CITY TEMS.

OUR NUBLE DELAWARE. The readers of this Our Nonth DathWard....The readers of this paper, we take for granted, have already, being pretty thoroughy "posted" upon the very population of the county. The various ratesing places, both sait and fresh, have been duly specified by ns, and in many cases graphically described by attentive correspondents. Nor have the rural charms of our mountain re orts been less faithfully depicted. What we here design, however, the rural testion to a time which even the been than a limit of the protect what we have a the rank and file of the cast get aways can in most case find time to indulge in, and which, when the mercury ranges as it did yesteriday, we can guaranties to all who will try the experiment, will form a gratifying contrast with the scalaring heat of brick and mortardom. That his view may be received with dur consideration, the writer would state that he know whereof he is about to affirm, experimentally. It was at once his privilege and pleasure to constitute one of a party of forty ladies and gentlemen who left the oity at an early hour yesterday morning for a point on the east bank of the Delaware, about eighteen miles up, known by the postic name of Edge-water. There is a cool freshness suggested in this name that is stringly in keeping with the place itself i and we may say, in passing, that for a town of country however, is to call attention to a trip, which even the the traction of the plate in the place itself; and there are few more eligible sites than this, and that if: the nucleus of the residents already there may be taken as an omen of the future, the society of the fuel on the traction of the future, the society of gress up the fixed model the may solution. But to the the index model the model traction. The solution of the society of gress up the fixed model the may solution. But to the the may solution of the many solution. The solution of the solution of the solution. The solution of the solution of the solution of the solution. The solution of the solution of the solution of the solution. The traction of the solution of the solution of the solution. The solution of the solution of the solution of the solution. The solution of the solution of the solution of the solution of the solution. The solution of the solution of the solution of the solution of the solution. The solution of the solution. The solution of the s Edgewater will itself became a feature of no ordinary attraction. But to the frip-the model trip. Our pro-gress up the river was at once pleasant, interesting, and to those unacquainted with the many splendid iments on its banks, we may say instructive -- mad so from the fact that the valuable informatio ouve-made I qualities of certain parties with which as company was honored, were made eminently practical on this occusion.

While spending the day up the river, the time was greeably occupied in sailing, lounging under massive ress on the river bank, social conversation upon the leading topics of the day-in the course of which, we leading topics of the day-in the course of which, we learned that the whole party w re staunchly anti-Le-compton-orien the ladies, to a man. The refreshments which were provided in luxuriant abundance by the female part of the excutaionists, were disposed of with a relish that does one good to think of Our party, while at Edgewater, were the guests of the Rer. A. A. Willis. At this in the wrening we were ready to return. The ride down the tiver was made in the face of a delightful breeze, and as a practical illus-tration of the thermometrical advantages of the trip, we may state that one of our prig-a theroughly main tor-of-fact individual, though evidently defective in the region of faith-made the round of thirtsen thermome ers, consuming near two hours time in the expedition before he can d be convinced that in this city the the mometer had actually marked ninety-five in the shade.

CONGRESS SPRINGS, BARATOGA, April 12, 1869.

BARATOGA, April 12, 1858. A OABD TO THE FUBLIO. During the last season an attempt was made to de-ceive the public, by persons olicring what they called "OONGRESS WATER," from Fonutains; and at the price of six cents per glass. The WHOLESALE price of the GENUINE CONGRESS WATER, at New York, being about 14 cents per glass. Lis imposition of this pretending to sell at retail, for less than cost, and with-out allowance for Freight, Cartage, and Heraksey, is apparent; but their probable course has been to empty ONE bottle of genuine Congress Water into a Foun-tain, and thereby christoning its total contents. We have NEVER sold Congress Water into Fountains nor in vessels of ANY OTHER DESCRIPTIONS THAN ordinary-ised GLASS BOTTLES. The conk of every bottle of the genuine is baaded "OONRESS WATER O. & W." and if without these words and latters, it is OUNTERPET.
