Faults of the Ocean Cable. By the Arago, which left Liverpool on the 22d ult., and arrived at New York on Wednesday, we received the highly interesting report from Mr. VARLEY, an eminent electrician, which we published yesterday. We also have the reply of the Managers of the Atlantic Telegraph Company to Mr. WHITEHOUSE. The Canada, with European news to the 25th which reached Halifax yesterday, does not bring any further news respecting the Ocean

scientific, is generally intelligible. He reached Valentia on the 5th of September, and found that no words had been received from Newfoundland, through the Cable, for several days. Five days' experiments, during which the Cable was subjected to various tests, brought the following results, which we repeat here the following results, which we repeat here is the following results, which we repeat here is the following result and great magnitude at a distance of between 245 and 300 statute mits from Valentia; but the locality cannot be more soutrately, ascertained, until a portion of the cable, twenty or thirty, miles in length has been tested against my standard of resistance, and until the log has been consulted to ascertain the amount of slack paid out. I would suggest that the piece of cable at Greenwich be earfully measured and tested against my standard, in order to obtain the most correct estimate of the distance of the fault. Assuming however, that it is two hundred and seventy miles, and allowing twenty two percent for slack, it is possible that the chief deck is in shallow water—four hundred and ten fathoms.

sthoms.

2. The copper wire at the faulty place above illuded to does not touch the iron covering of the able, as is proved by its forming a voltate elecate, which gives rise to a continuous positive urrent from the copper wire, varying very little

ourrent from the collection of the wire between Valentia in the final side of the wire between Valentia and the fault, is perfect, or at least contains no defect of sufficient importance to, be perceptible, or o materially influence the working were the cable therwise perfect.

4: The copper wire is continuous, and consequently the cable has not parted. Faint signals, ir reversals, are still received from Newfoundland, but the power used will shortly eat away the exposed copper wire in the faulty place by electrolytic decomposition.

The data presented to Mr. VARLEY show: First, that if there were a fault, it was nearer the upper end, but not far from the middle erfect message was recorded by them, everythere is a fault, offering a resistance equal to a look of 1,200 miles of cable, situate at a distance of about 560 miles from one end of the 200-mile coll, on board the Agamemnon; sixth; that this cannot be the fault alluded to efore, situate about 270 miles from Valentia, ut may have been the one which caused such nd, and when the signals ceased altogether, peed and certainty increased : Tenth, that it

These statements are unfavorable to the we expect it now.
The Directors reply to Mr. Whitzhouse is ractious that, his engagement having terminated with the laying of the Cable, they discussed him, especially as his proceedings caused an almost useless expenditure of the

he cable was laid until the present it has not been possible for the currents from Newfounddesage, and it has been necessary, in consequence, to apply instead the apparatus of Pro-lessor Thouses."

They hope from having sent one of their

and other circumstances are such as to enchance of success, to raise and repair the inired part, it is not beyond probability that the existing cable might be rendered permanently

oxisting cable might be rendered permanently useful.

The whole tone of this official reply to Mr. Whrreshoves makes us fear that the Atlantic Cable is not likely soon to be in working condition. But some points are established, and to these the Directors proudly and hopefully refer. They have supplied the means for easy submarine communication between Valentia and Trinity Bay, as several important messages really passed to and fro. There must be several alterations and improvements; but that an Ocean Cable will finally be made to perform its destined duty, can scarcely be doubted by disinterested persons.

List of Patents.

Among the patents issued for the week ending

Among the patents issued for the week ending Jacob D. Cutter, of Norristown, Pa.—For improvement in fog signal machines.

Henry Meauls, of Philadelphia, Pa.—For improvement in the mode of transmitting magnetic signals on railroads,
David A. Morris, of Pittsburgh, Pa.—For improved trip-hammer, and anvil.

David A. Morris, of Pittsburgh, Pa.—For improvement in rolls for making sheet iron.

John Fritz, of Johnstown, Pa.—For improvement in rolling railway iron.

Matthlas Basser, of Reading, Pa.—For improvement in hay rakes.

Re-issues.—Wm. F. Ladd, of New York, N. Y. and Morris L. Keen, of Philadelphia, Pa., assignées of Charles Watt and Hugh Burgess, of London, England.—For improvement in hanufacture of paper from wood. Patent dated July 18, 1854. Ante-dated August 19, 1853.

J. George Lefler, of Philadelphia, Pa.—For improved wear-iron for carriages. Dated September 8, 1857.

Booth, Gardecline about this gelebrated whinkey. To those who refinding quire tonics it is highly recommended by the medcal faculty.

