It is passing strange that these late officials are so severely handled people of clear heads should now speak, or out of the country, and here, a thousand miles away from the scene of their labors, all persons of every party in Kansas, or who come from there, for some years past should have spoken, of the Bank of France as a specie-paying institution. unite in commendations of Walker and Stanton's Does not everybody, know that ever since course, as the only just, wise, and politic one in LOUIS NAPOLEON made his military demonstrathe circumstances of the Territory. Meanwhile, Mr. BRUNEL, the engineer, (son of the contractor of the Thames Tunnel) must feel very uncomfortable. Already the huge bulk of iron, rivetted, welded, and braced into the outward and visible appearance of a ship, is contemptuously pointed to and spoken at, as "Brunel's Folly."

In future, we dare say, engineers will make their calculations on surer grounds and with more certain knowledge than have been exercised on this occasion. But, we cannot help thinking, as we read of the remarkable "fix" into which the Leviathan is placed, unwieldy and immoveable, of the great Primrose picture, doomed for ever to stand up against the kitchen-wall.

Had Speaker Banks anything to do with it, and it so, what were his relations to the money? What members of Congress shared in the distribution of the funds? It is pretty eertain that the investigation com-mittee of the last Congress, did not forret out a'l the corruption that has fostered in and about the capitol. Matteson, Gilbert & Co. were not the only members who should have been exposed. If they would consent to turn informers, there would be a terrible fauttering among many who now assume the garbot honesty. There must be an investiga-tion of this. great \$30,000 corruption case. The facts should be diagged to the lime holding their hands behind them to receive bries for their votes on important measures of legislation.

The fact that so large a sum of money should have been contributed by a single house to secure the passage of the tariff of 1857 is well calculated to produce intense excitement in Congress and the country. How much other

houses contributed remains to be seen. It will not be forgotten that in the struggle on the tariff question alluded to, the interests of Pennsylvania were postponed or subordinated to promote the interests of New England. We cannot but express the hope that the parties to this scandhlous transaction may be thoroughly exposed. Had Mr. GUTHRIE's reasonable compromise on that question been carried, it would have given great satisfaction to Pennsylvania, but it seems, that the manufactarers of New England had taken care in ing for him.
