of a law prohibiting the circulation within the State of notes for five dollars or less. He says: "It is estimated that the smount in circulation in the United States, in the form of bills of five dol-lars and less sums; is nearly firty million dollars. So far as the character of the circulation is re-turned in the several States, it appears that about injusteen per contum of bank circulation is in bills of less value than five dollars. The same propor-tion for the aggregate circulation would be about forty million dollars, and bills of the denomina-tion of the aggregate circulation would equal the estimate stated. "The substitution of this amount of gold and silver in small sums for use in ordinary budness transctions, instead of paper money to the same extont, would confer a lasting benefit. 'Oradually applied, first to bils less than five dollars, and in a period of three or five years, to bills of the donominations of five and the dollars, the change would not injuriously affect any inter-test. The supply of coin in the contry is abun-dantly sufficient. It is now not much less than two hundred and seventy million dollars. Instead of serving as a messure of raine merely, gold is now a staple product, and in the next decennial period the coin of this country will equal shat of England or France." They discover gold in lumps, they have mountains of glass, they possess lakes of issolved borax, and they luxuriate on vegetables of mammoth size. They are Patagonian n heart-large, expansive, and imaginative, Here is an example.

Mr. BRUNEL has built an immense steamship, originally called The Great Eastern, but latterly known as The Leviathan. A wonderful steamer, capable of carrying 10,000 persons at a pinch, and so large that it is doubted, all along our Atlantic seaboard, whether there be

any harbor which can receive and comfortably commodate her. The Leviathan, it seems. everything that a mammoth steamship ought be-with the one slight drawback that she

The vast and controlling majorities of the peo-ple of Kansas areagainst the Lecompton fraud. They have so spoken and voted. And if the South in Congress reselves to " put it through," what would they gain by this but two violent enemies in the Senate of the United States, in the persons of General J: H. LANE, and " Governor" Ronneysor, (who claims his and "Governor" RoBINSON, (who claims his title under the tainted Topeka organization,) and who are expected to be returned by the

newly-chosen free-State Legislature ? The ground offered and occupied by the honest opponents of the Lecompton Constitution, is the return of the Constitution of Kansas to the people of Kansas. Upon this commonsense basis we may all sgree. The South would lose nothing by yielding magnanimously to the suggestion. The North would be satisfied and in all probability the Democracy of Kansas would make Kansas a Democratic State hereafter.