Inventions and Discoveries Prepared for The Press.] 🛴 ondence of The Press.

Three large volumes have just been issued from the Patent Office, being the Commissioner's Report for 1857. The statistics for the year are quite port of 1031. In state of the long continued de-ression in all branches of business, the number of patents applied for was 4,771, of which 2,915 were granted, including designs, reissues, and additional improvements. Of these, only 42 were granted to foreigners. New York received S55 patents; Massachusetts, 421, and Pennsylvanis, Dable.

314. The number for the year exceeded those is sued in 1856 by 408. No stagnation of industry. seems to check the arder of inventors. There has been a regular progressive augmentation, the in the "American mind." From the walks of science, the workshops of the mechanic, and the broad lands of the husbandman, invent and the broad lands of the destination of the restantial of the latent office, demonstrating how completely the national intellect is emancipated from the shackles of the past, and with what intense zeal it is pursuing that career of scientific and mechanical glory which is career of scientific and mechanical glory which is open before it. Though almost every field of invention has, been assiduously occupied, yet that embracing agriculture has proved most fruitful, and for some years to come is destined to be immonsely remunerative. Of the 2,910 patents granted, the large proportion of 438 were for egriqually and processes and implements. The number outined processes and implements. Are number for cotton gins and rice cleaners was very great. Most of last year's inventions were for objects decidedly utilitarian. But little attention seems to have been bestowed on articles of mere luxury.

The receipts of the office for 1857 were \$196, 132.01, and expenditures \$211,582.09. The balance in the treasury on the first of January was \$30,719 46. In reviewing the progress of the Patont Office, the Commissioner thinks that while there is so much in the past to excite our pride, there is so much in the past to active un pries, there is yet in the future oven more to atimulate our hopes. It is but reasonable to infer that we, have searcely crossed the threshold of the temple of human knowledge; and, magnificent as may. seem the trophies we have treasured up, it would

of the wisest and wealthiest of sucient monarchis, with the deelar, and gold, and fvory, and oven the great temple of Jorusalem, hallowed by the visible glory of the Deity himself, are gone; yet.86-lomon's reservoirs are as perfect as ever. Of the ancient architecture of the Holy City not one stone is upon another; but the pool of Bethsadl commands the pilgrim's reverence to the present day. The columns of Persepolis are mouldering into dust, but its deserva and aqueducts remain to challenge our sadmiration. The golden house of Nero is a mass of ruins, but the Aqua Claudia still pours into Rome its limple stream." It may be that London will share the fate of Babylon, and nothing be left to mark its slie but mounds of crumbling of the coil :: Second, that there was a fault, at holds a first second, that there was a fault, at holds to the first of the coil is Second, that there was a fault, at holds to the first of the first 40 from the other : Third, that there had as it does now; and if any work of art should been considerable leakage on that pertion of the cable on board the Agamemnon: Fourth, that the our the Agamemnon: Fourth, that the our the outlet of the cable, even imbediately after it was submerged, were so weak that relays were useless, and that not one berfeet nessage was recorded by them, every name to some enduring work of utility or benevo sing that was received being read from the lence. This is the true glory that outlives all effections of a galvanometer: Fifth, that others, and shines with undying lustre from genenuments of historical tradition, or of mere magnifi-

A lively do in the dispute. They declare that gold-beating, while the whole force engaged in Wr. White the whole force engaged in the £12, this department is one hundred and twenty five, with an annual product of \$175,000. Gold watch to superintend the laying of the Cable; that cases are produced here with a perfection that the was unable to do this, from ill health, rivals all other cities. There are sixteen manuthe was unable to do this, from ill health, leaving Professor Thomson to perform this facturers of cases, who have a capital invested of \$375,000, employ two hundred and hinety-four men, and make cases annually of the value of \$375,000, employ two hundred and hinety-four men, and make cases annually of the value of \$32,000. One of these produces a large number of the intrinsic professor. Thomson, he caused the Cable in Valentia Harbor to be where the cases annually destined in a few years to stop the importation of the foreign articles. In manufacturing these cases, one proprietor employs several of the rarest and most ingenious machines that have ever been constructed for entablish that have ever been constructed for entablish that have ever been constructed for entablish.

graving. They are the invention of a monk in Switzerland, but introduced into this country some olty. The mere engraving of a case costs from five to sixty dollars. Several firms are engaged exclusively in manufacturing gold chains, one firm alone producing chains to the value of 000 annually, and employing one hundred and twenty-five hands. There are various persons en-gaged in outling and preparing precious stones for the manufacture of rings, breastpins, &c The machinery in a single pen and penalt manufactory discort nonson. This machinery has so cheapened the cost of thimbles, that as many gold ones are now annually sold as there were silver ence disposed of a few years since, ished through the cable for a time, even in its present state, and that so soon as the weather is produced largely by Abbey & Sone turn and other circumstances. commenced business, dentistry was scarcely known as a distinct profession. They now supply not only the United States, but their foll finds a market in

Business Prospects.

and other Sistes of the Northwest will be temporarily embarrassed by the partial failure of their crops, but on the whole there is no serious scarcity of snything, and the subanced prices consequent upon short crops will in a measure make up for their deficiency.

