Fifteen Hours from London. We are beginning to realize the practic advantages of the Atlantic Telegraph. A Telegram from Valentia and Trinity Bay was received in Philadelphia yesterday, afternoon having been despatched from London on the previous evening. This makes the communi-cation within about fifteen hours : in a little time, when the apparatus is in efficient work-Ing order, we shall probably receive it in as nany minutes. Even as it is, we have the news some sine days earlier than it could oth-

erwise have reached us. The importance of this intelligence, we pre me, suggested to the Lendon Directors the propriety of breaking through the prohibition f sending news over the line, and , under the sea, until the whole arrangements at the American and Irish termini should have been com

Rours and lordy-signs municas. New rumors concerning yellow fever at Staten Island have become current, and it is now confidently asserted that at least a dozen cases have been known outside of quarantine. The right prohibitions of the Health Commissioners have, doubtless, done much toward con-fining the infection; but public safety seems to call fo r yet more stringent regulations. The recent death of Policeman Sarger, from injuries

inflicted by a rowdy, has caused the arrest of the assailant on a charge of muider; but as the follow has served several months on Blackwell's Island for the as-sault, it is now alleged by astute counsel that he has been pusished for the offence, and consequently a writ of kabeas corpus is and out. This is good news for the desperadore-that six months in the penitentiary

prec'udes a trial for murder. In the case of George P. Edgar, charged with false pretence swindling, as the publisher of the "Way of Life," the order of arrest has been discharged, and the easy will now. it is probable, proceed civilly.

This opening there are twonty-three cases of -yellow fore reported at Staten Island. A committee of citi-zens protest sgainst the commissioners, as guilty of systematic efforts to scatter broadcast the seeds of this therein the seed of this terrible disease. This is strong language.

only Baron GRos and Lord ELGIN were autho azed to sign a treaty-namely, that Ambassadors should be received by the Emperor, with full permission to, realds in Pekin, and that the trade of China should be opened to the com-pate in. Mr. REED is on the spot, and may be relied upon to see full justice done to us in that and every other respect.

The other item of intelligence is a brief announcement, on 'news' exactly five weeks from Bombay to London, that "the Indian mutiny was being rapidly quelled." We con-fess to some incredulity on this point, believing that the Indian mutiny is not. to be so easily put down. The guerilla warfare which provalls in the northern part of India is most hirasing to the British regular troops, who are picked off, in detail, by Sepoys and Mahomedans, who have a knack of dodging out of danger, and desort the cities and fortified places on the first intimation that the red Coats are at hand. It will be a long time, we ect, before the Indian mutiny will be wholly sut down.

Twonty years ago, when the late Lientenant WAGHORN proposed the Overland Mail, which would bring Bombay within seven weeks of London, he was ridiculed as a visionary. He lived to see the Indian news brought over in five weeks. In another year, if all things go well, Galcutta, Madras, Bombay, Alexandria Trieste, (and the whole of Europe,) will be within a few hours telegraph distance from London, which, by that time, we hope, will

be within one hour's telegraphic communication with ourselves." We wonder what marve Science will accomplish next.

The Atlantic Telegraph Company. In compliance with the request of a corres pondent, who informs us that the information will be gratifying to many of our readers, we state the following particulars relative to the capital of the Atlantic Telegraph Company, and the proportion of it supplied from this to see in sette country.

The original capital of the Company was servative on many occasions, and has won de served credit for being so, but she has no £850,000, in 850 shares each of £1,000. After the failure in laying the Cable last year, it was considered necessary to increase it to £500,-000, and the greater part of this amount has she will hereafter.

been paid in. About £50,000 has still to be advanced to make up this amount, the greater part of which balance will be expended on putting the Cable into complete working order and fitting up the necessary offices at the two termini. The organization of the Company took place in 1856. Among various concessions, here and in England, there is a grant of £14,000 per annum; from the respective Governments at Washington and London, for priority of sending and receiving communications across the Ocean.

Of the three hundred and fifty shares into which the capital is divided, eighty-eight are held on this side of the Atlantic, and two hun-dred and sixty-two belong to stockholders in the United Kingdom Mr. Graus W. Firm is understood to have invested in this speculation to the amount of £50,000, or a tenth of the entire extended capital. We can readily imagine, therefore, how much he must have been interested, in a pecuniary as well as a personal manner, in the success of the great enterprise with which his name will stand

When their railroad interest loome up they were ready and eager to strike a blow at Pennsylvania coal and iron. New York is ever on the alert to advance he welfare of her great commercial emporium; and indefatigable in her exertions to levy tribute upon the National Treasury for

The singular oircumstances of the case oreated at the time intense excitement in the neighbor-heed; a number of persons were of the opinion that he had been foully dealt with, and several of his friends went in search of him, but could learn nothing. However, on Wednesday afternoon, the anneuncement that Mr. Luyster had turned up pat an end to all excitement. According to the statements of his friends, he was found sitting on the door-steps of a house in Rocsovelt street, near the forry, with a light summer suit, instead of the black one he had on previous to his disappear-ance. His own clothes were nowhere to be found. A portunantenu, which he had with him, was missing, as was a breast-pin, two gold watches, and four hundred dollars in bank bills, do. On being taken home, Mr. Luyster's feet wore so badly blistered, that on taking off his stockings the ckin came along with them. From all ap-pearances, he muit have walked a considerable distance, and not known it, for he is unconscious of soarcely anything that cocured previous to his leaving home. His back was considerably bruised, by what means he does not know.
