we bear strictures introduced in these Union as

drive men from their own peculiar views, which

bod waters only serve to agitate, and to defeat the great object now so universally

clerished—the true Christian fellowship be-tween all who sincerely believe in that "name

which is above every name," as the only Saviour.

If, by grace, the semblance of a vessel has been

opened in the heart to receive the union draught,

the way to cultivate and strengthen that vessel

and to fill it, is by gentle means, and not by turn-ing the full force of the fountain upon the shallow

receptacle at once, as in such cases the vessel is most likely to retain nothing but the froth.

Inraing the full force of a hydrant into a shell would illustrate our point. Hundreds, in common

with the writer, have noticed and regretted these

occasional attempts to disseminate the spirit of

charity among the churches, in this uncharitable yay, and the religious press, as well as individuals

nterested in this noble cause, instead of fanning bese fires, should seek by every means in their

power to suppress and avoid them. We ought to thank God that the day of opaque division walls seven feet high between the different branches of

the Church is fast passing away, and that the walls themselves are being perforated, breken down, and to a great extent disregarded; but we

must not forget that to raze them entirely will require time and the exercise of patience.

LEBANON, August 11, 1858.

The Reading folks were treated to an extraordiary expose, by Jasob Hoffman, Eq., on Saturday evening, of the dinner-Congressman, the Rev. Jebu G. Jones. According to Mr. Hoffman's exit, I was surprised to see him stand in the centre of the room, shaking his head negatively, in a mysterious manner. In order to get rid of him, I shied an old silpper at him, but, knowingly winking his left eye as he did it, the rat bounded out of the way of the mirsile, and, rapidly reaching the corner of the room, vanished out of sight through a hole in the waloscot. Soon after, he returned—keeping a pretty sharp look-out for dyning slippers. When he found that I made no further that demonstrations of antinathy he heaven hald. quent intimacy with the animal, that he was laughing in his sleeve at the manner in which he ther demonstrations of antipathy, he became bolder, and, at last, jumped up on the washing stand, curiously nosing the water-jug.