From other and distant quarters of the country there is the same cheerful intelligence. Commerce and manufactures are reviving at the East. The jobbers of New York, Boston, and Philadelphia are deling a very fair and we are cled to see.

BY MIDNIGHT MAIL. Letter from " Occasional,"

WASHINGTON, Oct. 7, 1859. The desertion of the English bill finality by the entire body of Lecomptenite Congressmen in the North has created no little surprise and indigna-tion in the South, and already the efforts to counteract it, usual in such cases, are being made. That is to say, the manipulators of the ultra That is to say, the manupulators of the utera Southern sentiment—the men who manufacture the medicine which produces "Yeakness Int the knees"—are bushly at work preaching the dootrine that if the English bill flashity is not strictly and D.V.A.N.O.B. IN CODTON 2 that if the English bill manify is not strictly ad-hered to, the Federal Union must and shall be dis-solved! Means precisely similar were sufficient to induce Mr. Bhohanan to change front on the Kan-sas issue in 1857, and to desart Gov. Wolker, and through his influence your Lecomptonites also vio-lated their pledges and betrayed their constituents. If any of these men are sent than the congruents. If any of these men are sent that the will be more true to their professions of 1858 than they were to their pledges of 1856. The principal siquet by which they seek to justify themselves now to their constituents, is the assertion, that it was their duty to sustain the Administration in all its sols; and if this doctrine is a sound one, and not subject to it this good no is a spand one, and not subject to exception, even when the, fundamental principles of the party, as embodied in its platform, are vio-lated, your Landys, Philipses, Florences, Joneses, Dimmicks, Whitas, Relllys, Gillises, and Dewarts are in duty bonds to violate their present promisss to ignore; the presistors of the Rogmiss to the presistor of the Administrato obtain a new lease of power, for the Administrato the infallity as at any former period of the

BURNLY FOR THE PROPERTY OF THE PROPERTY O

Proceedings of Councils.

The regular stated meeting of Councils took place yesterday afternoon, at the Gennol chambers.

The following communications were sense. One oftening success and the second of the ground.
One from the Commissioner of City Property, ating that, in obedience to Councils, he had, applied the Job Ridgway as superintendent of Lemon than the contract of the second of on ningway as superintendent of Lemon Hill.

One from the Ohle! Rogineer of the Fire Department, with little bis sinual report.

One from Mr. Oreely, complaining that he has been i jured by the erection of a shed at Re- enth and Market streets, by being thropp from a wagon, in consequence of such obstruction on the 22 disk little of such obstruction on the 22 disk little streets, by being thropp from a wagon, in consequence of such obstruction on the 22 disk little of such controller, allowing that the surplus in the account of the sinking fund is 310 700.

One from the Superintendent of Girard Estates, giving desialled account of the financial affairs of the department.

One presenting the claims of a patent fire plug. The above were referred to the appropriate cor tees.

Mr. Meal submitted that following: 11 ATC ATC Mr. Meal submitted that following: 11 ATC ATC Mr. Mesolved by the Select and Common Council of the contract of the contra the city, in order to avoid all suspicion of unfair dealing in awarding the contract, he shall, in this advertisement, specify the time when eath proposals shall be present at the opening of the same, which shall be done in the presence of a quorum of the committee having supervision of the department.

Agreed 6.

A colored man named owen Stait had one side of his throat cut with a rasor in a fight, yesterday morning, at fixth and St. Mary streets. The wounded man was taken to the Pennsylvania Hospital, where he wanted

