Those who go to Atlantic City to remain will find excellent hotels (which, we regret to see, are not advertised as they should be.) But sion House, Congress Hall, &c., &c., are nearly all well filled. Much of the success of the present season

Much of the success of the present season at Atlantic Oity is the result of the exertions of Mr. John Brodhard, president of the railroad. He is at work night and day, and takes great interest in his new vocation.

Of course, Atlantic Oity and the appurtenances are not perfect. There are many things that can be improved and added in time. The local authorities are rather illiberal and narrow in their police regulations. They certainly should not object to a train to Philadelphia, nor to ridds on the beach, on Sunday evening. Prohibit drinking, daucing, gaming, music in the evening of that day, but to punnish a ride on the beach in the cool twilight, with the delicious breeze of the ocean fanning the temples, and to hold back the iron horse with his train, only so that he may fling his cargo into the hot city the next morning, is neither humanity nor true religion. There is a wide difference between a genuine worship of the Sabbath and the enforcement of pharisal-cal and ridiculous laws.

Philadelphia is deeply interested in Atlantic City. It is the nearest watering place to her people. She should see to it with a care as sedulous as that which she exercises toward her own green squares. Her city railroads are securely more important to her welfare or her bealth. If her capitalists would improve Atlantic the West and the Sabbath and hook after the working of these botels, thousands of strangers, especially from the West and the Sabath and the propose has a stratum to the text of the steps with a day. The working of these botels, thousands of strangers, especially from the West and the Court working of these botels, thousands of strangers, especially from the West and the Sabath and the Appurtenant.

these hotels, thousands of strangers, especially from the West and the South, would make Philadelphia their favorite city. It would be nearer to this metropolis than Saratogs or Sharon is to New York; and, in a word. vould be to us what Nahant or Newport is to Boston. The argument needs no further illustration to make it irresistible.

ALE OF THE DELAWARE DIVISION. The Delaware Division of the Pennsylvania Canals, which recently came into the possession of the Sunbury and Eric Railroad Company, was sold last week to a company of capitalists, represented by Messra. E. W. CLARK & Co., for the sum of \$1,775,000. Among those interested in this purchase we inderstand are many of our most public-spicited citizons-CHAS. HENRY FISHER, A. E. Bonte, J. V. WILLIAMSON, J. G. FELL, MOSSIS. A. S. & E. ROBERTS & Co., WM. W. LONG-TRETH, and many others. These names are sufficient guarantee that the canal will be nanaged in such manner as will best serve the nterests of the Lebigh region and most ra-

pidly develop the growth of trade from thence. The State has done wisely in sanctioning this sale to the above parties, representing as they do vast interests in coal lands upon the Lehigh, and also nearly every prominent railroad or other improvement in that region. this sale, in connection with the recent disposal of the balance of the canals purchased y the Sunbury and Eric Railroad Company of the State, will enable that company to push forward rapidly their road to its final terminus t Erie. This result is confidently expected o be arrived at within two years, or within the present term of Gov. PACKER's service. f completed at or near that time, we will all have reason to congratulate our Executive that he has not only succeeded in ridding the State of the burden of (in the hands of the State) unproductive canals, but has, by their disposal to active, energetic parties, not only given a new impetus to the region through which they pass, but enabled the Sunbury and Erie Railroad Company to prosecute their great and most important work to a successful termination.

APPAIRS IN MEXICO The well-known case of the Kilkenny cats seems in a fair way of being realized in Mexico. Parties are completely at sixes and sevens, battling for power, with the country rapidly becoming demoralized, and SANTA Anna at hand, waiting to take his tiger-like spring. In the capital, where Zuloaga still has power, by virtue of the atrong hand, the British and French Ministers, making a virtue of necessity, have advised their countrymen to submit, under protest, to the decree exacting a forced loan from all foreigners in Mexico. Mr. Forerru, the American Minister, decided in his resistance to wholesale robbery by aphitrary power. What measure of sup-port, and how soon, he is to receive from Washington, will speedily be made manifest.

We do not know that the Lehigh Navigation. We do not know that the Lehigh Navigation. Company will feel that they have lost a bargain in the non-purchase of the Dolaware division. We are indeed fully satisfied that it would have been a dear purchase, as an independent work, at one million of dollars. It requires the old figures of receipts, under a system which regarded only receipts, and looked not to the exhaustion of the works for want of proper repairs, to make the Dalaware division appear profitable at the price proposed to be naid for it under the arrangement into some lates of the state of the price proposed to be naid for it under the arrangement into account. The condition of the canal reminds us of the well-known anecdate of the hackman and the deformed poet Pope, whose favorte outh was "God mend me." Using this expletive in an attending the hackman about a fere, the work the would be easier to make another." The honest icllow's cittiosism would apply equally well to the Dolaware division of the Pennsylvania canal. A third the canal, wanting large sums to put it in copair, with strong competitors in the field, and subject to the claims of any number of miliers, whose dams have been injured by the State works, and who have importuned deaf legislators in valuation to the condition of a first-class canal.

There is no question that for the sake of unity of owner-hip, and identity of interest in the management, it would have been a pleasant thing for the Lohigh Navigation Company, to have become purchasers of the Dolaware's division, on the part of the Sunday last, was not regularly brought before the Cohigh Navigation Company, to have become purchasers of the Dolaware's division, on the part of the Sunday last, was not regularly brought before the Cohigh Navigation Company, to have been a pleasant thing for the Lohigh Navigation Company, to have been and to the Lehigh Navigation Company, volume to the latter company to purchase the canals it is true, but upon conditions that it was impossible to the best information we can obtain, were one third in which the sale was placed as regarded the purchasers of the Dolaware's firm that leaving it in this position, the Sunday value the sale was placed as regarded the purchasers of the Dolaware division upon terms including the part of the firm that leaving it in this position, the Sunday value that the c

second in and determined. The records of the Eric Railroad Company have sold the Delaware division upon terms including the payment of two thirds in bonds, having twenty years to run, knowing all the time that the Lehigh Company were the most interested, and therefore likely to be willing to pay more than any other parties, it is hard to avoid the conclusion that there has been no real disposition to sell the canal to the Lehigh Company, and that the Subbury and Eric Railroad Company has been really made to safer, a spledling to prejudices or sinister influences en the part of its officers in the matter of this call.
