people as a public park. WITHERS & PETERSON, BROKEES, No. 39 Bouth THIRD Street, (East Fide.) Promissory Notes, Drafts, Acceptances, &c., ma-turing in this or other States, promptly collected, and parties advised immediately on receipt of funds. Drafts at sight or a few days to run, cashed at mode-rate-rates. Southern, Eastern, Westorn, and Pennsylvania State Honey bought at low figures. Drafts drawn on all the principal cities in the Union. audi-Sm is work to be done. Old stone walls, the 'remains of stables, coach-houses, green-house and other out buildings, stand tottering i their wretched ruln, inviting the friendly hand of the laborer for their removal ; innunerable old fences' running in 'all direction and dividing up the grounds for the convent and analy and an an an an any constraints of the Union and the Union CHARLES E. BUCK, No. 8142; WALNUT STREET. Real Estate purchased and sold. Houses rented. Rents and Ground Rents collected., Money procured on morigaged, ground rents, dc. EFFERENCES. Norris L. Hallowell, Esq. [Mon. J. Lowis, Esq. Morris L. Hallowell, Esq.] Thos. P. Sparhawk, Esq., James Dunlap, Esq.; [Mon. J. Lowis, Esq., James Dunlap, Esq.] [Thos. P. Sparhawk, Esq., James Dunlap, Esq.] [Thos. P. Sparhawk, Esq., James Dunlap, Esq.] [Thos. P. Sparhawk, Esq., Goleb Jones, Esq. and Jim A UGUST BELLMONT, BANKER,] ence of the several occupants, are to be laid low the spot, and trees planted along these walks to afford shade to the pedestrians who will throng the park. In view of the great benefit this beautiful place of resort will be to our citizens-particularly to the million-those

will be devoted exclusively to agricultural details. Now, on these grounds of the people there crops, labor-saving machines, &c., and the whole will be ready for delivery in a few weeks. The value of all these patents is very uncertain-some will be very productive of profit, others will never again be heard of. What, then, may be asked, is the real value of a patent? Some excellent patents are never pushed, and, like an unworked farm, are unproductive. Many persons seem to imagine when they have obtained a patent their work is done, and their fortune's made. This is a great for the untrammelled tread of. the people over, instake. You may know that gold is in the their own domain. Roads and walks are to claim that you have staked out, but it can only be staked out and made from the gravel on the spot, and trees planted along these walks to afford shade to the pedestrians who will times, of labor and money. Even then they fre-quently fall to be remunerative. Others come into

general use by their own momentum. A third class. and the least meritorious of all, are very often who own no country-seats, and remain in the reity the year round—would it not be the part of wise policy to set the able-bodied men in the Almshouse to work, in clearing away the rubbish from these grounds, and so far as

HAMING'S, Suportsons from S. 1010 OH EFTNUT street after doors balow, the St. Lawrence Hotel, where our street will for the street where our street is the street where street is the street is the street where our street is the street where street is the street is the street is the street is the street where street is the street	What hotel-keeper could harbor the slight- est doubt of a guest who heralded his ap- proach with the despatch : "Propare your heat apartments; I am coming," Noble telegraph I you have been abused like paper : when will you fall into the same dis- credit? The electric wire has lost some of its solemnity in our own eyes since we saw it transmit despatches like these, exchanged be- tween an ex-clown of the Folies-Nouvellos and an ex-songstress of the opera: "The singer to the clown: 'Monster! Thou levest ne no longer!'" "The elevito the singer: 'Ingrate! I adore the?!" Was the telegraph invented for this? Is there such usgency in this sentimental corres- pondence that it could not be committed to the slower but more confidential medium of the post-office? The telegraph proved to be Sintox's most useful accomplets. To-day he is a Bavarian general, or perhaps his defpatch may bear the name of the private secretary of the poles, and to-morrow Monsieur will appear before the dazzled eyes of the hotel-keeper with his breast a very milky way of decorations.	forming their combs, to compal the production of more honey; the idea being that under any oir- oumstances the bees will work all the time. The proportion of wax to that of honey, in an ordinary hive, is very large. Hence the bees expend a great deal of toll in producing their combs, which ought to be saved them. Intelligent bee: fanciers have made repeated at- tempts to produce artificial combs, without success until now. Mr. Mchieng, of Frankenthal, has at last succeeded in casting perfect combs of wax, which are said to answer all practical purposes. A comb of ten by twolve inches weighs only an ounce and a quartor, and can be completed in less than an hour by human hands—the bees would be weeks about it. Hore is quite a new idea for American patent bee-hives and new patents are com- tinually granted on them. If vulcanised indiar uber could be substituted for wax, the comb would be as indestructible as the new dor mat, and one would closely resemble the other. It is proba- ble, however, that a bargain would first have to be made with the bees to secure their consent its use the new contrivance. 	a complete failure. The "Tailingon," is beautiful engine, could not keep up steam to make the trip between Philadelphia and Pottsville, and was transferred from the main to a lateral road. To the ingeomity of Mr. James Millholland, however, the Reading Railroad Company is indebted for a passonger coal-burning engine, the "Vera Grun," which has not only proved completely successful, but is at this time the only passenger engine in the United States burning anthracito coal with entire satisfaction. The "Yera Oris" was robuilt at the lending shops by Mr. Millholland, to use only anthracite coal, and ran the market trains during Ootober and November, 1867. In Decem- ber she was put on the Boading road as a passan- ger engine, and during that month made 23 trips. The trips she made during subsequent months were as follows: 1858. Trips. Janusry