ITS ADVANTAGE.—Some time ago, it will be remembered, Dr. Jayfar petitioned Councils for per mission: to use: the Behavikuli water for purposes of protection against time—a mister in which he expirienced warm opposition. The boundity of that opposition warm opposition. The boundity of that opposition warm opposition. The popuration of the protection of the state of the protection of the state of the protection of the state of the state of the older of the state of the two condays and the boller in the beauthout of the five-storied building on the south side of Christ street, above Becond, occupied by the side of Christ street, above Becond, occupied by the side of Christ street, above Becond, occupied by the side of Christ street, above Becond, occupied the side of Christ street, above Becond, occupied the side of Christ street, and press and spread with great rapidity through the side of Christ street, and the successive street, and the successive street, and the upper windows the side of the side o was very near the fire, but suitation to damage, exc from water. The paper, for the next edition of it journal ready for use, was destroyed. The entire it to the building and the contents is covered by insuran The contents of the building were highly valual the dower part being filled with: waluable pressey, property, of, Masars, Lawlor, Eyersti, & Hingkon; while, upper portion contained the extensive printing a terials of The Priss. Had the fames extended through the latest the suited would the content of the suited that the same would probably have reached the adjoining buildings in the narrow, thorough farp, More Probable Arson - On Wednesde

the adjoining buildings in the narrow, thorough farm. Mone Probable in Arson. Our Wednesday midnight, two policemen, examined, according, to, duly; among other premises, the door of a trimming store. In Lombard street: below Brookly feet by a y. son woman named Adele Felix. They found that the door was unfastened, and, that they was a trings ment lof smoke in the store. Upon making a soarch they found that the place had been set on fire but the slames had died out in consequence of their theying been kindled in a confined place, where, there was not amficient, six, to keep up combustion. The Fire Marhal was sent for, and commerced an investigation into the easen't Partially burn's instales we're found strewed about. And there were numerous other evidences of the fire having been purposely hidded. The stock in the store was of little value, the best goods having been removed. The goods were insured for \$1,000. Migs Felix was afterwards arrested, and committed to prison to singue at the charge of aron. The store is, located in a large structure, which is known as O'Niel's Building. The goods, she states, were worth \$200, upon which she had a policy of \$1,000 in 'the Nieth' American Insurance (Company, dated April 224, 1835. She had a hearing, yobstedy mioring; before A'dermish' 'Patchel,' who thought the evidence warranted him in committing her to answer the charge of aron. The store has been seen proving about the neighborhood at a very ceity' better, before a'dermish' 'Patchel,' who thought the evidence warranted him in committing her to answer the charge of aron. She is believed to have been seen proving both the related to have fred the store for the sase look very suspland, as boxes' in the 'store' with 'the best to the 'dented the 'store' with the store of the 'store' with the best of goods. as boxes in the store were but about one third filled with good. The curtains, which are used to keep off the dash, had been arranged in such a mainer as to form a councilou around the room, and where this was not effected hadderchiefs were used. Below the bulk-window was a hole, through which any fire bould have been distinguished in the street. This was, alled with paper, among which matches had been sprinkled. A quantity of matches, old-rags, 'ce, were also found piled away under the counter. Had the fire got tha, least headway, the whole store would have been in fames in a very few minutes. O believe a collection of the store of t

least headway, the whole store would have been in flames in a very few minuten of belleview held foll that sales in a very few minuten of belleview held foll the SUPPOSED SUIGIDE.—The unfortunate man whose discovery on-board the ship Shamrock, with his threat cut, we yesterday noticed, it doing well, at the hordital. He states that on Trackly night he was mot in Water street, by two men, one of, whom saked him the time of hight. As he took out his watch one of them grasped it; and helmajangat.—The other then frew a knife and cut at him, imitiong, the wound on his throat. This story is perfectly abound, and has been manufactured to gloss over his attempt siph his dwn life. The rasor with which he cut his throat was found under his pillow towered with blood. He does not actount for this circumstance; nor delay he tell why the said, nothing about, his wound, when he, went, on, board the ship at high; fior explain his exercting himself near morning fant he hold of the wees place. Not of 1914 to 1914 to

AN ELECTION FOR TEACHERS of the evening The principal portion of those selected are not engaged as teachers in the day schools but they have passed an examination as to their dayses. The LEGIURE SEASON.—Rev. Dr. Alfred-

the defendant.

DISTRICT COURT NO. 2—Judge Sharswood.

Weyman vs. The City. An action to recover the value of services in collecting ballot boxes—before reported. Verdict for the plaintift, \$520.

Reed vs. The City. An action for the value of an iron girder. Verdict for the plaintift, \$500.

Rigabeth Murray administraty X of James. Murray, deceased, vs. The City of Philadelphia. This was an action to secure compensation to the widow of James Murray to services to the city, in revising certain as sessement books, under direction of the City Commissioner. George Hill; 3x. Commissioner, tearing d. that James Murray was employed to replae six books, and that it singaged him steadily for about three months, day and night. The question involved was, did the City. Commissioners allow more than was properly. \$300 is the amount of the largest volument of the largest
