Strict soonomists will be satisfied with our SILVER'S GAS-CONSUMING PARLOR STOVES. Many of the so-called gas-burning stoves introduce cold air to the top of the fire, the effect of which is to cool the stove and waste the fuel, precisely as if a stoye door was opened above the fire. In a true gas-burning stove, the air should be heated, in a hot-sit chamber, to a tomperature sufficient to ignite the gases, on the same principle as is adopted in our gas-burning coking stoves.

In addition to the above, a large assortment of Parlor Cooking Stoves, Parlor Stoves, for coal or wood, Hall Stoves, Portable Heaters, Cooking Stoves, of every description, Gas Ovens, Stove Fixtures, and Repairs may be found, in every variety, at our Wavercouns, No. 200 North SEGOND Street, above Race.
