CHOICE FARM LANIDS FUN SALE.—
THE ILLINDISCENTRAL RAILROAD COMPANY is now prepared to sell about 1,500,000 across of choice Farming lands, in tracts of 40 acres and upwards, on long credits, and at low rates of interest.

These lands were granted by the Government to an in the construction of this Road, and are among the richest and most fertile in the world. They extend from North-Rast and North-West, through the middle of the State, to the extreme South, and include very variety of climate and productions found between those parallels of latitude. The Northern portion is chedly prairie, interspread with fine grores, and 'ut he middle and Bouthern sections timber predominates alternating with beautiful prairies and opening.

The climate is more healthy, mild and equable, than any other part of the sountry—the air is pure and bracing, while living streams and springs of excellent water abound.

Bituminoca Coal is extensively mined, and supplies a cheap and desirable (ue.), being furnished at many points at \$2 to \$4 per ton—and wood can be had at the same rate per sord.

Building Stone of excellent quality also abounds, which can be procured for lattle more than the expense of transportation.

The great fertility of these lands, which are a black rich mould, from two to five fast deep, and gantly roll ing; their contiguity to this road, by which every facility is turnished for travel and transportation to the principal markets North, South, East, West, and the secondary with whire they can be entirated, render them the most raulable investment that can be found; and present the most favorable opportunity for parsons of industrions habits and small means to acquire a comfortable independence in a few years.

Chicago is now the greatest grain market in the world; and the facility and economy with which the products of these lands can be transported to that market, make them much more profutable, at the prices asked 7. Ballad — 'Ane Autes MISS FANNY HERON.

BAKER, & CO'S UNRIVALLED SEWING MaCHINES still retain the confidence of the public, and
their popularity increases. After years of trial it is demonstrated beyond all question that it is the popular
Machine, and the only one upon which any reliance can
be placed to work well on all kinds of shoes. The fact
that it does one-third more work in the same time, and
does it better; that it is the least liable to get out of
repair, being simple in its construction; that it makes
the least noise, and that it is acknowledged on all hands
that it is best for a new becomer, has given the proprietors a demand for it to such an extent that they are
obliged to delay the bling of orders in many cases for
months. Over eight hundred are in operation in this
city, and the case his jet to occur where a person who
has purchased one has ackninged it for another kind.
Taking into consideration, also, the fact that thosy
who employ tron 15 to 40 hands in their shops, doing
the work for he mutuacturers, without exception, use
this machine in preference to other kind, and alwas a recommend them in preference to other it would
seem unnecessary for the proprietors to alvertuse their
excellence, or set forth their superiority.
The undersigned, SOLE AGENTS for the sale of these
Machines always have a supply, and have made such
arrangements that they sell them upon terms that will
meet the wholes of all
Unike other Machines sold in this market, it is free
from all infringements of other patents.
