SOMETHING NEW.—GAS BURNING COOK STOVE.—I would respectfully call the attention of the public to one of the greatest improvements ever introduced in Cooking Stoves and Ranges.—the burning of the gas arising from the coal, by which means is saved 50 per cent. in fuel and also more intense heat thrown to the bottom of the oven. We effect the burning of the gases by means of a hollow centre-piece, perforated on the under side, which admits the, air in a heated state to mingle with the gases, thus siding its combustion, and causing a fiame to pass around the oven equal to a wood fire. This improvement alsa preserves the centre plece from sinking down on the fire, thereby saving the expense of repairs. One of the Stoves OAN BE BEEN IN OPERATION at 1116 MARKET. Street. Manufactured by JAMES SPEAR, inventor and Patentee, (late North, Chase & North,) 1116 MARKET Street. At a meeting of the Stockholders, convened on the 15th inst., the following persons were elected DIREO-TORS for the ensuing year, viz:
CHARLES O LATRIROP, 1422 Walnut street.
ALEX. WHILLDIN, nerchant, 18 N. Front street.
