Our new patented BOUBLE-OVEN BTOVE is the best constructed up-draft stove ever invented. It will heat a large belier of water, boil two dinner pots, broil a beefsteak, bake bread and plog and roast meat, all at the same time and with a single fire.

Invalids, and all persons who appreciate the influence of verilated apartments upon health, will be pleased with our PORTABLE GRAFES and MODEL FRANK-LIN STOVE; which are of beautiful and ornamental patterns, and give a cheerful, open fire, and thorough ventilation.

Strict écohomists will be satisfied with our SILVER'S, GAS-CONBUMING PARLOR STOVES. Many of the so-called gas-burning stoves introduce cold air to the top of the fire, the effect of which is to cool the stove and waste the fuel, precisely as if a stove door was opened above the fire In a true gas-burning stoves, the sir should be heated, in a hot-air chamber, to a temperature sufficient to ignite the gases, on the same principle as is adopted in our gas-burning cooking stoves.

QUEEN'S PORTABLE FORGE.—

Doubless many of our city readers, in passing the garge of workmen employed in laying down as the garge of workmen employed in laying down some of the passenger railroad tracks in our streets, had their attention attracted to a portable forge, with bellows and everything complete, and in efficient service. These forges, built upon the plan secured by C. V. Queen's patent are for sale at the commodious, long-established, and deservedly popular Store, Range, and Furnace-establishem of SECOND and RAGE Streets, who have the sole right for the sale of Queen's Portable Forge in Pennsylvania.

There are, we believe, five sizes of this forge, ranging in price from twenty-two to forty-four dollars—as un so small, when contrasted with its merits, as to secure its general introduction; for any one who will for a moment consider the advantages of this forge, which may be removed from place to place, so as always to be on the spot where workers in 1 non or other metals are to perform service, whether in original construction or repairs, will at ofose concede its great efficiency, and arrange for its possession and use. The adaptability of this forge to repairs to railroad sand mining machinery especially commends it to railroad companies and operators in the mining districts. We, therefore, take pleasure in calling to it the attention of road masters, amperintendouts of mines, and others.—[From the United States Railroad and Mining Register of Total Sta STOVES! STOVES!

admits the sir in a histed state to mingite with the

to pass around the oven equal to a wood fire. This improvement also preserves the centre-piece from sinking

PROFESSOR WOOD'S

ETALE RESTORATIVE.

Says the St. Louis (Me.) Democrat: Below, we publish a letter to Dr. Wood of this city, from a gentleman in Mains, which speaks glowingly of the superior merits of his hair tonic. Such evidence must have its effect, when coming from a reliable source. If certificates are guarantees of truth, the Dr. needs no encomiums, nor useless puffery from the press:

BARIN, Maine, Jan. 20, 1886.

Professor O. J. Wood & Oo. Gentlemen: Having my attention called a few months since to the highly benefic al effects of your Hair Restorative, I was induced to make application of it upon my own hair, which had become quite gray, probably one-third white; my whiskers were of same character. Some three months since I procured a bottle of your hair restorative, and used it. I soon found it was proving what I had wished. I used it about twice a week. I have since procured another bottle, of which I have used some. I can now certify to the world that the gray or white halr has totally disappeared, both on my head and face and my hair has resumed its natural color, and I believe more soft and glossy than it has been before for twenty-free years. I am now sixty years old; my good wife at the ago of fliry two, has used it with same effect.

The above notice I deem due to you roy your valuable discovery. I am assured this whoever will rightly use, as per directions, will not have occasion to contradict my statements. I am actition of this city, and a resident have over the energy of the years of the professor Wood—Dear Str: Having had the misfortune to lose the best portion of my halr, from the effects of the yellow fever, in New Orleans, in 1851, I was induced to make a trial of your preparation, and found it to answer as the very thing needed. My hair is now thick and glossy, and no words can express my obligations to you in giving to the afflicted such a treasure.

Professor Wood—Dear Str: Having made a trial of your Hair Restorative, it gives me pleasure to say, thai to englar standing, and Pastor INCORPORATED 1810—CHARTER PER

DENN INSTITUTE—Southeast corner of THIRTEENTH and FILBERT Streets, opened on MONDAY, the 6th of September.

Private instruction, though favorable to rapid progress, yet sends the schplar into the world with a keen sensitiveness, which totally disqualifies him for active life; whilst attention to many oftentimes forces the instructor to meet general difficulties rather than those personal to each individual, and the learner either loses all interest, or becomes supersidal in his acquirements. For these and other reasons the number is limited.

FOR ALL DIERARS OF THE BLOOD there is no better autidote than Hobensack's from Bitters. When the blood is impare the whole body is full of disease. Blood letting may answer for a time, but cleaning a part will not purify the whole. At the fountain we must begin, and to cleanse the blood there is no better remedy than these invaluable. Bitters. Their chief constinent is iron, and we all know its efficacy, id removing the impure matter from the whole visceral system. They are prepared by a praatical chemist, and have been pronounced, by eminent physicians and others, as the "ine plus ultra" of all tonics.

Wines and Liquors. CHESTNUT GROVE WHISKEY.—A deknowing their journous effects upon the constitution,
has induced the offering to the public of an article
which the analyzation of Professor Chilton, Analytical
Chemist, of New York, and Messra. Booth, Garrett, &
Cabase, of Philadelphia, proves, beyond all question, to
be the most pure and consequently least lajarious spirits
ever offered the American public.

I have analyzed a sample of Chestant-Grove Whiskey,
received from Mr. OHARLES WHARRON, JR. of
Philadelphia, and having carefully tested it, I am
pleased to state that it is entirely free from poisonous
or deleterious substances. It is an unusually pure and
fine flavored quality of Whiskey.

New York, Sept. 3, 1858. Analytical Chemist.

PRILADELPHIA, Sept. 9, 1858.

DEAR SIR: We have carefully tested the sample of
Chestant-Grove Whiskey which you sent us, and find
that it contains none of the poisonous substance known
as Pasic Oil, which is the characteristic and injurious
ingredient of the Whiskeys in general use.

Very respectfully.
