The author also endeavors to show that public sentiment, and a majority of residents and property-owners upon the street, are

where do they respect or recognize the Democratic principle. The Union would exclude all from the Democratic polloy, while it denounces as fac-tionials and disorganizors those who recognize the organization, and the principles of the party as we find them asserted and laid down in Illinois. Upon this theory the Democratic party could not exist to-day; and it is apparent that the Union's arti-to-lay; and it is apparent that the Union's arti-to la looks to a suptured party provious to 1830. The court might take the trouble to inform itself that the case was a proper one, and to be heard and decided on a mandamus, and whon they did so there could be no proper ground for a motion to quash the writ on account of the usual preliminary rulo baving been dispensed with. For several years past we have always dispensed with this preliminary rule, and awarded the alternative mandamus on a proper prima facie case bring shown by the petition, and we have found it very convenient. It prejudices no right of the defend-ant, and brings on the cause for hearing in a better form than by the rule to show cause. Instead of SALE OF THE DELAWARE DIVISION. The Judge entered the house shortly before 9 o'clock, and proceeded toward tho box provided for him. No sconor was bis entrance discovered than the whole audience, as if moved by one common impulse, received him by every demonstration of applause. The play, of course, stopped. The band struck up a national air, and Senator Douglas entered the obex groated by the warm, and no doubt heartfelt, plaudits of that vast assemblage. It was some moments before the ap-plause subsided. We have seen many distinguished men received in theatres, but we never saw so on received in theatres, but we unanimous and spontaneous a manifest unanimous and spontaneous a manifestation of ap proval and respect as was presented on this occa sion. It was a noble tribute of a portion of a grate ful constituency to a faithful and honored publi servant. The New York Doming Express publishes the following extract from a letter, from the agent of the Minnesota copper mine of Lake Superlor: "We are gotting a large smount of copper from the open out in the conglomerate, between Nos. 4 and 5 shafts. From shold wenty feet leng, ten to fifteen feet wide, and twenty feet deep from the surface, we hust have taken out about seventy tous, in masses and barrel work, in the last six or eight weeks, without any expense for cutils? The conglomerate at this point looks like a vast vein or quarry of copper and conglomerate, and I see no reason why it may not extend for hundreds of feet in length and depth. It lies quite flat, one mass overlying the other, and is a most important and intercaling fea-ture in the value of the mine. Should it extend to any considerable length or depth, it will add thousands of tons of copper to the mine, where we had no reason, two or three years since, to look for or expect to find any It is not probable we shall find it extend the whole length of the mine, but there are several points where this remarka-ble phenomenon coours, influenced by counter veins or cross-courses from the north. We have sloo opened some diggings of late in the east part of the mine that are showing well.
