Perhaps since Macaulay's History of England no book has been looked for with more eager expectation than this.—[Southern Literary Messagar.

With a patient industry only less remarkable than his creative power, he has produced a work which, in addition to higher qualities, is as amusing as a Waverley Novel, and as accurate as a German monograph —[Saturday Review (London.)

No labor can be compared to the literary toll, of which the marks are conspicuous on every page of these volumes. Such handling of antique musty documents, such thrashing of husks for a few grains of corr, such such thrashing of husks for a few grains of corr, such eye-destroying, soul-depressing pertiacely of research as their composition has evidently demanded of the author, aimost place the miraculous diligence of G.bbon himself at a discount. Seldom, indeed, is the inspiration of a man of genius so happily combined with the dogged faitfulnessof a drudge—[N. Y. Tribune.

It has long been eagerly auticipated, and now that it has been published it is seized upon with as much avidity as though it were a new novel by Bulwer or Dickens.

* * There is no abstement of 'the old Carlylean strength, or humor, or quaintness, with which the reading world is already so familiar, which (so many have tried in vain to imitate, and which still remains unique and impossible to all but their inventor and master.—(N. Y. Times.

The author has explored a field which has never been intelligently and thoroughly traversed by a competent historian, and the result is a historical resurrection of scenes and persons in the eighteenth century, which few readers were prepared to anticipate.—[N. Y. Evening Post.

Of the richness of Mr. Carlyle's book in firmly-drawn and vivid pictures of men and things—of its fantastic humor, and rugged manly pathos, no idea can be gathered except from its own pages ** There is one characteristic of Mr. Carlyle's which raises him above the level of all contemporary historians—a colemn sense of the mystery and wonder of human life and of the univerve in which it is placed is never absent from him. In his dealings with the "infinitely little" that makes so large a part of history, he never loses sight of the "infinitely great" that's ruggles meffectually for expression through it. It is this sense that gives to his writings their turn of quaint pathos, their tone of stern or mournful irooy, their startling and grotesque contrasts.—[National Beview (London)]

BY J. S GIBBONS.

With Thirty Illustrations, by Herrick. 1 vol. 12mo.
400 pages, cloth, \$1.60.

A book for every man of business; for the bank officer and clerk; for the bank stockholder and depositor; and especially for the merchant and his cash manager; also for the lawyer, who will here find the exact responsibilities that exist between the different officers of banks and the clerks, and between them and the dealers. All who have dealings with banks will save many times the price of this volume, by the practical instruction which it gives relative to the details of the business. They will learn how to transact their banking affairs most advantageously, and be enlightened as to the various resamps why their bils receivable are rejected by the Discount Board. Every man will see here set forth his own experience in the various conditions of the money market, and learn precisely how to act in order to maintain a good credit with his bank.

The operations of the Olearing-House are described in detail, and illustrated by a Financial Othart, which exhibits, in an interesting manner, the fluctuations of the bank loans.

The immediate and exact cause of the panic of 1867 is clearly demonstrated by the records of the Clearing-House, and a scale is presented by which the deviation of the volume of bank loans from an average stan and of affect yan be accertained at a single giance.

Messes. D. Appleron & Co:

Gentlemen: I beg leave to acknowledge the receipt of the sheets of a work about to be published by your house, entitled "The Banks of New York; their Dealers; The Clearing House, and The Panic of 1857," by J. S. Gibbons. I have read them with much interest, and take pleasure in saying that Mr. Gibbons has succeeded admirably in giving a faithful and very interesting description of the internal division of labor and of the methods of tranacting business, both inside and outside of the counters of the banks of this city.

His description of the New York Clearing-House, its daily routine of business, its books and forms, is accurate and full, and conveys a better idea of the institution than any description that has yet been published.

Respectfully yours.
