed here yesterday; but changed during the night to snow, which fell to the depth of two inches. Wind NW—weather moderating.

Nov 21, A M—Quite a fleet went to sea yesterday. The steamer Engineer, and a topsail schr are the only vessel at harbor. Wind WSW—weather cold, and ice as much thick formed during the night on the ponds and creeks in the vicinity.

Yours, &c., WM. M. HICKMAN.

A Meeting of the Citizens of the Fifth WARD FOR THE RELIEF AND EMPLOYMENT OF THE POOR, was held in the Hope Hose House, UNION Street, below Second, on WEDNESDAY EVENING, November 18th, 1857. Alderman JOHN B. KENNEY was called to the Chair, and JOHN Q. ADAMS, appointed Secretary.

After the object of the meeting had been stated by the Chairman, the following plan of organization was agreed upon:

1st. Precinct Committees, consisting of five for collecting funds, with power to add to their number. The Chairman of each Precinct Committee to be a member of the Executive Committee. Precincts to be subdivided by the Committee to suit their own convenience. All money collected to be promptly paid over to the Treasurer, and his receipt taken in the collection-book for the same. All books to be returned to the Executive Committee as soon as practicable.

2d. The Executive Committee shall consist of the Chairman and Secretary of this meeting, and the Chairmen of the Precinct Committees, with power to add to their number, who shall be required to call meetings of the citizens of the Ward, when, in their judgment, it may be required; to control all funds, audit, pass on, and approve all bills, prior to payment by the Treasurer, and approve of the ...; to publish a statement of their accounts, with such other matter as may be deemed expedient at the close of their labors; and to furnish each Chairman of the Precinct Committees with one or more books, properly attested, for the purpose of making collections; also, attested cards or circulars for the use of the Committees, to be left with the citizens when called on to contribute; and to attend to all contingent matters, from time to time, as they may deem expedient.

3d. The Executive Committee shall appoint a Treasurer, whose duty it shall be to receive all money, and keep a strict account of the same, pay all orders drawn on him, properly attested, and to receipt for all moneys paid him by the Committees on Collections, or otherwise obtained.

4th. Any two members of the Executive Committee may, from time to time, draw orders on the Treasurer for any sum not exceeding five dollars, for special purposes; but in no case shall any larger sum be drawn, unless passed on and approved in session by the Executive Committee.

5th. If the Executive Committee believe it expedient they may locate a Central Station, where all applications for relief, either in person or in writing, is to be made, and to provide a book of record for the name and residence of the applicant, in order that the case may be properly investigated.

6th. All funds collected to be disbursed in the Fifth Ward, and, after relieving the wants of the Ward, then the surplus, if any, may be distributed elsewhere.

7th. Besides the ordinary means of relief—that is, in food, fuel, money, and raiment—the Executive Committee shall have power to provide work on any of the public works in the Fifth Ward, or elsewhere, and pay wages for the same; and also to provide means of removal to the country for those willing to go.

8th. The Executive Committee shall have power to appoint one person to represent this meeting, and the citizens of the Ward, in any general meeting of the Wards of the city.

On motion, the Chairman was requested to appoint the different Committees; and the Executive Committee, authorized to confer with any Committee that may hereafter be appointed by the members of the City Councils, for the relief and employment of the poor during the approaching winter.

The proceedings were then ordered to be published, and the meeting adjourned.

JOHN B. KENNEY, Chairman.

Office of the Mayor of the City of Philadelphia,
EXECUTIVE DEPARTMENT, Nov. 21st, 1857.

WHEREAS, His Excellency the Governor of the Commonwealth of Pennsylvania, has, in conformity with a commendable custom, appointed THURSDAY next, the *26th day of November*, as a day of Thanksgiving throughout this State:

And whereas, the citizens of Philadelphia recognise, in common with all divinely enlightened intelligences, a dependence on the power and mercy of an omnipotent, omnipresent, and omniscient Jehovah, with whom are the prosperity of nations, the security of states, the welfare of communities, and the harmony of society:

Therefore, The Mayor of the City of Philadelphia feels it a duty most respectfully to invite the people of this city to unite with those of the Commonwealth, on the day thus appointed, in rendering unto God the thanksgiving of the heart for mercies we cannot command, blessings we surely enjoy, preservation from evils which involve social disorganization, and that pervading spirit in our metropolis which invokes a mitigation of troubles now clouding our contentment, but not obscuring our hopes.

