This view will be fully borne out by an examination of the commercial re-

which attempted, a few years ago, to invade the social, civil, and religious freedom of this country. I mode the first epsech ever pronounced on the Amterican Continent against that proscriptive system which proposed to strike men down on account of their birthplace or their religion. [Immones enthusiasm] Of all the acts of injus-tice ever attempted to be perpetrated, the greatest was to make the birthplace or the religions or ed a political test in the exercise of the elective franchise. [Cheers.] I hold that this Government was established by the white men of the continent—men of Buropean birth or Buropean descent then on the continent. It was established for the benefit of white men, to be administered by white men, on the white basis. Spain and France; in their colonies on the Ameri-can continent, admitted the negro and Indian to olizenship with the white man, on an equality. In the colonies from which this nation sprung, the political rights were confined to the white men, not merely to Englishmen, or Germans, or Swedes, or Swisz, but to all white more of the vorid proves that there is such a thing as superior and inferior races The experience of the world in all ages proves that the negro is intexpale of self-government in all olimes. [Cheers.] For this reason cur fathers, in making our institutions, confined the governing power to the white race, excluding no white man, but making no mixed basis, either with the Indiane or negros. WARHINGTON, Aug. 4, 1858. I have taken some pains to inquire into the proha-ble result of the extraordinary campaign in Illinois. Naturally enough, the news will come most direct to this central point; and as my information gomes from several sources, friendly and otherwise, it may be relied upon. The struggle is fierce; but there are certain reasons, apart from the enthu-siasm now existing, which lead me to the conclusion very flatteringly, and yot not very imperti- | that Douglas will only the State. First among these nently, (save for the mention of his " broken is the fact that Mr. Lincoln cannot damage his nently, (save for the mention of bis "broken nose"); that he discovered the writer to be like himself, a member of the Garrick Club-that he complained of the matter to the Club and that a majority sided with him against member of the form the

Another reason that the minority for dismissing the charge against helps Douglas is the feeling in his favor outside of Mr. YARSs. The Lecompton papers in Indiana are compelled to publish his speeches, while the leading Democratic journals in Milwaukee, St. Paul, Cleveland, Detroit, Dabuque, ardently sympathise with him. This creates an atmosphere that still further inspires the inside movement; and when to this is added the announced sympathy with him of the St. Louis Republican, Senate J S. Green, of Missouri, and thousands of Admin-

istration men in Missouri, he would seem to be hard to defeat, much less to drive out of the Democratic party. On Friday, the 30th ult., an election for alderman took place in much dislike to be satirized as Journay, the Demotrant for alderman took place in the second ward, Chicago, which ward gave Fremont over 400 majority; and the result was fremont over 400 majority; and the result was fremont over 400 majority; and the result was that Smith McClery, the Douglas candidate, was chosen by 130 majority. In order to intimidate certain gentlemen in Chicsgo, by holding over their heads the official lash, a number of names were affired to the call for a Lecompton meeting lately held in that city. The Union here should over the proceedings with infinite gusto. But the sequel was a sad damage. A large number of the emocrats, whose names were used, came out and epudiated the meeting, and endorsed Douglas. Mr. David Stuart, for some years the able Representative in Congress from Detroit, (while you were Clerk of the House.) and lately a resident o

were Clork of the Honse,) and lately a resident of Chicago, put his views down as follows: "Not one as all familiar with the politics of Il-linois can for a moment doubt that the defeat of Senator Douglas involves the election of a Repub-lican successor; and my, institucts of Democracy prompt me to beat a basty retreat from any snare which might beiray me into so fatal an inconsist-oncy and error, or subject me to the suspicion of such an 'unholy alliance."

Many others did likewise. But, what is most curious of all is, to see the feeling excited in the Southern States in favor of Douglas. Horror of the course that is being pursued against him, nontempt for the low and abandoned prosoription of a set of paid hirelings, and, in many cases cornest sympathy in his movement, have elloited a number of declarations in his behalf. The Membis Appeal, Mobile Tribune, New Orleans Delta Richmond Enquirer, Vicksburg True Southron object to the course of the Administration, and approve of most of the sentiments of the intrepid Senator. From these hints you may obtain a fair bird's eye view of the field. Really it is a grand struggie. It appeals to all our chivalric and generous feelings. It is a spectacle to be remember ed; and I am not astonished that it awakens such

intense feeling all over the country. The Washington Union is in a sad dilemm It has announced its purpose, after the English bribe is defeated in Kansas, to be about as follows:

"Bhould the Lecompton Covstitution be rejocted, they will remain as a Territory until they have a sufficient population to become a State under the English bill."

This is a hard measure to such men as Fierence Phillips, Landy, and the Joneses, and may be called the "test" upon them. If they say that they will vote for the Constitution which the people of Kansas may bring to Washington next ses-sion, without the ratio, they are outside of the party; if they do not say it, they will not even get Lecompton votes. Will the Union change about, and accept the principle, and yield to the voice of the people ? or will it keep the issue open, while averring that it is "settled ?" This is a di-

lomma indeed. The ultra Republicans of Illinois ha

Newton is the home of Martin V. Ryerson, one of the judges of the Supreme Court. He, at one time, when practising at the bar, was the idol of the Democracy of Sussex, and, in fact, holds yet a high and honorable place in the affections of the people. But years ago, he went to practice in Trenton, and for many years has withdrawn from the active strife of politics. When he was a leader of the faithful, Sussex was the banner county of New Jorcey, and used to give majorities as high as two thousand for the Democracy. Martin V. Ryerson is to the core an anti-Lecompton Democrat, and he is not without hosts of companions.
