Suffice It that the persons are well known and leading financiering" men in New York city, and the place where they operated is in New York

State: It is declared that, last spring, nine "financiaring" gentlemen were incorporated as a public company, for business purposes, in a remote but well-known part of the State of New York-that the declared capital was \$500,000, and that within five weeks of such incorporation, four of the financiers in ques-tion made, an affidavit and filed a certifi-cate, with the proper county officer that the whole capital had been paid in. All this would seem to be regular and business like. But, it. is further, alleged, that the amdavit

The Admission of Kansas.

The Leavenworth Herald, a Democratic paper of Kansas, suggests that in case that

Territory should apply for admission into the Union before she has obtained the population required by the terms of the English bill, that law should be repealed : The first departure from the usual practice of demanding that new States should possess a population sufficient to entitle them to a' member of Congress was in the case of Florida, a slaveholding State. The next case was Kansas, when, the South united to admit her under the Lecompton Constitution, with a less population than ahe now possesses: " There' should, therefore, be no objection" from "any quarter now against her population may be. As the Herald remarks: "All conservative men, of whatever party, will at once see the necessity of yielding to the force of circumstances, and admitting Kansas as a State. The only test which should be made upon the occasion is upon the merits of the Constitution itself. In our action we shall be guided by this alone. In case a Constitution, liboral and republican

in its provisions, shall be presented, then we shall certainly advocate its adoption by Congross." Hon.