By order of the Mayor.

Proposals.

STEAM MACHINERY FOR SCREW PROPELLER SLOOP-OF-WAR.

NAVY DEPARTMENT, November 19, 1857.

SEALED PROPOSALS, endorsed "Proposals for Steam Machinery for Screw Propeller sloop-of-War," will be received at this Department until 3 o'clock the 18th December next, for the complete construction of the steam machinery and appendages, and placing it on board a screw propeller ship of war building in the United States navy yard at Philadelphia.

The offers must be for a specific sum for putting the whole in successful operation; must include all patent fees for any arrangements that may be proposed; state the time in which the work will be completed, and be accompanied by the usual guarantee required by law. The name of the establishment in which the work is to be executed must be stated.

The details of the design and arrangement of the machinery will be left with the party whose proposition *may be accepted as combining the greatest number of* advantages, keeping in view simplicity of construction, readiness of access for adjustment when in operation, and not being subject to derangement in the working parts; it being the object of the Department to obtain the most speed and power with the most economical consumption of fuel, and the greatest stowage of coal which the space available for that purpose will admit.

The boilers to be of iron, with telescopic smoke-pipe, which must be placed at the greatest practicable distance from the mainmast; the propeller, with the connections for hoisting, to be of composition; the machinery for hoisting, for pumps, apparatus for ventilating, and appurtenances as well as all kinds necessary for the perfect working of the whole, to be of the most approved kinds. The coal-bunkers, shaft passage, two athwartships iron bulkheads, a distilling apparatus for fresh water which can be made not less than 1,000 gallons per day; all the tools and duplicate pieces necessary and satisfactory for an efficient cruising steam ship-of-war must be included in the proposition, and a list of them must be furnished.

The wood and carpenter work (except the boring out the deadwood for the shaft) necessary to adapt the vessel for the reception of the machinery, boilers, and appendages, will be provided at the expense of the Navy Department, and it will permit the use of such facilities as it may have for hoisting the heavy machinery on board.

For the accommodation of the entire steam machinery and the fuel, there will be allowed in the body of the *ship the entire space, under the berth deck*, commencing at 17½ feet abaft the mainmast, and thence extending forward a distance of 56 feet; the greatest breadth inside clear of the plank under the beams being 42½ feet, and the height from the top of the timbers to the under side of the beam amidships being 13 feet 0 inches. Within this space it is expected to carry coal for thirteen days' full steaming, the daily consumption of which the bidder will state in his specifications; and the weight of the machinery, water in boilers, shaft, propeller, and appendages, with the tools and spare work, must not exceed 340 tons, of 2,240 pounds.

The distance from the aft side of the mainmast to the aft-side of the forward stern-post will be about 100 feet, and the distance between the forward and the after stern-post will be 7 feet; the depth from the load water line to the top of the keel under the propeller will be 19½ feet.

Steam-engine manufacturers who desire to bid can obtain a copy of the section of the vessel upon making application to the Department.

The proposal must be accompanied by full specifications and general drawings, having the position of the *centre of gravity of the machinery, boilers, &c.*, marked on them; giving also the capacity of the steam cylinders and area of foot and delivery valves, and of air pump, and outboard delivery valves, space for steam above the water line to boilers, the fire and grate surface; also, the diameter, pitch surface, and kind of propeller and other principal points, that comparisons can readily be made. There will also be given the estimate of the weight of engines, boilers, water, bunkers, appendages, tools, and spare work, in tons of 2,240 pounds.

The terms of payment will be that when one-fourth of the materials and labor provided for in the contract shall have been completed to the satisfaction of the Department, there will be made a payment of one-fifth part of the whole amount of the contract; when one-half the work shall have been completed, there will be a further payment of one-fifth; when three-fourths the work shall have been completed, a further payment of one-fifth; when the whole shall have been completed, and have made a satisfactory trial of one week, then a further payment of one-fifth; and when the ship shall have performed satisfactorily at sea for a period of three months, then the *remaining sum* shall be paid.

The repairs necessary during this period from defective workmanship or materials will be at the expense of the contractor.

The proposals must be explicit, and no qualified or conditional offer will be considered.

ISAAC TOUCEY, Secretary of the Navy.