The electric wire had lost some of its solemnity in our own eyes since we saw it transmit despatches like these, exchanged be- tween an ex-clown of the Folics-Nouvelles and an ex-songstress of the opera : "The singer to the clown: 'Monster! Thou levest me no longer!'" "The olown to the singer: 'Ingrate! I adore the first it could not be committed for the slower but more confidential medium of the post-office? The telegraph proved to be Sixon's most useful accomplies. To-day he is a Bavarian general, or perhaps his despatch may bear the mame of the private secretary of the police, and to-morrow Monsieur will appear before the dazzled eyes of the hotel-keeper with his breast a very milky way of decorations. One is lost in amazement at the number of men who hiave been duped by this adventurer. It is hard to understand how this Gil Blas of the correctional police, this Bachelor of Theft has escaped se long. But Sixon's a man of	forming their combs, to compel the production of more honey; the idea being that under any oir- oumstances the bees will work all the time. The proportion of wax to that of honey, in an ordinary hive, is very large. Hence the bees expend a great deal of toll in producing their combs, which ought to be saved them. Intelligent bee:fanciers have made repeated at- tempts to produce artificial combs, without success until now. Mr. Mchieng, of Frankenthal, has at last successed at in easting perfect combs of wrax, which are said to answer all practical purposes. A comb of tan by tredre inches weighs only an ounce and a quarter, and can be completed in less than an hour by human hands—the bees would be weeks about it. Hore is quite a new idea for American patent bee-hive men to take up and am- plify. Fortunes have been made in this country by peddling bee-hives, and new patents are con- tinually granted on them. If vulcanised indea rubber could be substituted for wax, the comb would closely-resemble the other. It is proba- ble, however, that a bargain would first have to be made with the beas to secure their consent its is the simple refined borax. The Dutch women are well known as models of closniness, at leas in destror unstance. . How row Kasu Chornes—Not with a machiné, but with simple refined borax. The Dutch women are well known as models of closniness; at leas in their own country. They get up ligen whiten and nicer than any others, and they do it by using refined borax as a washing powdér instead of coda, in the proportion of a large handful to about fen gellons of boiling water. They thu as re. one half in soap. Cambries and have the uses to even a erter quantity of the payeder. while for	a complete failure. The "Tailingon," is beautiful engine, could not keep up steam to make the trip between Philadelphia and Potsville, and was transferred from the main to a hateral road. To the ingeouity of Mr. James Milihelland, however, the Reading Railroad Company is indebted for a passenger coal-burning engine, the "Vera Crua," which has not oaly proved completely successful, but is at this time the only "passenger engine in the United States burning anthractic coal with entire satisfaction. The "Yers Orba" was robuilt at the Reading Boys by Mr. Milhelland, to use only anthracite coal, and ran the market trains during October and November, 1867. In Decem- ber she was put on the Reading road as a passen- ger engine, and during that much made 23 trips. The trips she mado during subsequent months were as follows: "28 February
